1 JUDGE PRIDGIN: All right. Good morning.  
2 We are on the record. I'm wondering if I could get  
3 whoever put that easel up where it is to move it.  
4 It's -- Commissioner Kenney's going to be joining in  
5 from St. Louis and he can't see.

6 Thank you very much.

7 MR. DEARMONT: Is that sufficient right  
8 there?

9 JUDGE PRIDGIN: I think so. Yes. Thank  
10 you. That's his line of sight. Thank you.

11 As I understand, we would be beginning  
12 with mini openings on cost of capital, proceeding on  
13 to Dr. Hadaway and then going back to wrap up  
14 Mr. Elliott's cross and redirect; is that correct?

15 MR. STEINER: That's correct.

16 JUDGE PRIDGIN: All right. Anything  
17 further from counsel before we begin this morning?  
18 All right. I guess that would be time then for mini  
19 openings on cost of capital.

20 Mr. Zobrist, when you're ready, sir.

21 MR. ZOBRIST: Thank you, Judge. May it  
22 please the Commission. I'm going to outline briefly  
23 the issues that we're going to deal with in the cost  
24 of capital portion of this. Most of my comments will  
25 be directed to the return on equity.

1           And I'm going to put a couple of graphs  
2 and charts on the ELMO. I don't have extras. I can  
3 distribute those later. I'll try to zoom in on the  
4 statistics here because the -- the -- there are --  
5 there are three expert witnesses in this case who will  
6 be presenting testimony.

7           Dr. Sam Hadaway will be the ROE witness  
8 for the company. Dr. Hadaway has appeared before the  
9 Commission in KCP&L's prior two rate cases. We will  
10 also hear from Mr. Michael Gorman who presented  
11 testimony last year on behalf of I believe the Office  
12 of the Public Counsel or perhaps it was one of the  
13 industrial groups. And then we'll also be hearing  
14 from David Murray on behalf of Staff.

15           JUDGE PRIDGIN: This is all public,  
16 correct, Mr. Zobrist? What's on the ELMO?

17           MR. ZOBRIST: Yeah. This is all public.  
18 This has all been testimony of the witnesses. And I  
19 know that the resolution is not very good here and  
20 what I will try to do is zoom in on a couple of the  
21 cost of equity estimates here.

22           All of the experts in the case present  
23 discounted cash flow studies. Staff witness Murray  
24 presents a constant growth and a multi-stage analysis.  
25 Mr. Gorman and Dr. Hadaway present both a constant

1 growth, a long-term growth which Mr. Gorman calls a  
2 sustainable growth model, and then a multi-stage  
3 model. Both Mr. Murray and Mr. Gorman do a capital  
4 asset pricing model. Dr. Hadaway does not because  
5 he -- he took a look at it and found that the rates  
6 were too low and he rejected it. Mr. Gorman and  
7 Dr. Hadaway also do a risk premium analysis.

8           And I'm going -- is it all right, Judge,  
9 if I go over here and --

10           JUDGE PRIDGIN: Yes, sir.

11           MR. ZOBRIST: Let me -- the major point I  
12 want to illustrate to the Commission is the variations  
13 in the ROE estimates. Dr. Hadaway's midpoint is 10.5.  
14 Mr. Gorman's is 9.82 for discounted cash flow.  
15 Mr. Murray doesn't actually come up with a specific  
16 discounted cash flow point, but he has a range that  
17 goes from his constant growth from 8.7 to 9.7 percent  
18 and then a multi-stage which is lower.

19           And I'm also going to contrast these with  
20 the returns on equity that have been issued by state  
21 regulatory Commissions across the country during the  
22 last year. And the most interesting point about this  
23 is that when you look at the ranges that have been  
24 issued by other Commissions which can -- and which  
25 this Commission has referred to in establishing a zone

1 of reasonableness, the only witness who is within all  
2 of the zones of reasonableness if you take 50 or 100  
3 basis points from that ROE midpoint of the state  
4 regulatory Commissions, which is 10.32 for the fourth  
5 quarter and it's also 10.32 ROE for the third quarter  
6 of 2011, Dr. Hadaway is the only one that really falls  
7 within those -- those ranges.

8           It is the opinion of the company that  
9 Dr. Hadaway, who takes a long view of the data and  
10 whose growth rates -- and growth rates will be an  
11 important issue that we will discuss throughout the  
12 day today, his growth rates are long term and they are  
13 reasonable and they project the life of the economy  
14 over the long term and not in terms of a -- a short  
15 term or snapshot.

16           And the reason this is important is  
17 because there are great differences in the growth  
18 rates used by all of the witnesses in this case, which  
19 I'd like to illustrate right now.

20           For the constant growth method, which all  
21 three of the witnesses do and which are based upon  
22 analyst's projections, Dr. Hadaway uses a growth rate  
23 of 5.69 percent. Mr. Gorman's is a little short of  
24 that, 5.41 percent. Mr. Murray's is substantially  
25 below at 4 to 5 percent.

1 Dr. Hadaway then used a long-term growth  
2 rate for both his other DCF studies. Mr. Gorman drops  
3 his down to a degree and Mr. Murray kind of goes  
4 through the floor. And these -- this is the reason  
5 why we have such great disparity between the ROE  
6 estimates in this case. It is the growth rates.

7 Now, I'd like to show you just what the  
8 authorized rates of returns have been in the United  
9 States here for the past four quarters. And a number  
10 of the witnesses I believe have talked about these.

11 The first line, which I cut off just so  
12 you could see these numbers, relates to the vertically  
13 integrated utilities which would be pertinent to both  
14 KCPL and GMO in this case. And the first quarter you  
15 can see was 10.59 percent, then it dropped down to  
16 10.18 and then it began to come back up in the third  
17 quarter of 10.32 for both the third and the fourth  
18 quarters. The bottom column is for all utilities in  
19 the United States and so that includes some utilities  
20 that don't have fully integrated operations.

21 And so if we would take the third and the  
22 fourth quarter of 10.32 percent and say that's the  
23 center of our zone of reasonableness, and the  
24 Commission has used that before, and just spread out  
25 either 50 or 100 points, what you're going to see is

1 that all -- all of Dr. Hadaway's range of ROEs, which  
2 are from 10.2 to 10.8, fall within that hypothetical  
3 zone of reasonableness.

4           Mr. Murray's 9.0 recommended ROE falls  
5 well below that. He has one only -- only I believe  
6 the top of his constant growth recommendation of 9.7  
7 is anywhere near that hypothetical zone of  
8 reasonableness.

9           Mr. Gorman is closer at 9.5, but even  
10 that is 18 points only from the bottom. If you would  
11 take 100 points below the midpoint of 10.32, you go  
12 down to 9.32. His 9.50 recommendation is only 18  
13 points from the bottom.

14           On the -- on the -- on the contrary, when  
15 you take a look at where Dr. Hadaway is, again going  
16 upward from the 10.32, if you add 100 basis points, we  
17 go to 11.32. His entire range of 10.2 to 10.8 is  
18 within that zone of reasonableness. And even his  
19 highest point with the 25 basis adder which the  
20 company is requesting, is still below the -- the top  
21 point. It's 43 points above the midpoint and actually  
22 57 points below the top.

23           Now, one of the other reasons for the  
24 wide variety is not only the difference in growth  
25 rates used by the experts, but also by what has

1 happened to the economy. Now, this is the five-year  
2 treasury bond. I think most of the experts tend to  
3 either take a look at the 30-year treasury bond, the  
4 long-term bond or more clos-- or more short-term  
5 bonds.

6 But what this illustrates in the far  
7 column is January of this year and we go through by  
8 month to December. Well, what happened is when this  
9 case was filed in June, we were basing our data on  
10 April. And April is the peak, right where I put my  
11 index finger. That was the date of when KCPL and GMO  
12 filed their cases. So for the next three months, we  
13 went into a trough.

14 So when Staff filed its report and when  
15 the other parties filed their direct examination and  
16 even their rebuttal examinations -- pardon me,  
17 rebuttal testimonies, we were going into the trough  
18 and the economy was coming down, down, down.

19 And indeed that's why Dr. Hadaway in his  
20 rebuttal testimony revised his range down -- I think  
21 the top was 11 percent and he reduced it from 10.2 to  
22 10.8 with his midpoint of 10.5. I believe it had been  
23 10.75.

24 well, what has happened since then? This  
25 is not entirely captured by the testimony in the case.

1 The economy is improving and rates are going up. And  
2 it's very important for all of the witnesses to be  
3 asked about these recent trends because what we have  
4 seen in the past two years as result of the economic  
5 recession is great -- a great degree of volatility in  
6 the markets, a great deal of volatility and spreads  
7 between the utility bonds and the treasury bonds and  
8 interest rates.

9           And what we're seeing at this point now  
10 is that there is a recovery that is building that GDP  
11 growth, gross domestic product growth, is increasing  
12 and so many of the recommendations -- particularly the  
13 low recommendations that the experts have introduced  
14 into this case -- need to be modified in light of the  
15 latest data. And Dr. Hadaway is certainly here today  
16 to address those recent trends. He does not make any  
17 change in his recommending. They are the same. But  
18 if anything, the recovery that we're seeing in the  
19 economy validates his opinions in this case.

20           There are two other issues I just want to  
21 talk about quickly. We do have a capital structure  
22 issue that I believe relates to some debt issues at  
23 GMO. Mr. Cline will be dealing with those tomorrow.

24           The other disputed issue with regard to  
25 capital structure is the value of the equity units

1 that Great Plains Energy issued in 2009. Staff argues  
2 that the cost of these equity units was higher than it  
3 should have been and that this was caused by the GMO,  
4 formerly Aquila's, stresses on GPE credit ratings.

5 Mr. Cline will testify that the cost of  
6 these equity units was not a function of the credit  
7 rating. It is really -- the actual costs should be  
8 included in the capital structure because the key  
9 variable is the issuer's dividend yield; what is  
10 necessary to compensate investors who will not receive  
11 the actual common stock for in this case three years.

12 Your Honor, that's all that I have at  
13 this time. And we will be presenting Dr. Hadaway as  
14 our first witness later this morning.

15 JUDGE PRIDGIN: Mr. Zobrist, thank you.  
16 Did other parties wish to give their mini openings on  
17 cost of capital now or later?

18 MR. WOODSMALL: Now is fine.

19 MR. DEARMONT: Now would be preferable.

20 JUDGE PRIDGIN: Dr. Dearmont or  
21 Mr. Thompson?

22 MR. DEARMONT: Is there a location that I  
23 could place the easel that would allow Commissioner  
24 Kenney to see it from St. Louis, do you know?

25 JUDGE PRIDGIN: I would think if you put

1 it near the court reporter, kind of in the -- facing  
2 towards -- because there's his camera right there.

3 MR. WOODSMALL: Do you need help, Eric?

4 MR. DEARMONT: I think I have it. Thank  
5 you.

6 MR. DEARMONT: Good?

7 MR. MILLS: Got the top two-thirds of it.

8 JUDGE PRIDGIN: Mr. Mills, thank you.

9 MR. DEARMONT: Thank you. Good morning  
10 and may it please the Commission. Staff recommends  
11 that the Commission approve an overall rate of return  
12 of 7.8 percent to 8.28 percent for KCPL and  
13 7.74 percent to 8.22 percent for GMO. These  
14 recommendations include a proposed return on equity  
15 for each entity in the range of 8.5 percent to  
16 9.5 percent.

17 The company witness, Dr. Samuel Hadaway,  
18 recommends a return on equity of approximately 10.5.  
19 And witness Michael Gorman falls in between Staff and  
20 the company in recommending an ROE of about 9.5.

21 In addition to what I will call the  
22 market-based recommendations of these witnesses,  
23 company witness Jimmy Alberts proposes a 25-basis  
24 point adder to Dr. Hadaway's recommendation in order  
25 to compensate the company for what it claims are

1 customer service and reliability achievements.

2           Although Staff counselor Meghan McClowry  
3 will be handling this issue, I can tell you that Staff  
4 believes that the Commission should firmly reject this  
5 proposal because these achievements do not paint a  
6 complete picture of KCPL's customer service and  
7 reliability performances.

8           COMMISSIONER KENNEY: Can you guys hear  
9 me over there?

10           JUDGE PRIDGIN: Yes, sir, we can.

11           COMMISSIONER KENNEY: I think your  
12 microphone might be on mute. I can't hear you guys.

13           JUDGE PRIDGIN: Mr. Dearmont, is your  
14 microphone on?

15           MR. DEARMONT: I don't know if I have a  
16 mute option. Is that better, Commissioner?

17           COMMISSIONER KENNEY: I can see you but I  
18 can't hear you.

19           JUDGE PRIDGIN: Mr. Dearmont --  
20 Commissioner Kenney can you hear me, sir?

21           CHAIRMAN CLAYTON: No, he can't hear any  
22 of us. Are we muted?

23           MR. DEARMONT: Commissioner Kenney, can  
24 you hear me now?

25           JUDGE PRIDGIN: You'll just have to

1 continue. I'll let Daniel know.

2 MR. DEARMONT: Okay. Apologize. This  
3 25 basis point adder would amount to roughly  
4 \$7 million above and beyond whatever the Commission  
5 decides to be KCPL's and GMO's costs of equity. This  
6 adder is not compensation for services rendered. It's  
7 essentially a gift.

8 Staff recommends that the Commission deny  
9 this request for several reasons. Most importantly,  
10 because KCPL and GMO's customer service -- excuse me,  
11 customers already pay for every aspect, every  
12 component used to deliver customer service and  
13 reliability to those customers. Customers pay for the  
14 control processes, the systems, the practices,  
15 procedures -- the procedures, the maintenance, the  
16 plant, the training, the education, everything else  
17 that goes into providing them with safe and reliable  
18 service.

19 The bottom line is that KCPL and GMO are  
20 asking the Commission to require customers to pay more  
21 in rates for customer service than it costs to provide  
22 them that service. Staff believes that this is  
23 inappropriate --

24 CHAIRMAN CLAYTON: I'm just playing with  
25 this.

1 MR. DEARMONT: No, go ahead.

2 CHAIRMAN CLAYTON: Did you figure it out?

3 MR. MILLS: Apparently not because he  
4 hasn't made any sign that he can hear us.

5 CHAIRMAN CLAYTON: Keep going.

6 MR. DEARMONT: These cases also involve a  
7 dispute regarding the appropriate cost of a unique  
8 type of capital called an equity unit. An equity unit  
9 is sort of a debt/equity hybrid that's reported as  
10 debt on a utility's balance sheet because it  
11 represents an interest in an identifiable subordinated  
12 debt. However, whenever the purchaser acquires an  
13 equity unit, the purchaser enters into a contract  
14 requiring them to purchase common stock at a point in  
15 the future at a pre-determined price. In this  
16 respect, the equity unit converts to equity at a point  
17 in the future.

18 These equity units represent an interest  
19 in debt previously issued by GPE. And while the cost  
20 to issue these units is readily determinable because  
21 it's embedded like with debt, the problem here is that  
22 GPE had to issue these equity units at a cost higher  
23 than it would have had it not acui-- acquired the  
24 Aquila debt.

25 Staff adjusted the cost of these equity

1 units in attempt to remove the influence of what we  
2 believe is this Aquila debt anchor. As contained in  
3 the reconciliation filed in this case, the issues  
4 involving rate of the return and capital structure are  
5 worth approximately \$29 million.

6           And now that the introduction is out of  
7 the way, I have to tell you that I've had the  
8 opportunity to work on rate or return in the last few  
9 large cases that we've had. And it seems to me that  
10 while this can be one of the most complex issues in a  
11 rate case, that at least in my opinion it doesn't have  
12 to be one of the most complex issues.

13           In looking at the testimony, if we stick  
14 to the bigger picture, the 30,000-foot view of this  
15 picture, there are a few things that jump out to me.  
16 One, the United States is emerging from a severe  
17 recession. As a result, the projected economic growth  
18 is expected to be rather low for the next few years.  
19 Two, the fed's fund rate, which affects short-term  
20 debt cost is at an all-time low. Three, recent  
21 utility bond yields on investment grade debt have  
22 dropped to levels not experienced in the last  
23 40 years.

24           No offense to any of the experts in this  
25 case, but in reading the testimony, I get lost in the

1 CAPMs and risk premiums and the dividend yields and  
2 geometric versus arithmetic means and everything else  
3 that goes into this rate of return rate-making suit.  
4 So I have a suggestion. And I agree with counselor  
5 for the company, Mr. Zobrist, that we really need to  
6 focus our attention on just what matters in this case.

7           And it's my opinion that there is only  
8 one thing that matters in this case and that one thing  
9 can even be boiled down to one letter. That letter is  
10 G. Growth rate. Everyone knows the formula for the  
11 constant growth single stage DCF. Right? Cost of  
12 capital equals dividend expected over the next  
13 12 months, current price of the stock, plus G, growth  
14 rate. This case is all about G. All about G. That's  
15 the only thing that the Commission should focus on  
16 because that's the only thing that makes a difference  
17 in the recommendations of all the witnesses.

18           In the case of the single stage constant  
19 growth, DCF Staff uses a G, a growth rate, of about  
20 4 to 5 percent. Company, on the other hand, uses a  
21 growth rate of 6 percent. Now, in both cases the  
22 parties claim that these growth rates either represent  
23 or at least correspond with expected growth in GDP.

24           As a result, as was on the previous  
25 display, staff's constant growth yielded a result of

1 8.7 to 9.7 percent. Dr. Hadaway's version of this  
2 model produced a result that's approximately  
3 11 point -- 11.0.

4 Now, Staff also relied heavily and mostly  
5 on a multi-stage DCF, which is a slight variation of  
6 the constant growth. Staff's multi-stage uses three  
7 stages. First stage, years one through five; second  
8 stage, six through ten; third stage, 11 to I believe  
9 year 200.

10 Now, in this model for the first stage,  
11 Staff uses EPS projections. Okay? Now, these are  
12 projections made by equity analysts in the real  
13 market. And those projections are appropriate for  
14 this stage and only this stage because they are made  
15 for the express purpose of representing investor  
16 expectations for five years and only five years.

17 Stage two is confusing so I'm going to  
18 skip that stage. It's the transition stage, the  
19 linear transition. It's the math stage. Mr. Murray  
20 would be happy to discuss that with you in more  
21 detail.

22 But stage three is really what's  
23 important because that's the G stage. That is the  
24 G stage of the multi-stage DCF. In the multi-stage,  
25 Staff uses a G here of 3 to 4 percent. Dr. Hadaway

1 again uses an implied perpetual growth rate of  
2 approximately 6 percent.

3           Now, in reaching these -- these -- these  
4 G growth rates, these final terminal stage growth  
5 rates, staff looked at a number -- a number of  
6 factors. I'd like to share and discuss those factors  
7 with you. First of all, staff looked at expected  
8 long-term growth in electricity demand, plus  
9 inflation.

10           Now, in the spirit of full disclosure,  
11 the Commission examined this in the recent UE case and  
12 did not accept this reason. However, staff also  
13 examined a rule of thumb which generally states that  
14 in order to get a rough estimate of the current costs  
15 of equity, you can add 3 to 4 percent to the cost of  
16 the company's long-term debt. Using this rule of  
17 thumb results in an ROE in the range of 8.14 percent  
18 to 9.71 percent.

19           staff also looked at the perpetual growth  
20 rates generally assumed by Goldman Sachs when  
21 performing DCF analysis of regulated electric  
22 companies. Staff also looked at the implied perpetual  
23 growth rates used by financial advisors hired by  
24 Aquila to provide fairness opinions on a price to pay  
25 for the GMO properties, and included by these advisors

1 in publicly filed documents filed with the Securities  
2 Exchange Commission, the SEC.

3           Sagent Advisors use an implied perpetual  
4 growth rate of 1.79 percent. Credit Suisse, another  
5 firm hired by GMO and KCP&L to perform this analysis  
6 used an implied perpetual growth rate of 1.0 percent  
7 to 1.7 percent. Staff also found information provided  
8 by Goldman Sachs when hired by GPE as a joint book  
9 running manager in conjunction with the 2009 issuance  
10 of those equity units we talked about.

11           Finally, GDP. A lot of this discussion  
12 in this case involves -- involves GDP. Staff doesn't  
13 particularly care for the use of GDP in and of itself,  
14 but the Commission did express a preference for this  
15 growth proxy in the recent case of AmerenUE. If the  
16 Commission does want to use GDP, Staff strongly urges  
17 you to use a reliable and independent measure of  
18 long-term GDP growth.

19           One such measure is provided by the  
20 Congressional Budget Office, which we refer to as CBO.  
21 CBO currently estimates long-term GDP growth to be  
22 about 4.5 percent. Now, remember where we are.  
23 4.5 percent falls right in between Staff's estimate  
24 and the company's G estimate, the important measure of  
25 this case. Although GPE itself uses this discount

1 rate in the non-rate context and in doing so describes  
2 CBO data as, quote, one of the best published views of  
3 go forward growth and inflation. Dr. Hadaway, on the  
4 other hand, uses a self-calculated measure of GDP  
5 equaling 6 percent.

6           If you listen to nothing else I say  
7 today, I ask you to focus on three things. One, focus  
8 on G in this case. That's what makes the biggest  
9 difference. Two, review the report given by Goldman  
10 Sachs to GPE's board of directors attached to  
11 Mr. Murray's surrebuttal testimony as Schedule 6.  
12 Three, if you're going to use GDP, choose a reliable  
13 independent estimate. Even if we split the baby, even  
14 if we use CBO and go right in between the  
15 recommendations of Dr. Hadaway and Mr. Murray, we  
16 still land in the range of 9.5 to the upper 9's in  
17 this case.

18           So I have no further questions -- or  
19 statements. If you have any questions for me, I'd be  
20 happy to attempt to address those.

21           JUDGE PRIDGIN: Mr. Chairman?

22           CHAIRMAN CLAYTON: I don't have any  
23 questions. I just wanted to congratulate you on  
24 making it through your opening statement with our  
25 technical difficulties, the door opening and shutting

1 and then me jumping out from behind the curtain and  
2 causing some alarm.

3 MR. DEARMONT: That's all right. What  
4 are you going to do?

5 CHAIRMAN CLAYTON: You went unflustered  
6 and great job.

7 JUDGE PRIDGIN: Mr. Dearmont, thank you.

8 MR. DEARMONT: Thank you.

9 JUDGE PRIDGIN: Mr. Mills?

10 MR. MILLS: No. Not at this point.

11 JUDGE PRIDGIN: I'm sorry.

12 Mr. Woodsmall?

13 MR. WOODSMALL: Good morning. I sit back  
14 and listen to the company's opening statement and  
15 their request for a 10.75 percent return on equity and  
16 I think to myself, where has this company been?  
17 Clearly this company has not been reading your recent  
18 ROE rec-- or decisions.

19 For instance, last year in the MGE case,  
20 you granted MGE a return on equity of 10.1 percent.  
21 Then last May you also granted AmerenUE a return of  
22 10.1 percent. In that UE case, the Commission found  
23 that testimony of Michael Gorman to be persuasive.  
24 The Commission's order repeatedly relied upon  
25 Mr. Gorman's logic in tearing apart the deficiencies

1 of the company's recommendation.

2           As mentioned, consistent with the  
3 recommendation of Mr. Gorman, the Commission  
4 authorized AmerenUE a return of 10.1 percent.  
5 Mr. Gorman is again appearing today on behalf of the  
6 industrials in this case. Given the changes in the  
7 economy that we've seen recently in the last year,  
8 Mr. Gorman is now recommending a slightly lower return  
9 on equity of 9.65 percent for KCP&L.

10           As Mr. Gorman documents, not only is this  
11 a return that's reasonable for KCP&L, it also allows  
12 them to meet all the credit metrics necessary to  
13 maintain their current investment grade credit rating.  
14 He actually goes through all the credit metrics with  
15 his projected 9.65 percent ROE and he shows that they  
16 will maintain their current investment grade credit  
17 rating.

18           Now, Mr. Zobrist put up a chart and he  
19 mentioned the recent slight increase in bond yields  
20 and how it should affect the ROE recommendation. In  
21 fact, that was a great segue because I was going to  
22 tell you how it affects Mr. Gorman's recommendation.

23           Mr. Gorman has considered this change.  
24 Mr. Gorman will tell you that in his direct testimony,  
25 he -- he originally recommended a return on equity of

1 9.65 percent. Then we were still at the trough that  
2 he -- that Mr. Zobrist showed. He updated his study  
3 in the -- in the context of the GMO case and it went  
4 down to 9.5 percent and that's what Mr. Zobrist  
5 discussed, 9.5 percent.

6           However, there's been a recent tick up in  
7 bond yields. And Mr. Gorman will tell you when he  
8 takes the stand, that because of that, he is back to  
9 his 9.65 percent. So Mr. Gorman is using most recent  
10 information and he is still at 9.65. And that  
11 considers the increased bond yields that we've seen  
12 lately.

13           Much has changed since the Commission  
14 issued its decision last May in the AmerenUE case.  
15 First of all, numerous surrounding jurisdictions have  
16 issued return on equity decisions for other similar  
17 electric utilities. For instance, just last month the  
18 Iowa Utilities Board granted Interstate Power and  
19 Light a 10.0 percent return on equity. In addition,  
20 the Kansas Corporation Commission in its decision last  
21 month granted KCP&L a return on equity of  
22 10.0 percent.

23           You may be telling yourself then given  
24 what you gave AmerenUE and what the Iowa and Kansas  
25 Commissions have done, that a 10.0 percent return on

1 equity is appropriate. Such logic would be wrong.  
2 while bond yields have increased slightly in the last  
3 couple months, Mr. Gorman will tell you that since the  
4 time of the studies utilized in the AmerenUE and other  
5 recent decisions, utility bond yields are still down.

6           How does this affect the return on equity  
7 calculation? It is basic finance that there is a  
8 greater risk associated with equity than debt.  
9 Because debt is paid before dividends and because debt  
10 has a higher priority in a bankruptcy proceeding,  
11 equity holders require a premium to the return spelled  
12 out for debt holders. This is the basis of the risk  
13 premium model. Therefore, if the return on utility  
14 bonds decreases, the return for utility equity  
15 holders, the return on equity also decreases.

16           Since the time of the AmerenUE decision,  
17 utility bond yields are down 25 basis points.  
18 Therefore, all else being equal, a return on equity  
19 that was once 10.1 percent now becomes  
20 9.85 percent.

21           Looking quickly at KCP&L's requested  
22 return on equity, KCP&L presents the testimony of  
23 Mr. Hadaway. In his testimony, Mr. Hadaway relies  
24 largely on various DCF analysis. As was pointed out  
25 at page 9 of Mr. Gorman's rebuttal testimony, the

1 specific methodology used by Mr. Hadaway has been  
2 routinely rejected by numerous state utility  
3 commissions. That's page 9 of Mr. Gorman's rebuttal.

4           In his constant growth DCF methodology,  
5 Mr. Hadaway postulates that utilities will grow at one  
6 rate over the short term, but then will grow at  
7 another rate in the long term. In theory, this seems  
8 logical. In his analysis, however, Mr. Hadaway  
9 asserts that utilities will grow at a long-term rate  
10 of 6.0 percent. This is his claimed growth of the  
11 gross domestic product.

12           Now, as Mr. Zobrist and Mr. Dearmont  
13 mentioned, growth rates are the key to the differences  
14 in the DCF calculation. The problem with this  
15 analysis is that Mr. Hadaway's claimed GDP growth rate  
16 is well in excess of any rate recognized by any  
17 economist -- by any other recognized economist GDP  
18 growth rate. As the record indicates, Mr. Hadaway's  
19 GDP growth rate is self-created. It is not published  
20 for use by anyone investing in the market. It is not  
21 relied upon by any market participants. It is simply  
22 his recommendation.

23           In -- in the recent AmerenUE decision,  
24 the Commission considered this type of problem. The  
25 Commission criticized Staff's witness for utilizing

1 the return on equity calculations maintained by the  
2 Missouri State Employees Retirement System. As the  
3 Commission held there, quote, Murray's reliance on  
4 analyst reports to support his recommendation is  
5 misplaced. Most investors do not have access to the  
6 specific analyst reports that Murray examined and,  
7 thus, they cannot rely on them in deciding where to  
8 invest their money, unquote. So the Commission  
9 criticized him for using data that's unavailable to  
10 actual market investors.

11           Certainly the same logic is applicable to  
12 Mr. Hadaway's analysis. Investors do not have access  
13 to Mr. Hadaway's self-created GDP growth rates. As  
14 such, they cannot actually be relied upon by any  
15 entities when they invest their money. Just as the  
16 Commission did in the AmerenUE case, it should  
17 summarily reject Mr. Hadaway's analysis. There are  
18 many other things wrong with Mr. Hadaway's analysis.  
19 Again, I invite you to discuss these flaws with  
20 Mr. Gorman.

21           As Mr. Coffman mentioned in his opening  
22 statement last week, regulatory commissions are quick  
23 to raise equity returns in response to changing  
24 economic conditions. In fact, such a scenario was  
25 obviously the basis for this Commission granting KCPL

1 the highest return on equity in the nation when it  
2 granted a return of 11.25 percent in 2006. Ratepayers  
3 are still suffering. Ratepayers are suffering from  
4 this decision in the form of increased AFUDC and the  
5 cost of Iatan 2. When economic conditions change,  
6 however, regulatory commissions appear hesitant to  
7 make the necessary adjustments.

8 All of this is my way of asking you not  
9 to be hindered by the notion of a single-digit return  
10 on equity. Recently other commissions have broken the  
11 double digit barrier. For instance, the Maryland and  
12 Idaho Commissions recently granted returns of 9.86 and  
13 9.90 percent. I believe that you will once again find  
14 that Mr. Gorman's testimony is persuasive. Based on  
15 that testimony, you will then grant a return on equity  
16 of 9.65 percent. Thank you.

17 JUDGE PRIDGIN: Mr. Woodsmall, thank you.  
18 Are we ready for Dr. Hadaway? Before he takes the  
19 stand, could I trouble whoever -- if somebody could  
20 rotate that table back just so it's pointed. Give me  
21 just a moment. I want to be sure Commissioner Kenney  
22 can see the witness stand. That would be great.  
23 Thank you very much.

24 CHAIRMAN CLAYTON: Commissioner Kenney  
25 can hear us now.

1 JUDGE PRIDGIN: Commissioner Kenney, you  
2 can hear us, sir; is that correct?

3 COMMISSIONER KENNEY: Every word. Sorry  
4 for -- sorry for my interruption earlier.

5 JUDGE PRIDGIN: Very good. Thank you,  
6 sir. Not a problem.

7 All right. Dr. Hadaway, if you'll come  
8 forward to be sworn, please, sir. If you'll raise  
9 your right hand to be sworn, please, sir.

10 (Witness sworn.)

11 JUDGE PRIDGIN: Thank you very much, sir.  
12 Please have a seat. Mr. Zobrist, when you're ready,  
13 sir.

14 MR. ZOBRIST: Thank you, Judge.

15 (KCP&L Exhibit Nos. 27-NP, 27-HC, 28 and  
16 29 were marked for identification.)

17 (GMO Exhibit Nos. 15-NP, 15-HC, 16 and 17  
18 were marked for identification.)

19 SAMUEL HADAWAY, having been sworn, testified as  
20 follows:

21 DIRECT EXAMINATION BY MR. ZOBRIST:

22 Q. Please state your name.

23 A. Samuel C. Hadaway.

24 Q. And by whom are you employed,  
25 Dr. Hadaway?

1 A. By FINANCO, Inc.

2 Q. And did you cause to be prepared in both  
3 the Kansas City Power and Light Company ER 2010-0355  
4 and the KCPL Greater Missouri Operations company case  
5 ER-2010-0356 testimony?

6 A. Yes, I did.

7 Q. And let me go through this since we have  
8 three sets of testimony in both cases. Do you have  
9 before you both non-proprietary and highly  
10 confidential versions of your direct testimony in the  
11 KCPL case?

12 A. I have reviewed those. I only have I  
13 believe just my copies of them here.

14 Q. All right. All right. And did you  
15 prepare rebuttal in the KCP&L rate case?

16 A. Yes.

17 Q. And did you prepare surrebuttal in the  
18 KCP&L rate case?

19 A. Yes.

20 Q. And those rebuttal and surrebuttals  
21 testimonies were not highly confidential; is that  
22 correct?

23 A. That is correct.

24 MR. ZOBRIST: Okay. And, Judge, I have  
25 those pre-marked as Exhibits 27, 28 and 29 in the

1 KCP&L case and I would offer them at this time or at  
2 least at the conclusion of the witness's testimony

3 JUDGE PRIDGIN: Let me see -- if they're  
4 being offered, let me see if there's any objection at  
5 this time? Hearing none KCP&L 27-NP and HC, KCPL 28,  
6 KCPL 29 are admitted.

7 (KCP&L Exhibit Nos. 27-NP, 27-HC, 28 and  
8 29 were received into evidence.)

9 BY MR. ZOBRIST:

10 Q. Dr. Hadaway, in the GMO case, did you  
11 also prepare highly confidential and non-proprietary  
12 versions of direct testimony?

13 A. Yes, sir, I did.

14 Q. And did you prepare public versions of  
15 the rebuttal and surrebuttal testimony in the GMO  
16 case?

17 A. Yes, sir.

18 Q. And there was no highly confidential  
19 rebuttal and surrebuttal in the GMO case?

20 A. No.

21 MR. ZOBRIST: Judge, they been pre-marked  
22 as Exhibits GMO 15, 16 and 17 and I offer them at this  
23 time.

24 JUDGE PRIDGIN: Any objection? GMO 15,  
25 16 and 17 -- these are all public, Mr. Zobrist?

1 MR. ZOBRIST: The direct has HC and NP.

2 JUDGE PRIDGIN: Excuse me. NP and HC on  
3 15. They're all admitted.

4 (GMO Exhibit Nos. 15-NP, 15-HC, 16 and 17  
5 were received into evidence.)

6 BY MR. ZOBRIST:

7 Q. I should have asked you are there any  
8 corrections to any of the testimony at this point?

9 A. No, sir.

10 MR. ZOBRIST: Okay. Your Honor, I tender  
11 the witness for cross-examination.

12 JUDGE PRIDGIN: Mr. Zobrist, thank you.  
13 Mr. Woodsmall?

14 MR. WOODSMALL: Yes. Just one question.

15 CROSS-EXAMINATION BY MR. WOODSMALL:

16 Q. Good morning. In your -- you performed  
17 three different DCF analyses; is that correct?

18 A. Yes, sir.

19 Q. And in two of those you use a GDP growth  
20 rate; is that correct?

21 A. Yes.

22 Q. And that growth rate was created by you;  
23 is that correct?

24 A. It's an estimate that I did, yes.

25 Q. Okay. Is that published anywhere, your

1 GDP growth rate?

2 A. Only in my testimony.

3 MR. WOODSMALL: Okay. No further  
4 questions. Thank you.

5 JUDGE PRIDGIN: Thank you. Mr. Mills?

6 MR. MILLS: No questions.

7 JUDGE PRIDGIN: Mr. Dearmont, when you're  
8 ready, sir.

9 MR. DEARMONT: I have a few questions.  
10 Thank you.

11 CROSS-EXAMINATION BY MR. DEARMONT:

12 Q. Morning, Dr. Hadaway. How are you?

13 A. Good morning, Mr. Dearmont. I'm fine.

14 Thank you.

15 Q. Good. would you agree that it's unusual  
16 for a regulated utility to issue equity units or other  
17 types of convertible debt?

18 A. They certainly do it over time. Certain  
19 ones of them have.

20 Q. Frequently?

21 A. No.

22 Q. And you recommend the unadjusted embedded  
23 cost of those equity units. Correct?

24 A. Mr. Cline will respond to questions about  
25 those if we might.

1 Q. But you, yourself, make no adjustment to  
2 those?

3 A. No.

4 Q. What is GPE's unsecured credit rating?

5 A. It's unsecured rating is triple B.

6 Q. And that's S&P?

7 A. Yes.

8 Q. What about KCPL's?

9 A. I believe it's the same.

10 Q. You were deposed by Staff in a 2005 case  
11 involving Aquila, Incorporated. Correct?

12 A. I don't remember a deposition. Perhaps  
13 there was one. I may have forgotten.

14 MR. DEARMONT: Okay. May I approach the  
15 witness?

16 JUDGE PRIDGIN: You may.

17 BY MR. DEARMONT:

18 Q. Here you are, sir.

19 A. Thank you.

20 Q. Okay. You were deposed by Staff in a  
21 2005 case involving Aquila, Incorporated?

22 A. It appears that I was, yes.

23 Q. Okay. Investors' required rates of  
24 return on common equity are correlated with the level  
25 of interest rates?

1 A. Yes.

2 Q. So generally when interest rates go up,  
3 it's clear that the cost of equity moves up some?

4 A. About half the amount of the change in  
5 interest rates in our state.

6 Q. So when cost -- excuse me. When interest  
7 rates go down, the cost of equity also moves down?

8 A. About half as much, yes.

9 Q. Thank you. Now, do you believe that  
10 allowing a utility the opportunity to earn its cost of  
11 common equity balances the interests of the ratepayers  
12 and the investors?

13 A. All other things equal, yes.

14 Q. Understood. And you think it's important  
15 to set ROEs as correctly as possible; in other words,  
16 not too high, not too low?

17 A. That's what we try to do.

18 Q. In estimating a utility's cost of common  
19 equity, you think that the judgment of the financial  
20 analyst is as important by the -- as the results  
21 produced by -- by any of these models?

22 A. I think it depends on which analyst's  
23 estimate you're talking about.

24 Q. But in general, generically judgment is  
25 important?

1           A.     well, the five-year earnings forecast  
2 that analysts do are the most widely followed data  
3 with respect to stock values.

4           Q.     Sure. And I'm not even talking about  
5 those analysts. I mean yourself, for example. I  
6 mean, do you value your judgment?

7           A.     Yes.

8           Q.     And other experts value their judgment?

9           A.     I suppose so, yes.

10          Q.     So to the extent that we're all experts  
11 or that we have experts involved in these cases, the  
12 judgment of those experts is an important factor?

13          A.     well, we all present our best efforts.

14          Q.     Sure. At least to them? At least to  
15 them?

16          A.     Yes.

17          Q.     Okay. And you agree that if an allowed  
18 return on equity is based on a utility's cost of  
19 common equity, then this will assist the utility in  
20 raising capital and maintaining its financial  
21 integrity?

22          A.     Again, all things equal, that's the case.  
23 It depends on the circumstances obviously.

24          Q.     Understood. Now, you also testified in  
25 the recent KCPL case in the state of Kansas, didn't

1 you?

2 A. Yes.

3 Q. And in that case the most significant  
4 area of disagreement between yourself and the KCC  
5 witness was regarding the approximate growth rate to  
6 apply in a DCF model?

7 A. That was important. And also their  
8 reliance on the capital asset pricing model. Those  
9 two things.

10 Q. Okay. Now, the perpetual growth rate in  
11 the DCF, that's G. That's what I keep referring to as  
12 G. Right?

13 A. Yes.

14 Q. Now, that dispute involving -- involving  
15 G, that dispute carries over to this case, does it  
16 not?

17 A. It's typically the focal point of ROE  
18 debates.

19 Q. So between yourself and Mr. Murray and  
20 Mr. Gorman, that's a significant area of disagreement?

21 A. Yes.

22 Q. In one of your Kansas DCF models, you  
23 used a constant growth rate of about 6 percent.  
24 Correct?

25 A. Exactly 6 percent.

1 Q. And you deemed that as -- you term that  
2 as the long-term GDP growth expectation?

3 A. Yes. It's exactly the same as the one in  
4 this case.

5 Q. That was my next question. Thank you.  
6 And you calculated that growth rate?

7 A. Yes.

8 Q. The Kansas version of OPC is called the  
9 Citizens Utility Ratepayers Board, CURB. Right?

10 A. I believe so.

11 Q. And in the Kansas case, CURB sponsored a  
12 witness by the name of Mrs. Crane?

13 A. I believe that's right, yes.

14 Q. And Ms. Crane used government estimates  
15 of long-term GDP growth as an estimate of G, long-term  
16 growth?

17 A. Are you asking me if that's the case?

18 Q. Yes, sir.

19 A. I don't recall, but I -- she probably  
20 did.

21 Q. Okay. Now, to the best of your  
22 knowledge, did she use information used by CBO,  
23 Congressional Budget Office?

24 A. As I say, I don't remember, but that's  
25 typically what -- what --

1 Q. Are you familiar --

2 A. -- one of the factors that would be used.

3 Q. I apologize for interrupting you. Are  
4 you familiar with CBO's current estimates?

5 A. Yes.

6 Q. Okay. would you agree that they're about  
7 4.5 percent?

8 A. No. They came out yesterday or the day  
9 before and they're higher than that now.

10 Q. How much?

11 A. Their real growth without inflation is  
12 now over 3 percent and their inflation rate is about  
13 2 percent depending on the time period, I believe. So  
14 their forecast now is over 5 percent.

15 Q. And you say that these new CBO  
16 projections came out -- was it just yesterday?

17 A. I'm not sure. Just in -- in -- very  
18 recently.

19 Q. Very recently. And do you know how far  
20 in the future CBO generally predicts growth?

21 A. I actually looked at the document that  
22 you have in your hand this morning. I think they go  
23 out to 2016, but I don't have it here in front of me.

24 Q. How about '21 -- 2021?

25 A. Perhaps.

1 Q. Okay. And they give forecasts that look  
2 to be shorter term forecasts and they also give  
3 forecasts that look to be longer in scope. Will you  
4 agree with that statement?

5 A. Yes.

6 Q. Okay. And the percentages estimated by  
7 CBO are different depending on the time frame at which  
8 they are looking?

9 A. Yes. That's right.

10 Q. So would you agree that in the longer  
11 term, in other words, closer to that 2021 date that is  
12 the end period of their projection, that those -- that  
13 those growth rates are about 2.0 percent, in the 2's?

14 A. I don't think so.

15 Q. No?

16 A. They're closer to 3 percent for the real  
17 growth rate. And there's a part of that time period  
18 where they're 3.4 percent.

19 Q. I apologize. I only have one document  
20 here so I'm going to try and -- what is nominal GDP?

21 A. It's typically real GDP plus the expected  
22 inflation rate.

23 Q. Okay. Will you agree with me that as --  
24 as projected by CBO, that from the years 2017 to 2021  
25 nominal GDP is approximately 4.4 percent?

1 A. I'll be happy to look at the document.

2 Q. Sure.

3 A. I don't have it.

4 Q. I apologize. I only have one copy of it.

5 It's the one I circled there for you.

6 A. I see that one. I'm afraid though,  
7 Mr. Dearmont, we have to look at the whole document.

8 And it's 5.1 for the earlier period.

9 Q. Okay.

10 A. So it depends on which period.

11 Q. Well, I didn't ask about the earlier  
12 period. I'm talking about the later one.

13 A. You have 4.4 percent.

14 Q. 4.4. Okay.

15 A. That's one of the numbers they have on  
16 here.

17 Q. Thank you. Now, I understand crystal  
18 clear that you disagree with the use of CBO data, but  
19 hypothetically had you incorporated that growth rate  
20 into your G, the long-term expected growth rate of  
21 your DCF models, those models would have produced  
22 results that were significantly lower. Correct?

23 A. Yes. If you use lower growth rates in  
24 the DCF model, you get lower ROEs.

25 Q. You haven't always used your own

1 calculation of historical GDP for G, have you?

2 A. I have for the last seven or eight years.

3 Q. Not always?

4 A. Prior to -- I can't remember the date we  
5 didn't use GDP as the growth rate, but the FERC has  
6 used it for some time.

7 Q. what do you mean by "we"?

8 A. Typically regulatory economists. When I  
9 first came here and offered to use it, I was severely  
10 criticized for using it at all. Now the Commission  
11 has adopted it and so have Mr. Gorman and so has  
12 Mr. Murray. People have recognized that GDP is a more  
13 stable estimate of long-term growth.

14 Q. Okay.

15 A. And it depends on the time period.

16 Q. And it depends on your measure of GDP?

17 A. well, the data for GDP are what they are  
18 but --

19 Q. Thank you very much.

20 A. -- it depends on the time period  
21 you're --

22 Q. Understood. Back to my original question  
23 though. You haven't always done it this way?

24 A. I haven't always used GDP, but I have  
25 always made my estimate --

1 Q. Okay.

2 A. -- if I did use it.

3 Q. As a general matter, you believe it's  
4 appropriate to test theories against practice, don't  
5 you?

6 A. That's typically what people do.

7 Q. But in this case you've provided no  
8 examples other than your own of any independent  
9 investment analyst that uses a 6 percent GDP growth to  
10 discount cash flows?

11 A. I haven't, but it exists. It's in the  
12 EBITs and valuation books and they get about 6 percent  
13 as well.

14 Q. I want to move onto a few miscellaneous  
15 items with you. You would agree that other states  
16 sometimes consider things other than the cost of  
17 common equity in setting allowed returns?

18 A. Yes.

19 Q. For example, construction programs, would  
20 that be a good example?

21 A. That's one of the examples.

22 Q. Okay. Now, let's look at RRA data. Not  
23 all of the ROEs authorized by other State Commissions  
24 are the result of litigation. Correct?

25 A. No. Some of them are settlements.

1 Q. Stipulated?

2 A. Right.

3 Q. Would you agree with me that as a generic  
4 principal, the results of settled cases don't always  
5 reflect the results that would have been produced  
6 through the litigation process?

7 A. It would be pure speculation for me to  
8 say that. I don't know.

9 Q. If you conducted an ROE analysis and the  
10 results of that analysis indicated that your  
11 recommended ROE was more than 100 basis points above  
12 or below the RRA national average, would you  
13 manipulate the results to get within 100 basis points?

14 A. No.

15 Q. Do you think that investors rely upon  
16 financial statements filed with the SEC?

17 A. Yes.

18 Q. And it's important for the financial  
19 statement then to be true and accurate. Correct?

20 A. I believe that's a requirement.

21 Q. And reliable?

22 A. I suppose so.

23 Q. Okay. Is the information reported in  
24 financial statements based upon theory or practice?

25 A. Going beyond what I know.

1 MR. DEARMONT: Thank you. I have no  
2 further questions.

3 JUDGE PRIDGIN: Mr. Dearmont, thank you.  
4 Do we have any bench questions, Mr. Chairman?

5 CHAIRMAN CLAYTON: No questions. Thank  
6 you.

7 JUDGE PRIDGIN: I have no questions.  
8 Commissioner Kenney?

9 COMMISSIONER KENNEY: No. No, thank you.  
10 Thank you, Dr. Hadaway.

11 JUDGE PRIDGIN: Any redirect?

12 MR. ZOBRIST: Yes, Judge. Just a couple  
13 of questions.

14 REDIRECT EXAMINATION BY MR. ZOBRIST:

15 Q. Dr. Hadaway, both Mr. Woodsmall and  
16 Mr. Dearmont talked to you about your self-created  
17 6 percent growth rate. How did you create or arrive  
18 upon the 6 percent growth rate?

19 A. We collected the data from the St. Louis  
20 Federal Reserve Bank, which they provide each year  
21 that shows what the growth rate is and what the level  
22 of GDP is each year. We took those data and we did  
23 ten-year segments for the past 60 years so that we had  
24 six ten-year averages. We then averaged in the most  
25 recent ten years effectively six times, the most

1 recent twenty years five times and so forth. So we  
2 gave more weight to more recent outcomes.

3           This caused the estimate from the  
4 experience that investors have actually had over the  
5 past 60 years that I used to be 6 percent instead of  
6 the actual average for that 60-year period at  
7 6.9 percent. So my forecast is based on historical  
8 data, but all forecasts are. All econometric  
9 forecasts are.

10           So I've used those historical data to  
11 represent what investors might expect based on the  
12 experience that they've actually had. The real  
13 difference in my forecast and those that we've been  
14 debating today is that the ones that are out there  
15 today use an inflation rate of 2 percent, including  
16 the CBO response that have just come up. That number  
17 is not consistent with any ten-year period that has  
18 occurred in United States economy in the past  
19 60 years. Even the most recent ten years inflation  
20 rates have been about 2.3 percent on average. Over  
21 the entire 60-year time period, the average has been  
22 3.5 percent to 4 percent.

23           Inflation is 5 percent in China right  
24 now. McDonald's announced day before yesterday that  
25 they're about to start raising prices. And the

1 2 percent inflation rates in the CBO and other  
2 estimates of GDP growth are simply not consistent with  
3 the experience in this economy. That's why my  
4 forecast is different than theirs.

5 Q. Let me ask you another question.  
6 Mr. Dearmont asked you about the judgment of financial  
7 analysts and organizations that provide analytical  
8 opinions as regard to returns on equity. What is your  
9 opinion with regard to utilizing the opinions of  
10 investment bankers and those types of financial  
11 analysts in this type of a situation where you're  
12 estimating return on equity for a regulated public  
13 utility?

14 A. If, as is sometimes done, we look only at  
15 valuation analyses, those things are called fairness  
16 opinions as Mr. Murray has talked about. And they are  
17 done for that specific reason. They're often done in  
18 confidentiality, sometimes the numbers are released  
19 later.

20 But if you look at a growth rate in the  
21 DCF model that Mr. Dearmont said in his opening  
22 statement is in the 1 to 2 percent range, that's far  
23 less than anybody's estimate of inflation. It makes  
24 no sense that in terms of an investor's required rate  
25 of return, the investor would be willing to accept an

1 investment that didn't even kind up with inflation.  
2 Those numbers are there for a different purpose  
3 entirely. They have basically nothing to do with the  
4 cost of equity capital in a proceeding like this.

5 Q. And finally, Dr. Hadaway, in response to  
6 the questions that Mr. Dearmont asked about the Kansas  
7 Corporation decision on return on equity growth rates  
8 versus the capital asset pricing model, why didn't you  
9 do a CAPM or that kind of a model in this case?

10 A. Well, we -- we heard the opening  
11 statements. And I'm not sure exactly how to say this,  
12 but we went through a trough in interest rates that we  
13 saw. And you heard Mr. Woodsmall say that interest  
14 rates are still higher -- or still lower than they  
15 were at the time of the Commission's decision in the  
16 AmerenUE case.

17 If I'm correct, that was determined in  
18 May of this year. At that time in May, the average  
19 triple B interest rate was 5.97 percent. In December,  
20 it was 6.04 percent. And as of yesterday, it was  
21 6.0 percent. So it is not correct -- it may have been  
22 a month or so again -- that interest rates are still  
23 lower than they were when the AmerenUE case was  
24 decided.

25 Interest rates went through a trough, it

1 was not appropriate to use the CAPM based on those  
2 data. The entire record that we've seen and the  
3 testimony filed in this case, including my rebuttal,  
4 only had those data that were the lowest interest  
5 rates, as was said, in 40 years. We have now seen the  
6 economy begin to gain traction and interest rates are  
7 coming up very rapidly from there.

8           So it's not appropriate, in my opinion,  
9 to base ROEs on numbers that are at the very bottom of  
10 a 40-year trough. It should be balanced and looked at  
11 relative to where interest rates are now.

12           MR. ZOBRIST: No further questions,  
13 Judge.

14           JUDGE PRIDGIN: All right. Mr. Zobrist,  
15 thank you. Dr. Hadaway, thank you very much. You may  
16 step down.

17           THE WITNESS: Thank you, Judge.

18           JUDGE PRIDGIN: As we left it last night,  
19 we interrupted Mr. Elliott's cross-examination because  
20 of the hour. And I understood when Dr. Hadaway was  
21 done, we would go back and pick up where we left off  
22 with Mr. Elliott. Is that the parties' understanding?  
23 All right. Do the parties need just a few minutes to  
24 get things --

25           MR. THOMPSON: Yes, Judge.

1 JUDGE PRIDGIN: Roughly ten minutes or  
2 so?

3 MR. THOMPSON: We have to get special  
4 teams back in.

5 JUDGE PRIDGIN: I understand. Let's  
6 stand in recess until roughly 9:40. Thank you. We're  
7 off the record.

8 (A recess was taken.)

9 JUDGE PRIDGIN: All right. Good morning.  
10 we are back on the record. We are back to  
11 cross-examination of Mr. Elliott by KCP&L. And just  
12 to make sure those listening are with what I  
13 understand to be the schedule, when Mr. Elliott is  
14 done, the next scheduled witness is Mr. Majors and  
15 then Mr. Hyneman, Mr. Schallenberg and those would be  
16 the -- that would be the Iatan witnesses.

17 Is there anything further from counsel  
18 before Mr. Fischer resumes his cross? All right. If  
19 there's nothing further, Mr. Elliott, you're still  
20 under oath, sir. Mr. Fischer, when you're ready.

21 DAVID ELLIOTT, having been previously sworn, testified  
22 as follows:

23 CROSS-EXAMINATION BY MR. FISCHER:

24 Q. Thank you very much. Welcome back  
25 Mr. Elliott. We were -- late night last night. I

1 hope you got a good night's sleep.

2 A. Yes.

3 Q. I have been able to get better organized  
4 and I think I can reduce the remaining part of my  
5 cross.

6 MR. FISCHER: To begin with, I'd like to  
7 have another exhibit marked.

8 JUDGE PRIDGIN: My notes show this would  
9 be KCPL 93.

10 MR. FISCHER: And this one's not highly  
11 confidential.

12 JUDGE PRIDGIN: Thank you.

13 (KCP&L Exhibit No. 93 was marked for  
14 identification.)

15 BY MR. FISCHER:

16 Q. Mr. Elliott, I've placed in front of you  
17 what's been marked as Exhibit 93. And this was also  
18 Exhibit 5 in the deposition that we've been talking  
19 about. Do you recognize this as the surrebuttal  
20 testimony of David W. Elliott in the Empire case that  
21 was marked Case No. ER-2004-0570?

22 A. Yes.

23 Q. Was this your testimony in that case?

24 A. Yes.

25 Q. I'd like to refer you to page 2 of that

1 testimony at lines 16 through 22.

2 A. Yes.

3 Q. There you say, I use the term, in  
4 quotation marks "cost overrun" unquote, to describe  
5 the cost due to change orders that were above the  
6 original contract costs or costs that ran over the  
7 contract amount. I agree with Empire witness Beecher  
8 that these cost overruns were due to changes in the  
9 scope of the project. I did not use the term "cost  
10 overrun" to imply that these costs should not be  
11 allowed. In fact, after an examination of the  
12 contract change order costs due to changes in scope,  
13 the Staff allowed these costs.

14 Is that correct?

15 A. Yes.

16 Q. Now, sometimes a cost overrun is defined  
17 as a cost that exceeds a budget estimate or a  
18 definitive estimate; is that -- is that true?

19 A. That's my understanding.

20 Q. And in the past the Staff has allowed  
21 cost increases that exceeded a budget estimate to be  
22 included in rates as -- as was evidenced in this  
23 Empire case?

24 A. Yes.

25 Q. would it be correct to conclude from your

1 testimony in that Empire case that just because  
2 there's a cost overrun that exceeds a budget estimate,  
3 it does not necessarily imply that those costs should  
4 be not allowed in rates?

5 A. In this case, yes.

6 Q. And that would be your expert opinion?

7 A. That would be my opinion, yes.

8 Q. In fact, you testified in that Empire  
9 case that the Staff allowed the cost overruns after an  
10 examination of change orders; isn't that true?

11 A. That's correct.

12 Q. You reviewed the change orders in those  
13 cases and found no engineering issues; is that right?

14 A. That's correct.

15 Q. And in the Empire case, the cost overruns  
16 at the Empire Energy Center were included in rates.  
17 Is that your understanding?

18 A. I -- I believe the cost overruns were  
19 allowed, but I believe there was another issue that  
20 there was an adjustment made by Staff.

21 MR. FISCHER: Okay. That's all I have,  
22 Judge. Thank you very much. I'd move for the  
23 admission of 93.

24 JUDGE PRIDGIN: Mr. Fischer, thank you.  
25 KCP&L 93 has been offered. Any objection? Hearing

1 none, it's admitted.

2 (KCP&L Exhibit No. 93 was received into  
3 evidence.)

4 JUDGE PRIDGIN: Commissioner Kenney, any  
5 questions, sir?

6 COMMISSIONER KENNEY: No, thank you.

7 JUDGE PRIDGIN: All right. Thank you. I  
8 have no questions. Redirect?

9 MS. KLIETHERMES: Thank you, Judge.

10 REDIRECT EXAMINATION BY MS. KLIETHERMES:

11 Q. Morning, Mr. Elliott.

12 A. Good morning.

13 Q. Did you affirmatively recommend that any  
14 plant be recommended -- I'm sorry, that any plant be  
15 included in this case?

16 A. I'm sorry?

17 Q. Did you affirmatively recommend that any  
18 plant be included in cost of service in this case?

19 A. I didn't specifically make that  
20 recommendation. I said there was no engineering  
21 issues that I found that would make any adjustment to  
22 the cost.

23 Q. Did you hear the testimony yesterday that  
24 major contracts like Kissick's were let out for \$1 or  
25 so and all payouts over that \$1 required change

1 orders?

2 A. I believe I heard that, yes.

3 Q. So did virtually everything Kissick did  
4 show up as a change order?

5 A. I do not believe so.

6 Q. What kind of work did Kissick do?

7 A. Kissick did a lot of foundation work. I  
8 believe they also did some -- some earth moving work.  
9 That's what I recall.

10 Q. Would things like foundations have been  
11 included in the initial budget?

12 A. There would have been foundations in the  
13 original budget, yes.

14 Q. So was paying Kissick for doing that kind  
15 of work really an overrun?

16 A. Again, it would have been a change order,  
17 but there would have been a budget amount for their  
18 work. If it fell within the budget, it wouldn't have  
19 necessarily been what would I say a cost overrun.

20 Q. So --

21 A. But it might have been a change order  
22 because the purchase order was not fully developed.

23 Q. So something that you might -- something  
24 might be colloquially referred to as an overrun that  
25 isn't an overrun necessarily from an accounting

1 perspective?

2 A. I can only tell you what I believe a cost  
3 overrun is. And, yes, you could have a cost -- you  
4 know, cost overrun, as I stated just earlier here,  
5 that I viewed it as something over the budget amount  
6 or the original cost of the -- of the plant.

7 Q. So with that clarification, let me re-ask  
8 you a question that Mr. Fischer asked you last night  
9 and I hope I get it nearly verbatim. I think he asked  
10 you did you review change orders that accounted for  
11 over 90 percent of the cost overruns. Do you remember  
12 that?

13 A. Yes.

14 Q. So in light of the discussion we've just  
15 had, would you like to clarify whether or not you did  
16 review change orders that accounted for over  
17 90 percent of the cost overruns?

18 A. As I think I mentioned perhaps last  
19 night, is I don't know if all those dollars were taken  
20 out of the contingency amount or whether they were  
21 part of the budget amount. I -- at this point I don't  
22 know.

23 Q. You couldn't even hazard a gas as to what  
24 percentage of cost overruns you reviewed, could you?

25 A. Not based on my definition, no.

1 Q. Your review -- I'm sorry. Was your  
2 assignment to determine the identification and  
3 explanation for cost overruns?

4 A. No. My assignment was to look at the  
5 change orders based on -- I'm sorry. Do a review of  
6 the change orders from an engineer's perspective.

7 Q. Is there some discussion in your  
8 surrebuttal that goes to whether or not you explained  
9 and identified the cost overruns if a -- if the  
10 Commissioners want some further explanations?

11 A. Yes. I believe my surrebuttal testimony  
12 addresses two statements in a KCPL's witnesses  
13 rebuttal that -- that I specifically did not look at  
14 cost.

15 Q. So you didn't look at the total value of  
16 all of the change orders?

17 A. Not -- obviously there were -- there were  
18 dollars on the change orders, but I did not  
19 specifically look at whether those dollars were the  
20 correct dollars or not.

21 Q. And that would only be on the change  
22 orders you looked at. There were a lot of change  
23 orders you didn't even look at, weren't there?

24 A. I looked at -- I believe that there  
25 were -- I think it was in testimony there was over

1 2,700 change orders total and I only got 647 and I  
2 looked at -- deeply looked at 222.

3 Q. And so you never compared change orders  
4 you looked at, much less the ones you didn't to the  
5 contingency in the CBE budget?

6 A. No, I did not.

7 Q. Mr. Fischer also asked you about your  
8 request for change orders based on specific dollar  
9 values. Do you remember that?

10 A. Yes.

11 Q. Why did you frame your request that way?

12 A. Going into this project not -- I knew  
13 there was going to be change orders. I had no idea  
14 how many there would be. To put a limit on the number  
15 of change orders, I selected 50,000 as the threshold  
16 to receive change orders. I assume there might be  
17 some change orders for like 25 bucks or 100 bucks.  
18 And with my time available, I made the decision to --  
19 to put a threshold on the amount.

20 Q. So even though you used cost as a  
21 screening tool, you weren't looking at cost for the  
22 purpose of cost analysis?

23 A. That's correct.

24 Q. Is there any particular relevance to your  
25 engineering review of what quantity of costs were

1 associated with each of your six types of change  
2 orders? Do you remember Mr. Fischer asking you about  
3 what percent of costs went with type one change orders  
4 or type four change orders or different things like  
5 that?

6 A. I think he asked me how many were in each  
7 category. I'm sorry.

8 Q. Did that matter for what you were looking  
9 at?

10 A. No. The one of -- the categories was  
11 just a way to sort them into -- into things. And I  
12 don't believe I identified perhaps -- not identified  
13 in my report any dollar totals for each type of change  
14 order. My work papers may show that only because I  
15 sorted them and there were dollars associated with it,  
16 but my testimony is that this shows the number in each  
17 category.

18 Q. What do you mean by "number"?

19 A. I'm sorry. The -- the number of change  
20 orders that were type one and the number of change  
21 orders that were type two, so forth. On page 31 of my  
22 November 3rd Staff filing.

23 Q. In terms of hours or days, about how much  
24 time did you spend reviewing the change order cover  
25 sheet documents?

1           A.     This came up in my deposition and I had a  
2 hard time putting a number on it. It was a lot of  
3 hours. And I didn't specifically -- this was not my  
4 only specific job and I had a lot of other issues  
5 going on. You know, I think I said 15, 20 days  
6 totally looking at change orders and that's my best  
7 guess.

8           Q.     That's change orders and supporting  
9 documentation and all of that?

10          A.     Yes. Correct. I'm sorry, yes.

11          Q.     So if you had to guess how much -- I'm  
12 sorry, about how much time did you spend looking at  
13 the physical cover sheet of the change order that has  
14 the cost included on it?

15          A.     well, obviously I spent some time reading  
16 it. You know, 20 minutes -- 20 minutes to 30 minutes  
17 reading it and -- and absorbing what it was and what  
18 it said.

19          Q.     But the bulk --

20          A.     For each -- for each change order.

21          Q.     So the bulk of your analysis would have  
22 been focused on the supporting documentation and --  
23 and the engineering work behind the change order, not  
24 on -- one particular box on one line of the cover  
25 sheet. Correct?

1           A.     That -- that was my intent was to --  
2 to -- to -- to -- obviously you get the change order,  
3 you read the change order, it has a brief description  
4 on the front. It also has a dollar amount on the  
5 front. And then there's some documentation attached  
6 to that. And it could be a lot of documentation, it  
7 could be several pages of documentation. Then the  
8 222 that I -- that I selected that went to the site  
9 and talked to KCP&L in more detail about, you know,  
10 more information that perhaps was not in the  
11 documentation or discussion of understanding the  
12 documentation.

13           Q.     And about how much time did you spend  
14 reviewing or analyzing costs?

15           A.     I did not review costs.

16           Q.     Did you provide the change orders that  
17 you reviewed to the auditors for their use?

18           A.     I -- I believe that I supplied the  
19 auditors a list of my change orders and I believe the  
20 auditors made a copy of the change orders that I had.

21           Q.     Do you know whether Mr. Schallenberg  
22 reviewed them?

23           A.     I -- I can only assume that -- I can only  
24 say I assume so. I do not know.

25           Q.     That's fine. Mr. Fischer asked you about

1 your review of change orders to determine what should  
2 be allowed in rates. Is that the purpose of your  
3 engineering review?

4 A. My purpose of my engineering review is to  
5 determine if there's anything that -- that I would  
6 question or have an issue with that something wasn't  
7 what I believe to be proper or correct. And then I  
8 may or may not make a recommendation on an adjustment  
9 to the cost of the project.

10 Q. So do you consider there to be a  
11 difference between not recommending a disallowance and  
12 affirmatively recommending inclusion in rates?

13 A. That's the way I would look at it, yes.

14 Q. And to clarify, which did you do?

15 A. I looked at it to determine if there  
16 should be a -- a adjustment made.

17 Q. For -- for what basis would you be  
18 looking at whether an adjustment should be made?

19 A. Again, I would look at it from an  
20 engineering perspective. If I thought that -- that,  
21 you know, they -- they did something wrong or they did  
22 something too much or they did it twice and -- and  
23 whatever -- whatever the criteria of that particular  
24 change order. And I -- and I believe that it was --  
25 in my judgment, not the thing to do or not what -- the

1 way they should have done it, I may have filed  
2 testimony saying that there should have been  
3 adjustment on this cost of this change order.

4 Q. And just to clarify a little point that  
5 came up last night, in the work papers that you  
6 provided, did you provide those in electronic form or  
7 in paper form?

8 A. I provided them in electronic form at  
9 my -- at my deposition to the company.

10 Q. Okay. So if there were any printing  
11 glitches, you have no reason to believe that the  
12 complete work papers weren't provided to the company?

13 A. As far as I know, the spreadsheets were  
14 full when I copied them onto the disc and hand-- and  
15 gave them to KCP&L, yes, that's my belief.

16 Q. Okay. Mr. Fischer was asking you about  
17 your work with Commission auditors. Can you  
18 personally complete a construction audit in its  
19 entirety without auditors?

20 A. I can do what I do, the engineering  
21 review. At some point the auditors either do their  
22 review and we meet at the end or the auditors do their  
23 review and we both get to the end. It -- I -- I --  
24 the way I view it is that the auditors get -- look at  
25 it from a different perspective than I do, so I cannot

1 do what I do and -- and have the thing not be a  
2 construction audit.

3 Q. So to use Mr. Fischer's phrase from last  
4 night, you have the opportunity -- or do you have the  
5 opportunity to make substantive input if you have  
6 found a reason for disallowance?

7 A. Yes. I -- I believe that if I find  
8 something that I have an issue with, I can bring it  
9 forward and put it in testimony, bring it the honors'  
10 attention. If they agree and make an adjustment, that  
11 may be how it works, yes.

12 Q. Mr. Fischer brought out a lot of old  
13 testimony last night, didn't he?

14 A. Several, yes.

15 Q. Do you have a copy of Exhibit 90?

16 A. Yes, I do.

17 Q. Did he have you read part -- or did he  
18 read into the record part of a quote on page 4?

19 A. Yes. Down -- I believe the -- from the  
20 bottom of the page -- bottom of the page.

21 Q. And that was talking about cost overruns  
22 in general, wasn't it?

23 A. It's talking about --

24 Q. Or project complexity, I'm sorry. I  
25 hadn't flipped the page.

1           A.     Yeah. I believe I was talking about the  
2 fact that my belief is that, you know, there are  
3 always -- there are always changes. And the more  
4 complex the project is, the more likely it is they  
5 have more -- more unforeseen situations which then  
6 present more -- possibly more changes.

7           Q.     And that's what Mr. Fischer had you read  
8 last night. Could you finish reading that paragraph?

9           A.     I don't remember where -- where we  
10 stopped off. Sorry.

11          Q.     If you look on page 4, it looks like  
12 line 22. He had you stop at the end of that sentence.

13          A.     Okay.

14          Q.     So if you could start with, This project?

15          A.     Okay. This project also was a retrofit  
16 type of project where new equipment was retrofitted to  
17 existing equipment. When retrofit projects are done,  
18 sometimes the amount of work increases in order to  
19 make the new equipment fit properly to the existing  
20 equipment. Also, additional design work may be  
21 necessary based on what conditions are found as the  
22 project moves forward.

23          Q.     Thank you. Just wanted to clarify what  
24 context your earlier statement was in.

25                    Did you perform any cost reviews -- and

1 Exhibit 90 is referring to the La Cygne audit, isn't  
2 it? Or do I have my exhibits confused again?

3 A. It has the La Cygne SCR project, yes.

4 Q. And did your scope in that -- did your  
5 scope in that case include performing a cost review?

6 A. No.

7 Q. What was the extent of your work in that  
8 case?

9 A. Again, my -- I did an engineering review  
10 of the change orders on the project which I put in  
11 that my Schedule 3 has got the -- the listing of the  
12 most -- most of the change orders and identify which  
13 type they were and found no engineering issues.

14 Q. And if you remember, did KCP&L do a  
15 reforecast for La Cygne?

16 A. I'm sorry, I don't remember.

17 Q. Would whether they had or not been a part  
18 of your engineering review of La Cygne?

19 A. It might have resulted in some change  
20 orders, it might not. I don't -- don't believe it  
21 would have changed.

22 Q. All right. Mr. Fischer asked you if in  
23 prior cases you were ever given a single document to  
24 identify all cost increases. Do you remember that?

25 A. Yes.

1 Q. On any of those prior cases you've  
2 worked, do you ever recall if the company was  
3 contractually obligated to identify all cost  
4 increases?

5 A. Not to my knowledge, no.

6 MS. KLIETHERMES: Can I approach?

7 JUDGE PRIDGIN: You may.

8 BY MS. KLIETHERMES:

9 Q. I was going to have you read paragraph Q  
10 there.

11 MS. KLIETHERMES: Judge, I've just handed  
12 Mr. Elliott the regulatory plan, stipulation and  
13 agreement.

14 BY MS. KLIETHERMES:

15 Q. Mr. Elliott, could you just read aloud  
16 paragraph Q for the reference of page 28?

17 A. Page 28, paragraph Q, Cost control  
18 process for construction expenditures. KCP&L must  
19 develop and have a cost control system in place that  
20 identifies and explains any cost overruns above the  
21 definitive estimate during the construction period of  
22 the Iatan 2 project, the wind generating projects and  
23 the environmental investments.

24 Q. Thank you. On some of those -- some of  
25 Mr. Fischer's questions last night had to do with kind

1 of a specific listing of the plants you've worked on.  
2 I'm going to read through a list of them here.  
3 Osawatomie, West Gardner, Hawthorn 6, 7 and 8  
4 combustion turbines, Hawthorn 9 combined cycle,  
5 Hawthorn 5 rebuild, Asbury, Empire Energy Center,  
6 Jeffrey Energy Center, AmerenUE's Meramec combustion  
7 turbine, State Line combined cycle, Riverton -- sorry,  
8 Riverton 12 combustion turbine. Were any of those  
9 part of the KCPL regulatory plan?

10 A. No.

11 Q. Did you conduct your engineering review  
12 of Iatan any different than your previous engineering  
13 reviews of construction projects because of  
14 paragraph Q of the regulatory plan, stipulation and  
15 agreement?

16 A. No.

17 Q. Do you know why paragraph Q is part of  
18 the KCPL regulatory plan, stipulation and agreement?

19 A. Only based on what I've heard in this  
20 case so far.

21 Q. Have you ever participated in work on a  
22 construction audit or prudence review that wasn't done  
23 in conjunction with staff auditors?

24 A. I'm -- I'm sorry. Could you repeat the  
25 question?

1 Q. I'm sorry. Have you ever participated in  
2 work on a construction audit or prudence review that  
3 there weren't also Staff auditors involved on that  
4 construction audit or prudence review?

5 A. At some level or not, auditors were  
6 always involved, yes.

7 Q. On those prior audits, did Staff auditors  
8 always look at construction costs and make adjustments  
9 if any adjustments were to be made?

10 A. I believe so, yes.

11 Q. You weren't a Commission employee at the  
12 time of Wolf Creek and Callaway, were you?

13 A. No, I was not.

14 Q. Not been here quite that long?

15 A. Not quite that long.

16 Q. Almost.

17 A. Feels like it.

18 Q. Were you at any time in your work on  
19 these audits in any way prevented from conducting any  
20 scope of the audit of Iatan that you wanted to  
21 perform?

22 A. No.

23 Q. Can you tell us just very briefly about  
24 Ms. Roberta Grissom's -- I think at the time she may  
25 have been Ms. Roberta McKiddy -- her proposed

1 adjustments in the context of a construction or  
2 prudence audit that you participated in?

3 A. There was the Empire Electric -- Empire  
4 District Electric Energy Center 3 and 4 project. She  
5 was the -- the auditor that was working on that  
6 construction audit and I was -- with me. And there  
7 was an issue with the contractor on that project. If  
8 my recollection is correct, I think he went bankrupt  
9 and there was some additional cost due to that.

10 And I remember working with her coming up  
11 with what amount of an adjustment might be made. And  
12 I believe it's in her testimony that there's an  
13 adjustment made because of that issue.

14 Q. Are you aware of any effort to preclude  
15 you from including a section in the report that was  
16 filed on December 31st, 2009 in Case Nos. ER-2009-0089  
17 and ER-2009-0090?

18 A. No.

19 Q. In the course of your participation in  
20 this or any prior audit, have you ever found  
21 something -- I'm sorry. Never mind. I asked that one  
22 already.

23 MS. KLIETHERMES: Judge, quite a bit of  
24 testimony from prior cases was included in the record  
25 in this last night. Just in an effort to balance the

1 record and bas-- I'll -- I am happy to go through and  
2 introduce each of these pieces of testimony and lay  
3 the foundation for each of them. If there's not going  
4 to be a foundational objection, I would just as soon  
5 not waste the time to establish what these are if  
6 that's a proper way to ask for that.

7 JUDGE PRIDGIN: I think it's proper if  
8 you can just check with counsel.

9 MS. KLIETHERMES: Featherstone's in the  
10 2006-0314 and then McKiddy's. I won't use the HC  
11 part. And I guess I should say can I reserve on --  
12 I'll offer Cary Featherstone's direct testimony in  
13 Case No. ER-2006-0314.

14 JUDGE PRIDGIN: Get you an exhibit  
15 number. My notes show it would be 281.

16 MS. KLIETHERMES: And then pending  
17 verification from Empire of what version of testimony  
18 we can utilize, can I reserve the offer of some form  
19 of Roberta Grissom -- can I make but reserve --

20 JUDGE PRIDGIN: You can always label  
21 something and not offer it or change it later. Did  
22 you want Ms. Grissom's as 282?

23 MS. KLIETHERMES: Yes. Her surrebuttal  
24 in ER-2004-0570. And I'm sorry. What number did you  
25 say for that? 282?

1 JUDGE PRIDGIN: Correct.

2 MS. KLIETHERMES: And her -- at this time  
3 she was Roberta McKiddy and her direct also in  
4 ER-2004-0570.

5 JUDGE PRIDGIN: That would be 283.

6 MS. KLIETHERMES: And the concern is that  
7 the -- the individuals who were HC on the Empire  
8 docket are not the individuals who are HC on this  
9 docket -- the parties, I'm sorry. So I think we're  
10 trying to verify with Empire what -- what version,  
11 whether or not we can include the HC at this point.  
12 Is this something I can bring down later in the day to  
13 provide copies of? we'll provide copies to counsel.

14 JUDGE PRIDGIN: Absolutely.

15 MS. CARTER: At this point, Judge, we  
16 could only agree to admission of the NP versions, but  
17 there will be folks from Empire here later in the day  
18 to see if we could let a little bit more in.

19 JUDGE PRIDGIN: All right. Thank you,  
20 Ms. Carter.

21 JUDGE PRIDGIN: When you're ready.

22 MS. KLIETHERMES: I believe I had offered  
23 those or I hoped I had offered those.

24 JUDGE PRIDGIN: If you did, I missed it.  
25 And that's entirely possible so --

1 MS. KLIETHERMES: In that case, I offer  
2 those.

3 JUDGE PRIDGIN: Thank you. KCP&L 281,  
4 282 and 283 have been offered. Any objections?

5 MR. FISCHER: Judge, I don't have a copy  
6 of the Empire ones, but subject to getting a copy, we  
7 have no problem giving more context and would not  
8 object.

9 JUDGE PRIDGIN: All right. Those  
10 exhibits are admitted.

11 MS. CARTER: And, Judge, just to clarify,  
12 we would not be objecting to the admission of the NP  
13 versions of those two pieces of testimony.

14 JUDGE PRIDGIN: The NP. And I'm assuming  
15 we can later clarify.

16 MS. CARTER: Yes.

17 JUDGE PRIDGIN: Okay. That's fine.  
18 Thank you.

19 BY MS. KLIETHERMES:

20 Q. Have you ever sponsored a dollar  
21 adjustment as part of an engineering review that you  
22 have performed?

23 A. Specifically I -- I have not made a  
24 dollar adjustment. I have perhaps provided numbers to  
25 the auditors who have made an adjustment but I have

1 not made one on my own, no.

2 Q. Have you ever sponsored a dollar  
3 adjustment as part of a construction audit you have  
4 performed?

5 A. Again, no. Not specifically in my  
6 testimony.

7 Q. what specifically do you look for when  
8 you participate in a construction audit, a prudence  
9 audit, a prudence review or an engineering review?  
10 And please distinguish if they differ in any way.

11 A. I don't know if I would distinguish them  
12 any -- in my case between any of those. An  
13 engineering review is what I do in any of those that  
14 I'm part of. Again, basically it's been reviewing the  
15 change orders. If there's -- as in the Empire case,  
16 if it's an issue with the contract or contractor, I  
17 may be involved based on my experience. I -- I look  
18 at, you know, what was done, how it was done, make  
19 decisions on whether that was the right thing to do to  
20 get it built or not get it built and try to understand  
21 what was done.

22 JUDGE PRIDGIN: I hate to interrupt. I  
23 do need to fix exhibit numbers. I'm afraid I'll  
24 forget if I don't do it now. I apologize. All the  
25 exhibit numbers I just admitted and gave you need to

1 be increased by one. I already admitted a 281  
2 earlier. So what I had previously called 281 should  
3 be 282, et cetera. My apologizes. Had a 282 last  
4 night. Featherstone would be 282 and the two Grissoms  
5 would be 283 and 284. I'm very sorry.

6 (KCP&L Exhibit Nos. 282, 283 and 284 were  
7 marked for identification.)

8 (KCP&L Exhibit Nos. 282, 283 and 284 were  
9 received into evidence.)

10 BY MS. KLIETHERMES:

11 Q. Were you done, Dave?

12 A. Yes. Yes. I'm sorry.

13 Q. And for you, your role in all of those  
14 activities, whatever the name is for another purpose  
15 is the same. Correct?

16 A. Yes.

17 Q. Is that what you did in this case?

18 A. Yes.

19 MS. KLIETHERMES: Thank you. That's all  
20 I have.

21 JUDGE PRIDGIN: All right. Thank you  
22 very much. You may step down.

23 And this looks to be a convenient time to  
24 break. We would be going on to Mr. Majors next; is  
25 that correct? All right. I'm showing 10:20 here on

1 the clock in the hearing room. Is there anything  
2 further from counsel before we go on break? All  
3 right. In that case, let's re-adjourn [sic] at 10:35,  
4 please. Thank you. We're off the record.

5 (A recess was taken.)

6 JUDGE PRIDGIN: All right. We're back on  
7 the record. Anything from counsel before I administer  
8 the oath to Mr. Majors and -- all right. Mr. Majors,  
9 if you'll raise your right hand to be sworn, please,  
10 sir.

11 (Witness sworn.)

12 JUDGE PRIDGIN: Thank you very much, sir.  
13 Ms. Ott, anything before he stands cross?

14 MS. OTT: No. Well, yes.

15 KEITH MAJORS, having been sworn, testified as follows:

16 DIRECT EXAMINATION BY MS. OTT:

17 Q. Can you please state your name for the  
18 record.

19 A. Keith A. Majors.

20 Q. Mr. Majors, who are you employed, in what  
21 capacity?

22 A. The Missouri -- the Missouri Public  
23 Service Commission. I am a regulatory -- utility  
24 regulatory auditor.

25 Q. And are you the same Keith Majors that

1 has participated in Staff's November 3rd, 2010 report  
2 on the Construction Audit and Prudence Review that has  
3 been previously marked for identification as KCP&L  
4 205-HC?

5 A. Yes.

6 Q. Are you also the same Keith Majors that  
7 has participated in Staff's revenue requirement cost  
8 of service report previously marked for identification  
9 as KCP&L 210-HC?

10 A. Yes.

11 Q. And are you the same Keith Majors that  
12 has filed rebuttal testimony that's been pre-marked  
13 KCPL 230?

14 A. Yes.

15 Q. As well as surrebuttal testimony that has  
16 been marked KCPL 231-HC and 231-NP?

17 A. Yes.

18 Q. With respect to your rebuttal and  
19 surrebuttal testimony, was that prepared by you or  
20 under direct supervision?

21 A. Yes.

22 Q. Do you have any corrections to make to  
23 your rebuttal or surrebuttal testimony at this time?

24 A. No.

25 Q. And if I were to ask you the same or

1 similar questions contained in that testimony, would  
2 the answers today be substantially the same?

3 A. Yes.

4 Q. would they be true and accurate to the  
5 best of your information, knowledge and belief?

6 A. Yes.

7 Q. Do you have any corrections to make to  
8 Staff's cost of service report?

9 A. No.

10 Q. And do you have any corrections to make  
11 to Staff's November 3rd, 2010 Staff report?

12 A. No.

13 Q. Is the information contained therein true  
14 and accurate to your best knowledge and belief?

15 A. Yes.

16 MS. OTT: With that, I'd like to meet  
17 Staff -- or KCPL 205-HC, KCPL 210-HC and NP and KCPL  
18 230 and KCPL 231-HC and NP.

19 MR. HATFIELD: Judge, I'm sorry. Are you  
20 ready for --

21 JUDGE PRIDGIN: Whenever you're ready.

22 MR. HATFIELD: We're going to object to  
23 the admission of the audit report at this stage. The  
24 audit report was sponsored by the testimony of witness  
25 Hyneman. And I think I do have some objections to

1 raise then. So I guess subject to that objection, I  
2 don't know -- I didn't realize we were going to do it  
3 with this witness and actually I don't think it's  
4 appropriate to do with this witness. The Commission  
5 requires that staff members identify it by section  
6 which sections they sponsored and he didn't sponsor  
7 even the majority of those sections.

8 I think Mr. Fischer also needs to make a  
9 comment about the testimony itself.

10 MR. FISCHER: I may be incorrect, but I  
11 think Mr. Majors may have some rate case adjustments  
12 that he addresses in his testimony. And if you're  
13 continuing to reserve admission until after all the  
14 issues have been heard, we would ask that you continue  
15 that on this one.

16 JUDGE PRIDGIN: Okay. So let me -- so in  
17 that case, Mr. Fischer, you would -- on that ground  
18 alone at least for now, prefer the pre-filed not to be  
19 admitted on the grounds that he has other topics to  
20 discuss?

21 MR. FISCHER: That's my understanding.  
22 Unless they settle out or something.

23 MR. HATFIELD: And those are 230 and 231  
24 as I understand it, Judge. My concern is with -- I  
25 think it was with 205, which was sponsored by

1 Mr. Hyneman in his testimony and --

2 JUDGE PRIDGIN: So I will -- I will  
3 sustain those objections with the understanding  
4 Ms. Ott, that you are free to offer those later, that  
5 these are more timeliness objections at least for now  
6 and there may be substantive objections later. So I'm  
7 not -- I'm not saying they can't be re-offered later.  
8 I'm just saying I think it was counsel's understanding  
9 that the testimony wouldn't be offered until the  
10 witness was up for the last portion of their  
11 testimony.

12 MS. OTT: And I wasn't in here for that  
13 section so I apologize, but there are parts of these  
14 reports in which Mr. Majors has sponsored testimony  
15 and if he was going to be questioned on them, just put  
16 it in now.

17 JUDGE PRIDGIN: No, I understand. I  
18 don't blame you at all. It's just kind of awkward  
19 when you have several witnesses sponsoring the same  
20 exhibit so it's one way we decided to do it. So I  
21 heard no objection to 210-NC -- pardon me, NP and HC.

22 MR. HATFIELD: Which one is 210? I'm  
23 sorry.

24 MS. OTT: The cost of service report.

25 MR. FISCHER: That would be the rate case

1 piece that I think has several witnesses addressing  
2 various rate case issues.

3 MS. OTT: That's correct. Are we waiting  
4 to the very last witness to put that entire piece in?  
5 Okay.

6 JUDGE PRIDGIN: And same ruling on that.  
7 That's sustained with the understanding that that can  
8 certainly be offered later and the Commission would  
9 reconsider its ruling later.

10 MS. OTT: Well, with that, I will tender  
11 Mr. Majors for cross-examination.

12 JUDGE PRIDGIN: All right. Thank you.  
13 Mr. Mills?

14 MR. MILLS: No questions.

15 JUDGE PRIDGIN: Mr. Schwarz?

16 MR. SCHWARZ: No questions.

17 JUDGE PRIDGIN: Mr. Hatfield,  
18 Mr. Fischer?

19 MR. HATFIELD: Yes, your Honor. Thank  
20 you. I'm just going to stay right here if that's all  
21 right.

22 JUDGE PRIDGIN: All right.

23 CROSS-EXAMINATION BY MR. HATFIELD:

24 Q. Good morning, Mr. Majors.

25 A. Good morning.

1 Q. We've met before so -- is that right?

2 A. We have.

3 Q. Now, you just heard the discussion about  
4 various documents that have been marked. Do you have  
5 testimony in front of you that you filed?

6 A. Which -- which testimony are you  
7 referring to?

8 Q. I was referring to all of it actually?

9 A. I believe I have substantially most of  
10 it. I have surrebuttal.

11 Q. Okay.

12 A. And the cost of service reports.

13 Q. Well, let's do it this way. You have  
14 your surrebuttal there?

15 A. I do.

16 Q. And you have a copy of Staff's  
17 Construction Audit and Prudence Review there?

18 A. Dated November 3rd, yes.

19 Q. Yes, sir. For the period ended June 30th  
20 of 2010?

21 A. That's correct.

22 Q. All right. In your testimony the -- the  
23 adjustments in Staff's Construction Audit and Prudence  
24 Review that you sponsored were sole AFUDC adjustments;  
25 is that right?

1 A. There were -- there was a property tax  
2 adjustment --

3 Q. Okay.

4 A. -- as well.

5 Q. Absolutely. So property tax and AFUDC.  
6 Anything else?

7 A. I -- I believe that's it.

8 MR. HATFIELD: And let me do one other  
9 thing. I don't remember the exhibit number, Judge.  
10 Beginning -- during the openings, Mr. Dottheim handed  
11 out an exhibit that contained Staff's disallowances.  
12 So I'm just saying for the record that's what I'm  
13 going to give him. I didn't write down the exhibit  
14 number. Mr. Mills?

15 JUDGE PRIDGIN: That's for the assistance  
16 of -- I'll try to find it.

17 MR. HATFIELD: Do you know the number on  
18 that, Steve?

19 MR. DOTTHEIM: I did not mark it as an  
20 exhibit. That -- I don't recall.

21 MS. OTT: It's not in here.

22 MR. DOTTHEIM: It was a page that was  
23 attached to the Staff's reconciliation. It's the last  
24 page. It is also Schedule 1 to the Staff's November 3  
25 report. It is Schedule 1-1 and Schedule 1-2. And it

1 is separately bound in Staff's Schedules 1-8. It  
2 appears as two pages. The first two pages in Staff's  
3 schedules volume staff schedules 1 to 8, 8.5-by-11  
4 sheets of paper, Schedule 1-1 and 1-2.

5           And when it was attached to the Staff's  
6 reconciliation that was filed, it was attached as a --  
7 or produced as a legal size document and Schedule 1-1  
8 and 1-2 was on one sheet of paper. The numbers are  
9 the same on both documents. The numbers did not  
10 change.

11 BY MR. HATFIELD:

12           Q.     So Mr. Majors, you have that document in  
13 front of you now?

14           A.     I do.

15           Q.     By the way, I found it to be a very  
16 helpful exhibit so I thought I would refer to it. And  
17 so I just want to make sure before we begin, that  
18 you've had an opportunity to look at adjustments and  
19 AFUDC, property tax credit, property tax adjustment.  
20 Any others you sponsored?

21           A.     No.

22           Q.     Okay. So you did not sponsor any  
23 adjustments related to unidentified and unexplained  
24 cost overruns?

25           A.     Other than the AFUDC related to it.

1 Q. Fair point. Okay. Do you have an  
2 understanding of how you were selected to participate  
3 in the audit?

4 A. Not a -- not a complete understanding. I  
5 was -- I was told to participate.

6 Q. That would be an understanding. I  
7 understand. Prior to being told to participate, you  
8 had never performed a construction audit; is that  
9 right?

10 A. That's correct.

11 Q. You'd never performed a prudence audit?

12 A. In -- in rate cases there are  
13 particular -- particular items that require a  
14 prudence -- to evaluate prudence, but not a prudence  
15 audit of a construction project.

16 Q. Gotcha. You'd never audited a  
17 construction project?

18 A. That's correct.

19 Q. You didn't have any experience with the  
20 construction industry?

21 A. That's correct.

22 Q. Had you ever audited contingency logs  
23 before?

24 A. No.

25 Q. You'd never worked on any construction

1 projects?

2 A. No.

3 Q. And you've never had any training on how  
4 to perform a construction audit?

5 A. Other than the -- the general training I  
6 received as a utility regulatory auditor during my  
7 tenure as a utility regulatory auditor, no.

8 Q. All right. I think -- okay. I think we  
9 talked about this once before. You did not have any  
10 specific training in that tenure on how to conduct a  
11 construction audit, did you?

12 A. What specific period are you referring  
13 to?

14 Q. The period you referred to. Your tenure.  
15 You've been at the PSC ever since you got out of  
16 college. Right?

17 A. Since June 2007, that's correct.

18 Q. So that period, did you ever have any  
19 specific training on how to conduct a construction  
20 audit?

21 A. I -- attended some training with  
22 Mr. Hyneman, Mr. Schallenberg on -- it had to do with  
23 construction -- construction management. It was over  
24 in the Truman Building. I'm sure you're familiar with  
25 the Truman Building. And I -- I attended and I'm not

1 quite sure how long it was. It was for an afternoon.

2 It was an instructional seminar.

3 Q. And when was that?

4 A. Late last year.

5 Q. Late in 2010?

6 A. That's correct.

7 Q. Okay. So that would have been after the  
8 Construction Audit and Prudence Reviews had been filed  
9 with the Commission. Right?

10 A. I -- I believe so.

11 Q. And did you find that training to be  
12 helpful in understanding how to conduct a construction  
13 audit and prudence review?

14 A. Generally.

15 Q. Did it inform you of anything that you  
16 had -- did not know before attending that training?

17 A. Not that I can recall.

18 Q. In the course of your involvement with  
19 the Construction Audit and Prudence Review, you did  
20 not have any discussions with engineering Staff at the  
21 PSC about the Construction Audit and Prudence Review.  
22 Right?

23 A. I was -- I was present in -- in a room  
24 where -- where our adjustments were discussed. Not --  
25 not specifically the adjustments, but the filing of

1 the Construction Audit and Prudence Review was  
2 discussed with -- with some engineers, yes.

3 Q. In reaching your conclusion, you did not  
4 consult -- your conclusions in the Construction Audit  
5 and Prudence Reviews, you did not consult with any  
6 engineers?

7 A. That's correct.

8 Q. And in reaching the conclusions and the  
9 testimony that you filed in this case, you did not  
10 consult with any engineers?

11 A. That's correct.

12 Q. Okay. Let me just ask about your  
13 surrebuttal testimony. I think that will be the  
14 easiest thing to do. Let's just start right at the  
15 beginning there on page 1, line 9, first question. It  
16 says, Are you the same Keith Majors who filed direct  
17 and rebuttal testimony on these issues?

18 Now, your direct and rebuttal testimony  
19 had to do with things other than the Construction  
20 Audit and Prudence Review. Right?

21 A. There was a portion of my direct that  
22 referred to the Construction Audit and Prudence Review  
23 specifically an adjustment that was in the -- that  
24 report.

25 Q. For AFUDC?

1 A. That's correct.

2 Q. You didn't file any direct or rebuttal  
3 testimony concerning the cost control system.  
4 Correct?

5 A. That's correct.

6 Q. And that's because when the audit  
7 started, Mr. Schallenberg was in charge of the cost  
8 control system of the audit. Right?

9 A. I don't know -- I don't know -- what do  
10 you mean by "in charge of"?

11 Q. Well, if you -- if you don't know or if  
12 he wasn't, that's okay. My understanding is  
13 Mr. Schallenberg was responsible for the cost control  
14 portion of the audit; is that correct?

15 A. I -- I don't know.

16 Q. All right. At some point Mr. Hyneman  
17 sponsored adjustments relating to unidentified and  
18 unexplained cost overruns; is that right?

19 A. I -- I believe he sponsored the  
20 adjustment, yes.

21 Q. And your only involvement in those, I  
22 think you've told me, was to calculate the AFUDC  
23 related to those adjustments?

24 A. That's right.

25 Q. Now, how did it come to be that you filed

1 surrebuttal to respond to Mr. Meyer and  
2 Mr. Archibald's comments about budget and cost  
3 control?

4 A. At the time that we filed the  
5 surrebuttal, no one was addressing the testimony. I  
6 don't believe anybody was addressing the testimony of  
7 those two witnesses.

8 Q. You mean no one on Staff was addressing  
9 it?

10 A. No one that I was aware of.

11 Q. So how did it come to be that you drew  
12 the short straw on that?

13 A. I read through Mr. Meyer and  
14 Mr. Archibald's testimony and responded to certain  
15 sections thereof.

16 Q. Okay. And those sections had to do with  
17 the budget and cost control system that you had not  
18 sponsored an adjustment on. Right?

19 A. That's correct.

20 Q. And you just made that decision on your  
21 own without any direction from Mr. Hyneman or  
22 Mr. Schallenberg?

23 A. I was --

24 MS. OTT: I'm going to object to  
25 attorney/client privilege and going into strategy to

1 file testimony.

2 MR. HATFIELD: I --

3 JUDGE PRIDGIN: Mr. Hatfield?

4 MR. HATFIELD: I didn't mean to ask him  
5 for advice from an attorney and I'd be happy to have  
6 the witness instructed that if I'm asking him  
7 something that would require attorney/client -- or a  
8 conversation he had with an attorney, he should let us  
9 know that. I wouldn't want him to do that.

10 JUDGE PRIDGIN: I'll overrule. I didn't  
11 hear anything about counsel.

12 MR. HATFIELD: I don't know what my  
13 question was. Is there any way the court reporter  
14 could read it back.

15 THE COURT REPORTER: "Question: And you  
16 just made that decision on your own without any  
17 direction from Mr. Hyneman or Mr. Schallenberg?"

18 BY MR. HATFIELD:

19 Q. Is that right?

20 A. Can you repeat the question?

21 Q. It's the same question she just gave you.  
22 You made that decision to file the testimony on your  
23 own without any direction from Mr. Schallenberg or  
24 Mr. Hyneman; is that right?

25 A. Well, I consulted with an attorney.

1 Q. Okay.

2 A. With Mr. Schallenberg and Mr. Hyneman.

3 Q. All right. And after consulting with the  
4 attorney, without telling me what the attorney said,  
5 did you make the decision to file the testimony or  
6 were you directed by Mr. Schallenberg or Mr. Hyneman  
7 to file the testimony?

8 A. I would say I was -- I -- I -- I made the  
9 decision to sign the affidavit and sponsor the  
10 testimony.

11 Q. Let's look at page 21 of your surrebuttal  
12 testimony. You -- you've been in the courtroom for  
13 some portions of the testimony, I take it?

14 A. Some, yes.

15 Q. I said courtroom. Hearing room. And I'm  
16 trying to remember. Were you sitting here next to --  
17 at counsel table for the questioning of Mr. Archibald?

18 A. I don't think I was here at the time.

19 I --

20 Q. Well, we had some discussion about the  
21 definition of a cost overrun. And I notice at page  
22 21, line 6 you say that, Cost overruns occur when the  
23 sum of all negative, paren, increased costs, closed  
24 paren, budget variances exceed the sum of all  
25 positive, paren, decreased cost, closed paren, budget

1 variances, plus the contingency level, plus the  
2 baseline budget.

3 Did I read that correctly?

4 A. Yes.

5 Q. Where did you get that definition?

6 A. It's -- it's -- it's just the definition  
7 of a cost overrun. I -- I don't know that I got it  
8 anywhere specifically. Through my -- through my  
9 experience as an accountant and auditor.

10 Q. Do you agree there might be other  
11 definitions of a cost overrun?

12 A. I -- I don't know.

13 Q. So it's possible there are? I guess --  
14 no, let me withdraw that. You didn't go out and try  
15 to find a definition of a cost overrun in any  
16 authoritative literature in order to reach this  
17 conclusion?

18 A. I consulted -- we have several handbooks  
19 that I consulted.

20 Q. Excellent. Which one did you consult for  
21 this definition?

22 A. The -- well, I didn't particularly  
23 consult a specific handbook. I --

24 Q. I'm sorry.

25 A. -- I had some knowledge of the handbook,

1 but we had -- I -- someone had ordered some handbooks  
2 from the Project Management Institute which had  
3 various definitions in them.

4 Q. All right. I must have misunderstood.  
5 I'm sorry. Let me know which construction handbook I  
6 would look at to find a definition of a cost overrun.

7 A. You want to know which specific one?

8 Q. If you can.

9 A. I don't -- I don't have the title of  
10 the -- of the book for -- that you would find a  
11 definition of that.

12 Q. Okay. But did you get this definition --  
13 I'm just trying to make sure I understand. Did you  
14 get this from a book or did you just -- you know about  
15 these books and so you kind of paraphrased what you  
16 think your -- the definition is?

17 A. It would be a paraphrasing of the  
18 definition.

19 Q. All right. I understand. And then the  
20 next sentence says -- I'm on line 8, Since KCPL  
21 refused to provide the information that supports the  
22 contingency levels contained in the Iatan 1 AQCS and  
23 Iatan 2 control budget estimate CBE or definitive  
24 estimate as specified in the KCPL regulatory plan,  
25 comma, no one aside from KCPL can identify which

1 budget variances were provided for in the contingency  
2 versus the budget variances that were not considered.

3 Is that your testimony?

4 A. That's correct.

5 Q. First question, so you're saying that the  
6 control budget estimate is also known as the  
7 definitive estimate as specified in the regulatory  
8 plan?

9 A. That's -- that's my understanding of it,  
10 yes.

11 Q. Okay. They're the same thing?

12 A. If you ask me, they're the same thing.  
13 To me, yes, they're the same thing.

14 Q. All right. And -- and when you've heard  
15 staff discuss the control budget estimate the phrase  
16 "control budget estimate," "definitive estimate" are  
17 used as synonyms. Correct?

18 A. Yes.

19 Q. And I think you discuss this, but let me  
20 just make sure I understand. When you say KCPL  
21 refused to provide the information that supports the  
22 contingency levels, can you tell me when they refused  
23 to provide that?

24 A. It would be when they responded to Data  
25 Request 490 and 491.

1 Q. All right. We've marked Exhibit 256  
2 already and I believe it's been admitted, Data Request  
3 490.

4 MR. HATFIELD: Judge, can I approach  
5 because I've only got one left?

6 JUDGE PRIDGIN: You may.

7 BY MR. HATFIELD:

8 Q. So your testimony is in Data Request 490  
9 KCPL refused to provide information on the contingency  
10 logs; is that right?

11 A. We -- we asked the question and the  
12 response was not supportive of an answer to the  
13 question.

14 Q. Okay. Well, let's look at -- I want to  
15 make sure I understand this. On page 22, line 6 you  
16 quote the DRs and then you said, The only response  
17 that was not privileged was Schedule 3 attached to  
18 this testimony.

19 Is that right?

20 A. That -- that's correct.

21 Q. And -- and did you write that testimony  
22 that -- the testimony we're looking at here in your  
23 surrebuttal?

24 A. Did.

25 Q. And did you look at DR No. 490 and the

1 response thereto when you wrote that testimony?

2 A. I did.

3 Q. Let me hand you Exhibit 256. I've got  
4 some handwriting on there, but I don't think it's  
5 significant. And ask you if you recognize that as DR  
6 Request No. 490?

7 A. Yes.

8 Q. That's from Mr. Schallenberg to  
9 Mr. Reynolds; is that right?

10 A. It was from Mr. Schallenberg to KCPL.  
11 I -- it wasn't specifically to Mr. Reynolds.

12 Q. My bad. Fair enough. That DR request  
13 contains a case number at the top. Right?

14 A. That's correct.

15 Q. And what is that number?

16 A. ER-2009-0089.

17 Q. So that's a DR that was submitted in the  
18 Iatan 1 rate case. Right?

19 A. I -- I don't know what you mean by "Iatan  
20 1 rate case."

21 Q. That's okay. So this is the DR that  
22 you're saying KCPL refused to provide an answer to?  
23 Yes?

24 A. I'm saying it's one of the DRs.

25 Q. All right. would you read the response

1 from KCPL, please?

2 A. Under the line, Response?

3 Q. Yes, sir.

4 A. The current control budget estimate for  
5 Iatan 1 is \$484 million. Due to their confidential  
6 nature, all of the documentation supporting the  
7 development review, analysis and approval of the  
8 contingency and executive contingency included in the  
9 current control budget estimate for environmental  
10 upgrades at Iatan 1 are available by contacting Tim  
11 Rush, 816.556.2344 or Lois Liechti --

12 Q. Okay.

13 A. -- 816.556.2612 to make arrangements to  
14 view these documents. Response provided by Iatan  
15 construction project, project controls. This  
16 information was provided for onsite viewing to the  
17 Commission Staff in early 2008 as part of its  
18 investigation in Case No. EM-2007-0374.

19 Q. Thank you. Now, the other DR you talk  
20 about there is Data Request 491; is that right?

21 A. That's correct.

22 Q. And you're saying that KCPL refused to  
23 provide the information in response to 491 as well.  
24 Right?

25 A. That's correct.

1 Q. All right. Let me show you what's been  
2 marked as Exhibit 257. Do you recognize that as the  
3 Data Request No. 491?

4 A. I do.

5 Q. And that's also in the 0089 rate case; is  
6 that right?

7 A. It is.

8 Q. And can you read the response to Data  
9 Request 491?

10 A. KCPL objects to this data request to the  
11 extent it calls for information pertaining to Iatan 2  
12 and, therefore, seeks discovery of information which  
13 is irrelevant, immaterial and inadmissible and whose  
14 discovery is not reasonably calculated to lead to the  
15 production of relevant and admissible evidence.

16 Q. And -- now, what's the date on that  
17 response up at the top?

18 A. February 3rd, 2009.

19 Q. All right. Now, let me hand you what's  
20 been marked as Exhibit 258 and already admitted in  
21 this case. And ask you if you recognize that as a  
22 data request response?

23 A. It is.

24 Q. And what's the number on that?

25 A. which -- which number?

1 Q. Data request number. Or there's a  
2 response number.

3 A. There's a question number that says  
4 0491 S.

5 Q. And what does an "S" mean in the data  
6 response world?

7 A. I think it means supplemental.

8 Q. Okay. And is the -- is the question  
9 repeated there in Data Response 491 S the same as the  
10 question that was in Data Response 490?

11 A. You said 490.

12 Q. 491. My bad. Thank you. 491. I'm  
13 comparing 491 to 491 S.

14 A. You're making that comparison?

15 Q. I am. And asking you to as well.

16 A. It looks to be the same text. The text  
17 is the same for both questions.

18 Q. All right. And then 491 S, what's the  
19 date on that response?

20 A. 4/17/2009.

21 Q. would you read the response of Kansas  
22 City Power and Light in that supplemental response?

23 A. Please see MPSC Data Request 0490 in Case  
24 No. ER-2009-0089.

25 Q. And 490 is the one we just read a minute

1 ago that says please call Tim Rush and these were made  
2 available for onsite viewing. Right? Exhibit 256.

3 Did I take it?

4 A. That's correct. I don't have that in  
5 front me, but --

6 Q. Can I get those back from you? Thank  
7 you.

8 Do you know whether any disputes  
9 concerning KCPL's responses to Data Request 490 and  
10 491 were submitted to an RLJ for review?

11 A. I -- I think they were.

12 Q. Okay. Let me turn to your surrebuttal  
13 testimony, page 26. You got it?

14 A. I do.

15 Q. On line 20 there's a question, Does Staff  
16 have a position on the decision to lease the rail cars  
17 versus buying them?

18 And you say, Not at this time.

19 what -- what's -- what's the purpose of  
20 telling us that Staff has no position? why is that in  
21 here?

22 A. Because I -- I didn't evaluate the -- the  
23 position on the decision to lease versus buy the rail  
24 cars. I --

25 Q. Is -- do you -- is it your

1 understanding -- the answer is, Not at this time.

2 And, you know, the lawyer in me makes me ask. Is that  
3 an implication that you intend to have a position on  
4 buying or leasing the rail cars at a later time?

5 A. I don't know.

6 Q. Okay. And then let me just make sure I  
7 understand your testimony then on the next -- next  
8 line, page 23. You're quoting Mr. Meyer now, but I  
9 just want to ask you. Mr. Meyer apparently made the  
10 statement that, Leasing the rail cars will result in  
11 savings to KCPL's customers in this case.

12 And you're agreeing that it will, in  
13 fact, save the customers money?

14 A. In the immediate time period in this  
15 case.

16 Q. Gotcha. I just want to make sure I  
17 understood. All right. Now, on page 29, line 9,  
18 question, Did Kansas Corporation Commission take any  
19 issue with the KCPL's level of rate case expense?

20 Do you agree with the opening statement  
21 of Mr. Schwarz that the decisions of KCC are a red  
22 herring in this case?

23 A. Well, is that -- was that part of his  
24 opening statement?

25 Q. I'm telling you it was.

1 A. I -- I don't think I have an opinion on  
2 that statement.

3 Q. So you think that what KC-- I mean you've  
4 included in your testimony here what KCC found about  
5 the rate case. So was that -- is your testimony that  
6 you've included here relevant to this case?

7 A. I believe so, yes.

8 Q. Okay. So what KCC said is relevant to  
9 this case?

10 A. Just in terms -- all I'm saying is in  
11 terms of rate case expense.

12 Q. Okay. So only in terms of rate case  
13 expense should we consider what KCC said?

14 A. No. I'm not making an evaluation of what  
15 the KCC said on other items.

16 Q. Okay. But you did do that for rate case  
17 expense?

18 A. Just for rate case expense.

19 Q. Okay. Why did you not do that for any  
20 other items?

21 A. I don't know.

22 Q. Okay. So there's a discussion of rate  
23 case expense and then on page 30, there's -- at line  
24 19 there's another question, Has Staff made any  
25 conclusions concerning rate case expense?

1                   You see that?

2           A.     I'm sorry.  what line?

3           Q.     Page 30, line 19.

4           A.     Oh, okay.

5           Q.     Has Staff made any conclusions concerning  
6 rate case expense?

7                   I'm wondering if it should say any other  
8 conclusions, first of all?

9           A.     I'm sorry.  Is that a question?

10          Q.     Yes.

11                  MS. OTT:  Judge, I just want for  
12 clarification, are -- rate case expense is an issue  
13 later on and if we're -- in which Mr. Majors is a  
14 witness.  I'm just not sure if this is relevant to the  
15 Iatan issue right now.  So I'm going to object to any  
16 further questioning on rate case expense.

17                  MR. SCHWARZ:  I would join that as well.

18                  MR. HATFIELD:  I wasn't planning to  
19 question him on rate case expense.  I was questioning  
20 a moment ago on the relevance of KCC opinions to this  
21 case generally and I'm getting ready to question him  
22 about some testimony he has that is related to a  
23 section of the audit that he sponsors where he says  
24 that the Kansas City Power and Light Company has  
25 withheld a significant amount of materials from the

1 auditors in this case.

2 JUDGE PRIDGIN: And that's why I'll  
3 sustain. If you can try to move away from rate case  
4 expense.

5 MR. HATFIELD: So may I ask him about --  
6 if you sustain, may I ask him about the question on  
7 page 30, line 19?

8 JUDGE PRIDGIN: If you're asking about  
9 something he said in his testimony and you're  
10 side-stepping rate case expense, that's certainly  
11 fine.

12 MR. HATFIELD: Okay.

13 MS. OTT: Judge, I will say the line of  
14 questioning is coming directly under the subheading  
15 Rate Case Expense in Mr. Majors' surrebuttal testimony  
16 so --

17 MR. HATFIELD: You know what? I'm not  
18 going to make a great point with the question anyway  
19 so I withdraw it and I have nothing further for this  
20 witness, Judge.

21 JUDGE PRIDGIN: Thank you. Bench  
22 questions, Commissioner Jarrett?

23 COMMISSIONER JARRETT: I don't have any  
24 questions. Thank you.

25 JUDGE PRIDGIN: Commissioner Kenney?

1 COMMISSIONER KENNEY: No, thank you.

2 JUDGE PRIDGIN: All right. Redirect?

3 REDIRECT EXAMINATION BY MS. OTT:

4 Q. Mr. Majors, is AFUDC an engineering  
5 issue?

6 A. No.

7 Q. And is property tax generally evaluated  
8 by an engineer or an auditor?

9 A. Property tax?

10 Q. Yes.

11 A. I -- I think it's usually evaluated by an  
12 auditor.

13 Q. Now, there was some discussions about  
14 cost overruns and whether or not you sponsored that  
15 testimony. Were you aware that there was testimony  
16 within the Staff report and which addressed cost  
17 overruns?

18 A. I believe so, yes.

19 Q. There was some discussion regarding this  
20 DR 490 and 491 and it said to make arrangements with  
21 Mr. Rush or Ms. Liechti. Do you know if Staff  
22 attempted to make those arrangements to review the  
23 material?

24 A. I personally don't -- I don't know. I  
25 typically didn't -- wasn't the one calling to make

1 arrangements.

2 Q. Do you know if -- if anybody met to have  
3 arrangements regarding DR 490 and 491?

4 A. I -- I don't know.

5 Q. Have you reviewed privilege logs in this  
6 matter related to data requests?

7 A. I have.

8 Q. Do you know if there's a privilege log  
9 for 490 or 491?

10 A. There is.

11 Q. Going back to the AFUDC issue and  
12 property tax, is -- are those issues you would  
13 generally talk with an engineer when making your  
14 determination --

15 A. No.

16 Q. -- or your opinion?

17 Now, with discussion on the rail cars,  
18 will the rail cars cost move in the future because of  
19 leasing versus buying?

20 A. Could you repeat that?

21 Q. In regards to the rail car, will the  
22 costs fluctuate in the future because of leasing  
23 versus buying?

24 A. Yes.

25 MS. OTT: I have nothing further. Thank

1 you.

2 JUDGE PRIDGIN: All right. Thank you.  
3 Mr. Majors, thank you very much. You may step down.

4 We're ready for Mr. Hyneman.

5 MS. OTT: Can we just have a moment to  
6 switch out?

7 JUDGE PRIDGIN: Certainly. We'll take  
8 about five minutes. We'll be off the record.

9 (A recess was taken.)

10 JUDGE PRIDGIN: All right. We're back on  
11 the record. Mr. Hyneman has taken the stand. Is  
12 there anything from counsel before I administer the  
13 oath? All right. Mr. Hyneman, if you'll raise your  
14 right hand to be sworn, please, sir.

15 (Witness sworn.)

16 JUDGE PRIDGIN: Thank you very much, sir.  
17 Please have a seat. Ms. Ott, when you're ready.

18 CHARLES HYNEMAN, having been sworn, testified as  
19 follows:

20 DIRECT EXAMINATION BY MS. OTT:

21 Q. Please state your name for the record.

22 A. It's Charles R. Hyneman.

23 Q. And whom are you employed, in what  
24 capacity?

25 A. I am a regulatory auditor with the

1 Missouri Public Service Commission.

2 Q. And have you sponsored part of Staff's  
3 November 3rd, 2010 report on Construction Audit and  
4 Prudence Review?

5 A. Yes.

6 Q. Have you also filed direct testimony  
7 that's been pre-marked Exhibit 244?

8 A. Yes.

9 Q. And rebuttal testimony 225?

10 A. Yes.

11 Q. And surrebuttal 226?

12 A. Yes.

13 MS. OTT: Since we're not offering the  
14 exhibits at this time, I will tender him for  
15 cross-examination.

16 MR. HATFIELD: And, Judge, just to  
17 clarify, I'll do it however you want. The -- I have  
18 some specific objections to the Construction Audit and  
19 Prudence Review related to particular pages, but I  
20 think it would be appropriate if Ms. Ott desires, that  
21 this would be the witness to sponsor the Staff report.  
22 It needs to come in at some point. We're in the  
23 prudence section. So whatever you'd like to do,  
24 Ms. Ott.

25 MS. OTT: It was my understanding we'd do

1 it with the last witness and that's Mr. Schallenberg  
2 so --

3 MR. HATFIELD: Well, I'm going to object  
4 to Mr. Schallenberg sponsoring the audit.  
5 Mr. Hyneman's direct testimony is the sponsor of the  
6 audit. Mr. Schallenberg filed no direct or actually  
7 filed no testimony in this case.

8 MS. OTT: He did file sections of the  
9 Staff report which was filed for the construction  
10 audit in this case, but if we want to offer it now --

11 JUDGE PRIDGIN: Can I get an exhibit  
12 number, please?

13 MS. OTT: 205-HC.

14 JUDGE PRIDGIN: 205-HC

15 MS. OTT: Well, it's just HC.

16 JUDGE PRIDGIN: So 205-HC is being  
17 offered.

18 MR. HATFIELD: So, Judge, generally we  
19 have -- KCPL has no objection to the exhibit being  
20 offered at this time. However, we do have specific  
21 objections to portions of the Staff audit report.

22 And if you'll give me just a moment,  
23 specifically on pages 13 and 14 of the Staff audit  
24 report, there is a lengthy quote from an Associated  
25 Press article about the Kansas Corporation Commission

1 proceedings I believe. And on page 21 there are  
2 lengthy quotes from various reports of individuals who  
3 are not here and available for questioning,  
4 specifically page 21, lines 20 through page 24,  
5 line 33. I believe those are LogOn reports.

6 To the extent they're being offered for  
7 the truth of the matter asserted, they're hearsay that  
8 should not be admitted into this proceeding. And if  
9 counsel wants to clarify that, of course.

10 And if I could -- if you'd like me to, I  
11 could stop there because that's my only hearsay  
12 objection. I have another one after that or would you  
13 like me to give them both and then let Ms. Ott  
14 respond?

15 JUDGE PRIDGIN: If you could give all  
16 your objections, that would be great. Thank you.

17 MR. HATFIELD: Okay. Great. Second  
18 objection is that on pages 8 through 11 there is a  
19 section entitled Prudence. It's labeled as Roman  
20 Numeral III, which is pure legal conclusion. This  
21 section was sponsored by -- or has a name on it that  
22 is Mr. Steve Dottheim. It quotes at length from case  
23 law and purports to give legal conclusions about what  
24 the case law shows. And we would object to the  
25 admission of Section 3. It's very nice briefing, by

1 the way, that is appropriate to be put into a brief  
2 but it's not appropriate to be admitted as testimony.

3           And finally, under the Supreme Court's  
4 holding in the McDonagh case that says that  
5 administrative agencies are -- must make a finding  
6 that expert testimony that's being offered, that the  
7 expert is an expert in the area in which they're  
8 offering an opinion and their analysis that says that  
9 that rule of evidence does apply to administrative  
10 proceedings, it is not a technical rule of evidence,  
11 we would object to page 24, lines 34, through page 25,  
12 line 20, where the Staff offers opinions concerning  
13 decisions of construction projects to fast track a  
14 project.

15           we would object to pages 43, line 3 and  
16 following concerning campus relocation. Specifically,  
17 Judge, at page 44, lines 26 through 27 Staff says that  
18 the reason for the disallowance is due to a design  
19 error. But the Staff person sponsoring that  
20 disallowance is not qualified to offer an opinion and  
21 the Commission may not accept that opinion from that  
22 particular Staff witness.

23           On page 47 there's a section entitled  
24 Construction Resurfacing. The witness who sponsors  
25 that opinion is not qualified to give an opinion on

1 that issue and the Commission may not accept his  
2 opinion on that issue. Specifically that section  
3 claims that the resurfacing which was done for safety  
4 reasons was a cause for a delay. And that would  
5 require an engineer or a safety manager to opine on  
6 whether it was prudent to do the resurfacing.

7           Next, on page 54 there's a discussion of  
8 an Alstom settlement. And the witness who sponsored  
9 that is not qualified to render an opinion on the  
10 prudence of a legal settlement and the Commission is  
11 not authorized to accept his opinion on the prudence  
12 of a legal settlement because he is not an expert in  
13 risk management or in legal principles associated with  
14 settlements.

15           On page 63, similar problem occurs with  
16 the Alstom unit 2 settlement. And we would object to  
17 any opinions on the prudence, reasonableness,  
18 appropriateness or any other opinions on the Alstom  
19 unit 2 settlement for the same reason.

20           And finally on page 78 et seq, there's a  
21 section entitled Schiff Adjustments. And the witness  
22 who sponsors --

23           MR. SCHWARZ: What page?

24           MR. HATFIELD: -- those opinions --  
25 78 and following. The witness who offers those

1 opinions is not qualified to render an opinion on the  
2 market rates or the reasonableness of fees charged by  
3 attorneys in any particular market nor on the  
4 reasonableness of fees charged for project oversight.  
5 I know that was long and I appreciate your Honor's  
6 patience.

7 JUDGE PRIDGIN: Mr. Hatfield, thank you.  
8 And before I have Ms. Ott respond, do you have a cite,  
9 Mr. Hatfield?

10 MR. HATFIELD: On McDonagh? I knew you  
11 were going to ask me that. I can get that to you  
12 still today.

13 JUDGE PRIDGIN: All right. Thank you.  
14 Ms. Ott?

15 MS. OTT: In terms of under the McDonagh  
16 standards, I believe Mister -- those were all in  
17 Mr. Hyneman's section. He's offering an auditing  
18 perspective. The Commission can weigh the credibility  
19 of Mr. Hyneman and determine whether or not his  
20 testimony is appropriate or not and the weight of the  
21 evidence. I don't think at any point we have gone  
22 through and determined specifically who's been an  
23 expert on what issues in this lengthy proceeding.

24 In terms of the -- and I'm trying to keep  
25 all of his objections straight. The Associated Press,

1 that is Associated Press's news article and which can  
2 be out and verified. Again, the Commission can weigh  
3 the credibility of that article and the quotations  
4 within.

5 I'm trying to -- and I don't remember the  
6 second one that he was citing, KCC. I think the  
7 Commission --

8 MR. HATFIELD: AP article and then the  
9 other one was page 21, quoting from LogOn reports, I  
10 believe.

11 MS. OTT: I believe there has been  
12 several people questioned about LogOn throughout this  
13 construction and prudence review. And the -- again, I  
14 think the Commission can weigh the credibility of  
15 Staff's report in making its determination in this  
16 case.

17 JUDGE PRIDGIN: I'm going to overrule the  
18 objections with the understanding that when I'm  
19 provided the cite and when I have time, I'll review  
20 McDonagh. And the Commission may change its mind and  
21 sustain those objections. But for the time being, I'm  
22 going to overrule and admit 205-HC into evidence.

23 (KCP&L Exhibit No. 205-HC was received  
24 into evidence.)

25 JUDGE PRIDGIN: Anything further before

1 Mr. Hyneman stands cross? Mr. Mills?

2 MR. MILLS: No questions.

3 JUDGE PRIDGIN: Mr. Schwarz?

4 MR. SCHWARZ: No questions.

5 JUDGE PRIDGIN: Mr. Hatfield?

6 MR. HATFIELD: Yes. Thank you, Judge.

7 Just a few.

8 CROSS-EXAMINATION BY MR. HATFIELD:

9 Q. Morning, Mr. Hyneman.

10 A. Good morning.

11 Q. You became involved in reviewing the  
12 Iatan 1 and 2 project for prudence sometime after the  
13 conclusions of Cases 2009-0089 and 2009-0090; is that  
14 right?

15 A. I believe it was approximately during the  
16 negotiations -- negotiation discussions that led to  
17 the settlement of that case. I was involved in a  
18 Construction Audit and Prudence Review at the very  
19 beginning stages.

20 Q. Gotcha. So earlier when I was -- were  
21 you here when I was examining Mr. Majors?

22 A. Yes.

23 Q. I referred to the Iatan 1 cases or rate  
24 case. If I -- if I use that term to refer to 0089 and  
25 0090, are we okay? No?

1 A. well, I don't agree with the --

2 Q. All right.

3 A. I mean, the Iatan 1 audit was agreed to  
4 by KCPL to be tried in this current rate case. So  
5 this is the Iatan 1 case --

6 Q. Gotcha.

7 A. -- and the Iatan 2 case.

8 Q. We're doing both Iatan 1 and Iatan 2  
9 here.

10 A. Yes.

11 Q. All right. Are you aware of whether the  
12 Commission -- or whether the Staff was ordered to  
13 complete an audit of Iatan 1 during 0089 and 0090?

14 A. There was a stipulation and agreement  
15 reached --

16 Q. Right now I just need to know if you're  
17 aware?

18 A. Okay. Could you repeat the question?

19 Q. Sure. Are you aware of whether the Staff  
20 was ordered to complete an audit of Iatan 1 during the  
21 0089 and 0090 cases?

22 A. My recollection is that in a discussion  
23 of the stipulation and agreement, that the Commission  
24 in that time period ordered Staff to -- a period  
25 within a few months, I think it was August, to

1 complete the Iatan 1 construction audit, yes.

2 Q. Okay. And then at some point are you --  
3 is it correct to say that the Staff was ordered to  
4 create -- commit -- complete -- you still with me or  
5 did I screw you up?

6 A. I'm with you.

7 Q. Let me start again. Is it your  
8 understanding that at some point the Staff was ordered  
9 to complete a preliminary audit of Iatan 1 by  
10 December 31st of 2009?

11 A. Yes.

12 Q. And were you involved in that preliminary  
13 audit?

14 A. Yes.

15 Q. And the way you got involved in that was  
16 solely based on the fact that you volunteered to be  
17 involved in it. Correct?

18 A. I think we discussed this in my  
19 deposition.

20 Q. We did indeed.

21 A. And my answer I believe at that time was  
22 that the primary reason I was involved because there  
23 was a significant need for me to be involved.

24 Q. All right.

25 A. And it was a case that I volunteered for.

1 Q. All right. Did you tell me in your  
2 deposition that the reason you became involved was  
3 because you volunteered?

4 A. I think that was a reason, but not -- I  
5 think there were two reasons, I believe.

6 Q. Okay. All right. But you were not  
7 selected based on any previous experience you had.  
8 Correct?

9 A. I believe I was.

10 Q. Do you have any -- well, okay. Good.  
11 You don't have any previous experience with  
12 construction auditing. Right?

13 A. Contract administration on construction  
14 projects, yes. But actually auditing a construction  
15 project, no.

16 Q. Okay. So when I asked you if you had any  
17 experience in working in construction and you said no,  
18 you're saying that wasn't right?

19 A. Working in construction, I've never  
20 worked in construction.

21 Q. Okay. You weren't selected based on any  
22 special training you had regarding construction?

23 A. I don't know that.

24 Q. All right. At the time you had not -- at  
25 the time you were selected to work on the preliminary

1 audit, you had not received any training on  
2 construction auditing. Correct?

3 A. Correct.

4 Q. You had not received any training on  
5 constructing -- construction project management.  
6 Correct?

7 A. Correct.

8 Q. Now, after you were selected to work on  
9 the preliminary audit, you realized you needed some  
10 training, didn't you?

11 A. I believe Mr. Schallenberg realized that  
12 I should be getting up to speed on the terms of  
13 project management. And he -- he ordered that I  
14 complete project management training.

15 Q. And you did that by going to St. Louis to  
16 take a two- to three-day training course in project  
17 management. Correct?

18 A. well, initially I took an online course  
19 in project management and completed that.

20 Q. And when was that?

21 A. That would be -- again, it's approximate.  
22 I'm thinking it's in the summer or fall of 2009.

23 Q. Okay. So then in addition to the online  
24 training course, you took a -- you went to St. Louis  
25 and took a two-day training course in project

1 management?

2 A. Correct.

3 Q. Related to construction?

4 A. Yes.

5 Q. And that was in September of 2010?

6 A. Yes.

7 Q. Okay. And up -- and then so that  
8 preliminary audit that we talked about was about the  
9 Iatan 1 section of the Iatan construction projects.  
10 Right?

11 A. Are you talking about the August 6th  
12 report or the December report?

13 Q. Talking about the December 31st -- I  
14 thought we defined that. I'm sorry. December 31st,  
15 2009 report.

16 A. Yes.

17 Q. Do you have a copy of that? You got a  
18 lot of stuff. I bet you do.

19 A. I do have a lot of stuff.

20 Q. Let's take a minute and let you find it  
21 because I do have a couple questions about the  
22 preliminary audit report. I'm looking at the Staff  
23 Report of the Construction Audit, slash, Prudence  
24 Review of Environmental Upgrades to Iatan 1 and Iatan  
25 Common Plant in Case No. ER-2009 and I'm looking at

1 the 0090 version.

2 A. Yes, I have a copy.

3 Q. And just to make our record clear, as I  
4 understand it, there were -- there were -- they were  
5 filed in both cases. Right?

6 A. Yes.

7 Q. The findings are, fair to say,  
8 substantively the same?

9 A. Yes.

10 Q. Maybe some minor differences?

11 A. In amounts.

12 Q. In amounts. Right?

13 A. Yes.

14 Q. Okay. Now, in preparing the -- and let  
15 me make sure I understand now. The Staff report of  
16 the construction audit of Iatan 1 filed on  
17 December 31st, 2009 was related to Iatan 1 only.  
18 Right?

19 A. Iatan 1 and common plant.

20 Q. Okay. And when you did this report, you  
21 had a significant number of documents in order to  
22 prepare this report?

23 A. What are you referring to?

24 Q. Well, had you done a significant amount  
25 of work in preparing the December 31st, 2009 report?

1 A. Yes.

2 Q. All right. You followed the Commission's  
3 directive, right, to work on that expeditiously and  
4 immediately?

5 A. I don't know if that's the terms they  
6 used.

7 Q. I'm paraphrasing.

8 A. I don't know if that is -- that they  
9 referred to any terms to work on it expeditiously.  
10 But in any way, we did work on it expeditiously, but I  
11 don't believe the Commission order said that.

12 Q. When the Commission ordered the Staff to  
13 prepare a preliminary audit, did you delay in any way  
14 in starting to work on the preliminary audit?

15 A. No. Absolutely not.

16 Q. All right. And were you, in fact, able  
17 to produce a preliminary audit on December 31st, 2009?

18 A. Yes.

19 Q. And was that audit in compliance with the  
20 Generally Accepted Accounting Standards?

21 A. Again, as a CPA, if I'm working on an  
22 audit, I comply with Generally Accepted Auditing  
23 Standards.

24 Q. And you did that --

25 A. Yes.

1 Q. -- in preparing this audit?

2 A. This one and the current one, yes.

3 Q. Gotcha. So this audit contains  
4 sufficient evidentiary support within the meaning of  
5 GAAS for all of the findings in the preliminary audit.  
6 Right?

7 A. It would contain sufficient evidence for  
8 the findings consistent with being a -- how you termed  
9 a preliminary audit and consistent with the amount of  
10 documents and evidence that Staff was able to obtain  
11 and make a decision on. Now, with that caveat, we  
12 were not provided with the documents that we needed to  
13 decide the identification of and the amount of any  
14 cost overrun over the definitive estimate. We did not  
15 have that documentation.

16 Q. Gotcha. So when the Generally Accepted  
17 Auditing Standards discuss audit findings -- and I'm  
18 paraphrasing so feel free to correct me if I'm  
19 wrong -- they say that an auditor shall provide  
20 evidentiary support for his findings. Correct? Is  
21 that generally right?

22 A. Yes.

23 Q. And -- and they say that if you cannot  
24 reach conclusions, you should disclose that you could  
25 not reach a conclusion and why; is that right?

1 A. And I believe we did that.

2 Q. Okay. That was my next question. So  
3 thank you very much. Well, let's take a look at --  
4 since you've got the preliminary audit there, you've  
5 got the 0090 version. Right?

6 A. Yes. And I have -- maybe not an official  
7 copy so it may not be exactly lined up with your copy.

8 Q. I bet we can make it work.

9 A. Okay.

10 Q. Let's -- and this may be the issue.  
11 Let's turn to page 6 and tell me if you see a list of  
12 disallowances there.

13 A. Yes, I do.

14 Q. And if you need to refer back to page 5,  
15 please do. But as I understand it, these are a list  
16 of the disallowances that were included and proposed  
17 by Staff in the preliminary audit report filed  
18 December 31st, 2009. Right?

19 A. Yes.

20 Q. And Mr. Hyneman, if we can, I'd like to  
21 do it without referring to specific dollar amounts so  
22 we don't have to go HC, but if we have to refer to  
23 dollar amounts, you let me know and we'll alert the  
24 judge. All right?

25 There is no disallowance in the

1 preliminary audit for cost overruns in excess of the  
2 control budget estimate, is there?

3 A. Not on this page.

4 Q. Where else is it? Show me which page  
5 it's on.

6 A. I think -- and again, I don't know where  
7 the page is, but I think there was a description that  
8 staff was unable to find the information and it wasn't  
9 I think making adjustment at this time. Because we  
10 were going to continue and hopefully we could reach  
11 some resolution with KCPL about the regulatory plan  
12 stipulation and that it would provide the documents in  
13 accordance with that stipulation and agreement. And  
14 KCPL never provided that documentation.

15 So at this time we were hopeful that we  
16 would resolve that issue so we did not make a specific  
17 adjustment in this report.

18 Q. Okay. We're going to get to the  
19 documents thing in a minute. Let me make sure I  
20 understand your last answer because it might save me a  
21 couple questions. In the December 31st, 2009 report,  
22 you did not recommend any disallowance because of  
23 unidentified or unexplained cost overruns above the  
24 definitive estimate; is that right?

25 A. Again, in the preliminary nature of the

1 report, we did not assign a dollar value. The Staff  
2 was hoping that this issue about KCPL complying and  
3 providing documents that identify and describe any  
4 cost overrun of over the definitive estimate, that we  
5 would get that information.

6 Q. Sure.

7 A. So we decided at that time not to make  
8 the specific dollar adjustment. And that was -- only  
9 came when we were forced to in the November report  
10 that we just -- we had to make the adjustment.

11 Q. Who forced you?

12 A. Well, nobody forced -- it was --

13 Q. I'm sorry. I thought you said somebody  
14 forced you.

15 A. I'm sorry. It was a bad term. We were  
16 forced into the situation by KCPL.

17 Q. I see.

18 A. Yes.

19 Q. All right. Well, we're going to get to  
20 that a little later. Right now I just want to talk  
21 about what happened December 31st, 2009. I think you  
22 said a minute ago you weren't able to identify a  
23 specific number for the cost overruns?

24 A. I didn't say that.

25 Q. You didn't? Well, the record will be

1 what it will be.

2 All right. Let's go back to page 5 for a  
3 minute in the preliminary report. And let's look at  
4 line 3. It says, At this time Staff is proposing that  
5 approximately \$60 million --

6 THE COURT REPORTER: I'm sorry; 60 or 16?

7 MR. HATFIELD: Sixty. I know it's a big  
8 number, isn't it?

9 BY MR. HATFIELD:

10 Q. Six-zero million dollars of the cost  
11 overruns be examined in conjunction with the Staff's  
12 audit of Iatan 2 overruns.

13 Did I read that correctly?

14 A. Yes.

15 Q. And that was Staff's position in the  
16 preliminary audit?

17 A. Yes.

18 Q. So you were able to identify that there  
19 were \$60 million of cost overruns as of your filing  
20 December 31st, 2009. Right?

21 A. Well, with the caveat that we -- we could  
22 not identify whether any of those overruns were  
23 charged to the contingency reserve, but on the  
24 assumption that they were not in the contingency and  
25 they were cost overruns, that is the dollar amount

1 that we --

2 Q. I missed that in the report. You'll have  
3 to help me. Tell me where it talks about the  
4 contingency reserves in the preliminary audit report.

5 A. I can't at this time identify the  
6 location.

7 Q. But you believe it's in there somewhere?

8 A. Yes. I mean the contingency reserve has  
9 been exceeded so -- so the dollar amount above the  
10 definitive estimate, which includes the contingency  
11 reserve, is a certain dollar amount.

12 Now, our Staff adjustments that we made  
13 based on imprudence, inappropriate costs, unreasonable  
14 costs were made. I don't believe we can identify if  
15 each -- if any of those costs or a portion of those  
16 costs were charged to reserve contingency. But  
17 they -- they in and of themselves were determined to  
18 be inappropriate, unreasonable or imprudent.

19 Q. Okay. I'm just talking about the  
20 preliminary audit right now.

21 A. Yes.

22 Q. Is that what you just meant? The answer  
23 you just gave, did that relate to the preliminary  
24 audit, December 31st, 2009?

25 A. That's what my memory is, yes.

1 Q. So somewhere in here there's a discussion  
2 of the contingency and the charges to the contingency?  
3 Somewhere in the preliminary audit report. That's  
4 what you're telling the Commission?

5 A. I didn't make that statement.

6 Q. Okay.

7 A. You asked me if -- I said all of these  
8 adjustments listed on page 6.

9 Q. Yes, sir.

10 A. Now were any of those costs charged to  
11 the contingency? I -- I can't say if it was or was  
12 not.

13 Q. You'd have to see contingency logs to  
14 know that?

15 A. I would have to see documents that --  
16 that -- that state whether appropriate charges should  
17 be charged to the contingency and if, in fact, they  
18 were charged to the contingency.

19 Q. Gotcha.

20 A. And if the document listed a cost  
21 overrun, you know, to show that those costs were above  
22 the definitive estimate including the contingency,  
23 then I will know that those charges were not in the  
24 contingency. That documentation was not available.

25 Q. I understand. Now, let's stay on page 5

1 for just a minute. The line 4 in the December 31st,  
2 2009 report says, while Staff is not proposing a  
3 disallowance of the Iatan 1 AQCS cost overruns not  
4 identified or explained by the change management  
5 system, Staff cannot recommend inclusion of these  
6 amounts without justification -- without  
7 identification and corresponding examination.

8 Did I read that correctly?

9 A. Yes.

10 Q. So when Staff completed the audit in  
11 December 31st, 2009 -- preliminary audit, Staff was  
12 not proposing a disallowance for the cost overruns?

13 A. Let me reread the statement.

14 Q. Please do.

15 A. Yes. And I believe this section of the  
16 report was drafted by Mr. Schallenberg.

17 Q. I believe you're correct.

18 A. Okay. So I think he would be a better  
19 witness to address this, but I can tell what it means  
20 to me.

21 Q. If I need to know that, I'll let you  
22 know. Thank you very much for offering.

23 So Staff made a decision that it was not  
24 appropriate to recommend a disallowance in this  
25 preliminary audit report. Correct?

1           A.     I don't see the word "not appropriate" in  
2 there.

3           Q.     I don't either. I'm asking you.

4           A.     No. I -- I'm not sure it would not be  
5 appropriate. We decided -- in my understanding of the  
6 adjustment, we could have made an adjustment at this  
7 time. However we, by this report alerted the KCPL and  
8 subsequent other times that we could not identify and  
9 had no description of any cost overrun above the  
10 definitive estimate. And this report notified them  
11 clearly.

12                     And we decided that we still had time on  
13 the audit to get the documentation, to satisfy  
14 ourselves whether these costs were reasonable, prudent  
15 or excessive and then in our final audit make a  
16 determination. We weren't ready to close the door or  
17 make a dollar adjustment at this time because, as you  
18 noted, this was a preliminary audit.

19           Q.     This is the one that was supposed to be  
20 completed December 31st. Right?

21           A.     I -- I can't recall if this one was -- if  
22 the Commission allowed us to continue in this rate  
23 case. I can't recall at this time.

24           Q.     All right. Okay. Let's go to page 6 now  
25 and take a look at the disallowances that were

1 recommended in the December 31st, 2009 report. There  
2 is a -- now, I think we're going to need to compare it  
3 to Exhibit 205-HC, which is the current -- what I call  
4 the current Staff construction audit. Exhibit 205-HC  
5 Ms. Ott has handed you up there and it's the  
6 Construction Audit and Prudence Review for the Iatan  
7 construction project for costs reported as of  
8 June 30th, 2010. Do you have that document?

9 A. Did she -- did she hand me a document?

10 Q. Well, she marked it. I don't know if she  
11 handed it to you. I'm sorry. I wasn't watching.

12 A. Is this the document that's in the  
13 November 3rd report?

14 Q. Yes. That's it. And we also handed out  
15 a little earlier -- I don't know if it's still up  
16 there. Mr. Dottheim prepared a very helpful  
17 demonstrative exhibit in the opening. It's a legal  
18 sheet like this that has disallowances.

19 A. Yes. And I have that document somewhere  
20 in this report.

21 Q. You know, that's the easiest thing to do.  
22 What I want to do is I want to compare the  
23 disallowances in the preliminary audit to the  
24 disallowances in the November 3rd audit. So if you  
25 can get the charts that we need to do that, that would

1 be great.

2 A. To the November report, do you have a  
3 reference on what page that's on?

4 Q. Be Schedule 1-1 and 1-2 are probably the  
5 easiest ones to refer to.

6 A. Okay. I have those.

7 Q. Okay. Cool.

8 MS. OTT: Your Schedule 1 is  
9 Mr. Schallenberg's case history.

10 BY MR. HATFIELD:

11 Q. Do you have a list of the proposed  
12 disallowances for the Construction Audit and Prudence  
13 Review that was filed by the Staff on November 3rd,  
14 2010?

15 A. Yes.

16 Q. Okay. So in the preliminary audit, we  
17 talked about the unidentified/unexplained. I'm just  
18 going to tell you the second largest one after that in  
19 the final audit is the Alstom settlements. would you  
20 agree?

21 A. For unit 1?

22 Q. Yes, sir, for unit 1 only.

23 A. Yes.

24 Q. All right. So on the Alstom settlements,  
25 where are those in the preliminary audit report that

1 was filed December 31?

2 A. would be number six.

3 Q. Number six. And there's a number there  
4 on number six. Correct?

5 A. Yes.

6 Q. And again, I don't want to say the  
7 numbers so we can stay out of HC. In the November 3rd  
8 report, that number doubles, doesn't it?

9 A. well, it's a separate adjustment. The  
10 number does not double.

11 Q. Okay.

12 A. It's a completely separate adjustment in  
13 the November report.

14 Q. Good clarification. So number six in the  
15 preliminary audit report matches which one on the  
16 November 3rd report?

17 A. The document I have doesn't have a  
18 number, but it's referred to as KCPL's July 18th, 2008  
19 Alstom settlement, unit 1.

20 Q. All right. And on Mr. Dottheim's  
21 exhibit, that's labeled as Issue 41, I believe. He's  
22 got --

23 A. I don't have that exhibit with me.

24 Q. All right. So that one is on the  
25 preliminary report and it's on the final report.

1 Right?

2 A. Yes.

3 Q. And it went up \$2 million from

4 December 31st until now?

5 A. The reason --

6 Q. How did that happen?

7 A. -- for that change and -- I think it  
8 changed by 10 percent change. I don't know exactly  
9 sitting here what the reason for that change was, yes.  
10 But it did go up \$2 million.

11 Q. That Alstom settlement adjustment, that's  
12 one you're responsible for in the report. Right?

13 A. Yes.

14 Q. Okay. Then there's another one for  
15 Alstom entitled Alstom Settlement, Forgone Liquidated  
16 Damages --

17 A. Yes.

18 Q. -- in the November 3rd report. Correct?

19 A. Correct.

20 Q. And on December 31st, 2009, you did not  
21 make a recommendation to disallow that item, did you?

22 A. In the preliminary report, correct.

23 Q. Why not?

24 A. Well, it's -- the decision to make that  
25 adjustment was not arrived at at that time. Further

1 evidence, further discussion that continued on during  
2 the audit led staff to conclude that that would be an  
3 appropriate adjustment.

4 Q. Okay. So that -- that's a settlement  
5 that occurred on July 18th of 2008. Right?

6 A. Yes.

7 Q. And you looked at that settlement in your  
8 December 31st, 2009 preliminary audit. Correct?

9 A. Yes.

10 Q. You had all the settlement documents you  
11 needed to make an adjustment related to the  
12 settlement?

13 A. No, we did not.

14 Q. Okay. So in the December 31st, 2009  
15 report when you recommended to this Commission they  
16 disallow a number, you did not have sufficient  
17 documents to make that recommendation?

18 A. Well, we had sufficient documents to make  
19 the recommendation to the Commission. We did not have  
20 sufficient documents to -- to understand each and  
21 every component of why KCPL arrived at that  
22 settlement. And Mr. Roberts sat here and explained to  
23 the Commission the reasons and the communication with  
24 Jonathan Marks, the mediator, all these reasons why it  
25 entered into the settlement.

1           And the Staff in its -- in its attempt to  
2 obtain that information was told it could not under  
3 the privilege of mediator/client privilege. So we --  
4 we sought access on numerous occasions to get  
5 documents to describe the reasons for the settlement  
6 and to get an understanding of it. We were prohibited  
7 from that. Yet Mr. Roberts in this hearing was able  
8 to go on and on about that evidence that Staff never  
9 had access to.

10           So did we have all the evidence we wanted  
11 to gain an understanding of the adjustment?

12 No. Did we have the evidence that we determined were  
13 appropriate to make the adjustment? Yes.

14           Q.     Okay. You had enough evidence to say  
15 disallow some of it at the time?

16           A.     I think that was a total settlement, was  
17 that number?

18           Q.     So did you obtain -- I think you're  
19 saying you did not obtain any additional evidence  
20 after that. Is that what you're saying? KCPL  
21 wouldn't give you any additional evidence about it?

22           A.     KCPL refused to give us any documentation  
23 related to how that settlement number was arrived at  
24 between KCPL and Alstom.

25           Q.     Okay.

1 A. Yes.

2 Q. So did you obtain additional evidence  
3 after December 31st, 2009 related to the Alstom  
4 settlement?

5 A. Are you -- are you talking about the  
6 Alstom settlement adjustment or the liquidated  
7 damages?

8 Q. I'm -- are there two different  
9 settlements?

10 A. There are two different adjustments.

11 Q. I know there are two different  
12 adjustments.

13 A. Which adjustment are you referring to?

14 Q. All right. Let's try it this way. Since  
15 you brought up the refusal, are you aware of whether  
16 Judge Stearley has reviewed -- well, let me ask this  
17 way: You asked for documents communicating with  
18 Mr. Marks. Correct?

19 A. Correct.

20 Q. And you asked for those about three weeks  
21 ago; is that fair?

22 A. I -- I think we've asked on two or three  
23 occasions going back a period of months and were  
24 refused that data each and every time.

25 Q. Okay. That's fair. And was that dispute

1 taken to Judge Stearley?

2 A. I don't recall.

3 Q. Okay. So it's not important for you to  
4 know that?

5 A. No, it's very important.

6 Q. Okay.

7 A. However, we had numerous disputes with  
8 KCPL on data and I didn't have time to track down and  
9 follow through on each -- I had to conduct the audit.  
10 And the discovery issues were handled by our general  
11 counsel's office. I know it was referred to, it was a  
12 significant problem, having data not available to make  
13 an audit conclusion. All the information available.

14 Our general counsel's office handled that  
15 issue and KCPL and Judge Stearley. And -- and -- and  
16 I can't recall if that determination has been made  
17 yet. But I do know that Mr. Roberts had no  
18 reservations about discussing that information to the  
19 Commission in this case.

20 Q. All right. I agree with you  
21 wholeheartedly. Thanks for volunteering that for us.

22 Okay. So you said there were significant  
23 problems related to production of documents and we  
24 talked about that in your deposition. Right?

25 A. I don't recall if we did.

1 Q. well, those are all related to  
2 attorney/client privilege assertions, aren't they?

3 A. I think they're related to  
4 attorney/client, mediation and even auditor/client.

5 Q. Privilege?

6 A. Yes.

7 Q. All right. And you are aware that at  
8 least some of those issues are being dealt with or  
9 have been dealt with in a process where Judge Stearley  
10 is serving as a special master; is that right?

11 A. Yes.

12 Q. And you're aware that Judge Stearley has  
13 upheld the privilege in the vast majority of those  
14 cases, hasn't he?

15 A. Do you want my opinion on that?

16 Q. I want you to know -- whether you're  
17 aware that he's upheld the privilege?

18 A. I believe he has upheld the privilege on  
19 a substantial number of documents.

20 Q. And -- and I guess you're getting ready  
21 to offer me an opinion on whether you think that was  
22 the right thing for him to do? Is that what you're  
23 getting ready to do?

24 A. I'm going to say I think Judge Stearley  
25 acted properly --

1 Q. Oh, good.

2 A. -- when he was referring to a document  
3 between an attorney and a client. The problem is, a  
4 lot of that documents were from Schiff Hardin.  
5 Technically he -- Mr. Roberts is an attorney, but he  
6 was very involved in the development of contingency,  
7 the project controls, a lot of the information that  
8 staff needed to perform the audit. And it was very  
9 difficult because he's an attorney he could use the  
10 privilege.

11 And -- and Judge Stearley and I'm not --  
12 I'm not an attorney, don't want to even get into the  
13 area, but he -- he acted on that -- that information.  
14 Was Mr. Roberts an attorney? Was this a communication  
15 between KCPL and Mr. Roberts? I believe that's how  
16 Judge Stearley approached it.

17 Q. You're not an attorney?

18 A. No, I'm not.

19 Q. All right. You're not offering an  
20 opinion on whether the invocation of attorney/client  
21 privilege was proper?

22 A. No.

23 Q. All right. You're not offering an  
24 opinion on whether the invocation of mediator  
25 privilege was proper?

1 A. No.

2 Q. All right. Okay. I'm trying to remember  
3 where we were. So at any rate, the December 31st,  
4 2009 audit of Iatan 1 did not include a disallowance  
5 related to foregone liquidated damages on Alstom.  
6 Right?

7 A. Correct.

8 Q. The -- there are some adjustments related  
9 to Schiff Hardin which you've just mentioned.  
10 Correct?

11 A. Correct.

12 Q. And between December 31st, 2009 and the  
13 final audit report, those dollar amounts went down,  
14 didn't they?

15 A. Let's see. One adjustment, number four,  
16 was slightly down --

17 Q. Okay.

18 A. -- on the work scope adjustment. The  
19 expense adjustment was increased. So I would say --

20 Q. Wait. Stop at work scope adjustment for  
21 a minute. What did you say about that one? Actually  
22 I don't see that.

23 A. No, that --

24 Q. So you recommended a work scope  
25 adjustment in December of 2009, but you're not

1 recommending that any longer?

2 A. I believe in the updated report it didn't  
3 have a specific work scope adjustment.

4 Q. Okay. So no work scope adjustment now?

5 A. In this current case, yes.

6 Q. Okay. In December 31st you thought there  
7 should be a work scope adjustment of approximately  
8 \$400,000, but you've changed your mind?

9 A. I didn't change my mind.

10 Q. Okay.

11 A. When you're approaching an audit and  
12 this --

13 Q. That's okay. Let's move on to the other  
14 one. So what's the next one then? The -- there's  
15 a -- I only see -- oh, out-of-pocket expense  
16 adjustment, number three?

17 A. For expense adjustment, correct. That  
18 one increased.

19 Q. That one increased. So is that because  
20 there were expenses charged to Iatan 1 after the  
21 period when you completed the audit? Is that what  
22 happened?

23 A. I would assume that's correct, yes.

24 Q. Okay. What else?

25 A. Do you have a question?

1 Q. well, was there a legal services rate  
2 adjustment in the December 31st, 2001 --

3 A. I think the terminology --

4 Q. -- or 2009?

5 A. -- used in the November report was  
6 different than the terminology used -- and I've got to  
7 go back to December '09. The December '09 report may  
8 be more -- adjustment was comprehensive, and they were  
9 broken out separately in the November report. I think  
10 that is what it indicates.

11 Q. Gotcha. All right. So the November --  
12 I'm sorry. The December 31st, 2009 audit of Iatan 1  
13 had no adjustment for Pullman, P-u-l-l-m-a-n.  
14 Correct?

15 A. Correct.

16 Q. Had no adjustment related to Cushman.  
17 Correct?

18 A. I don't see a Cushman adjustment.

19 Q. Had no adjustment related to KCC Staff  
20 audits. Correct?

21 A. I don't see that on this page.

22 Q. Okay. So from December 31st, 2009 until  
23 this current audit that was filed November 3rd, the  
24 Staff adjustments have, fair to say, doubled?  
25 Disallowance have doubled for Iatan 1 in total?

1 A. I -- are you including the disallowance  
2 for the unexplained unidentified costs?

3 Q. Well, I'm just looking at your total.  
4 I'm on page 6 of the preliminary audit report. Total  
5 proposed adjustments and there's a number there. Do  
6 you see it? Please don't say it out loud.

7 A. On page 6, yes.

8 Q. And I'm suggesting that when you compare  
9 that to the current proposed adjustments for Iatan 1,  
10 the current proposed adjustments are double the amount  
11 found for Iatan 1 in the December 31st, 2009 audit?

12 A. Yes. And I think substantially all of  
13 that increase was related to two adjustments.

14 Q. And those two adjustments are the  
15 unidentified and unexplained cost overruns?

16 A. Correct.

17 Q. And the Alstom foregone liquidated  
18 damages?

19 A. Correct.

20 Q. Okay. Between December 31st, 2009 when  
21 staff filed its preliminary audit, Kansas City -- and  
22 now, Kansas City Power and Light has not changed its  
23 cost control system, has it?

24 A. I do not know.

25 Q. Okay. You're not testifying that any --

1 so that's -- that's good. That helps us. That saves  
2 some questions. You're not here to tell the  
3 Commission that after you did the audit that you filed  
4 December 31st, 2009, they changed the way they were  
5 tracking costs?

6 A. I know they did not change their cost  
7 control document.

8 Q. That's what I'm asking.

9 A. Yes. I don't believe there are any  
10 changes to that.

11 Q. Okay. Now, let me just ask you a couple  
12 of questions about the -- the Alstom disallowance in  
13 the preliminary audit. It's -- it's a round number.  
14 Right?

15 A. Yes.

16 Q. And that's not the exact amount that was  
17 paid to Alstom, is it?

18 A. No, it is not.

19 Q. Okay. Okay. Let's talk just a little  
20 bit about your involvement with this audit then that  
21 we're talking about in this particular case. Now,  
22 prior to becoming involved, as we discussed, in  
23 auditing the construction on this project, you had  
24 never read other construction audits, had you?

25 A. I believe I have.

1 Q. Did you tell me in your deposition that  
2 you'd never read another construction audit before you  
3 became involved?

4 A. I've read testimony of Mr. Elliott and  
5 Mr. Featherstone that includes sections related to I  
6 think the Hawthorn 5 review, maybe an Empire review.

7 Q. I might have asked a bad question. I'm  
8 saying prior to becoming involved in this. Before you  
9 became involved in this case, had you ever read  
10 construction audits?

11 A. I really can't recall if I have prior or  
12 not.

13 Q. All right. Did you tell me before that  
14 you had not read an audit?

15 A. I may have. And I can't recall so maybe  
16 that's --

17 Q. Okay. But you're not aware of any  
18 national guidance on how to conduct a construction  
19 audit. Right?

20 A. I don't believe there exists such a  
21 document.

22 Q. And so similarly when I asked you if  
23 there were any authoritative sources on how to conduct  
24 a construction audit, you said you weren't aware of  
25 any. Right?

1           A.     Yes.  And I've researched the topic and I  
2 think there do not exist any nationally accepted  
3 authoritative standards on construction audits.

4           Q.     Okay.  So you don't know if the  
5 construction audit that you were involved in and you  
6 sponsor is conducted in a way similar to the way  
7 others conduct construction audits.  Right?

8           A.     Yes.

9           Q.     Yes, you -- I asked a double negative.  I  
10 hate when I do that.  So do you know whether the way  
11 you conducted your construction audit is the same way  
12 others conduct construction audits?

13          A.     It's the same way others conduct audits.  
14 I haven't seen an audit report of another construction  
15 audit that -- and matched that up with ours to see if  
16 it's similar.

17          Q.     I'm sorry.  I don't mean to be difficult.  
18 If you haven't seen any others, how do you know it's  
19 the same way others do it?

20          A.     I didn't say I've never seen any others.

21          Q.     Okay.  You don't know if you rely on the  
22 same things other experts rely on in reaching the  
23 conclusions in a construction audit report.  Right?

24          A.     Could you be more specific?

25          Q.     I don't think I can.

1 A. Can you repeat the question?

2 Q. You don't know whether you relied on the  
3 same evidence that other experts rely on when they  
4 reach their conclusions in construction audits?

5 MS. OTT: Objection, speculation.

6 JUDGE PRIDGIN: Overrule. I'll let him  
7 answer if he knows. If he doesn't know, he can say  
8 so.

9 THE WITNESS: I believe I do. I mean we  
10 try to get as much evidence as we can to formulate our  
11 opinions. And we -- we've gotten evidence we believe  
12 form the basis of our conclusions.

13 BY MR. HATFIELD:

14 Q. Have you previously told me that you  
15 don't know whether you rely on the same evidence that  
16 others rely on when they conduct construction audits?

17 A. I don't know specifically if I do, but I  
18 believe in general terms, I would.

19 Q. So don't know if you -- specifically if  
20 you do rely on the same things?

21 A. Right.

22 Q. All right. Similarly on a -- on a --  
23 similarly on a prudence review, you don't know what  
24 other experts rely on when they do a prudence review,  
25 do you?

1           A.     I have read the testimony of Dr. Nielsen  
2 and I understand what he relies on.

3           Q.     And does he rely on the same data and  
4 evidence you rely on?

5           A.     No.

6           Q.     And is that the only -- the only other  
7 prudence review you've looked at?

8           A.     Yes.

9           Q.     So other than Dr. Nielsen, you don't know  
10 whether, in reaching your conclusions on prudence,  
11 you're relying on the same data and evidence that  
12 other experts would rely upon in reaching their  
13 conclusions on prudence?

14          A.     Specifically, no. In general terms, I  
15 believe I would, but specifically, no.

16          Q.     Okay. Gotcha. Now, I think we -- I  
17 think you may have covered this just a minute ago, but  
18 just to be clear, you're not aware of any -- any  
19 authoritative sources on how to conduct a construction  
20 audit. Right?

21          A.     I do not believe they exist.

22          Q.     All right. So then why in the  
23 construction audit did you cite to -- does the Staff  
24 cite to a source on construction audits?

25          A.     Can you refer to -- me to that cite?

1 Q. I can and I will. On page 12, the  
2 bottom -- the bottom of the page if our pagination is  
3 the same in the --

4 A. And I believe I don't have a copy of that  
5 specific report. I have the schedule -- you're  
6 talking about the November?

7 Q. Yes, sir. The November 3rd.

8 MR. HATFIELD: Could we just give him  
9 that?

10 THE WITNESS: Yes.

11 BY MR. HATFIELD:

12 Q. So now in the audit that you've sponsored  
13 with your testimony, there's a reference to The  
14 Construction Audit Guide: Overview Monitoring  
15 Auditing by Denise Cicchella; is that correct?

16 A. Yes.

17 Q. And so that's not an authoritative source  
18 on how to conduct a construction audit, is it?

19 A. This section on risk assessment is  
20 sponsored by Mr. Schallenberg.

21 Q. I know.

22 A. And I believe he could address that  
23 further, but I don't believe this is an authoritative  
24 source --

25 Q. Gotcha.

1 A. -- on how to do a construction audit.

2 Q. Gotcha.

3 A. And when I speak of authoritative source,  
4 I mean like some generally accepted principles or  
5 guidelines.

6 Q. Now, did you quote from this book at all  
7 in your testimony --

8 A. I don't believe --

9 Q. -- in your sections?

10 A. I don't believe I did.

11 Q. Okay. Let me ask you about that source  
12 that's quoted in the -- in the testimony.

13 MR. HATFIELD: Can I approach the  
14 witness, Judge?

15 JUDGE PRIDGIN: You may.

16 BY MR. HATFIELD:

17 Q. I'm handing you a book that says  
18 Construction Audit Guide: Overview Monitoring and  
19 Auditing, Denise Cicchella, CIA, CFE. Have you seen  
20 that before?

21 A. Yes.

22 Q. And where have you seen it?

23 A. I obtained a review of that.

24 Mr. Schallenberg owns a copy of this book.

25 Q. So you've seen this one before. Correct?

1 A. Yes. Yes.

2 Q. Did you review the qualifications of the  
3 author of this book?

4 A. I may have. I can't recall.

5 Q. Can you just READ the About the Author  
6 section from that book for the record?

7 A. Yes. Denise --

8 MR. HATFIELD: It's not terribly long,  
9 Judge.

10 THE WITNESS: All three paragraphs?

11 BY MR. HATFIELD:

12 Q. If you don't mind. Thank you.

13 A. Okay. About the Author: Denise  
14 Cicchella, CIA, CFE, NESD securities representative,  
15 is a senior auditor for MetLife and has  
16 responsibilities for audits and investigations related  
17 to mergers and acquisitions, records management,  
18 facilities and services and construction.

19 She has been employed by MetLife for over  
20 five years in the field of -- in the field  
21 investigation unit of auditing. Denise has worked in  
22 the financial services industry for over 15 years.  
23 She has experience in commercial and residential  
24 lending, REIT portfolios and syndicated loans, among  
25 others. She has friends and families who have been

1 involved with construction and her early exposure and  
2 experience helped her develop the knowledge she shares  
3 in this handbook.

4           Please note that names, amounts,  
5 locations and other specifics given in this handbook  
6 may have been altered to protect the confidentiality  
7 of the companies' vendors and other interested  
8 parties.

9           Q.     Thank you.

10           MR. HATFIELD:   Judge, I'm getting ready  
11 to move to a slightly different line of questioning.  
12 Just alert you to that in light of the time.

13           JUDGE PRIDGIN:   I understand. I'm  
14 assuming you still have quite a bit of --

15           MR. HATFIELD:   I do, sir.

16           JUDGE PRIDGIN:   All right. This looks to  
17 be then a pretty convenient time to break for lunch  
18 and let me --

19           COMMISSIONER KENNEY:   Can I ask a quick  
20 question?

21           JUDGE PRIDGIN:   Commissioner Kenney, yes,  
22 sir.

23           COMMISSIONER KENNEY:   The document  
24 Mr. Hatfield was just having the witness read, what --  
25 what is that?

1 MR. HATFIELD: I'll let you do it, Judge,  
2 since you've got a mic.

3 JUDGE PRIDGIN: Commissioner Kenney, it  
4 is a booklet entitled Construction Audit Guide:  
5 Overview Monitoring and Auditing.

6 COMMISSIONER KENNEY: Is it evidence?

7 JUDGE PRIDGIN: It has not been offered.  
8 Not yet.

9 COMMISSIONER KENNEY: Okay. All right.  
10 Thank you.

11 JUDGE PRIDGIN: You're welcome. All  
12 right. I do want to continue to work with the parties  
13 on scheduling to make sure that we've got witnesses  
14 coming and going and we can keep going. So can we do  
15 that off the record?

16 MS. OTT: Yes.

17 JUDGE PRIDGIN: All right. If there's  
18 nothing else from counsel, we will adjourn for lunch.  
19 We will resume at 1:15. We're off the record.

20 (A recess was taken.)

21 JUDGE PRIDGIN: All right. We are back  
22 on the record. I believe Mr. Hyneman was still  
23 undergoing cross-examination from Kansas City Power  
24 and Light. Is there anything from counsel before he  
25 resumes?

1 MR. STEINER: Judge, you had indicated  
2 about next witnesses.

3 JUDGE PRIDGIN: Yes. Is it -- I'm sorry.  
4 Go ahead.

5 MR. STEINER: We had been anticipating  
6 having a short break to talk about some settlement  
7 offers that were floating around. And I think if we  
8 get done with this issue today, that might be a good  
9 time to stop and have that meeting with the parties.

10 JUDGE PRIDGIN: So what I'm hearing is  
11 assuming we get done with Mr. Hyneman and  
12 Mr. Schallenberg today, that would be a good time for  
13 you to talk?

14 MR. STEINER: That's what I'm proposing,  
15 that's correct.

16 JUDGE PRIDGIN: And I think Mr. Mills had  
17 mentioned earlier about maybe you -- parties meeting  
18 some time in the morning. And while I was thinking, I  
19 thought the same thing you proposed, Mr. Steiner. If  
20 we get done today, is today as good or better time to  
21 do that?

22 MR. MILLS: Yes.

23 JUDGE PRIDGIN: So perhaps with the  
24 understanding that that would be time well spent --  
25 and I don't know how long examination will take, but

1 how about if Mister -- if Mr. Hyneman and Schallenberg  
2 are finished today, we'll talk, but I mean, I see no  
3 problem, especially if the parties consent that, you  
4 know, knocking off for the day and giving you time to  
5 talk. And if you need additional time in the morning,  
6 I'd listen to that as well.

7 MR. STEINER: Right. I think Mr. Gorman  
8 has to go up so we probably would start him at 8:30  
9 tomorrow on the ROE issue. But we could certainly  
10 talk after that as well.

11 JUDGE PRIDGIN: Certainly. Then let's  
12 just leave it with the understanding that more than  
13 likely if we finish Mr. Schallenberg, Mr. Hyneman  
14 today, that that would be the end of evidence today.

15 MR. STEINER: That's fine.

16 JUDGE PRIDGIN: Anything further before  
17 Mr. Hatfield continues? All right. Mr. Hyneman, you  
18 are still under oath, sir.

19 THE WITNESS: Yes.

20 JUDGE PRIDGIN: Mr. Hatfield, when you're  
21 ready, sir.

22 MR. HATFIELD: Thank you, Judge.

23 BY MR. HATFIELD:

24 Q. Mr. Hyneman, when we started this  
25 proceeding it seems like a long time ago now, I think

1 Mr. Featherstone was one of the first to join us. And  
2 I believe he said, kind of paraphrasing, that  
3 sometimes when you do a construction audit, you don't  
4 even know what the budget is. Do you agree with that?

5 A. No. I have no reason to agree with that.

6 Q. Okay. So is the budget important when  
7 you're doing a construction audit?

8 A. Yes.

9 Q. And so when Mr. Drabinski said that he  
10 doesn't think the definitive estimate or the control  
11 budget estimate should be a starting point for any  
12 deductions, do you agree with that?

13 A. I would say the starting point for  
14 deduction is the actual cost incurred. That's the --  
15 that's what you start and then you compare the budget.  
16 And then you determine cost overruns. And once you  
17 determine cost overruns, then you make evaluations  
18 whether the costs were appropriate.

19 Q. And are you saying that's generally how  
20 you should conduct a construction audit?

21 A. Simplified, you look at everything. You  
22 look at all costs, whether costs to -- charged to the  
23 direct cost of construction, procurement, indirects.  
24 You look at costs charged to contingencies and you  
25 look at cost overruns.

1 Q. Okay.

2 A. But the budget is critical in determining  
3 cost overruns.

4 Q. So then is the budget critical  
5 information in order for an auditor to perform a  
6 construction audit?

7 A. It's critical for an audit -- auditor to  
8 determine cost overruns over a budget, yes.

9 Q. Right. I mean you can't have an overrun  
10 unless you know what it's an overrun to --

11 A. Correct.

12 Q. -- that's what you're saying?

13 A. Yes.

14 Q. So if you're trying to determine what's  
15 an overrun, you got to have a budget?

16 A. Yes.

17 Q. You got to know which budget you're  
18 working from?

19 A. Yes.

20 Q. Do you agree that construction  
21 projects -- a given construction project could  
22 sometimes have more than one budget?

23 A. I know that KCPL has several updates to  
24 their budget.

25 Q. And I think you told me that it is not

1 your opinion that reforecasting the budget was  
2 imprudent. Right?

3 A. That's correct.

4 Q. Okay. Nothing inherently wrong with  
5 setting a different budget?

6 A. No.

7 Q. All right. Now, when Mr. Drabinski said  
8 he doesn't believe there is a relationship between  
9 cost estimates and budgets as to whether the costs  
10 were prudently incurred, do you agree with that?

11 A. I don't know what he was referring to as  
12 far as cost estimates.

13 Q. All right. Well, let me just ask it this  
14 way: Do you agree that a cost could be imprudently  
15 incurred even though it was within the budget?

16 A. Yes.

17 Q. And do you agree that a cost could be  
18 prudently incurred even though it exceeds a budget?

19 A. Yes.

20 Q. All right. Just a couple more questions  
21 about Mr. Drabinski. Now, as I understand it, you  
22 attended Kansas Corporation Commission hearings; is  
23 that correct?

24 A. Yes.

25 Q. And Mr. Dottheim attended as well?

1 A. Yes.

2 Q. And you met Mr. Drabinski there in

3 Topeka, Kansas; is that correct?

4 A. Yes.

5 Q. Had you met him before that?

6 A. No.

7 Q. And you went to lunch with him during

8 those hearings a couple of times at the Cracker

9 Barrel; is that right?

10 A. My recollection is one. Mr. Dottheim's

11 recollection is two. So I would defer to his and say

12 it is likely there were two.

13 Q. He has a good memory.

14 A. Yes, he does.

15 Q. I will admit that. How many days were

16 you in Topeka, Kansas?

17 A. I believe it was six.

18 Q. Didn't go to lunch with Kansas City Power

19 and Light Staff. Right?

20 A. Was not invited.

21 Q. Were you invited by Mr. Drabinski?

22 A. I think so.

23 Q. So Mr. Drabinski approached you; is that

24 right?

25 A. We talked in the hearing room and we were

1 talking one day and it could have been he that  
2 suggested we eat or me to go out for lunch. There's a  
3 restaurant right near the Commission building and we  
4 were both going to go there so we said, Let's go to  
5 lunch.

6 Q. Okay. Let me ask you a different way  
7 then now that you've clarified that. Did you suggest  
8 to any of the Kansas City Power and Light personnel  
9 that they go to lunch with you?

10 A. No.

11 Q. Did you go to lunch with Mr. Nielsen?

12 A. I don't -- I had a brief discussion with  
13 Mr. Nielsen later on in the week, but no.

14 Q. Okay. Did anybody -- did either you or  
15 Dr. Nielsen suggest that you should go to lunch?

16 A. No.

17 Q. Did you have lunch with anybody on the  
18 KCC Staff?

19 A. No.

20 Q. Did either you or KCC Staff suggest that  
21 you have lunch?

22 A. I don't know if the attorney for  
23 Mr. Drabinski was present when we discussed lunch, if  
24 he was there and he couldn't make it. That could have  
25 happened. I just don't recall.

1 Q. And the -- so you -- when you had lunch  
2 with Mr. Drabinski, the point of that was -- I'm  
3 sorry, not the point. One of the things that was  
4 discussed at that lunch was whether the Missouri Staff  
5 would like to hire Mr. Drabinski. Correct?

6 A. Not that I recall.

7 Q. Did you tell me in your deposition that  
8 that was one of the topics of discussion?

9 A. I don't believe so.

10 Q. We'll come back to that in a minute.  
11 After you left Topeka, Mr. Drabinski sent you an  
12 e-mail. Correct?

13 A. Yes.

14 Q. And that was because he was interested in  
15 having the Staff of the Missouri PSC hire him.  
16 Correct?

17 A. I think he asked if there were any  
18 discussions about whether the Commission was going to  
19 retain him or not. I think that's my recollection of  
20 the e-mail.

21 Q. Did he -- did he e-mail you directly  
22 then?

23 A. Yes.

24 Q. And in that e-mail he said, Has a  
25 decision been made on my testifying in Missouri.

1 Correct? That's what he said?

2 A. To that effect. I trust that's correct  
3 reading of it, yes.

4 Q. would it refresh your recollection if I  
5 were to show you a document that contains his e-mail?

6 A. That -- I believe that's what he said.

7 Q. Okay. And did he also say, what is your  
8 time frame for testimony and hearings?

9 A. Again, I'm going to have to look at the  
10 e-mail to refresh my memory of that.

11 Q. Yeah, that's fine. why don't you just go  
12 ahead and read what he said. It's very short. Just  
13 read what Mr. Drabinski wrote to you in that e-mail.

14 MR. SCHWARZ: I'm going to object. I  
15 don't understand either the relevance nor the  
16 materiality of this line of questions which may just  
17 reflect a limitation on my understanding, but I'd  
18 still like it explained.

19 JUDGE PRIDGIN: Mr. Hatfield?

20 MR. HATFIELD: I think it goes to the  
21 credibility of Mr. Drabinski's testimony, among other  
22 things, but it also goes to the issue of expert  
23 testimony. The Staff has actually recommended  
24 disallowances based, in part, on Mr. Drabinski's  
25 testimony and it's on the disallowance list.

1 JUDGE PRIDGIN: I'll overrule.

2 BY MR. HATFIELD:

3 Q. Just read for us what Mr. Drabinski  
4 e-mailed to you. Can you give us the date, just --

5 A. Yes. The date was Tuesday,  
6 September 7th, 2010. It says, Chuck, it was great  
7 meeting you at the Kansas hearing. I was glad to be  
8 off the stand to get home after two-plus weeks in  
9 Topeka. Has a decision been made on my testifying in  
10 Missouri? What is your time frame for testimony in  
11 hearings? I have to take some vacation this winter  
12 and need to set dates soon. Feel free to call. Walt  
13 Drabinski.

14 Q. And you responded to that e-mail; is that  
15 correct?

16 A. Yes.

17 Q. And on what date did you respond?

18 A. The following day, September 8th.

19 Q. And what was your response, please?

20 A. Says, Walt, it was great to meet you in  
21 Topeka. I thought you did a great job. Have you  
22 not -- have not heard any discussions and do not think  
23 any consideration has been made of going out -- going  
24 outside on Iatan 2. It is still a possibility though  
25 and I will let you know if and when I find something

1 out. Good luck on your current and future engagements  
2 and I hope we meet again.

3 Q. Thank you. Let me get that back from  
4 you.

5 Now, in the Construction Audit and  
6 Prudence Review that you sponsor in this case, the  
7 November 3rd Construction Audit and Prudence Review,  
8 you don't draw a distinction between the portion of  
9 the document that is the construction audit and the  
10 portion that's the prudence review -- prudence review,  
11 do you?

12 A. No.

13 Q. And you've said that it's really not  
14 possible to separate out what was construction audit  
15 and what was prudence review?

16 A. Yes.

17 Q. And do you agree with Mr. Drabinski that  
18 a prudence review is not a performance audit within  
19 the meaning of Generally Accepted Accounting  
20 Standards?

21 A. Yes.

22 Q. Do you agree that what Dr. Nielsen  
23 conducted was a prudence review?

24 A. No.

25 Q. Did you in your deposition agree that

1 what Dr. Nielsen conducted was a prudence review?

2 A. I may have. And subsequently, I've read  
3 more closely the GAGAS standards and where he  
4 certified that he performed his audit under GAGAS  
5 which doesn't have the word "prudence" in the whole  
6 GAGAS statement. So there is no prudence statement  
7 under GAGAS so I don't know how he could have  
8 completed one under GAGAS.

9 Q. Let me ask you about that then. So you  
10 agree that you told me in your deposition that you  
11 thought what he did was a prudence review?

12 A. Yes.

13 Q. And so you're saying that after you told  
14 me that like December of this year -- or last year --

15 A. Yes.

16 Q. -- December of '10, after you told me  
17 that, you went and looked at the GAGAS standards?

18 A. It was -- yes, sometime recently I took  
19 the time to look over GAGAS. And I think maybe in a  
20 review of Dr. Nielsen's testimony --

21 Q. Okay.

22 A. -- just to see some points. And came to  
23 the conclusion that GAGAS doesn't address prudence  
24 audits.

25 Q. Okay. And GAGAS again is the

1 government --

2 A. Generally Accepted Government --

3 Q. -- Generally Accepted Government --

4 A. I believe the title is Governmental

5 Auditing Standards.

6 Q. Auditing Standards?

7 A. Yes.

8 Q. Generally Accepted Government Auditing

9 Standards?

10 A. I believe that's correct.

11 Q. And you had not looked at those before

12 the deposition in December of 2009 [sic]. Right?

13 A. Not very closely, no.

14 Q. Didn't -- didn't think it was important

15 to look at GAGAS standards as to what they said about

16 prudence reviews?

17 A. First of all, GAGAS statements apply only

18 to government entities, which KCPL is not, or entities

19 that are receiving government funds, which KCPL does

20 not. So GAGAS technically doesn't apply to an audit

21 of KCPL. And if you can -- I think there's another

22 part of that.

23 Q. Actually that -- that's more than I

24 asked.

25 A. Okay.

1 Q. So thank you very much. Okay. All  
2 right. Let me ask you about now -- when we started  
3 the proceeding, there were some opening statements.  
4 And Mr. Schwarz I think told the Commission that there  
5 were some red herrings in this case. Did you happen  
6 to hear Mr. Schwarz's opening statement?

7 A. No.

8 Q. All right. Let me just put -- let me ask  
9 you this way then. Do you agree that the issue of  
10 fast tracking is a red herring in this case?

11 A. Define "red herring."

12 Q. Oh, good. Yeah. I was going to do that.  
13 why don't you tell me? When somebody says the word  
14 "red herring," what do you think that means?

15 A. That it's something to distract, not  
16 important. Just a distraction, something that's not  
17 substantive.

18 Q. Yeah, I agree. That's the way I meant to  
19 use the term. Thank you.

20 A. Okay.

21 Q. So do you agree the issue of fast  
22 tracking is something that's meant to distract and is  
23 not important?

24 A. No.

25 Q. Okay. So you think it is, in fact,

1 important?

2 A. Yes.

3 Q. So in your -- the audit that you sponsor,  
4 do you discuss the issue of fast tracking?

5 A. I believe Mr. Schallenberg does, yes.

6 Q. You don't discuss the issue of fast  
7 tracking?

8 A. I may have. I don't recall sitting here  
9 right now.

10 Q. All right. Well, let's look at page -- I  
11 have 38, but that's wrong. Hold on. If you find it  
12 before I do, let me know.

13 MS. OTT: What document are you in?

14 MR. HATFIELD: The Construction Audit and  
15 Prudence Review of November 3rd.

16 BY MR. HATFIELD:

17 Q. Let's look at page 24 --

18 A. Okay.

19 Q. -- line 26.

20 A. Starting with, Thus, by --

21 Q. Yes, sir.

22 A. Yes.

23 Q. So the audit report says, Thus, by  
24 November 1st, 2006, all the conditions were in place  
25 for the Iatan project to experience cost overruns as

1 by this date, the Iatan project was being fast  
2 tracked, end quotes, to meet KCPL's experimental  
3 alternative regulatory plan Iatan project completion  
4 date of June 1st, 2010. Right?

5 A. Yes.

6 Q. Tell me which disallowance is as a result  
7 of the decision to fast track.

8 A. I think it -- it's -- provides part of  
9 the evidence for several adjustments. And it could be  
10 part of the basis, the supporting evidence for the  
11 Alstom settlements. And I'd have to go through the  
12 list, but the fast track decision -- I think Ernst &  
13 Young --

14 Q. well, let's do it because that's my  
15 question.

16 A. Okay.

17 Q. which ones are -- which disallowances do  
18 you recommend as a result of fast tracking?

19 A. And I could start -- part of the  
20 unidentified/unexplained disallowance, it could be a  
21 substantial portion of that.

22 Q. And I'm not interested in could be. I'm  
23 interested in from you as the sponsor of the audit,  
24 which disallowances are you making because Kansas City  
25 Power and Light made the decision to fast track?

1           A.     Okay.  But I want to be clear.  The  
2 unidentified/unexplained disallowances reflect  
3 overruns that are not identified or explained.  The  
4 fast tracking decision that KCPL made with an  
5 inexperienced project management team could have  
6 caused substantial cost overruns that are embedded in  
7 that adjustment.

8           Q.     Let's stop with that one because I do  
9 want to let you finish your answer and list them all  
10 for me.  But could have caused those overruns.  Right?

11          A.     Yes.

12          Q.     Is that what you -- you don't know  
13 whether they did or not?  Whether fast tracking caused  
14 those overruns or not?

15          A.     I think that's the point of the  
16 adjustment.  KCPL did not provide the data to -- for  
17 the staff to make that assessment.

18          Q.     Yes, sir.  I'm just trying to pin down  
19 whether it's your opinion that fast tracking caused  
20 the unidentified and unexplained cost overruns.  Did  
21 fast tracking cause them?

22          A.     Fast tracking was a decision KCPL made.

23          Q.     Yes.

24          A.     The results of which were -- fast -- KCPL  
25 was advised by Ernst & Young that if they're going to

1 fast track, they need to have a highly experienced  
2 project management team in place. It is the Staff's  
3 position that KCPL did not and we provide evidence in  
4 this hearing to that effect.

5 Now, when you fast track a project with  
6 engineering going --following the procurement, there  
7 are a lot of problems that come up with that and cost  
8 based on a design -- an engineering design that is not  
9 at a definitive estimate level. And those costs that  
10 are incurred based on fast tracking cause -- led to  
11 cost overruns and -- and other adjustments in the  
12 Staff's filing.

13 Q. Okay. I'm going to try it one more time  
14 and then I'll ask the judge to ask you -- order you to  
15 answer the question one way or another.

16 A. Okay.

17 Q. Do you have an opinion that the decision  
18 to fast track is what caused the cost overruns that  
19 are listed as unidentified and unexplained?

20 A. My opinion is it is very likely that at  
21 least a portion of that was caused in part by fast  
22 tracking.

23 MR. HATFIELD: I'm sorry to do this,  
24 Judge. Can I ask the court reporter just to read it  
25 back what he answered? Is that all right?

1 JUDGE PRIDGIN: Certainly.

2 MR. HATFIELD: Thank you.

3 THE COURT REPORTER: "Answer: My opinion  
4 is it is very likely that at least a portion of that  
5 was caused in part by fast tracking."

6 BY MR. HATFIELD:

7 Q. Is that your only opinion related to  
8 whether fast tracking led to unidentified and  
9 unexplained cost overruns?

10 A. Fast tracking in part is likely a cause  
11 of a portion of those amounts.

12 Q. And is that your only opinion?

13 MS. OTT: Objection, asked and answered.

14 JUDGE PRIDGIN: I'll overrule.

15 MR. HATFIELD: Actually, Judge, I guess  
16 I'd ask you to order him -- or direct him please to  
17 answer my question as to whether he has already given  
18 us his only opinion.

19 JUDGE PRIDGIN: I think what he's trying  
20 to get at, Mr. Hyneman, is do you think -- well, I  
21 don't want to ask the question for him. Can you --  
22 can you ask your question again, Mr. Hatfield?

23 MR. HATFIELD: well, the question --

24 JUDGE PRIDGIN: I think I know the point  
25 you're trying to make. I just don't want ask your

1 question for you.

2 BY MR. HATFIELD:

3 Q. Yeah. The question I'm on right now,  
4 Mr. Hyneman, I just want to make sure you've had an  
5 opportunity -- if you have opinions that fast tracking  
6 had an effect on these cost overruns that you've said  
7 in your report are unidentified and unexplained, I  
8 want to give you an opportunity to share with the  
9 Commission all of your opinions about whether fast  
10 tracking led to those unidentified and unexplained  
11 cost overruns. I thought you had, but then you  
12 offered a little more so I just wanted to make sure.

13 A. My opinion is that it is likely that they  
14 did.

15 Q. Okay. Now, did you tell me in your  
16 deposition that the Staff was not recommending any  
17 disallowances as a result of the decision to fast  
18 track?

19 A. No adjustments were proposed solely based  
20 on KCPL's decision to fast track the construction  
21 project, the procurement. That is not a sole basis  
22 for any adjustment that I'm aware of.

23 Q. Okay. And you used the past tense so I  
24 just want to make sure I understand today. You're not  
25 proposing any disallowances based solely on the

1 decision to fast track?

2 A. That's correct.

3 Q. All right. Now, I want to make sure I  
4 let you answer the question because we took a little  
5 bit of a detour. I asked you to list for us all of  
6 the disallowances that are the result of the decision  
7 to fast track. And I think we got hung up a little on  
8 unexplained cost overruns because I interrupted you.

9 So are there other disallowances that you  
10 would like to identify that were the result of the  
11 decision to fast track?

12 A. Okay. In my answer I'll say that they --  
13 they were not direct cause that I'm aware of. They're  
14 a part of the reasons. Whenever you have construction  
15 activity and procurements commence without design  
16 being in a definitive estimate level, which is roughly  
17 75 to 80 percent, the fast tracking decision was made  
18 I believe based on a 25 percent engineering level.  
19 And by definition, the project wasn't designed at a  
20 high level when the procurement and the construction  
21 was taking place. So that is a part of some of the  
22 reasons that -- that could have led to the  
23 adjustments.

24 For example --

25 Q. I don't want for example. I'd like you

1 to list, please, the disallowances that are a  
2 result -- are made as a result of the decision to fast  
3 track.

4 A. Okay. In part, the Alstom settlement.  
5 Because of the design --

6 Q. Wait. Just go ahead and list them and  
7 then we'll come back and we can explain them.

8 A. The Alstom settlement for Iatan 1 and  
9 Iatan 2.

10 Q. Okay. The Alstom settlement for Iatan 1  
11 is disallowed as a result of the decision to fast  
12 track?

13 A. I said the fast track decision --

14 Q. For Iatan 1?

15 A. -- with an inexperienced project  
16 management team is, in part, some basis of the  
17 adjustment.

18 Q. Okay. What else?

19 A. Iatan 2 settlement.

20 Q. Okay. And what else?

21 A. It could be the campus relocation for the  
22 unit 2 turbine build.

23 Q. Again, I'm not looking for could be.

24 A. Again, the fast track decision was not a  
25 direct cause. We're not directly relating that to a

1 specific adjustment.

2 Q. Gotcha.

3 A. The fast track decision with an  
4 inexperienced project management team caused problems  
5 with contractor performance down the line based on  
6 doing work with specifications and design that wasn't  
7 fully complete. And --

8 Q. And?

9 A. And that's -- you know, it's a part of a  
10 basis. When I made the adjustment, I didn't say I'm  
11 making this adjustment and -- because a decision was  
12 fast tracked. It was a decision by KCPL to fast track  
13 the project without an experienced project management  
14 team.

15 That was an underlying decision which  
16 indicates problems could be -- additional costs could  
17 be incurred down the line. And I think that's one of  
18 the accepted facts with fast tracking is you could  
19 have potential costs incurred down the line because  
20 the design is not at a level where it -- it -- the  
21 project is substantially complete before costs are  
22 incurred.

23 Q. You just hit it on the head, so let's go  
24 to that for just a minute. So in the disallowances,  
25 you didn't specifically list in each one that you've

1 identified, Alstom, you didn't say it's partially as a  
2 result of fast tracking --

3 A. No.

4 Q. -- did you?

5 A. No.

6 Q. So when the Commission ordered you to  
7 specifically identify the rationale for each and every  
8 disallowance, you followed that order. Right?

9 A. Yes.

10 Q. Okay. So in your audit report if there's  
11 not -- in the disallowance for Alstom if you didn't  
12 say we did it because of fast tracking, then that  
13 wasn't one of your reasons, was it?

14 A. Well, I think the section on fast  
15 tracking was written by Mr. Schallenberg and he would  
16 be more of a witness to talk about that issue. I'm  
17 saying I am aware that under fast tracking, that one  
18 of the potential risks with fast tracking a project,  
19 especially one the size of Iatan construction project,  
20 is that you have a risk of higher costs being incurred  
21 because the design is not at a level where it is -- it  
22 is substantially complete. I think that's commonly  
23 accepted.

24 Now, KCPL fast tracked the project to  
25 meet its June 1st date. It did not have an

1 experienced project management team in place and it  
2 did incur significant costs that the Staff believes  
3 were related, in part, from the decision to fast  
4 track. Now, it did not tie a specific adjustment to  
5 the fast tracking decision.

6 Q. I think I understand. Thank you. Now,  
7 you talked about the decision to fast track. You  
8 still got page 24 there?

9 A. Yes.

10 Q. And I think you made some reference to  
11 it. Well, you see -- you said Mr. Schallenberg wrote  
12 this section. So do you not sponsor this portion  
13 of -- are you not sponsoring the whole audit?

14 A. I don't know what you mean by "sponsoring  
15 the whole audit."

16 Q. Well, I thought your testimony filed in  
17 this case said that you were the Staff's sponsor of  
18 this audit report.

19 A. I am sponsoring the adjustments to KCPL's  
20 cost of service.

21 Q. Okay. So you're not sponsoring this  
22 section on page 24?

23 A. This section was written by  
24 Mr. Schallenberg. I think he could testify to the --  
25 to the accuracy of this section.

1 Q. I see that. I -- identifies it by name.  
2 I guess I'm just wondering if you're sponsoring this  
3 part of the report or not?

4 A. This part of the report is sponsored by  
5 Mr. Schallenberg.

6 Q. And in what testimony filed with this  
7 Commission did Mr. Schallenberg sponsor this?

8 A. Well, we -- we sponsor Staff's work in  
9 reports now. Like in the Staff's rate case, we filed  
10 a report. We don't file testimony. Similar to here,  
11 we filed a report, not testimony, in our direct  
12 filing. So it's -- we made a change from filing  
13 direct testimony sponsoring adjustments to filing  
14 reports and that's what Mr. Schallenberg is sponsoring  
15 in this section in the report.

16 Q. Okay. I apologize for my confusion on  
17 that. Now, on line 33 there, let me just ask you  
18 about the report. Line 33 generally -- well, can you  
19 read line 33 where it says -- beginning with,  
20 Generally.

21 A. Through.

22 Q. And -- yeah, just -- just there.

23 A. How far?

24 Q. Just starting with -- just read that  
25 first sentence there starting with, Generally.

1 A. Generally with fast tracking, the  
2 construction project term is shorter. The ultimate  
3 goal is to complete to a tight deadline and budget  
4 issues tend to be secondary.

5 Q. And do you agree with that?

6 A. Yes.

7 Q. And how do you know that?

8 A. well, for one example, the Hawthorn 5  
9 construction project.

10 Q. No. Just --

11 A. That's how I know it.

12 Q. You know it from Hawthorn 5?

13 A. That's part of the reason.

14 Q. Okay. Great.

15 A. Hawthorn 5 was a fast --

16 Q. Let me -- let me ask you on -- we showed  
17 you before the Construction Audit Guide: Overview  
18 Monitoring and Auditing?

19 A. Yes.

20 Q. would you just read from the sentence  
21 beginning, Generally?

22 MS. OTT: what page are you on?

23 BY MR. HATFIELD:

24 Q. Go ahead and let her know what page  
25 you're looking at.

1 A. Page 49.

2 Q. Would you just read sentence that begins,  
3 Generally?

4 A. Generally the construction project term  
5 is shorter. The ultimate goal is to complete a tight  
6 deadline and budget issues tend to be secondary.

7 Q. Thank you. Now, would you read here the  
8 primary benefits in the section I've highlighted down  
9 to the -- where it says, Made.

10 A. The primary benefits of fast tracking are  
11 reducing planning lead times and allowing parallel  
12 execution of tasks. Fast track projects are harder to  
13 monitor and plan and may result in errors when  
14 incorrect assumptions are made.

15 Q. Now, would you turn to the Staff report,  
16 page 24, line 35 and pick up the sentence that begins,  
17 The primary benefits of fast tracking and read that,  
18 please.

19 A. Can I read that for just a second?

20 Q. No.

21 A. I want to get a understanding of this  
22 sentence. Is that --

23 Q. Right now I just need you to read from  
24 the audit. Then we'll go back and read another  
25 sentence.

1 A. Okay.

2 Q. Read from the audit report, please, page  
3 24, line 35, The primary benefits.

4 A. The primary benefits of fast tracking  
5 are; one, reduce planning lead times; and two,  
6 parallel execution of tasks.

7 Q. Okay. So you'll agree that the wording  
8 in this book is identical to the wording in Staff's  
9 report. Correct?

10 A. No.

11 Q. Okay.

12 A. They're not identical.

13 Q. All right. Thank you. Yeah. Can you go  
14 ahead and just keep reading where -- in the Staff  
15 report there, Fast tracked projects. Keep reading.

16 A. Fast track projects are harder to oversee  
17 and plan and may result in errors when incorrect  
18 assumptions about engineering design are made.

19 Q. Now, will you read this sentence that  
20 begins, Fast track projects.

21 A. Fast track projects are harder to monitor  
22 and plan and may result in errors when incorrect  
23 assumptions are made.

24 Q. All right. So is it fair to say that  
25 that discussion of fast tracking and the benefits,

1 et cetera come from the construction and audit guide  
2 that we referred to earlier?

3 A. Well, the audit says that fast track  
4 projects are harder to oversee and that says monitor.  
5 They're -- I mean overseeing and monitoring I don't  
6 think are synonomous.

7 Q. Completely different words.

8 A. I don't think they're completely  
9 different, but they're not synonomous.

10 Q. All right. would you agree that the  
11 concept there comes pretty closely from the  
12 construction audit guide that we read earlier?

13 A. The concept, yes.

14 Q. And at least major phrases out of that  
15 are identical to what appear in this book?

16 A. I would say so, yes.

17 Q. All right. Now, you said a couple of  
18 times in discussing the fast track decision that  
19 Kansas City Power and Light made the decision to fast  
20 track without an experienced management team.  
21 Correct?

22 A. Experienced project management team,  
23 correct.

24 Q. And you did not ask Mr. Elliott, the  
25 Staff engineer, for an opinion on whether this was an

1 experienced management team, did you?

2 A. Staff relied on the expertise of KCPL's  
3 auditor, Ernst & Young, in part, to make that decision  
4 and did its own discovery in that matter.

5 Q. So does that mean you did talk to the  
6 Staff's own engineer about whether the project  
7 management team was experienced?

8 A. I did not.

9 Q. Okay. In fact, you didn't talk to  
10 Mr. Elliott about this audit at all, did you?

11 A. Oh, yes, I did.

12 Q. Okay. We'll come back to that. You also  
13 made a judgment that there was not an experienced  
14 engineering team, didn't you?

15 A. No.

16 Q. Do you have your deposition in front of  
17 you?

18 A. I have it available.

19 Q. Great. Would you turn to page 227,  
20 please.

21 A. I'm there.

22 Q. Now, you were deposed in this matter on  
23 December the 9th of 2010; is that right?

24 A. Yes.

25 Q. And at that time you answered questions

1 for me under oath; is that right?

2 A. Yes.

3 Q. And you understood that that deposition  
4 might be used in this proceeding; is that correct?

5 A. Yes.

6 Q. And would you turn to -- I'm sorry, it's  
7 page 229.

8 A. I'm there.

9 Q. Lines 16 did I ask you, And you also  
10 say -- or you say also fast tracking demands very high  
11 quality work from the owner's engineer. Now, do you  
12 have an opinion on the quality of the engineer's work?

13 Did I ask you that?

14 A. Yes.

15 Q. And what was your answer?

16 A. The answer was yes.

17 Q. Okay. And your opinion on the quality of  
18 the expert of the owner's engineer was based on the  
19 findings from Ernst & Young; is that correct?

20 A. Supported by the finding of Alstom Power,  
21 Inc. and their issues with Burns and McDonnell, yes.

22 Q. Okay. When I followed up with the  
23 question and I said, I thought you told me you weren't  
24 an expert on engineering, what was your response?

25 A. I am not -- my response was -- you said,

1 okay. So it's not -- you're not offering an expert --

2 Q. Before that, please, line 22.

3 A. My opinion is based on the findings from  
4 documents I reviewed from Ernst & Young.

5 Q. Okay. So let's go ahead if you think  
6 this is important. I said, Okay. So it's not --  
7 you're not offering an expert opinion?

8 You said?

9 A. No, I didn't.

10 Q. And I said, On that issue. Right?

11 A. Yes.

12 Q. And you said?

13 A. Look at the design and say that this  
14 design is poor.

15 Q. Yes.

16 A. KCPL hired experts in construction to do  
17 that, to analyze the quality of work provided by Burns  
18 and Mac. The Burns and Mac contract audit performed  
19 by KCPL, GP internal services and Ernst & Young found  
20 major problems with the quality of work by Burns and  
21 Mac. I have no reason to disagree with that. That's  
22 evidential support.

23 Q. All right. Did you ask Mr. Elliott to  
24 give any input on the quality of work of the owner's  
25 engineer when you prepared this audit and made your

1 conclusions about fast tracking?

2 A. No.

3 Q. Why not?

4 A. I don't know that -- that Mr. Elliott

5 looked at the quality of work from Burns and

6 McDonnell.

7 Q. Is that the only reason you didn't ask  
8 him for input on the quality of work from the owner's  
9 engineer?

10 A. That -- that is my answer sitting here  
11 today.

12 Q. Okay.

13 A. If I knew he did an evaluation of the  
14 quality of work of Burns and McDonnell, I would have  
15 asked his opinion.

16 Q. Okay. Now, a few moments ago I was  
17 asking you about unidentified cost overruns and the  
18 comparing that to the budget. And you mentioned a  
19 definitive estimate --

20 A. Yes.

21 Q. -- do you recall that?

22 And I think you gave us some  
23 understanding of what a definitive estimate is.  
24 Right?

25 A. Yes.

1 Q. Now, you told me in your deposition that  
2 you consider yourself an expert on interpreting  
3 contract terms. Right?

4 A. Yes.

5 Q. All right. So when you're trying to  
6 figure out from a contract what the intent of the  
7 parties to the contract is, what's the first step you  
8 would take to figure out what words mean?

9 A. I would look at documentation supporting  
10 the entering into the contract.

11 Q. Okay. As an expert on the meaning of  
12 contract terms, as you told me in your deposition,  
13 would you look at the plain and ordinary meaning of  
14 the language in the contract?

15 A. Yes.

16 Q. And in this case in arriving at your  
17 opinions concerning whether costs exceeded the  
18 definitive estimate, did you look up the dictionary  
19 definition of the word "definitive"?

20 A. I may have.

21 Q. What did you find?

22 A. I can't recall.

23 Q. Did you look up the dictionary definition  
24 of the word "estimate"?

25 A. I don't think so.

1 Q. Okay. would you agree that generally the  
2 ordinary meaning of the word "definitive" is  
3 containing some level -- sorry, containing a high  
4 level of precision?

5 A. Yes.

6 Q. And would you agree that one ordinary  
7 meaning of the word "estimate" is a rough guess?

8 A. No.

9 Q. Okay. Is guess synonymous with estimate?

10 A. I don't believe it is.

11 Q. All right. why don't you give us your  
12 understanding of the plain and ordinary meaning of the  
13 word "estimate"?

14 A. when you're making an estimate, for  
15 example, of a budget, that estimate is based on  
16 knowledge of the components of it. You're estimating  
17 all these things and -- for a budget based on your  
18 knowledge of the cost of the work. You're estimating  
19 that the budget will be this amount.

20 Q. Okay.

21 A. Not a guess.

22 Q. when you estimate my weight, be fair to  
23 say you're guessing my weight, wouldn't it?

24 A. well, based on observations, yes, but  
25 I --

1 Q. So would you agree with me that the  
2 phrase "definitive estimate" is an oxymoron? You  
3 can't have a definitive estimate?

4 A. No. Definitive is a qualifier to the  
5 estimate. Definitive estimate in my understanding is  
6 the highest estimate that you can have for a  
7 construction project.

8 Q. Okay.

9 A. I haven't seen anything -- definitive  
10 estimate -- I think Mr. Roberts said it's like  
11 75 percent of the engineering complete he -- and he  
12 advised KCPL that they should not call their budget a  
13 definitive estimate. So I would say it's the highest  
14 level of a budget estimate that you could have.

15 Q. All right. Regardless of what the  
16 meaning is, for purposes of the regulatory plan, Staff  
17 has agreed to allow Kansas City Power and Light to  
18 substitute the control budget estimate for the  
19 definitive estimate. Correct?

20 A. When you say allowed to substitute --

21 Q. Yes.

22 A. -- I don't know what that means.

23 Q. You don't?

24 A. No.

25 Q. That's a vague and ambiguous term to you?

1           A.     I don't know that Staff took a position  
2 that they notified KCPL we are allowing you to  
3 substitute -- and first of all, this is a regulatory  
4 plan agreement that the Staff can't arbitrarily allow  
5 KCPL. I mean it's a document I believe that's a  
6 contract among several parties. And I don't -- I'm  
7 not a lawyer, but I don't believe Staff can  
8 arbitrarily say, Okay, we'll accept your CBE as a  
9 substitute for definitive estimate. I don't believe  
10 they can do that. And I don't think that they have  
11 done that.

12           Q.     Okay. So you don't think that Staff has  
13 allowed KCPL to substitute its control budget estimate  
14 for a definitive estimate within the meaning of the  
15 regulatory plan?

16           A.     Well, I do know that on August 1st, 2006,  
17 that the budget was -- should have been completed.  
18 And I know it wasn't completed until substantially  
19 later than that, six months. And I know that KCPL is  
20 saying that Staff's to blame for that. But during  
21 that period of time when a definitive estimate was due  
22 and the time it was done, Staff would be of the  
23 opinion that that estimate would be a very high  
24 quality.

25           Q.     And you can speak for Staff on that?

1 A. Yes.

2 Q. All right. Did Kansas City Power and  
3 Light ever send you any data requests?

4 A. Yes.

5 Q. How many?

6 A. Twenty-six.

7 Q. All right. Let me show you -- I don't  
8 think we need to mark it, but is this a copy of a data  
9 request that you answered in response to one of Kansas  
10 City Power and Light's 26 data requests?

11 A. Yes.

12 Q. And when did you answer this data request  
13 generally? Sometime last month maybe?

14 A. Yes.

15 Q. All right. would you section -- and you  
16 answered this data request; is that right?

17 A. It was reviewed by general counsel's  
18 office and I believe Mr. Schallenberg, but I wrote the  
19 answers, yes.

20 Q. And these are your answers? That's all  
21 I'm trying to understand.

22 A. Yes.

23 Q. All right. would you read -- there's a  
24 small B there sort of about a third of the way down  
25 beginning with, Identify the specific paragraph.

1 A. Yes.

2 Q. Would you read that question for us,  
3 please?

4 A. Identify the specific paragraph, section  
5 and verbiage that staff relies upon in the regulatory  
6 plan that states KCPL must provide Staff with such a  
7 list.

8 Q. And would you read your response, please?

9 A. When KCPL says such a list,  
10 quote/unquote, I am making the assumption that is  
11 referring to, quote, list with an adjoining  
12 explanation of such overruns on the same sheet of  
13 paper or consecutive sheets of paper, unquote.

14 The regulatory plan, page 28, requires  
15 KCPL to identify and explain any cost overrun above  
16 the definitive estimate. The Staff agrees with Schiff  
17 Hardin assessment that KCPL did not create a  
18 definitive estimate. However, the Staff has agreed to  
19 rely KCPL to substitute this control budget estimate  
20 for definitive estimate for the purpose of this  
21 requirement.

22 Q. Okay. So when you said in this DR  
23 response, The Staff has agreed to allow KCPL to  
24 substitute its control budget estimate for a  
25 definitive estimate for the purposes of this

1 requirement, the "this requirement" was the regulatory  
2 plan. Right?

3 A. No. For the requirement to -- the staff  
4 is calculating cost overruns. We're not saying it's a  
5 substitute for the requirement to create a definitive  
6 estimate, but we're saying that's all we have as a  
7 budget to calculate cost overruns. So we used the  
8 1.685 number, the control budget estimate number, as  
9 the basis to calculate the staff's unidentified and  
10 explained [sic] cost overrun adjustment.

11 Q. All right. Gotcha. Well, we read in the  
12 exact answer. You read it in correctly. Right?

13 A. I believe I did.

14 Q. All right. And just to make sure I  
15 understand what -- what you said a minute ago, that  
16 answer that you provided there was reviewed by  
17 Mr. Schallenberg. Correct?

18 A. Yes.

19 Q. Was reviewed by staff counsel's office.  
20 Correct?

21 A. Correct.

22 Q. Before it was sent out --

23 A. Yes.

24 Q. -- to Kansas City Power and Light? Thank  
25 you.

1 well, let's -- let just stay on that one  
2 for a minute because that was -- I had a couple of  
3 questions about that. I think we already covered  
4 this, but in response to question 3, I believe you  
5 indicated, I have not performed a construction  
6 prudence audit prior to the Iatan 1 construction  
7 prudence review and construction audit.

8 And that's correct, isn't it?

9 A. That's correct.

10 Q. All right. would you turn to question 6,  
11 please.

12 A. Yes.

13 Q. Question 6 reads on page 87 of, quote,  
14 Staff's Construction Audit and Prudence Review of  
15 Iatan construction project for costs reported as of  
16 June 30th, 2010, end quote. Staff states that, quote,  
17 Staff first looked at the legal fees and para--  
18 paralegal fees charged by two Kansas City area law  
19 firms hired by KCPL to perform legal work related to  
20 the Iatan construction projects, end quotes.

21 Please provide any work papers related to  
22 this statement and please identify which two firms are  
23 referenced and the type of legal work they were  
24 performing for the Iatan construction projects.  
25 Right?

1 A. Correct.

2 Q. And you did not provide any response to  
3 explain the type of legal work that the two firms were  
4 conducting for the Iatan construction projects, did  
5 you?

6 A. No.

7 Q. Some-- sometimes when a DR response  
8 comes, it just doesn't get thoroughly answered.  
9 Right?

10 A. Correct.

11 Q. And -- and in this case you did that. In  
12 good faith though you were answering the question,  
13 weren't you?

14 A. Yes.

15 Q. All right. And there were no work papers  
16 related to that review?

17 A. No. The invoices were work papers.

18 Q. You have no work papers related to your  
19 review of the Sonnenschein, Nath and Rosenthal legal  
20 fees or the Farley Law Office legal fees. Right?

21 A. Right.

22 Q. All right. Let's just stay with this  
23 document. I'm jumping around topics a little bit, but  
24 I think this will move things a little quicker.

25 In question 8 we had some questions about

1 your Schiff Hardin adjustments generally. And let me  
2 just ask you -- and if we need to, we can look at the  
3 DR responses because I want to make sure we understand  
4 where the Schiff Hardin adjustments are. You're not  
5 suggesting -- or are you, that Schiff Hardin worked  
6 too many hours on the project?

7 A. Yes, I am.

8 Q. Okay. which disallowance is that?

9 A. well, if you see in the Staff's  
10 December of 2009 report, Staff made a work -- work  
11 adjustment hours.

12 Q. Uh-huh.

13 A. In the -- in the November report, the  
14 Staff updated its adjustment, it reviewed the data and  
15 it -- I decided -- I didn't have the time and effort  
16 to go back and substantiate and bring forward that  
17 adjustment. So I made a decision that my adjustment  
18 will be restricted to legal fees, construction  
19 management fees and expense disallowances. I didn't  
20 bring forward the excess work hours adjustment.

21 Q. I understand. Actually that's helpful.  
22 Thank you. So today sitting here in this hearing, you  
23 have no proposal for disallowances related to the  
24 amount of time worked?

25 A. That's correct.

1 Q. Don't have any opinion on whether the  
2 amount of time Schiff Hardin spent was appropriate or  
3 not?

4 A. No, I do have opinion on that.

5 Q. Well, are all your opinions that you have  
6 to offer the Commission included in your Construction  
7 Audit and Prudence Review as the Commission ordered  
8 you to do or not?

9 A. It is in the December report.

10 Q. Yes.

11 A. And -- and the staff listed adjustments  
12 sheets where Schiff Hardin was getting involved with  
13 stuff like reviewing KCPL internal audits. They were  
14 spending a lot of time reviewing Missouri law and  
15 Kansas law, which I think may be more appropriately  
16 done by a Missouri firm who has a -- probably a better  
17 understanding of Missouri law and -- or Kansas law  
18 than -- than an Illinois firm.

19 They -- a lot of time on documentation  
20 with a lot of work by both attorneys and paralegals  
21 and a lot of documentation and paperwork stuff that  
22 could possibly be done a lot cheaper by KCPL internal  
23 counsel staff or paralegals in the Kansas City area  
24 that charge a lot less than Schiff Hardin was  
25 charging.

1           So yeah, I do have substantial opinions  
2 on whether they had excess work on the project. And I  
3 don't believe that KCPL provided any oversight on the  
4 amount of work that Schiff Hardin was performing on a  
5 day-to-day basis. I think Schiff Hardin determined on  
6 their own how much work they wanted to do, what work  
7 they wanted to do and they did it and KCPL exercised  
8 no control over that work.

9           Q.     Okay. I just want the Commission to  
10 understand this. Which one of your adjustments  
11 reduces the number of hours for which Schiff should  
12 have been paid?

13          A.     I explained in the December report, the  
14 staff made an adjustment. With the time constraints  
15 and the amount of work the staff had to do, I made the  
16 decision in the November report not to make a specific  
17 adjustment based on the work hours that Schiff  
18 performed.

19          Q.     So does that mean none of them?

20          A.     Yes.

21          Q.     Okay. So you do consider yourself an  
22 expert on legal fees. Correct?

23          A.     Yes.

24          Q.     And you do consider yourself an expert on  
25 the quality of legal work. Correct?

1 A. No.

2 Q. Okay. So you're not -- when you were  
3 talking a minute ago about how somebody else could  
4 have done the work maybe in Kansas City, same work,  
5 you weren't offering an opinion on the quality of  
6 Schiff's product?

7 A. No.

8 Q. All right. And in your Construction  
9 Audit and Prudence Review you included a rate study  
10 known as the Laffey matrix; is that right?

11 A. I provided the Laffey matrix as kind of a  
12 high end ceiling on what kind of legal fees would be  
13 allowed.

14 Q. It's a high end ceiling, \$170 an hour  
15 seriously?

16 A. I don't know what you're referring to. I  
17 know it's the legal rates charged by attorneys in the  
18 Washington, DC area.

19 Q. For employment cases?

20 A. Well, for -- I don't know if it's  
21 restricted to employment cases or not.

22 Q. All right. Anyway, in your Construction  
23 Audit and Prudence Review you didn't provide any data  
24 about Missouri rates. Right?

25 A. Yes. In fact, when you refer to the

1 rates that I used on Sonnenschein and Farley Law  
2 Offices, they perform work on the Iatan 2 project.  
3 And I reviewed their invoices to see what an  
4 approximate range for legal fees for Missouri lawyers.

5 Q. And is that approximate range of legal  
6 fees for Missouri firms included in the Construction  
7 Audit and Prudence Review that you filed with the  
8 Commission?

9 A. It's embedded in the rate adjustment that  
10 I -- I -- I calculated for Schiff Hardin.

11 Q. Show me what page it's on.

12 A. It's a judgment number that's included.  
13 And I'd have to go back to the work papers, but it's a  
14 judgment number using Laffey as a high end and using  
15 local Missouri firms. I had to come up with what I  
16 believed was a reasonable rate per hour for Schiff  
17 Hardin to use considering the fact that KCPL made no  
18 attempt to get a volume discount and KCPL made no  
19 attempt that I've seen to justify the rates that  
20 Schiff Hardin was charging.

21 Q. Okay. I'm almost off this, I promise  
22 you, but let's go back to your DR response on  
23 page 6 -- I'm sorry, on page 2, question 6. I thought  
24 you told us that there were no work papers created  
25 from the review of legal fees charged in the Kansas

1 City area.

2 A. Well, when you refer to work papers, I'm  
3 assuming like an Excel spreadsheet, a calculation of a  
4 work paper. I provided KCPL my work papers for the  
5 Schiff Hardin calculation. They've had that for, you  
6 know, months and months. I've never heard anything  
7 that they had kind of an issue with the calculations.

8 Q. Okay. So when you --

9 A. Work papers -- I guess the invoices that  
10 I reviewed would be the work papers.

11 Q. All right. So when you said in response  
12 to our data request, No work papers were created from  
13 this review, you didn't quite understand "work papers"  
14 the same way I do?

15 A. I think I should have probably referenced  
16 the invoices as the work papers, but I was -- I  
17 thought the question was going to did I do any  
18 calculation of -- of those rates.

19 Q. And you did not?

20 A. They were used as a judgment in the  
21 calculation of the Schiff Hardin legal rates that I  
22 provided KCPL's work papers in the -- for the November  
23 report.

24 Q. All right. All right. Let me just talk  
25 about the way you approached the audit. In your work

1 on the Construction Audit and Prudence Review, you  
2 didn't talk with Mr. Elliott other than a couple of  
3 times; is that correct?

4 A. I don't know if it was a couple, three,  
5 five, six over a period of time. I don't have the  
6 number.

7 Q. Did you tell me in your deposition that  
8 you talked to Mr. Elliott, quote, a couple of times?

9 A. And a couple if -- I think the strict  
10 definition is two, but that could be a number; two,  
11 three, four. I'm not sure the exact number of times.

12 Q. Fair to say that any conversations with  
13 Mr. Elliott and now including Mr. Lange were less than  
14 a handful. Correct?

15 A. Now, they attended several meetings that  
16 we had. Whether I had specific discussions with them,  
17 I've had e-mails back and forth. But I think specific  
18 discussions on the project, it may be two or three  
19 that I can recall.

20 Q. Now, when I asked you if you had  
21 conversations with Mr. Elliott and Mr. Lange, did you  
22 respond, Less than a handful?

23 A. I believe that's true, yes.

24 Q. All right. And you didn't obtain any  
25 input from Mr. Elliott concerning your proposed

1 disallowances for the balance of plant work, did you?

2 A. I did not have a disallowance for the  
3 balance of plant work.

4 Q. Well, that makes sense then. So you  
5 didn't have any conversations with him because you  
6 didn't have any disallowances?

7 A. Correct.

8 Q. All right. Now, we talked a little bit  
9 earlier about the definitive estimate and you were  
10 talking about the level of engineering?

11 A. Yes.

12 Q. Did you -- you did not have any  
13 conversations with Mr. Elliott about what level of  
14 engineering was complete when the definitive estimate  
15 was arrived at, did you?

16 A. He may have mentioned it in a meeting  
17 that I attended to, discussed it. I don't recall  
18 specifically asking him about it.

19 Q. When I asked you, Did you ever ask  
20 Mr. Elliott about the level of engineering, did you  
21 answer no?

22 A. I think that's true, yes.

23 Q. All right. And we already said you did  
24 not ask Mr. Elliott to give any input on the quality  
25 of work of the owner's engineer when you prepared this

1 audit. Right?

2 A. Yes. I don't believe he did an  
3 evaluation of the quality of work of Burns and  
4 McDonnell.

5 Q. Now, if -- let's just make sure I  
6 understand how auditing and engineering were  
7 interaction -- interacting -- sorry, interacting.  
8 Mr. Elliott sponsored some portions of the  
9 construction audit prudence review. Right?

10 A. Yes.

11 Q. And your understanding was that if  
12 Mr. Elliott had found a decision that he would -- he  
13 believed was imprudent, he would have to bring that to  
14 you. Right?

15 A. If he found an engineering design issue  
16 that he thought was imprudent, I would assume it  
17 involved cost, he would bring that to either me or  
18 Mr. Schallenberg.

19 Q. And then you would look at it and you  
20 would make the decision as to whether the costs were  
21 prudent or not. Correct?

22 A. I believe he would based on -- if it's an  
23 engineering issue, I am not an engineer. I don't  
24 believe I would have testified to the prudence of an  
25 engineering decision, but I would have probably

1 sponsored the cost of that decision that -- that would  
2 be incurred because of the imprudent engineering  
3 decision.

4 Q. So if Mr. Elliott found that a decision  
5 was imprudent, you might still allow the costs even  
6 though he said they were imprudent?

7 A. No. That's not what I said.

8 Q. Is that true or not?

9 A. That's not true.

10 Q. All right. In your deposition, did I ask  
11 you, so you might still allow costs even though  
12 Mr. Elliott said the decision to relocate them was  
13 imprudent?

14 And was your answer, if Mr. Elliott came  
15 to me and said this movement of this building was  
16 imprudent -- I'm not looking at cost -- I would take  
17 his input, I would get the data, review it, discuss it  
18 and find out if these costs were prudently incurred.

19 A. Yes. That's true.

20 Q. All right. That's the way you approached  
21 it. Right?

22 A. Yes. Mister -- Mr. Elliott would have an  
23 opinion on whether the -- the movement -- the  
24 engineering, movement of the building was prudent.  
25 And I would do the investigation as it relates to the

1 cost of that movement.

2 Q. Now, related to -- there's a disallowance  
3 for campus relocation. Correct?

4 A. Yes.

5 Q. And Staff found that the reason for the  
6 cost for campus relocation appears to be a significant  
7 design error. Right?

8 A. I don't recall that testimony.

9 Q. Page 44, line 26 of Staff's audit. Would  
10 you read the first two sentences there beginning with,  
11 Staff finds?

12 A. On page 44, line 26?

13 Q. Yes, sir.

14 A. Staff finds that the allocation of any  
15 cost of the campus relocation to the Iatan project is  
16 inappropriate. The reason for the cost appears to be  
17 a significant design error.

18 Q. All right. And so it is your opinion  
19 that there was a significant design error?

20 A. It -- it appears. And I believe in my  
21 testimony I said that the -- that the reason for --  
22 and I would have to reference that -- is either that  
23 they had to move the campus -- was that it was a  
24 design or a drawing issue with the engineers or  
25 somehow they thought that by moving the campus, it

1 would be a cost savings.

2           And I think Mr. Gould -- Mr. Gould of  
3 Schiff indicated that there was a cost savings related  
4 to it. I asked him for any documentation to support  
5 that and he -- later on I was advised that he had  
6 none. So it was either an engineering or drawing, a  
7 problem with it or they did it for another reason, to  
8 save money.

9           Q.     So it's your opinion that there was a  
10 significant design error. Right?

11          A.     No.

12          Q.     All right. Turn to your deposition,  
13 please.

14          A.     I think that says appears.

15          Q.     Turn to your deposition, please, page --  
16 shoot.

17                 MR. HATFIELD: Judge, can I have just one  
18 minute? I've got to get some stuff out.

19                 JUDGE PRIDGIN: Certainly.

20                 MR. HATFIELD: Judge, can we have just a  
21 quick break while I find --

22                 JUDGE PRIDGIN: Okay. We'll go off the  
23 record here for about five minutes.

24                 MR. HATFIELD: Thank you.

25                 (A recess was taken.)

1 JUDGE PRIDGIN: Good afternoon. We're  
2 back on the record. Mr. Hatfield, did you have an  
3 opportunity to find what you're looking for?

4 MR. HATFIELD: I did, Judge. I  
5 appreciate your indulgence.

6 JUDGE PRIDGIN: My pleasure. Whenever  
7 you're ready, sir.

8 BY MR. HATFIELD:

9 Q. Mr. Hyneman, would you turn to page 237  
10 of the deposition you gave on December 9th, 2010?

11 A. I'm there.

12 Q. And in that deposition did I ask you, so  
13 your opinion, Mr. Hyneman, is that there was a  
14 significant design error. Right?

15 And did you answer, Yes?

16 A. Yes.

17 Q. All right. And you did not consult with  
18 Mr. Elliott on whether there was a design error, did  
19 you?

20 A. No. That information was based on data  
21 responses from KCPL.

22 Q. And -- and there's -- and somewhere in  
23 your report there's an explanation that there's --  
24 that KCPL in a data response told you there was a  
25 design error?

1 A. well --

2 Q. Is that right or not? That I'm going to  
3 find that in the report?

4 A. Did they use those specific words? No.

5 Q. Thank you.

6 A. But I think as I explained on page 43 of  
7 the staff report, that the reason to move the campus  
8 to a new area was -- was for two reasons; one, there's  
9 a problem with the design, the drawings, the sketches  
10 that were made on -- where the campus should be set  
11 up; or for some reason, KCPL decided to incur the --  
12 the -- I don't know if it's HC or not, but the dollar  
13 amount for that which is, you know, substantial amount  
14 of money because the project could incur cost savings  
15 that would offset those costs.

16 So those would be the two plausible  
17 reasons. I solicited from KCPL in a discussion with  
18 Mr. Gould were there any cost savings? He said he  
19 thought there were, he'd have to --

20 MR. HATFIELD: Judge, can I ask you to  
21 instruct the witness? This isn't responsive. And let  
22 me move on to the next question.

23 JUDGE PRIDGIN: That's fine. If he's  
24 answered your question, that's fine. We'll move on.

25 MR. HATFIELD: Thank you.

1 BY MR. HATFIELD:

2 Q. Now, Mr. Hyneman, did you ever review  
3 Mr. Elliott's work papers?

4 A. No. I don't know that he had any work  
5 papers.

6 Q. You never asked Mr. Elliott if he had any  
7 work papers then?

8 A. Mr. Elliott, as far as I know, is not  
9 proposing any adjustments whatsoever in the case and  
10 the total body of his work is located in a paragraph  
11 in the Staff report. That's my knowledge.

12 Q. You're saying that Mr. Elliott's report  
13 is one paragraph in Staff's report?

14 A. One or two paragraphs, whatever it is.

15 Q. You don't consider it a significant  
16 amount of Staff's report?

17 A. For engineering, it -- it's all of the  
18 engineering analysis.

19 Q. All right. But in your head, it's a  
20 couple paragraphs in your report?

21 A. I'm just going to the size of his -- his  
22 section of the report, not to the quality or  
23 anything -- or its impact. I'm just going to the size  
24 of it. That's the body of my knowledge to the work  
25 that he produced. I don't know if he had any work

1 papers.

2 Q. And all I just wanted to make sure I  
3 understood was you never asked Mr. Elliott if he had  
4 any work papers. Right?

5 A. No. But I recall providing work papers  
6 to the company and I think I would have seen them in  
7 my review of the staff work papers. I don't recall  
8 seeing Mr. Elliott have any.

9 Q. Okay. What about Mister -- is it Lange?

10 A. Lange, yes.

11 Q. Lange. Did you ask Mr. Lange if he had  
12 any work papers?

13 A. No.

14 Q. Okay. Now, let me ask you a couple more  
15 questions about how you approached the audit. And  
16 then I just want to walk through it. So I think the  
17 easiest thing to do would probably be just to go to  
18 your testimony. Do you have that in front of you?

19 A. My testimony -- direct testimony?

20 Q. Yes, sir.

21 A. Yes.

22 Q. Oh, I almost forgot. What disallowance  
23 does staff have for failing to tear down the second  
24 chimney?

25 A. None.

1 Q. Okay. In your direct testimony, page 2,  
2 line 11 -- well, let me do it this way. In analyzing  
3 the costs incurred for Iatan 1 and Iatan 2, the staff  
4 employed different standards of review; isn't that  
5 correct?

6 MS. OTT: What page are you on?

7 MR. HATFIELD: I'm not yet.

8 THE WITNESS: I don't believe they  
9 employed different standards for review. I don't know  
10 what you're referring to on that.

11 BY MR. HATFIELD:

12 Q. Well, let me ask you this -- we'll do it  
13 that way. On line 11 of your -- your testimony,  
14 page 2 you say, The purpose of this testimony is to  
15 introduce and sponsor the adjustments to Iatan unit 1  
16 AQCS construction costs that staff has found to be  
17 imprudently incurred. Right?

18 A. Well, it goes on, but yes, it did say  
19 that.

20 Q. And then if we go down to line 21, you  
21 say, In this direct testimony I am almost introducing  
22 staff's list of adjustments associated with the  
23 construction of Iatan unit 2. Correct? Based on  
24 investment and costs incurred through June 30th, 200--

25 A. Right. Introducing. Correct.

1 Q. All right. And it says, This list of  
2 adjustments reflects expenditures KCPL made and  
3 charged to the Iatan unit 2 segment that Staff found  
4 to be imprudent, comma, unreasonable, comma, or not of  
5 benefit to Missouri ratepayers. Right?

6 A. Yes.

7 Q. So you're -- what you were looking for  
8 for unit 1 was imprudently incurred but for unit 2 it  
9 was imprudent, unreasonable or not of benefit to  
10 Missouri ratepayers. Right?

11 A. No.

12 Q. No. Okay.

13 A. I mean I could have listed those for both  
14 Iatan 1 and Iatan 2, but the report didn't. But the  
15 disallowance for Iatan 1 and Iatan 2 were based on  
16 costs that were either imprudent, inappropriate,  
17 unreasonable or not of benefit to Missouri ratepayers.

18 Q. Okay.

19 A. Those criteria apply to all adjustments  
20 for Iatan 1 and all adjustments for Iatan 2.

21 Q. Okay. So when your testimony said, For  
22 Iatan 1, Staff has found to be imprudently incurred --  
23 I thought that meant you didn't find any unreasonable,  
24 inappropriate. That's not right?

25 A. No. No. It could have been more

1 detailed but it wasn't.

2 Q. Okay. So --

3 A. But the Staff report I think identified  
4 that criteria.

5 Q. Okay. Well, help me with that. And this  
6 might be the fastest way to do it. Can we -- I'm  
7 going to read from your DR response. Actually, I'm  
8 going to ask you to read from your DR response that I  
9 think you still have up there. I've got another copy  
10 if you need it.

11 A. No, I have it here. Thank you.

12 Q. All right. Can you go to page 5 of that?

13 A. Yes.

14 Q. There was a question 13 that says  
15 essentially define your use of imprudent,  
16 unreasonable, inappropriate. And can you just go to  
17 the first, second, third paragraph where you talk  
18 about what unreasonable means? And would you go ahead  
19 and read that paragraph out loud? And I'll tell you  
20 I'm going to ask you when you're done, if that's still  
21 your testimony today so think through that.

22 A. Unreasonable means not showing  
23 appropriate judgment, especially in the terms of the  
24 incurrence of cost by failure to take actions  
25 consistent with obligations and duties. Inappropriate

1 means actions or conduct which are not suitable or  
2 required given, for example -- given, for example, an  
3 agreement. For the authorities or standards that  
4 support the definition imprudence, please see Staff's  
5 construction audit prudence review reports.

6           An example of imprudence was Schiff  
7 Hardin's contract administration regarding the payment  
8 of increased hourly rates of pay without any  
9 documentation of KCPL approval of these higher rates  
10 as well as payment of Schiff Hardin expenses without  
11 the receipts as required by contract.

12           Q.     Okay. And is that -- that definition of  
13 unreasonable, is that the definition that you used  
14 when you prepared the Staff Construction Audit and  
15 Prudence Review?

16           A.     I -- I didn't prepare a definition  
17 unreasonable for the report. I think that may be the  
18 portion prepared by Mr. Dottheim. but I believe that  
19 this definition -- I think it's a dictionary  
20 definition is consistent with it.

21           Q.     I might have asked a bad question. I'm  
22 not asking you what's in the report. I'm asking you  
23 if this definition you gave in response to this DR is  
24 the same definition you used when you prepared the  
25 Construction Audit and Prudence Review?

1           A.     It would have been one I applied. I  
2 don't know if I created the definition -- specific  
3 definition, but unreasonable is -- that's the  
4 definition of it. I mean I just don't know -- I  
5 didn't create a definition before the audit. I've  
6 been auditing company utility costs for 17 years and  
7 it's kind of implicit in what unreasonable and  
8 reasonable is.

9           Q.     So did you use this definition or did you  
10 use another definition?

11          A.     My judgment was based on a definition  
12 substantive to this, yes. I just don't want to give  
13 the appearance that I created this definition before.

14          Q.     I didn't ask you that.

15          A.     This definition, okay, was created in  
16 response to this data request.

17          Q.     Yes. I'm with you.

18          A.     Okay.

19          Q.     But it is the definition you used in  
20 preparing the audit?

21          A.     Substantively, yes.

22          Q.     Okay. Good. Inappropriate -- is that  
23 the definition of the term "inappropriate" you used  
24 when you prepared the audit?

25          A.     I didn't prepare a definition when I

1 prepared the audit, but this would be substantively  
2 similar to what the standards of inappropriate costs  
3 that I used was.

4 Q. Okay. Unreasonable -- now, let's --  
5 putting that aside for a minute, when we use the term  
6 "unreasonable," it doesn't mean imprudent. Right?

7 A. It can. It -- it's a subset. I think if  
8 you read the Staff report, I think it could be  
9 considered as a subset of imprudence.

10 Q. Gotcha.

11 A. An unreasonable incurrence of cost, is  
12 that imprudent? No. I think imprudence covers  
13 different, unreasonable, inappropriate. I think it's  
14 a broad definition.

15 Q. All right. So inappropriate charges mean  
16 the same thing as imprudent charges?

17 A. Inappropriate charges could be imprudent,  
18 yes. Inappropriate -- costs that are inappropriate  
19 may not, by definition, be imprudent.

20 Q. Okay. Back to your direct testimony on  
21 page 3 then when you said the list of adjustments  
22 reflects unit 2 costs that Staff found to be  
23 imprudent, comma, unreasonable, comma, or not of  
24 benefit to Missouri ratepayers did you mean us to  
25 understand that those are three separate terms to be

1 used in a disjunctive with the term "or"?

2 A. No. As I explained I think -- I believe  
3 in our deposition and I explained in a data request,  
4 those terms overlap a lot. I mean you can have  
5 inappropriate and unreasonable costs that are prudent.  
6 You can have prudent -- imprudent costs that -- that  
7 meet other criteria. I mean they're not strictly  
8 separated. They could be encompassing of all.

9 The underlying criteria as you see in the  
10 scope of the Staff audits, was to ensure that no  
11 inappropriate, imprudent or unreasonable costs were  
12 charged to Missouri ratepayers. And Staff made a  
13 determination what costs were imprudent, unreasonable  
14 or inappropriate that should not be allocated to  
15 Missouri ratepayers.

16 Q. Okay. Let's go to -- stay on the same  
17 page, line 3 -- I'm sorry, page 3, line 9, The  
18 Commission has ordered Staff members who perform audit  
19 activities on this case to comply with the Generally  
20 Accepted Auditing Standards. In this testimony, I  
21 describe these auditing standards.

22 why is that in there?

23 A. Because to advise the Commission -- I put  
24 that in here to let the Commission know that we take  
25 serious their orders. They said they require -- the

1 auditors need to require GAAS and I was affirming to  
2 them that we did.

3 Q. But you did not follow the GAAS reporting  
4 standards. Right?

5 A. The -- no.

6 Q. Okay. Did you come back to the  
7 Commission and seek clarification on whether you  
8 should follow the GAAS reporting standards?

9 A. I did not determine a need to --

10 Q. Okay.

11 A. -- as I explained.

12 Q. And that's because in your opinion the  
13 four GAAS reporting standards do not apply to the  
14 prudence review and construction audit you did.  
15 Right?

16 A. Correct.

17 Q. And similarly, although you applied the  
18 field work portion of the standards, you did not  
19 necessarily review individual interpretations of the  
20 field work standards. Right?

21 A. No. And as I explained, there are 220  
22 individual statement on auditing standards --

23 Q. Right.

24 A. -- 220 different ones. Between the time  
25 the Commission ordered us to comply with GAAS on this

1 audit and in the middle of an audit in a rate case, it  
2 would be no time at all to develop trainings and  
3 lesson plans to come in to get up to speed on all that  
4 training of the individual statement on auditing  
5 standards and how they apply to an audit of a utility  
6 company. There would just not be sufficient time.

7           we -- I made the understanding that the  
8 Commission required us to comply with GAAS. GAAS are  
9 ten standards. And supportive of those ten standards  
10 are the individual SAS or State Accounting Standards.  
11 Four are reporting standards dealing with how  
12 certified public accountants and audit of private  
13 companies need to make their reports. The statements  
14 to their reports are in compliance with Generally  
15 Accepted Accounting Principles.

16           And specific detailed requirements of  
17 reporting, the Staff does not do any of that  
18 reporting. So they would not apply to the Staff.

19           Q. All right. And on -- you were just  
20 talking about the SAS, which explained the GAAS. You  
21 say that you would need extensive training in order to  
22 review and apply all of those SASS?

23           A. Yes.

24           Q. And that's because when Staff began the  
25 audit, it did not have training sufficient to review

1 and apply all of those interpretations. Right?

2 A. Yes. The Commission has never required  
3 the Staff to comply with GAAS.

4 Q. All right. So the Staff was not trained  
5 on the interpretations of the GAAS standards --

6 A. Correct.

7 Q. -- prior to this audit?

8 A. Correct.

9 Q. Now, you believe that the stipulation and  
10 agreement, sometimes called the regulatory plan,  
11 required Kansas City Power and Light to provide  
12 specific documentation to the Staff. Right?

13 A. Yes.

14 Q. And you base that on the plain language  
15 of the stipulation and agreement?

16 A. Yes.

17 Q. I have just a couple more questions about  
18 your testimony and they may be on various topics.

19 I'll just sort of warn everyone.

20 surrebuttal testimony, page 7.

21 A. Yes.

22 Q. would you read lines 5 through 9, please.

23 A. Yes. From response to Staff data  
24 request, the Staff noticed that Mr. Blanc began his  
25 employment with KCPL in 2005 when he was hired as an

1 in-house attorney. After four years as a KCPL  
2 in-house attorney, Mr. Blanc was promoted to senior  
3 director of regulatory affairs. This would indicate  
4 that Mr. Blanc's experience with utility construction  
5 projects in Missouri is extremely limited.

6 Q. why did you include that last sentence,  
7 This would indicate that Mr. Blanc's experience with  
8 utility construction projects in Missouri is extremely  
9 limited?

10 A. I think it goes to Mr. Blanc's testimony  
11 where he was critical of the Staff's auditing and  
12 auditing procedures for Missouri utility companies and  
13 the construction project. And I understand as an  
14 attorney, he -- he may have had some federal utility  
15 work, but I didn't note any state regulatory work in  
16 his background.

17 Q. So that's why you included that sentence  
18 that his experience is extremely limited?

19 A. Yes.

20 Q. Okay. He has more experience than you do  
21 on utility construction projects, doesn't he?

22 A. I don't believe he's ever performed an  
23 audit of a utility construction project.

24 Q. which wasn't exactly my question.

25 A. well, my experience is is in auditing.

1 Q. Okay.

2 A. I don't believe he has any experience in  
3 auditing.

4 Q. Okay. Do you have any experience with  
5 utility construction projects other than in auditing?

6 A. Again, I don't want to quibble. I have  
7 evaluated a lot of construction projects, for example,  
8 on other utilities as far as service line replacements  
9 and work order and construction of that nature. But  
10 none on the construction of a new power plant like  
11 Iatan 2.

12 Q. Okay.

13 A. I understand the basics of the accounting  
14 and what types of costs go into utility construction  
15 projects. A lot of work in that area, yes.

16 Q. All right. Let's turn to page 8, still  
17 in that same testimony, line 13. There's a question  
18 in your testimony that says, Mr. Blanc also alleges at  
19 page 10 of his rebuttal testimony that Staff, quote,  
20 engineer's review of the Iatan projects has been  
21 largely cast aside as a non-dollar adjustment, end  
22 quote. Is there any truth to this allegation?

23 And you answered, No. Right?

24 A. Yes. That's correct.

25 Q. And then you go on to elaborate on your

1 no. And would you read that, please?

2 A. Mr. Blanc may --

3 Q. Let's start with right after, No.

4 A. Okay. As he does throughout his  
5 testimony, Mr. Blanc just makes pejorative statements  
6 against the Staff with very little or no explanation  
7 or support for his statements. The full results of  
8 the findings and conclusions of the Staff engineers  
9 regarding the Iatan construction audit were included  
10 in the Staff's August 6th, 2010, November 3rd, 2010  
11 audit reports. Dave Elliott, one of the Staff  
12 engineers who Mr. Blanc refers to, is submitting  
13 surrebuttal testimony and addresses KCPL's rebuttal  
14 testimony.

15 Q. So let me make sure I understand what  
16 you're saying here. You're saying that throughout  
17 Mr. Blanc's testimony, he just makes pejorative  
18 statements?

19 A. Yes.

20 Q. All right. And why did you want to tell  
21 the Commission that you thought his statements were  
22 pejorative?

23 A. Well, because they were pejorative to the  
24 Staff with little or no substantive or evidence behind  
25 them. And I can go into examples if you'd like.

1 Q. We might do that a little later. So if  
2 there is a statement made that has no evidence behind  
3 it, it's pejorative?

4 A. No.

5 Q. Okay.

6 A. He did it in a pejorative manner, I  
7 believe.

8 Q. Okay. Help me with the definition of the  
9 term "pejorative." What does that mean?

10 A. To cast in a negative light.

11 Q. Okay. So Mister -- throughout his  
12 testimony, Mr. Blanc makes statements casting Staff in  
13 a negative light?

14 A. Yes.

15 Q. All right.

16 A. Cast-- I'm sorry. Not casting Staff  
17 individuals, but the Staff's audit. I want to make  
18 that -- I don't think he took any pejorative  
19 statements against individuals, but against the  
20 Staff's work product.

21 Q. Oh, right. Yeah. I didn't --

22 A. Okay.

23 Q. So when you say "pejorative statements  
24 against the Staff," you mean against the Staff's work  
25 product?

1 A. Yes.

2 Q. Yeah. Okay. Okay. I'm going to move on  
3 from Mr. Blanc. I'm sure he appreciates me reading  
4 all of this, but page 11, please. I just want to make  
5 sure I understand your testimony. On line 7 --

6 A. Yes.

7 Q. -- your testimony says, Mr. Blanc's  
8 experience is principally in law and not accounting or  
9 auditing. And he has never completed any education in  
10 auditing and never participated in an audit as an  
11 auditor, yet he expresses an opinion about what it  
12 would take to complete an audit such as the Staff has  
13 undertaken.

14 So you're saying it's not appropriate for  
15 a lawyer to have an opinion on your auditing. Right?

16 A. No. He can have an opinion, but I  
17 believe any -- any allegations of what it -- of  
18 inappropriate audit activity ought to be substantiated  
19 by a person who has audit experience.

20 Q. Okay. Did he say your audit activity was  
21 inappropriate? Where --

22 A. I don't know if he used that term, but he  
23 was very critical of a lot of the audit activities.

24 Q. So a lawyer should not be critical of  
25 auditing activity because he doesn't know anything

1 about auditing?

2 A. I didn't say that.

3 Q. Sorry.

4 A. I said he in his position has no ex-- no  
5 training, no experience whatsoever in auditing.

6 Q. Okay.

7 A. Has never conducted an audit.

8 Q. Right. So similarly an auditor who has  
9 never negotiated a contract shouldn't take positions  
10 on contract terms. Right?

11 A. Well, I think an auditor is specifically  
12 trained on making evaluative statements of contracts,  
13 agreements, costs incurred. They evaluate whether  
14 they're reasonable, prudent given the circumstances  
15 and the documentation available.

16 Q. Okay. And so an auditor can also make  
17 judgments on whether to settle a lawsuit. Correct?

18 A. No.

19 Q. Okay. Can an auditor make decisions on  
20 whether it's appropriate to settle a threatened  
21 lawsuit?

22 A. We have not.

23 Q. All right. So you don't have any  
24 opinions on whether it was appropriate to settle any  
25 threatened lawsuits?

1 A. No.

2 Q. All right. Good. I'm glad we cleared  
3 that up.

4 A. I can explain, if you'd like.

5 Q. We'll -- I'm sure Ms. Ott will have you  
6 do that for us a little later.

7 Okay. We talked about these unexplained  
8 cost overruns a little bit and the stipulation and  
9 agreement. Let me make sure I understand. The Staff  
10 agrees that KCPL does have a cost control system in  
11 place that identifies and explains cost overruns.  
12 Right?

13 A. The Staff believes that KCPL is required  
14 to. And I --

15 Q. Yes.

16 A. -- I see no evidence that they don't.

17 Q. Okay. And here's my question. Does the  
18 Staff agree that KCPL has a cost control system in  
19 place that identifies and explains cost overruns?

20 A. They have a cost control system. The  
21 document which describes it does not mention the  
22 stipulation agreement, does not mention cost overruns,  
23 does not mention tracking. All those are basic  
24 requirements of the stipulation and agreement. The  
25 document that describes their cost control system

1 doesn't reference that.

2           Now, I believe as an auditor with  
3 17 years experience, that KCPL has the ability with  
4 the personnel and the software available to identify  
5 and explain each cost overrun above the definitive  
6 estimate. I believe they have that capability. They  
7 have not done it. The staff believes they're required  
8 to.

9           MR. HATFIELD: All right. Judge, I'm  
10 sorry to have to do this, but this is a really  
11 important issue. I need the witness to give me a yes  
12 or no answer to the following question.

13           JUDGE PRIDGIN: All right.

14 BY MR. HATFIELD:

15           Q. Does the staff believe that KCPL has a  
16 cost control system in place that explains and  
17 identifies cost overruns?

18           A. I believe they do. And if I can speak  
19 for the staff, the staff believes they have the  
20 capability.

21           Q. Okay. I think we've got it, but just to  
22 be clear, on page 14 of your surrebuttal testimony,  
23 line 11 would you please read that first sentence to  
24 us?

25           A. The staff position is that KCPL does have

1 a cost control system in place that does indeed  
2 identify and explain cost overruns.

3 Q. All right. Thank you. Now -- okay.  
4 Let's talk about the Construction Audit and Prudence  
5 Review. Do you -- the November 3rd filing. Do you  
6 have a copy of that there?

7 A. Yes.

8 Q. Let's just turn to page 1. Page 1 is an  
9 executive summary that was prepared by -- begins --  
10 I'm sorry, begins an executive summary prepared by  
11 Mr. Schallenberg; is that correct?

12 A. Yes.

13 Q. And page 2 that continues and then on  
14 page 3 you're still in an executive summary; is that  
15 right?

16 A. Yes.

17 Q. Line 7 says, The Iatan project  
18 experienced significant overruns from the definitive  
19 estimate.

20 so Staff knew what the definitive  
21 estimate was in conducting this audit. Right?

22 A. Again, I don't want to quibble. This is  
23 Mr. Schallenberg's testimony and I think he can speak  
24 to what he meant when he wrote that statement.

25 Q. Oh, I know. I'm not asking what he

1 meant. That would be speculation. I'm just asking if  
2 Staff knew what the definitive estimate was when they  
3 prepared this audit?

4 A. We knew what KCPL was using as a  
5 definitive estimate.

6 Q. Okay. All right. And then on line 31 it  
7 says, The Iatan 1 AQCS construction project experience  
8 cost overruns from the definitive estimate.

9 So in order to calculate a cost overrun,  
10 you would have to know what the definitive estimate  
11 was. We talked about this earlier. Right?

12 A. Yes.

13 Q. All right. And so you did know what the  
14 definitive estimate was in order to calculate the  
15 overruns. Right?

16 A. Again, I don't want to quibble. I don't  
17 believe the Staff ever agreed that KCPL's document  
18 that they called a control budget estimate was synon--  
19 synonymous with a definitive estimate. The definitive  
20 estimate the Staff understands is an estimate that's  
21 based on engineering and substantially complete.

22 Q. Well, I think we talked about that on  
23 your DR response. Right? That Staff has agreed to  
24 allow KCPL to substitute the control budget estimate  
25 for a definitive estimate?

1           A.     Yes.  Unless the Staff took a position  
2 and saying, KCPL, your control budget estimate did not  
3 meet the requirements of definitive estimate requiring  
4 you to go back and -- and submit a different budget.  
5 We did not do that.  Therefore, we used the control  
6 budget estimate as a substitute for the definitive  
7 estimate.

8           Q.     And when you say "we," you mean Staff did  
9 that?

10          A.     Yes, Staff.  I'm sorry.  Staff.

11          Q.     And you did that for purposes of your  
12 analysis under the regulatory plan?

13          A.     We had no definitive estimate to use.  We  
14 had a control budget estimate.

15          Q.     Okay.  So on page 4, line 25, the audit  
16 report says, Instead, KCPL referred to the definitive  
17 estimate as a control budget estimate?

18          A.     That's correct.

19          Q.     So that's what you were just saying.  You  
20 knew that when they said control budget estimate, they  
21 meant the definitive estimate?

22          A.     Yes.

23          Q.     And vice-versa?

24          A.     Yes.

25          Q.     All right.  On page 5 there's some

1 discussion about train cars. And just so I'm clear,  
2 which disallowance is related to the leasing of train  
3 cars?

4 A. There is no specific disallowance related  
5 to the train cars. I don't think the report indicated  
6 there was any disallowance --

7 Q. Thank you.

8 A. -- related to the train cars.

9 Q. Okay. So on page 6 then there's a little  
10 chart. And I think you told me in your deposition  
11 that although this is Mr. Schallenberg's section, you  
12 may have prepared this chart?

13 A. Yes, I did.

14 Q. All right. And so on page 6 you're  
15 identifying cost overruns by category. Right?

16 A. Yes.

17 Q. So we can identify that the overrun in  
18 excess of the definitive estimate for procurement was  
19 a specific dollar amount. Right?

20 A. Yes.

21 Q. And we can do that -- I mean you've got a  
22 number there that ends in 343. So you can do it down  
23 to the dollar?

24 A. Yes.

25 Q. All right. And you can do that for

1 procurement, you can do it for construction, you can  
2 do it for indirects, you can do it for contingency and  
3 you can do it for total cost. Right?

4 A. Well, I don't think you have an overrun  
5 on contingency. You subtract contingency from the  
6 amount to get an overrun. I mean it's -- we don't  
7 have an overrun --

8 Q. Well, some of them are underruns  
9 actually.

10 A. Yes. Actually that's correct.

11 Q. I think Ms. Ott and Mr. Archibald talked  
12 about variances.

13 A. Mr. Archibald?

14 Q. Yes.

15 A. Okay, yes.

16 Q. Sorry. You may not have been here for  
17 that.

18 A. I was.

19 Q. Okay. You agree that a budget variance  
20 refers to either an overrun or an underrun; is that  
21 fair?

22 A. Yes.

23 Q. All right. Okay. Now, let's go ahead  
24 and flip to page 12 of the audit report. As a  
25 participant in the audit, do you agree with the

1 statement there that the objective of Staff's audit  
2 has been to determine whether the Iatan construction  
3 project, Iatan 1, Iatan 2 and common plant, contains  
4 inappropriate, slash, unreasonable, slash, not of  
5 benefit to Missouri ratepayer charges or unnecessary  
6 facilities?

7 A. Yes.

8 Q. And is that the entire audit objective?

9 A. That's the -- I mean that's the  
10 objective, yes.

11 Q. And you agree that in performing the  
12 audit, Staff identified and explained with  
13 particularity any disallowances that Staff believes  
14 are justified; is that right?

15 A. With any particularity? We made an  
16 adjustment called the unidentified/unexplained cost  
17 overrun adjustment. And the basis of it is that we  
18 couldn't identify and explain the cost overruns.

19 Q. Okay. So you agree that the auditing  
20 objective was not to look for imprudent charges.  
21 Right?

22 A. Well, as I said, inappropriate,  
23 unreasonable, not of benefit, all those fit under the  
24 umbrella of prudence. And I think that's indicated in  
25 the section of the report on prudence.

1 Q. Okay. But the audit objective -- I think  
2 it's here -- it doesn't say that the objective was to  
3 find whether any charges were prudently or imprudently  
4 incurred, does it?

5 A. No.

6 Q. But -- and your understanding is that  
7 was, in fact, the audit objective was --

8 A. Well, I mean, I'm saying inappropriate,  
9 unreasonable, not of benefit all -- that term could be  
10 consumed under the term "prudence," which is  
11 identified and described in another section of the  
12 report.

13 Q. Okay. Then let's move to page 15,  
14 line 5.

15 A. Yes.

16 Q. And here we're talking about some over--  
17 we're still in Mr. Schallenberg's section, I think. I  
18 understand that. It says, KCPL's response to Staff  
19 Data Request 969 provided the identification that  
20 69 million, I think Iatan 1, of cost overruns exist at  
21 April 30th, 2010. Right?

22 A. Yes.

23 Q. So I guess I want to make sure I know  
24 what we're quibbling about. We could identify cost  
25 overruns. Right?

1 A. The total number, yes.

2 Q. Okay. And you could do it by categories  
3 in your -- your chart earlier. Right?

4 A. Yes.

5 Q. And the -- do you -- do you understand  
6 the stipulation and agreement to require it be done by  
7 categories?

8 A. No.

9 Q. Do you understand the stipulation and  
10 agreement requires it to be done by anything other  
11 than total number?

12 A. Yes.

13 Q. And on what do you base that?

14 A. Identify and explain any overruns over  
15 the definitive estimate.

16 Q. Yes.

17 A. So any time you have a cost overrun, that  
18 has to be identified and explained.

19 Q. Okay. All right. And here you have  
20 identified the cost overruns in this sentence?

21 A. The total number, dollar amount of actual  
22 costs incurred in excess of the control budget  
23 estimate, yes.

24 Q. Okay. Okay. Now, let's turn to your  
25 sections, I believe it starts on page 16. First,

1 you're talking about auditing procedures. And that's  
2 what that section's intended to explain. Right?

3 A. Yes.

4 Q. It says, In addition -- I'm sorry. I'm  
5 on line 15. The Staff reviewed thousands of documents  
6 received through data requests that were specifically  
7 related to the costs charged to the Iatan project.  
8 Right?

9 A. Yes.

10 Q. And it is true that Kansas City Power and  
11 Light provided you thousands of documents related to  
12 the project?

13 A. Yes.

14 Q. Do you have an estimate as to how many  
15 thousands were provided to you?

16 A. No, I don't. I know it was thousands  
17 is -- 10,000, could be a rough estimate.

18 Q. Okay. All right. I want to just for a  
19 minute ask you about -- well, how did you receive --  
20 or how did you go about obtaining those documents  
21 generally? Was it through data requests?

22 A. Yes.

23 Q. All right. Let me show you --

24 MR. HATFIELD: Let's go ahead and mark as  
25 KCPL exhibit, Judge.

1 JUDGE PRIDGIN: Let me get you a number.

2 MR. HATFIELD: That would be great.

3 JUDGE PRIDGIN: I'm up to KCPL 94.

4 MR. HATFIELD: Did you say 94, Judge?

5 MR. FISCHER: Yes, sir.

6 (KCP&L Exhibit No. 94 was marked for  
7 identification.)

8 BY MR. HATFIELD:

9 Q. Mr. Hyneman, do you recognize --

10 MR. HATFIELD: Uh-oh. Judge, I might  
11 have given you -- I just realized mine had two  
12 attached.

13 BY MR. HATFIELD:

14 Q. Do you recognize KCPL 94?

15 A. Looking for the number on it. Is there a  
16 number 94 on this? Is this Exhibit 94?

17 Q. Yes. Exhibit 94.

18 A. Yes. I do recognize it.

19 Q. And that's Staff Data Request 653.

20 Correct?

21 A. Yes.

22 Q. And that's a data request from you to  
23 Kansas City Power and Light. Right?

24 A. Yes.

25 Q. And this is a data request that you sent

1 on January the 18th of this year. Correct?

2 A. Yes.

3 Q. So nine days ago?

4 A. I'll take your word for it.

5 Q. January 18th of 2011. Right? That's

6 when you sent it? Is that --

7 A. This is not -- it's an e-mail from Amanda  
8 Berendzen.

9 Q. It's a printout from my office, right.

10 Here let me --

11 A. This is not the data request that -- this  
12 is an e-mail.

13 Q. That's what I did wrong. Let's try this

14 way. Sorry. I gave the Commission the right one.

15 Still we're on Data Request 653. Correct?

16 A. Yes.

17 Q. And tell us what that is.

18 A. It's a data request from me to KCPL on

19 January 18th, 2011 referencing KCPL/Alstom contract

20 paragraph 20.7, consequential damages.

21 Q. Okay. So nine days ago you were

22 requesting documents related to the Alstom contract.

23 Correct?

24 A. Yes.

25 Q. And you wanted the names of each and

1 every individual who reviewed the contract. Right?

2 A. Right.

3 Q. And you wanted every document in KCPL's  
4 possession related to the contract. Right?

5 A. Contract clause limited -- I think  
6 limited to that specific clause, the consequential  
7 damages clause.

8 Q. All right. And you wanted a copy of each  
9 and every correspondence between KCPL and any entity  
10 related to the contract clause. Right?

11 A. If there were any, yes.

12 Q. And so you're asking for any  
13 communications between KCPL Power and Light and its  
14 attorneys. Those should be included in here. Right?

15 A. I don't know if they were or not.

16 Q. Well, you didn't say except for your  
17 attorneys is all I'm trying --

18 A. I normally don't.

19 Q. And even though we've had some objections  
20 on attorney/client privilege, you continue to ask for  
21 every correspondence between any entity about contract  
22 clause. Right?

23 A. Well, KCPL can assert privilege on a DR  
24 if they want to. I -- the Staff has not found it a  
25 normal practice to ask for documents except those

1 provided to an attorney. It's just something we don't  
2 normally do.

3 Q. Okay. So these are documents that you  
4 did not have when you performed the audit that was  
5 filed November 3rd. Right?

6 A. Yes.

7 Q. And these were audits that -- these were  
8 documents that you did not need to perform the audit?

9 A. That I did not believe I needed, correct.

10 Q. Okay. Good. So now have you changed  
11 your belief? Is that what you mean?

12 A. Yes.

13 Q. So if your audit's already been filed,  
14 why are you sending a DR nine days ago asking for all  
15 these documents?

16 A. Well, I think as early as the December  
17 2009 audit report where the Staff sponsored an  
18 adjustment to exclude the cost of the May 18th, 2008  
19 crane incident, the Staff has been led all along  
20 throughout its audit and -- and -- that KCPL would not  
21 be seeking recovery of those costs.

22 In fact, KCPL asserted to the Commission  
23 during the acquisition of Aquila hearings that it  
24 would not have any financial responsibility for these  
25 costs. So the Staff's audit activity was very

1 limited.

2           It was not until the Staff read the  
3 surrebuttal testimony of Mr. William Downey did the  
4 Staff find out that KCPL was, in fact, seeking  
5 recovery of these costs. And this contract language  
6 was a substantial part of his reason for seeking these  
7 costs. So we didn't find out until probably really  
8 close to the date of this data request -- this data  
9 request that KCPL was seeking recovery based on a  
10 consequential damage clauses in the Alstom contract.

11           Q. So prior to -- if you don't mind, try to  
12 stay tight with me for a little bit here so we don't  
13 have to go into HC.

14           A. Okay.

15           Q. Prior to sending this data request then,  
16 you had not requested all documents related to the  
17 Alstom contract; is that right?

18           A. I know we requested the Alstom contract  
19 and any changes and modifications to it, I believe. I  
20 don't know if I had a data request any documents  
21 related to the Alstom contract. I don't know if  
22 that's a data request or not.

23           Q. Okay. So you don't know one way or the  
24 other whether prior to completing the audit report,  
25 you had requested all documents related to the Alstom

1 contract?

2 A. Sitting here today, I can't remember a  
3 specific DR that used that term. I know we requested  
4 the Alstom contract. I know we got a copy of the  
5 Alstom contract.

6 Q. Now, after you filed your audit you  
7 believe it's necessary to request documents related to  
8 the Alstom contract. Right?

9 A. The Staff was led to believe that KCPL --

10 Q. Stay with me because if you start saying  
11 that, we're going to have to go HC.

12 A. I apologize.

13 Q. You do believe now it's necessary for you  
14 to see documents related to the Alstom contract that  
15 you did not have before. Right?

16 A. Yes.

17 MR. HATFIELD: Okay. Let me -- let me  
18 mark another KCPL exhibit, Judge.

19 JUDGE PRIDGIN: KCP&L 95.

20 (KCP&L Exhibit No. 95 was marked for  
21 identification.)

22 BY MR. HATFIELD:

23 Q. Can you tell me have you seen that  
24 before?

25 A. Yes.

1 Q. what is that?

2 A. It's Data Request 652. It's a data  
3 request from me to KCPL on January 14th, 2011 with  
4 reference to the -- an Alstom contract amendment.

5 Q. So 13 days ago. Right?

6 A. Yes.

7 Q. And would you just read what it is you  
8 were requesting?

9 A. Reference Ken Roberts of Schiff Harden  
10 invoice work on July 7th -- July 21st of 2009. Please  
11 provide a copy of the Alstom contract amendment  
12 referenced here. Please provide a copy of all meeting  
13 notes, correspondence between KCPL and Schiff and  
14 Schiff and Jonathan Marks related to this issue.

15 Q. Okay. So were these -- you didn't have  
16 these documents before January what? I'm sorry. When  
17 did you ask for it? January 14th?

18 A. I don't believe I did.

19 Q. You hadn't asked for these documents  
20 before January 14th?

21 A. We may have asked for a DR for the Alstom  
22 contract and any amendments thereto. I know we got  
23 the basic contract. I don't recall if we have any  
24 amendments or modifications to that contract.

25 Q. Okay. It says, Please provide a copy of

1 the Alstom contract amendment referenced here.

2 A. Right.

3 Q. So you -- did you or not have all the  
4 Alstom contract amendments before you completed your  
5 audit?

6 A. He referenced work in an invoice on a  
7 contract amendment -- Alstom contract amendment. I do  
8 not know -- I don't believe we had that amendment.

9 Q. Okay. So you had not asked for all of  
10 the amendments to the Alstom contract before you  
11 completed the audit; is that right?

12 A. Sitting here today, I don't know if  
13 there's a DR existing whether we asked for all  
14 contract amendments to the Alstom contract.

15 Q. And you didn't try to find out before you  
16 sent out another DR 10 days -- or 13 days ago?

17 A. Well, this data request asked more than  
18 that amendment. I mean if they want to say we  
19 provided this amendment in DR X and here are the  
20 meeting notes, correspondence, that would be fine.

21 Q. Right.

22 A. Did I take the time to go through all the  
23 data to see if we had that specific amendment? I did  
24 not believe we did.

25 Q. Okay.

1 A. But I did not take the time and effort to  
2 do that research.

3 Q. Yeah, and let's talk about that for a  
4 minute. This is Data Request No. 652; is that right?

5 A. Yes.

6 Q. How many data requests have there been  
7 total related to the Iatan projects?

8 A. I have no idea.

9 Q. It's in the thousands?

10 A. I have no idea.

11 Q. It's more than 652 anyway?

12 A. Yes.

13 Q. All right. Let's mark --

14 JUDGE PRIDGIN: Do you need an exhibit  
15 number? This is KCPL 96.

16 (KCP&L Exhibit No. 96 was marked for  
17 identification.)

18 BY MR. HATFIELD:

19 Q. Can you tell me if you recognize KCPL  
20 Exhibit 96?

21 A. Yes.

22 Q. And is this another data request?

23 A. Yes,s.

24 Q. Number 651. Correct?

25 A. Correct.

1 Q. And when was this one sent?

2 A. This was sent on January 14th, 2011.

3 Q. In here you're asking for project status  
4 reports among other things; is that right?

5 A. Risk assessment, white papers.

6 MR. HATFIELD: What's our number again,  
7 Judge?

8 JUDGE PRIDGIN: This is KCPL 96.

9 MR. HATFIELD: I'd move the admission of  
10 KCPL 96.

11 JUDGE PRIDGIN: Any objections? Hearing  
12 none, KCPL 96 is admitted.

13 (KCP&L Exhibit No. 96 was received into  
14 evidence.)

15 BY MR. HATFIELD:

16 Q. Related to Request No. 10 you say, what  
17 was the purpose of the expenditure of \$1,408 on color  
18 copies between April 23rd, 2010 and April 29th, 2010?

19 A. Yes.

20 Q. Why did you want to know why Schiff  
21 Hardin was making color copies?

22 A. Well, KCPL was required to obtain  
23 invoices and documents supporting charges from Schiff  
24 Hardin. KCPL must have made a decision it was not  
25 going to require Schiff to provide the documents. So

1 it had a listing on an invoice.

2           when staff reviews invoices, it  
3 identifies charges that it believes should -- you  
4 know, should be verified. \$1,400 in color copies --  
5 copies indicated that -- you know, we want to make  
6 sure why did they expend that amount of money and was  
7 it chargeable to the project. It seems like a lot of  
8 money for color copies.

9           Q.     So might have been imprudent to make them  
10 in color or might have been imprudent to make that  
11 many?

12           A.     First of all, it was imprudent for KCPL  
13 for not seeking the documentation supporting the  
14 charge. Second of all, \$1,400 for color copies is a  
15 lot of money. The Staff felt an obligation to make  
16 sure that that expenditure was related to the Iatan 2  
17 project and was reasonable.

18           MR. HATFIELD: All right. Can I have  
19 another exhibit number, Judge?

20           JUDGE PRIDGIN: You may. This will be  
21 KCPL 97.

22                   (KCP&L Exhibit No. 97 was marked for  
23 identification.)

24 BY MR. HATFIELD:

25           Q.     Mr. Hyneman, can you tell me what KCPL 97

1 is, please?

2 A. It's Data Request No. 650 requested on  
3 January 13th, 2011 referencing a full and complete CP  
4 package.

5 Q. Okay. So let me make sure -- I should  
6 have done this on some earlier ones, but you requested  
7 this on January 13th and it was due earlier this week,  
8 is that right, the 23rd?

9 A. Yes.

10 Q. And we've heard some testimony on this  
11 already, but CPs are related to reforecasting; is that  
12 right?

13 A. Yes.

14 Q. And you knew that there were CPs, you  
15 talked about them in the audit report, didn't you?

16 A. We knew there -- the existence of CPs,  
17 yes.

18 Q. And, in fact, there was some testimony  
19 filed about the difference between R&Os and CPs?

20 A. May have been, yes.

21 Q. But prior to sending this data request on  
22 January the 13th of 2011, you did not have all of the  
23 CP packages for each and every CPA ever created for  
24 the Iatan construction project?

25 A. We had the CP I think for an earlier

1 forecast. whether that DR asked KCPL to update it  
2 when the next reforecast was done -- if it did, they  
3 didn't update the DR. We had to go back and issue a  
4 subsequent DR to get that information. And we also  
5 learned that the current documentation for the current  
6 reforecast is not yet available.

7           So the -- the purpose of this DR was to  
8 make sure we had all the CPs, which we didn't. And  
9 that we get the current one that's still not completed  
10 yet. I think the November 2011 CP is not finished  
11 yet, but hopefully KCPL will provide it when it's  
12 complete.

13           Q.     So this says, Please provide a full and  
14 complete package for each and every CP ever created.  
15 Right?

16           A.     Right. I think there were three.

17           Q.     So there would be CPs that were created  
18 before you did the audit report you filed in this  
19 case. Right?

20           A.     I don't know the date of the first CP,  
21 but we did have the first CP.

22           Q.     Okay. So you already had them but you  
23 asked for them again two weeks ago?

24           A.     well, we wanted to make sure that we had  
25 them all. We wanted to make sure that the

1 documentation we had was complete, and it wasn't. We  
2 wanted to make sure we get that data.

3 Q. And -- and so Thursday, January 13th at  
4 6:27 p.m. you sent another DR asking for some  
5 documents you already had. Right?

6 A. Are you referencing this DR?

7 Q. Yes, sir.

8 A. When I drafted this DR was -- did I know  
9 that we had a full and complete CP package for every  
10 CP? No. I had another DR where I asked for a CP -- a  
11 listing of CPs and that -- that was not artfully  
12 worded. I meant to ask for all the CP packages.

13 And each CP is a volume of paper about  
14 this thick (indicating). And I got back a listing,  
15 but what I really meant to ask for was the whole  
16 package. So this DR was just to make sure I got the  
17 whole package.

18 MR. HATFIELD: Move the admission of KCPL  
19 Exhibit 97, please.

20 JUDGE PRIDGIN: Any objections? Hearing  
21 none, KCPL No. 97 is admitted.

22 (KCP&L Exhibit No. 97 was received into  
23 evidence.)

24 MR. HATFIELD: Can I have another exhibit  
25 number, Judge, please?

1 JUDGE PRIDGIN: You may.

2 (KCP&L Exhibit No. 98 was marked for  
3 identification.)

4 BY MR. HATFIELD:

5 Q. Mr. Hyneman, would you identify KCPL 97,  
6 please -- 98 --98, sorry?

7 A. Yes. It's Data Request 645 dated  
8 January 7, 2011 referencing the May 2008 crane  
9 accident.

10 Q. Now, you have a disallowance in your  
11 construction audit for -- related to the May 2008  
12 crane accident. Correct?

13 A. Yes.

14 Q. And on January the 7th of 2011, you in  
15 this data request are asking for a copy of each and  
16 every document and correspondence between KCPL and  
17 Alstom associated in any manner with the 2008 crane  
18 accident. And that's what you wanted. Right?

19 A. Yes.

20 Q. And so you didn't already have each and  
21 every document associated with that; is that correct?

22 A. Correct.

23 Q. You -- did you have any documents  
24 associated with the crane accident?

25 A. Yes.

1 Q. well, why were you asking for them again?

2 A. well, as I explained, the Staff made  
3 its -- an adjustment to remove the cost of the crane  
4 accident and --

5 Q. Yes.

6 A. -- these costs were allocated in a  
7 separate cost code, a separate pool.

8 Q. Did you do that based on documents you  
9 reviewed?

10 A. A limited number. The Staff made the  
11 adjustment based on KCPL's assertion that had no  
12 financial responsibility.

13 Q. I understand that. I'm just asking you  
14 what documents you had that you found it necessary to  
15 submit a DR three weeks ago asking for each and every  
16 document associated with the crane accident?

17 A. well, I advised the Staff was caught by  
18 surprise by Mr. Downey's testimony saying they are, in  
19 fact, seeking recovery of these costs. The Staff was  
20 led to believe that it was not -- KCPL was not seeking  
21 recovery. Because of Mr. Downey's surrebuttal  
22 testimony, we had to issue discovery to see, you  
23 know -- to update our costs.

24 And may I add on these DRs, the Iatan 2  
25 construction audit is still being completed. The

1 audit's not finished. This data -- these data  
2 requests are responsive to a continuing audit.

3 Q. Right.

4 A. It's not like we're issuing data requests  
5 after the audit's completed.

6 Q. Mr. Downey's surrebuttal testimony was  
7 filed after you filed the construction audit in this  
8 case. Correct?

9 A. Yes.

10 Q. Thank you.

11 MR. HATFIELD: Judge, I'd move the  
12 admission of whatever that exhibit was.

13 JUDGE PRIDGIN: That was KCPL No. 98.

14 Any objection?

15 MR. HATFIELD: I also --

16 JUDGE PRIDGIN: I'm sorry. It is  
17 admitted.

18 (KCP&L Exhibit No. 98 was received into  
19 evidence.)

20 JUDGE PRIDGIN: I'm sorry. Go ahead.

21 MR. HATFIELD: I'd also move the  
22 admission of KCPL Exhibits 94 and 95, which were  
23 previous DRS we discussed.

24 JUDGE PRIDGIN: Any objection? Hearing  
25 none, those are admitted.

1 (KCP&L Exhibit Nos. 94 and 95 were  
2 received into evidence.)

3 JUDGE PRIDGIN: And, Mr. Hatfield, could  
4 I inquire about how much cross you'd have?

5 MR. HATFIELD: Judge, what I'd like to  
6 do, I'm at a point to take a break if that's what  
7 you're asking. Oh, and then how much more cross? I  
8 think I'm down to I'd say an hour or less.

9 JUDGE PRIDGIN: All right. Let's take  
10 about 15 minutes. Let's go back on the record at  
11 about five till 4:00.

12 (A recess was taken.)

13 JUDGE PRIDGIN: All right. We're back on  
14 the record. Mr. Hyneman, you are still under oath.  
15 Mr. Hatfield, whether you're ready, sir.

16 MR. HATFIELD: Thank you. And actually,  
17 Judge, my next exhibit number I believe is Exhibit 99.  
18 And what I would like to do, after conferring with  
19 counsel, is move the admission of Kansas City Power  
20 and Light Exhibit 99 did I say?

21 JUDGE PRIDGIN: Yes, sir.

22 MR. HATFIELD: Which is Data Request  
23 No. 624.1, 632, 633, 634, 635, 636, 637, 642, 642.1,  
24 643 and 644.

25 JUDGE PRIDGIN: All right. Those are

1 being offered?

2 MR. HATFIELD: Those are being offered,  
3 yes.

4 MS. OTT: Can we show them to  
5 Mr. Hyneman? Has Mr. Hyneman looked at them yet?

6 MR. HATFIELD: I didn't do that yet. I'm  
7 sorry. I gave you a full set. Yeah.

8 JUDGE PRIDGIN: I'll give you a moment.

9 MR. HATFIELD: Sorry.

10 JUDGE PRIDGIN: That's all right.

11 MR. HATFIELD: Okay. If it will help  
12 any, I don't actually intend to examine the witness on  
13 these. I just wanted to move their admission. I don't  
14 mind him looking at them, I'm not objecting to that,  
15 but --

16 MS. OTT: Judge, Staff doesn't have an  
17 objection to KCPL 99; however, Staff would like to  
18 note for the record that we still have a true-up  
19 proceeding.

20 And pursuant to the procedural schedule,  
21 true-up information was supposed to be provided to the  
22 parties by Friday, January 21st, 2011. We have  
23 true-up direct due on February 22nd, 2011 and then  
24 true-up rebuttal due on February 28, 2011.

25 JUDGE PRIDGIN: All right. Thank you.

1 Hearing no objection noted, KCPL No. 99 is admitted.

2 (KCP&L Exhibit No. 99 was received into  
3 evidence.)

4 MR. HATFIELD: Thank you, Judge.

5 BY MR. HATFIELD:

6 Q. Now, Mr. Hyneman, I'd like to talk about  
7 some specific disallowances and I'll do my best to  
8 pick up the pace here. To help us get oriented, maybe  
9 you can just tell us. We were talking about  
10 disallowance lists earlier. What do you have in front  
11 of you that would show disallowances recommended by  
12 staff? Are you going to refer to the construction  
13 audit schedule?

14 A. Yes.

15 Q. Okay. And I had a little conversation  
16 with Ms. Ott. Can you identify which schedule to the  
17 Construction Audit and Prudence Review that would be?

18 A. Schedule 1-1.

19 Q. Okay.

20 A. And 1-2.

21 Q. And 1-2. And for everyone else who may  
22 be following along, I was going to use Mr. Dottheim's  
23 demonstrative which is a combination of 1-1 and 1-2,  
24 but I agree with Mr. Dottheim's explanation that the  
25 numbers are the same, et cetera.

1                   So, Mr. Hyneman, the -- is it fair to say  
2 that the largest disallowance recommended by Staff for  
3 Iatan 2 is for net unidentified/unexplained cost  
4 overruns?

5                   A.     Yes.

6                   Q.     And for Iatan 1 is it fair to say that  
7 the net unidentified/unexplained cost overrun  
8 adjustment is the second or third largest item  
9 depending on how you think about it?

10                  A.     Yes.

11                  Q.     And on Iatan 1 fair to say that the  
12 largest item is the combined disallowances for the  
13 Alstom settlement; is that right? Please we're not  
14 going to talk numbers yet.

15                  A.     Right. There's one adjustment for the  
16 Alstom settlement and there's one adjustment about  
17 KCPL's failure to enforce the liquidated damages.  
18 There are two separate adjustments.

19                  Q.     Right. And I think our documents are all  
20 very clear on this, but just so the record's clear for  
21 people reading this later, both of those adjustments  
22 are related to a decision Alstom made on or about  
23 July 18th, 2008 to settle with Alstom. Correct?

24                  A.     That KCPL made, yes.

25                  Q.     What did I say?

1 A. Alstom.

2 Q. Sorry about that. Alstom settled with  
3 Alstom. KCP&L settled with Alstom?

4 A. Correct.

5 Q. So now let's talk about the net  
6 unidentified and unexplained cost overrun adjustment.  
7 And we've spent a lot of on this. But as I understand  
8 it, that is an adjustment for all costs incurred above  
9 the control budget estimate. Right?

10 A. Yes.

11 Q. And you're not aware of anything in the  
12 stipulation and agreement that says that any costs  
13 above the control budget estimate will be disallowed.  
14 Right?

15 A. Right.

16 Q. Staff made a decision that in Staff's  
17 opinion, there should be a disallowance for those  
18 overruns?

19 A. Yes.

20 Q. And that is based on the fact that Staff  
21 does not believe Kansas City Power and Light complied  
22 with its commitment in the stipulation and agreement  
23 to provide a cost control system that identifies and  
24 explains cost overruns above the definitive estimate.  
25 Correct?

1           A.     I don't think that's the exact wording of  
2 the paragraph. Identify and explain any cost overruns  
3 above the definitive estimate.

4           Q.     Thank you.

5           A.     Okay.

6           Q.     But that's -- that's the reason for it?

7           A.     Yes.

8           Q.     And I think we've already covered this,  
9 but the audit report -- well, the audit report,  
10 page 37, 911 which is one of your sections, contains  
11 the statement, It is clear that KCPL has the ability  
12 to track, identify and explain control budget cost  
13 overruns. Right?

14          A.     Yes.

15          Q.     And you agree that it is clear that KCPL  
16 has the capability to do all of that?

17          A.     KCPL does, yes.

18          Q.     All right. Now, those adjustments there  
19 on Mr. Dottheim's demonstrative, they are listed as  
20 Issue 30, net unidentified/unexplained cost overrun  
21 adjustments. There are two numbers there. I'm not  
22 going to read them out loud, but just to make sure  
23 we're on the same page, one ends in \$836. That's for  
24 Iatan 1. Do you see where I am?

25          A.     Yes.

1 Q. And the other ends in \$296 and that's for  
2 Iatan 2. Right?

3 A. Yes.

4 Q. You don't have an opinion as to whether  
5 those net unidentified/unexplained cost overruns are  
6 imprudent, do you?

7 A. No.

8 Q. You don't have an opinion as to whether  
9 they're inappropriate, do you?

10 A. No.

11 Q. You don't have an opinion as to whether  
12 they're unreasonable, do you?

13 A. No.

14 Q. Don't have an opinion as to whether those  
15 costs were of benefit to ratepayers, do you?

16 A. No.

17 Q. Don't have an opinion as to whether those  
18 costs were for any unnecessary facilities, do you?

19 A. No.

20 Q. You just don't know one way or another  
21 whether those amounts represent prudent expenditures?

22 A. Correct.

23 Q. And you're the sponsor of Staff's  
24 adjustment on -- on unexplained overruns. Right?

25 A. Yes.

1 Q. Okay. All right. Let me -- let's just  
2 stay with Iatan 1 -- or let's look at Iatan 1, I  
3 should say. And let's just start at the top of the  
4 list. There is a proposed disallowance --  
5 disallowance for inappropriate charges?

6 A. Yes.

7 Q. And that -- that is a round number ending  
8 in 000. Correct?

9 A. Correct.

10 Q. And that is an estimate of inappropriate  
11 charges?

12 A. Yes.

13 Q. And you did not attempt to identify  
14 specifically each inappropriate charge in your report.  
15 Correct?

16 A. Well, we did attempt to identify, but  
17 there were so many that the Staff made an estimate  
18 just to get the issue done.

19 Q. Which -- I'm sorry, which part of your --  
20 I believe the inappropriate charges section begins on  
21 page 25, line 21; is that correct?

22 MS. OTT: What page?

23 MR. HATFIELD: Page 25. Maybe I said it  
24 wrong. I'm sorry, Jaime. Page 25, line 21, I think.

25 THE WITNESS: That's correct.

1 BY MR. HATFIELD:

2 Q. where in there did you specifically  
3 identify the particular charges?

4 A. well, page 26, line 29.

5 Q. Okay. Let -- let's not read it right now  
6 just because that part may contain some HC material,  
7 but thank you.

8 A. Okay.

9 Q. Is that the only place?

10 A. There was an exhibit in the Staff's  
11 December 31st, 2009 report that listed a list of what  
12 it considered as an example of inappropriate charges.

13 Q. Okay.

14 A. I don't believe that list was filed with  
15 the November report.

16 Q. Okay.

17 A. I'm assuming it will be with the true-up  
18 report.

19 Q. Okay. You know, let me ask you about  
20 that for a minute. Does -- as far as you know, will  
21 there be any new categories of disallowance in the  
22 true-up report or will it simply be to update the  
23 numbers for the disallowances already proposed?

24 A. I haven't been in any discussions related  
25 to that topic.

1 Q. Just don't know one way or another?

2 A. Not sitting here today. I -- I would  
3 have to review the Commission order to see if there's  
4 any specified guidance or orders on that. I haven't  
5 had any discussions.

6 Q. Well, you know, all this discussion of  
7 Wolf Creek we've had reminds me that I'm relatively  
8 new to this process so help me out with this. I  
9 thought true-up meant we've already dealt with all the  
10 main issues and now we're just fine-tuning the dollar  
11 amounts. Is that the laymen's understanding of  
12 true-up?

13 A. Yes.

14 Q. Okay. Is that what you think you're  
15 supposed to do as Staff auditor during the true-up  
16 process?

17 A. Normally in rate case true-ups, you  
18 identify the issue for the -- for the hearing and then  
19 you update the issues. And based on the Commission  
20 order, those numbers fall into the revenue  
21 requirement.

22 Q. Okay. All right. Let me go back and  
23 just finish up on these inappropriate charges. I  
24 didn't see any -- I see where you say they're  
25 inappropriate and I see where you refer to them as

1 unreasonable. I didn't see you use the word  
2 "imprudent" anywhere in the inappropriate charges  
3 section. Did I miss it?

4 A. I don't think so.

5 Q. Okay. Let's turn to the next  
6 disallowance -- and by the way, the -- I said let's  
7 stay with Iatan 1, but the inappropriate charges  
8 adjustment, you have a discussion about there's no  
9 difference in how you treated that adjustment for  
10 Iatan 1 and Iatan 2, is there?

11 A. No. Just the allocation.

12 Q. Yeah. Absolutely. Okay. And then the  
13 next one on the proposed disallowances is Iatan 1 only  
14 and it's the May 23rd, 2008 crane accident  
15 disallowance. Right?

16 A. Correct.

17 Q. And that was in the preliminary audit  
18 report as well. Correct?

19 A. The December 31st, 2009 report?

20 Q. Yes.

21 A. Yes.

22 Q. Is that right?

23 A. Yes.

24 Q. And that is on page 41 of the audit  
25 report. Correct?

1 A. Yes.

2 Q. And you sponsored that adjustment?

3 A. Yes.

4 Q. And does that adjustment identify and  
5 explain with particularity the disallowances of the  
6 expenses and the reasons Staff believes those  
7 disallowances are justified?

8 A. Yes.

9 Q. So Staff is not offering an opinion on  
10 whether KCPL was liable in any way regarding the crane  
11 accident?

12 A. Staff relied on KCPL witness testimony  
13 that was not financially liable.

14 Q. Gotcha.

15 A. I don't know of any determination Staff  
16 made if KCPL was liable for those costs.

17 Q. Okay. And sitting here today, you don't  
18 have an opinion on that. Right?

19 A. I don't believe I've received a data  
20 request back when I addressed that issue based on  
21 Mr. Downey's rebuttal testimony when I got the  
22 information back and had time to analyze what basis do  
23 they believe the potential liability. I don't believe  
24 we've got that data yet. I'm not sure.

25 Q. Okay. So I don't see any opinion in here

1 that the expenses for the crane accident were  
2 imprudent. Am I missing that?

3 A. No.

4 Q. I don't see any opinion that they were  
5 unreasonable.

6 A. No.

7 Q. No opinion that they were inappropriate?

8 A. No.

9 Q. No opinion that they were not a benefit  
10 to ratepayers?

11 A. Yes.

12 Q. There is an opinion in here that the  
13 expenses for the crane accident were not a benefit to  
14 ratepayers?

15 A. I don't know if that terminology was used  
16 in this -- if that was stated here.

17 Q. Okay.

18 A. The Staff's position is that KCPL was not  
19 at fault, that the contractor was at fault for this  
20 accident and the contractor should bear the  
21 responsibility for the cost. So, therefore, any cost  
22 that KCPL ratepayers pay for an incident that was not  
23 the responsibility of KCPL would be inappropriate.

24 Q. All right. I think I understand. So --  
25 and you're basing that solely on statements of KCPL.

1 Correct?

2 A. Statements of KCPL and -- and documents  
3 reviewed by KCPL, yes.

4 Q. I'm sorry. I thought we were done. I  
5 thought you didn't have an opinion on the prudence,  
6 reasonableness or appropriateness of the expenses.

7 Correct?

8 A. About -- my opinion they should not be  
9 borne by Missouri ratepayers was based on statements  
10 made by KCPL --

11 Q. Right.

12 A. -- and documents that I have reviewed  
13 indicating KCPL had no responsibility for the crane  
14 accident.

15 Q. All right. So the purpose of this  
16 adjustment is to make sure it's not charged to the  
17 ratepayers?

18 A. Yes.

19 Q. And to advocate on behalf of the  
20 ratepayers to make sure --

21 A. No.

22 Q. Oh, I'm sorry. No?

23 A. Staff does not advocate on behalf of the  
24 ratepayers.

25 Q. Okay. But the sole reason for this

1 adjustment is to protect ratepayers is what you're  
2 saying?

3 A. To ensure that no cost that did not  
4 benefit ratepayers are charged to them. I don't know  
5 about protections, but that no cost that they should  
6 not bear are charged to them.

7 Q. Okay. All right. Okay. The next  
8 adjustment is for the severance costs and there are  
9 adjustments there for both Iatan 1 and Iatan 2; is  
10 that right?

11 A. Yes.

12 Q. And that adjustment's on page 42?

13 A. Yes.

14 Q. And as I understand it, Staff is  
15 proposing this adjustment based solely on prior  
16 Commission orders. Correct?

17 A. No.

18 Q. All right. Tell me where the other  
19 explanation for the proposed disallowance is.

20 A. Could you refer to the appropriate page?

21 Q. Yes. Page 42.

22 A. Okay. The adjustment was based on the  
23 fact that the severance agreements provide no  
24 ratepayer benefit.

25 Q. Where are you reading? I'm sorry.

1 A. The first paragraph, it's implicit in the  
2 paragraph.

3 Q. Okay. why don't we read why the Staff is  
4 proposing an adjustment to remove the severance  
5 charges? Just point me to it.

6 A. It's at page 42, beginning at line 9.

7 Q. It's not at page 42, beginning at line 24  
8 where it says, The Staff is proposing an adjustment to  
9 remove the severance charges from the Iatan work  
10 orders for two reasons?

11 A. well, the first para-- two paragraphs set  
12 up the summary of the two reasons why.

13 Q. I understand. Are all of the -- are all  
14 of the reasons for the disallowances explained with  
15 particularity in that section?

16 A. Yes.

17 Q. All right. Thank you. Now, the next one  
18 on my list is the JLG accident adjustment and there's  
19 an adjustment for both Iatan 1 and Iatan 2; is that  
20 correct?

21 A. Yes.

22 Q. And that is on page 45?

23 A. Yes.

24 Q. And the reason for that adjustment is  
25 contained on page 46, line 31; is that right?

1 A. well, that's -- the concluding statement  
2 I believe begins there, yes.

3 Q. well --

4 A. The reasons are listed above it.

5 Q. -- let me read it. Staff does not  
6 believe it was reasonable and prudent for KCPL to  
7 enter into this settlement agreement and pay any cost  
8 for the JLG accident.

9 Now, go ahead. Where is another sentence  
10 that explains why Staff is disallowing?

11 A. Beginning on line -- page 46, line 21.

12 Q. Okay.

13 A. would you like me to read it?

14 Q. well, how much do you want to read?

15 A. That paragraph.

16 Q. Okay.

17 A. In change order supplemental  
18 documentation form attached to this change order by  
19 KCPL on October 13, 2008, seven months after the JLG  
20 accident settlement agreement with Alstom --

21 Q. It's actually not -- I don't believe it  
22 is marked HC on my copy.

23 A. -- KCPL reiterated its belief that  
24 operator error was the cause of the JLG accident, not  
25 soil conditions. The supplemental change order

1 documentation signed by Steve Jones and Carl  
2 Churchman, former KCPL vice president of construction,  
3 provided the rationale behind KCPL's decision.

4 Q. Can I ask you to skip the number?

5 A. Yes.

6 Q. would that be all right? The Commission  
7 can --

8 A. Yes. Decision to pay Alstom for costs  
9 which KCPL believed it bore no responsibility. The  
10 rationale was that KCPL wanted to resolve these issues  
11 and keep the project moving forward.

12 Q. All right. Thank you. The next one on  
13 my list is the employee mileage charge adjustment and  
14 that's only for Iatan 1. Right?

15 A. I -- I did have a statement I need to  
16 correct that I made earlier.

17 Q. Oh, please do.

18 A. And I want to be clear and this is not  
19 worded artfully at all on page 46, line 31. The Staff  
20 did not reach a conclusion that it was not prudent for  
21 KCPL to enter into this settlement agreement. As in  
22 all settlement agreements that -- KCPL entered into it  
23 for its own reasons. The Staff does not believe that  
24 the cost of this settlement agreement should be borne  
25 by Missouri ratepayers.

1           So -- and if that thought was not  
2 conveyed by this statement, then it -- it's incorrect.  
3 But the Staff position -- and I think it's outlined in  
4 other portions of the report is we're not saying that  
5 the decision to enter into that settlement agreement  
6 was imprudent. We're saying the costs that were  
7 incurred as a result should not be borne by Missouri  
8 ratepayers.

9           Q.     Okay. There's an employee mileage charge  
10 adjustment, there's an affiliate transaction  
11 adjustment. Correct?

12           A.     Yes.

13           Q.     And then we have what I'm going to call  
14 the Alstom settlement adjustments that we talked about  
15 a little bit before --

16           A.     Yes.

17           Q.     -- right?

18                     And again, if you and I can kind of dance  
19 and avoid the actual numbers here as long as possible,  
20 that would be great.

21           A.     Okay.

22           Q.     But I do want to talk about those. So  
23 they're both related to a July 18th, 2008 settlement.  
24 Right?

25           A.     Yes.

1 Q. And back in December the Staff  
2 recommended disallowing the payment of some money to  
3 Alstom. Right? Have I got that wrong?

4 A. We have made no opinion on KCPL's payment  
5 to Alstom.

6 Q. Okay. why don't you -- can we find  
7 together in your testimony where the Alstom settlement  
8 is? There's actually a table of contents. Here we  
9 go, page 54.

10 A. Yes.

11 Q. And so on page 54 here there's a heading  
12 entitled KCPL's July 18th, 2008 Alstom Settlement,  
13 Iatan 1. Does it -- does the narrative there then  
14 discuss both adjustments?

15 A. I think the -- you mean both adjustments  
16 for the liquidated damages and the settlement?

17 Q. Right. The foregone liquidated damages  
18 and the settlement.

19 A. Yes. I think it does.

20 Q. And so here's what I was trying to ask.  
21 As I understood what you were explaining, and I'm  
22 looking particularly at page 55, line 4, there was a  
23 settlement in which KCPL agreed to pay Alstom an  
24 amount of money. Correct?

25 A. Yes.

1 Q. All right. And the -- you were able to  
2 review some documents at Kansas City Power and Light  
3 that estimated that potential cost exposure within a  
4 particular range; is that correct?

5 A. Liquidated damages?

6 Q. No. For the amount that might have to be  
7 paid. I'm looking now at page 54, line 23.

8 MR. HATFIELD: Judge, I think it would be  
9 easier just to go in-camera. I'm sorry.

10 JUDGE PRIDGIN: That's all right. We'll  
11 go HC. Just a moment, please.

12 (REPORTER'S NOTE: At this point, an  
13 in-camera session was held, which is contained in  
14 volume 28, pages 2728 to 2744 of the transcript.)

1 JUDGE PRIDGIN: We're back in public  
2 session.

3 THE WITNESS: Yes.

4 CHARLES HYNEMAN testified as follows:

5 BY MR. HATFIELD:

6 Q. So -- and I'm going to paraphrase here,  
7 tell me if I've got this wrong. That's because of  
8 insufficient documentation of Schiff Hardin's  
9 expenses. Right?

10 A. No documentation.

11 Q. No documentation?

12 A. Yes.

13 Q. Well, you got an invoice that says, we  
14 made this expense. Right?

15 A. There was invoices listing categories  
16 like meals --

17 Q. Right.

18 A. -- non-meals, travel.

19 Q. And you know things like they made color  
20 copies?

21 A. Yes.

22 Q. Right. Because you had a DR on that.  
23 Right?

24 A. \$1,400 in copies, yes.

25 Q. So are you then -- are you assuming

1 Schiff Hardin is lying about that when they say that  
2 they incurred those expenses?

3 A. No.

4 Q. Are you assuming they're telling truth?

5 A. I don't approach audit -- that -- that  
6 people are telling the truth or not telling the truth.  
7 Under -- under Generally Accepted Auditing Standards,  
8 an auditor is required to approach audit evidence or  
9 documentation with professional scepticism. That's  
10 what I apply.

11 Q. Okay. So professional scepticism. So  
12 when a lawyer at Schiff Hardin says, I flew from  
13 Chicago to Kansas City and I expended X amount of  
14 money, professional scepticism says you don't believe  
15 that cost unless they produce a receipt?

16 A. I can't validate the cost was incurred.

17 Q. All right.

18 A. And professional scepticism would say  
19 show me the documentation and then I'll be  
20 understanding the cost that was actually incurred.

21 Schiff Hardin was required to provide that  
22 documentation to KCPL. KCPL decided not to enforce  
23 the contract terms.

24 Q. I understand.

25 A. Okay.

1 Q. I understand. Now, let me ask you about  
2 the legal services rate adjustment for a minute. And  
3 I think we talked about this before. You're saying  
4 that what -- when you arrived at this, you took the  
5 total number of hours worked by Schiff and you  
6 discounted the rate charged for those hours --

7 A. No.

8 Q. -- is that right? No? Sorry.

9 A. I took the total cost by Schiff and I  
10 made a percentage which we allocate to legal work and  
11 a percentage to project management, project control  
12 type work.

13 Q. Okay. I want to break them in half for a  
14 minute. So on the sheet I'm looking at, there are two  
15 different adjustments. There's one for Schiff Hardin  
16 project management labor rate.

17 A. Yes.

18 Q. And so that's where you determined that  
19 there was a certain portion of Schiff's work that was  
20 really project management. Right?

21 A. Yes.

22 Q. And what you did is you just discounted  
23 the amount that was paid for that portion of the work.  
24 Right?

25 A. When you say "discounted," I took that

1 percentage of total Schiff charges and I applied a  
2 project management cost rate, which was the rate that  
3 LogOn Consultants, a very experienced project  
4 management group of individuals, were charging KCPL.

5 Q. Right.

6 A. I substituted that rate for the rate that  
7 Schiff Hardin should be compensated for for project  
8 management type work.

9 Q. You assumed that the LogOn rate was the  
10 market rate for project management services?

11 A. It's the rate KCPL was paying LogOn.

12 Q. Okay.

13 A. Yes.

14 Q. That's not what I asked you.

15 A. I'm --- ye-- well, market rate -- a  
16 reasonable rate is what I determined.

17 Q. So you determined that LogOn was a  
18 reasonable rate?

19 A. Yes.

20 Q. You did not determine that LogOn was the  
21 market rate?

22 A. I didn't do a market survey to determine  
23 a market rate.

24 Q. There you go. So the only project  
25 management rates you looked at were LogOn's?

1 A. They're the only one I used as a  
2 substitute to -- for -- for Schiff Hardin.

3 Q. Gotcha.

4 A. I've looked at a lot of invoices and I've  
5 seen a lot of rates for different -- different  
6 individuals.

7 Q. For project management on construction  
8 projects?

9 A. The promp-- the best sample to use for  
10 that would be LogOn Consulting --

11 Q. Okay.

12 A. -- the type of work they were performing.

13 Q. Right. But I just want to make clear  
14 because you told us before you haven't done a  
15 construction audit before. Right?

16 A. For a new power plant, yes. Or I'm not  
17 going -- a construction audit, yes.

18 Q. Haven't done one?

19 A. Correct.

20 Q. Okay. Because that will save us a lot of  
21 time.

22 A. Yes.

23 Q. Because if you have, I got to go back.

24 A. No.

25 Q. Good. I understand. And you applied a

1 percentage to all of Schiff Hardin's bills in order to  
2 figure out which was project management and which was  
3 legal. Right?

4 A. No.

5 Q. I thought it was 80/20.

6 A. I took a percentage of the cost for  
7 Iatan 1, Iatan 2.

8 Q. Yeah.

9 A. Took 80 percent of that --

10 Q. Yeah.

11 A. -- and categorized that as project  
12 management.

13 Q. Okay. And you came up with the  
14 80 percent based on your judgment from reviewing  
15 invoices as to what was project management and what  
16 wasn't. Right?

17 A. Reviewing contract -- the Schiff Hardin  
18 contract.

19 Q. Yeah.

20 A. Reviewing Mr. Downey's testimony and the  
21 type of work Schiff Hardin performs.

22 Q. So did he say 80 percent was project  
23 management you're saying?

24 A. No. He provided a description of the  
25 services.

1 Q. Okay. All right.

2 A. Reviewing detailed invoices over a period  
3 of three to four years.

4 Q. Okay.

5 A. That's -- there are probably other  
6 documents I reviewed to come to that conclusion, but  
7 that's substantively what they were.

8 Q. Okay. And you determined that -- and in  
9 some cases you determined that lawyers were actually  
10 performing project management work. Right?

11 A. I determined the work performed was  
12 project management related work and it was done by  
13 Ms. Okizaki or Ms. Shermer (ph.) their attorneys, that  
14 they were performing work.

15 Q. And so you moved some of Ms. Okizaki's  
16 work into the project management category as a  
17 practical matter?

18 A. Again, I would have to look at my work  
19 papers to see how I recognized that.

20 Q. Okay. All right. Let me just ask you  
21 then, so you determined that 20 percent of Schiff  
22 Hardin's costs were legal services. Is that fair to  
23 say?

24 A. Yes.

25 Q. Okay. And that was based on your -- your

1 opinion about the percent that was legal services  
2 versus the percent that was project management?

3 A. My evaluation of the evidence.

4 Q. And then did you reach an opinion?

5 A. Yes.

6 Q. Okay. And you decided to lower the rate  
7 that Schiff Hardin was entitled to there. Right?

8 A. Again, I came up with a reasonable rate  
9 for project management services based on what KCPL  
10 paid LogOn Consultants.

11 Q. I'm not talking about project management  
12 anymore. I'm talking about legal services.

13 A. The legal services were based on a rate.  
14 And the range I determined were based on a high end,  
15 which would be the Laffey index, which would be the  
16 attorneys providing service in Washington, DC in the  
17 current period based on the year -- their years of  
18 experience.

19 Q. Right.

20 A. I reviewed invoices of -- that KCPL paid  
21 for -- for attorneys working on the Iatan 2 project  
22 and came up with a range that -- that what I felt was  
23 reasonable --

24 Q. And then --

25 A. -- for the legal work.

1 Q. -- you took the Laffey index and then you  
2 discounted below that. Right?

3 A. What do you mean "discounted below that"?

4 Q. I thought you applied a volume  
5 discount --

6 A. Oh, yes.

7 Q. -- even below the Laffey index.

8 A. Yeah. Given the fact that KCPL has  
9 received volume discounts from other attorneys on the  
10 Iatan project, that KC-- that Schiff Hardin would be  
11 charging thousands and thousands and thousands of  
12 hours on the project, I felt it would be reasonable  
13 for KCPL to at least make an attempt to secure a  
14 volume discount. They did not. So I imputed a volume  
15 discount.

16 Q. Did you hear the testimony from  
17 Mr. Roberts that KCPL actually did attempt to get a  
18 volume discount and he said no?

19 A. I believe I heard that, yes.

20 Q. And would that change your opinion at  
21 all?

22 A. No.

23 Q. Okay. I -- I've lost it. I'm not going  
24 to spend too much time on this, but can you help me  
25 find the Laffey matrix numbers in your testimony?

1 A. Page 88.

2 Q. Page 88. Thank you so much. So under  
3 the Laffey matrix, an attorney -- let's see here. I  
4 graduated in -- all right. So an attorney with 11 to  
5 19 years of experience would have a rate of 410 an  
6 hour; is that right?

7 A. Yes. And I believe that is probably  
8 pretty reasonable to what -- a high end of what  
9 attorneys charge for that years -- those number of  
10 years.

11 Q. And then you subtracted a 10 percent  
12 volume discount. Right?

13 A. Yes.

14 Q. So that would take that number down to --  
15 I can't -- I'm not an accountant, as you've told me.  
16 370, is that right? The 410 comes down to 370?

17 A. Roughly, yes.

18 Q. And so this is the only market survey you  
19 looked at. Right?

20 A. I don't think this is a market survey.

21 Q. Oh, I'm sorry. Did you look at any market  
22 surveys? I think you told me you didn't before.

23 A. I don't know of any market surveys that I  
24 had available, no.

25 Q. All right. So you didn't look at any

1 surveys of the AmLaw 200. Right?

2 A. I don't know what that is.

3 Q. You don't know what the AmLaw 200 is?

4 A. No.

5 Q. All right. You didn't look at the  
6 Missouri Lawyers Weekly Annual Survey of Missouri  
7 Hourly Rates?

8 A. No.

9 Q. Didn't know that existed, did you?

10 A. No.

11 Q. Didn't consult with any attorneys about  
12 the average hourly rates for attorneys in Missouri.  
13 Right?

14 A. No.

15 Q. Okay. Now, we have the Cushman project  
16 management adjustment, the Pullman adjustments. and  
17 those are for both Iatan 1 and Iatan 2. Right?

18 A. Yes.

19 Q. And those were not in the preliminary  
20 audit report. Did you already explain to us why not  
21 earlier in -- I know it's been a long day.

22 A. I don't recall if we addressed the  
23 Cushman adjustment or not, whether or not -- in the  
24 December report. I know the Pullman adjustment  
25 wasn't.

1 Q. All right. Cushman project management  
2 adjustment, same deal. You took Cushman's hourly rate  
3 and you dropped it down to LogOn's rate. Right?

4 A. Yes. KCPL, in an effort to have  
5 assistance with the project execution plan, hired  
6 Cushman and Associates.

7 Q. All right. And you -- you didn't do any  
8 study again of project management rates. You just  
9 took the LogOn rate. Right?

10 A. Actual rates, yes.

11 Q. Okay. Now, 49, adjustment from KCC Staff  
12 audits. There was not one of those in the preliminary  
13 audit. Right?

14 A. Correct.

15 Q. You just took whatever KCC Staff audit  
16 found and you plugged in those exact numbers. Right?

17 A. Where is that? I'm --

18 Q. It says, Adjustment from KCC Staff  
19 audits.

20 A. Yes. These are the R&Os which KCPL  
21 decided not to challenge from Mr. Drabinski in the  
22 Iatan 1 audit. KCPL acquiesced in Kansas, decided not  
23 to charge Kansas ratepayers for those costs, then --

24 Q. Missouri Staff did not reach any  
25 independent conclusion about the prudence of those

1 costs. Right?

2 A. If you could tell me which specific costs  
3 that you're addressing there.

4 Q. The costs you're disallowing.

5 A. I think one -- R&O 139, can you refer me  
6 to that one?

7 Q. You've got two numbers there.

8 A. Yeah. I mean if we want to --

9 Q. well, you have \$438,200 for 1 -- Iatan 1,  
10 \$1,509,915 for Iatan 2. And I just want to know if  
11 the -- well, let me put it this way. I don't see  
12 anything in the audit that says Missouri Staff has  
13 reached an independent opinion on whether those costs  
14 were prudently incurred or not. Did I miss it?

15 A. No. The Staff reviewed the testimony of  
16 Mr. Drabinski on this and reviewed the R&Os and it  
17 reviewed KCPL's decision not to seek recovery of these  
18 costs and it agreed that they shouldn't be sought  
19 recovery in Missouri. Did I know that I categorized  
20 them as imprudent? No.

21 Q. Okay.

22 A. Did -- were they -- meet another  
23 category? Yes. KCPL admitted that it was not seeking  
24 recovery.

25 Q. So your testimony is that somewhere they

1 admitted that those costs were imprudently incurred?

2 A. I didn't say that.

3 Q. I'm sorry. I thought you said

4 "admitted." I misunderstood you.

5 A. They admitted they weren't seeking

6 recovery.

7 Q. In Kansas?

8 A. Correct.

9 Q. Okay. All right. So let me make sure  
10 now I understand. The -- there's a note A and it  
11 says, Gross unidentified/unexplained cost overruns.  
12 And so that's just you took the control budget  
13 estimate and you added up everything over that as of  
14 just June 30th. I think we talked about this. Right?

15 A. Yes.

16 Q. And you used the exact dollar amount of  
17 the control budget estimate. Correct?

18 A. Yes.

19 Q. You didn't give them a -- an allowance  
20 for -- I believe the number in the audit report is  
21 10 percent degree of confidence in a definitive  
22 estimate?

23 A. I don't know what you're referring to.

24 Q. You didn't add anything to the control  
25 budget estimate. You took that exact dollar amount

1 that's been said, 1.68 for the Iatan 2?

2 A. which includes \$220 million of  
3 contingency.

4 Q. I understand.

5 A. Plus a \$48 million decrease in scope. So  
6 basically \$260 million above what KCPL projected it  
7 would cost them.

8 Q. I understand.

9 A. So that's the cost around that, yeah.

10 Q. You took that exact amount. Right?

11 A. Yes.

12 Q. And disallowed everything above that?  
13 And then you reduced from that the Staff disallowances  
14 for things like the JLG accident, the Alstom  
15 settlement. Right?

16 A. Yes.

17 Q. So were you able to identify that there  
18 was a cost overrun for the May 23rd, 2008 crane  
19 accident?

20 A. Sitting here today, I don't recall  
21 whether that cost was charged as an overrun or whether  
22 that was charged to the contingency.

23 Q. Okay. Were you able to identify that the  
24 specific disallowances were, in fact, cost overruns?  
25 We know Schiff was. Right?

1 A. I don't know that.

2 Q. Okay.

3 A. I don't know whether it was charged -- I  
4 know there were pieces of the Schiff charges  
5 identified in -- in contingency. The -- and we don't  
6 even know what the budget for Schiff was, but assuming  
7 it's what Mr. Archibald said, about \$7.3 million --

8 Q. Wait a minute now. You don't know what  
9 the budget for Schiff was?

10 A. We have a document that appeared to be  
11 approved by the board of directors saying the budget  
12 for Schiff Hardin for Iatan was \$1.6 million.

13 Q. You do?

14 A. Yes.

15 Q. And do you believe that's accurate?

16 A. I had no reason to believe it's  
17 inaccurate. It's attached to the board minutes.  
18 There's question whether those were the numbers that  
19 the board approved. I didn't see signatures, but an  
20 indication that that's the number, the budget, which  
21 tied to the \$1.685 million, that Schiff Hardin budget  
22 was in that number.

23 Q. Hang on now. Let's back up. Let's go to  
24 page 66 of the Construction Audit and Prudence Review,  
25 line 15. This is your section. Right?

1 A. Yes.

2 Q. It says, In the Iatan 2 cost report, the  
3 total Schiff amount in the control budget estimate  
4 is -- and there's a number there?

5 A. Yes.

6 Q. Are you saying that number -- what you  
7 put in the report is wrong?

8 A. No. That is the number that's in the  
9 cost report. That's clearly the number that's in the  
10 report.

11 Q. Well, wait. It says, The total Schiff  
12 amount in the control budget estimate.

13 A. Right. The cost report has the control  
14 budget estimate in it.

15 Q. Right.

16 A. That's the number that was allocated for  
17 the budget for Schiff Hardin.

18 Q. Gotcha.

19 A. As Mr. Archibald said, he didn't see the  
20 document that -- that had Schiff Hardin budget at the  
21 \$1.6 million. It was in the document that the board  
22 supposedly approved. So there's question whether this  
23 is the actual board approved budget or is the  
24 1.6 billion -- million the actual board approved  
25 budget.

1 Q. So you think the board approved line by  
2 line every line in the control budget estimate? Is  
3 that your testimony?

4 A. They were -- it appears they were  
5 presented with a document that had line by line  
6 budgets and they approved that document. Do I know if  
7 they said, okay, we're approving this one or we're  
8 approving -- okay, the 1.6 is good, we'll go with that  
9 or the specific areas? I don't know if they did  
10 specifically or in total.

11 Q. Okay. When you say "it appears," you're  
12 relying on the language of a particular document that  
13 I believe we've talked about in this hearing.  
14 Correct?

15 A. I'm relying on a numerical document which  
16 lists the budget that's attached to board minutes.

17 Q. I meant whether or not the board approved  
18 line by line, the only evidence you have of that is  
19 documentary. Correct?

20 A. Yes.

21 Q. Okay. Thank you. All right. If -- now,  
22 if the Commission were to accept your disallowance and  
23 disallow all cost overruns over the control budget  
24 estimate, has Staff given any thought as to what  
25 effect that would have on future construction

1 projects?

2 A. well, I have not. Let me ask -- I can't  
3 speak for the Staff on that question.

4 Q. If a policy's adopted that we're going to  
5 disallow everything over a control budget estimate,  
6 based on your experience as an auditor, your 17 years  
7 and all that, isn't there just by common sense an  
8 incentive for utilities to set the budget as high as  
9 possible?

10 MR. SCHWARZ: Objection. In order to set  
11 a policy, the Commission would have to adopt a rule.  
12 This is a contested case and any decision in this case  
13 is excepted from the rulemaking. And if the  
14 Commission's going to adopt a policy, it has to be  
15 done by rule.

16 MR. MILLS: And further, the question  
17 calls for speculation.

18 JUDGE PRIDGIN: That's the objection I  
19 was expecting. Mr. Hatfield?

20 MR. MILLS: Just trying to help.

21 MR. HATFIELD: well, Judge, I'm  
22 exploring -- we already talked with Mr. Henderson  
23 about Staff's -- and I haven't asked him this, I can  
24 by foundation -- Staff's obligation to not just  
25 advocate for ratepayers but rather to balance

1 interest. And he's the sponsor of particular  
2 disallowances and he said Staff made the decision to  
3 recommend disallowances above the control budget  
4 estimate.

5 so if I've phrased the question  
6 inartfully, I apologize, but I would like to ask him  
7 what the effect would be if that disallowance were  
8 adopted.

9 MS. OTT: It's still -- still think it  
10 calls for speculation.

11 JUDGE PRIDGIN: I'll let him answer if he  
12 knows. If he doesn't know, he can say so.

13 THE WITNESS: Could you repeat the  
14 question, please?

15 BY MR. HATFIELD:

16 Q. I don't know if I can. And I may draw  
17 another objection, but I think my question was if  
18 Staff succeeds in disallowing everything over a  
19 control budget estimate, isn't that an incentive in  
20 future projects to set the budget as high as possible  
21 to avoid disallowances?

22 A. Again, that -- an incentive to -- to  
23 engage in inappropriate conduct, I don't know. But  
24 the thing is, is Staff is not doing an adjustment  
25 based on what a purported incentive may be in the

1 future. It is making the adjustment based on a  
2 regulatory stipulation and agreement entered into  
3 between several parties.

4 Q. Gotcha. All right. Let me ask this  
5 real -- just -- do you agree that it is important for  
6 construction projects to be budgeted as accurately as  
7 possible?

8 A. Yes.

9 Q. And that that budgeting could -- should  
10 occur on fact -- on a fact basis?

11 A. Again, budgeting occur on a fact basis?

12 Q. Yes.

13 A. I don't know if that's how budgeting's --  
14 budgets are created, on a fact basis.

15 Q. So conversely then, you agree that  
16 budgets should be created without facts?

17 A. Budgets are created on studies and  
18 estimates of what it would take to cost to construct a  
19 project.

20 Q. Right. And that should be done with as  
21 much information as possible. Right?

22 A. Given the constraints of the construction  
23 project, yes.

24 Q. And you agree it's prudent and reasonable  
25 to construct budgets -- to construct, that's a bad

1 word -- to create budgets for a construction project?

2 A. Yes.

3 Q. And I think you've said that you agree  
4 that it's prudent and reasonable to update those  
5 budgets as additional information becomes available.  
6 Correct?

7 A. I think I said it wasn't im-- I didn't  
8 believe it was imprudent.

9 MR. HATFIELD: Thank you, Judge. I don't  
10 have any further questions.

11 JUDGE PRIDGIN: Mr. Hatfield, thank you.  
12 Let me see if we have any bench questions.  
13 Commissioner Kenney?

14 COMMISSIONER KENNEY: I'm the only one?

15 JUDGE PRIDGIN: Commissioner Jarrett was  
16 here and stepped out so it's to you.

17 COMMISSIONER KENNEY: Okay. I have -- I  
18 just have a few.

19 QUESTIONS BY COMMISSIONER KENNEY:

20 Q. Mr. Hyneman, thanks for your time and I  
21 won't keep you too very long. I want to ask about the  
22 exhibits that you went through with Mr. Hatfield. Can  
23 you hear me okay?

24 A. Yes.

25 Q. Okay. I just want to ask you about the

1 exhibits that you went through with Mr. Hatfield. I  
2 think it was Exhibits 94, 95, 96, 97. And they --  
3 those exhibits were certain data requests. Do you  
4 remember that?

5 A. Yes, sir.

6 Q. Can you tell me is it -- is it your  
7 practice to -- to draft those data requests yourself  
8 and send them out or do you do it in consultation with  
9 the Staff attorneys?

10 A. We do that in consultation with the Staff  
11 attorneys.

12 Q. Okay. With all of them?

13 A. That's the intent, yes, sir.

14 Q. Is that what, in fact, happened with  
15 those particular Exhibits 94, 95, 96, 97?

16 A. Yes, sir. Our data requests before we  
17 send it to the company, we send it to our general  
18 counsel's office for coordination and approval.

19 Q. Okay. But do you -- you draft them --  
20 you take the first shot at drafting them and then you  
21 send them over to the Staff counsel's office to  
22 review?

23 A. Yes, sir.

24 Q. Okay. Were you involved at all in the  
25 negotiation of the Comprehensive Energy Plan or the

1 stipulation and agreement as it's been variously  
2 referred to?

3 A. No.

4 Q. Okay. I want to ask you -- I was not  
5 clear and I may have just misheard. I think -- and  
6 I'm not going to refer to any numbers, but we were  
7 talking about those various settlements and you said  
8 that the costs of the settlement shouldn't be borne by  
9 the ratepayer because it's inappropriate. Is that --  
10 did I hear you correctly?

11 A. Yes, sir. That's correct.

12 Q. So are you meaning that the actual dollar  
13 amount that was paid in the settlement shouldn't be  
14 borne by the ratepayers? Is that what you're  
15 referring to?

16 A. Yes. For unit 1, Iatan 1, both the  
17 actual dollar amount of the settlement, for example,  
18 that KCPL paid to Alstom and the liquidated damages  
19 that KCPL gave up should not be charged to Missouri  
20 ratepayers. And Staff is not --

21 Q. But -- but you're not -- but the act of  
22 entering into the settlement itself, have you formed  
23 an opinion about whether that was prudent or  
24 imprudent?

25 A. We have not come to an explicit decision.

1 Now, we know a lot of the problems that were created  
2 and we have evidence in the case and testimony in the  
3 case and attachments support that KCPL had an  
4 inexperienced project management team, KCPL hired  
5 outside experts, including Ernst & Young, Carl Morano,  
6 LogOn Consulting.

7                   And their evaluation indicated that  
8 KCPL's management of the major contractors, for  
9 example, Alstom and Burns and McDonnell, were not  
10 effective and a lot of -- caused a lot of cost to be  
11 incurred that resulted in the settlement.

12                   So that -- that's substantively the  
13 reason why we don't believe that the cost of the  
14 settlement -- and we're not saying that KCPL because  
15 they were behind schedule and you wanted to get the  
16 project done on time and -- we're not saying that was  
17 imprudent to do that. We're just -- do a cost  
18 allocation of the settlement is where the staff is  
19 involved on that.

20           Q.     Okay.

21           A.     And if I may add, I don't believe KCPL --

22           Q.     Sure. Go ahead.

23           A.     -- has provided any information to show  
24 where -- any part of the settlement broken out. For  
25 example, if KCPL can show that a part of the

1 settlement was a realistic claim based on force  
2 majeure items or, you know, differing site conditions  
3 where they -- they assert too the economizer. If they  
4 can quantify that a portion of the settlement was  
5 attributable to that, which is reasonable, the Staff  
6 would have no problem allowing that.

7           But the Staff is of the understanding  
8 that the settlement was based on problems and faults  
9 of the contractors, delays, excess costs caused by its  
10 lack of aggressive management of the contractors.

11           Q.     So it's -- it's the improper management  
12 of the project in the first instance and everything  
13 that flows from that that is the basis of the  
14 disallowances?

15           A.     Well, it's improper management as far as  
16 you had an inexperienced project management team.  
17 KCPL was warned by Ernst & Young that if you're going  
18 to fast track the project, you have to have an  
19 experienced project management team in place. Staff's  
20 position is it did not have an experienced project  
21 management team in place and that was a cause of a lot  
22 of cost.

23           KCPL was to have a definitive estimate  
24 completed. And definitive estimate as -- as Schiff  
25 Hardin has defined, is one that's 75 -- or a

1 definitive estimate is one that's approximately  
2 75 percent engineered. KCPL's budget was based on an  
3 engineering that's roughly 25 percent.

4 Q. well, what's the significance of that  
5 fact?

6 A. well, when you have a project that's --  
7 that's not substantially designed prior to incurring  
8 procurements and construction, a lot of the  
9 procurements later on will have to be changed based on  
10 updated design. And those changes incur costs and --

11 Q. Is that a function -- is that a function  
12 of when they set the control budget or is that a  
13 function of entering into an EPC contract, for  
14 instance?

15 A. I believe that's a function of what is  
16 the design of the -- of the engineering when the  
17 budget is complete. They have a much better  
18 understanding of what the costs are going to be.

19 Q. Okay. were you involved in the -- there  
20 was a July 11th, 2006 meeting that was referred to  
21 earlier in which KCPL's cost control systems document  
22 was presented to Staff. were you there at that  
23 meeting?

24 A. No, sir.

25 Q. Okay. Do you know the meeting I'm

1 referring to?

2 A. I've heard discussions of it and I  
3 don't -- I was not involved with the project at that  
4 time or the discussions.

5 Q. Okay. All right. Mr. Hyneman, thanks  
6 for your time. I don't have any other questions.

7 JUDGE PRIDGIN: Commissioner Kenney,  
8 thank you. Any recross? Mr. Mills?

9 RECROSS-EXAMINATION BY MR. MILLS:

10 Q. Just a few. And this goes to that -- to  
11 the question of the timing, the control budget and the  
12 percentage engineering and all that. When was the  
13 regulatory plan negotiated?

14 A. The negotiations I think took place in  
15 2005.

16 Q. Spring of 2005?

17 A. I think it was along the time when the  
18 negotiations took place. That's reasonable.

19 Q. And in the regulatory plan what was the  
20 deadline for a definitive estimate?

21 A. I believe KCPL committed to have it done  
22 on August 1st of 2006.

23 Q. Okay. Based on your understanding of the  
24 process, would it have been possible to get a  
25 definitive estimate, something in the neighborhood of

1 70 to 75 engineered, in the period of time between  
2 when the regulatory plan was negotiated and that  
3 August deadline a year and a half later?

4 A. Again, I know there were issues with  
5 the -- with Burns and McDonnell, the amount of  
6 resources they were devoting to the project. I don't  
7 know if they could have -- that period of time would  
8 be sufficient to -- to get 75 percent. I have no  
9 experience to base that assumption on.

10 Q. When was the control budget finally given  
11 to staff?

12 A. I believe it was January of 2007.

13 Q. Okay. So that's another six months after  
14 the deadline?

15 A. Yes.

16 Q. Okay. And at that point do you agree  
17 that the engineering was only 20 to 30 per-- the --  
18 20 to 30 percent complete?

19 A. That's what KCPL asserts, correct.

20 Q. Okay. What is your understanding of why  
21 the engineering was so incomplete so long after KCPL  
22 committed to presenting a definitive estimate?

23 A. The documents I reviewed indicated  
24 that -- that Burns and McDonnell were not devoting  
25 enough resources to this project. And I have reviewed

1 documents from Schiff Hardin where they experienced  
2 significant difficulty getting information from Burns  
3 and McDonnell to get the budget. That's what I know.

4 Q. Okay. So in a previous answer, you said  
5 you don't know whether that's enough time to get to a  
6 definitive estimate. But you do know that it was  
7 enough time to be more ahead than the 20 to 30 percent  
8 they ultimately were. Right? Because of those  
9 problems with Burns and Mac?

10 MR. HATFIELD: Judge, just for the  
11 record, I want to object. It calls for an opinion  
12 that this witness is not qualified to give.

13 THE WITNESS: I don't have an opinion on  
14 that.

15 MR. HATFIELD: I withdraw my objection.

16 MR. MILLS: That's all I have.

17 JUDGE PRIDGIN: Mr. Mills, thank you.  
18 Further recross, Mr. Schwarz?

19 MR. SCHWARZ: No.

20 MR. HATFIELD: Are we up to me?

21 JUDGE PRIDGIN: Mr. Hatfield, yes, sir.

22 RE-CROSS-EXAMINATION BY MR. HATFIELD:

23 Q. Just briefly since we got into the  
24 discussion of definitive estimate. So I take it from  
25 the discussion you have an understanding of what a

1 definitive estimate is then?

2 A. Yes.

3 Q. So did KCPL at some point have a  
4 definitive estimate, some point in time?

5 A. I believe around May of '08 was -- the  
6 engineering was 75 percent complete.

7 Q. Okay. And so I guess I'm trying to  
8 understand now. Do you -- is whether the estimate was  
9 definitive important to the analysis of how much you  
10 recommend disallowing?

11 A. I would say yes, to the extent where KCPL  
12 made the decision to fast track the project based on  
13 engineering being 25 percent complete --

14 Q. All right.

15 A. -- and they were warned by its auditors  
16 that it needed an experienced project management team  
17 in place and it didn't have that. So that -- that was  
18 issues that the Staff considered in formulating its  
19 adjustments.

20 Q. Okay. And I guess here's what I'm trying  
21 to understand. Let's say for a minute that the 2006  
22 control budget estimate was definitive under your  
23 definition. You would still disallow all cost  
24 overruns over that, under your analysis?

25 A. If KCPL did not provide documentation

1 which they're required to do to explain and list each  
2 cost overrun over that definitive estimate, then we'd  
3 be in the same predicament.

4 Q. Gotcha. And by the way, you keep going  
5 back to that documentation. You think that the  
6 stipulation and agreement has the word "documentation"  
7 in it?

8 A. It implies documentation.

9 Q. All right. Fair enough. So KCPL did  
10 have a definitive estimate in 2008. Right?

11 A. Yes.

12 Q. And your testimony is that the  
13 stipulation and agreement requires KCPL to have a  
14 definitive estimate by a specific date and time; is  
15 that right?

16 A. It requires KCPL to track costs overruns  
17 to a definitive estimate.

18 Q. Okay.

19 A. KCPL committed I believe to having that  
20 definitive estimate completed on August 1st, 2006.

21 Q. And if that agreement is not in the  
22 stipulation and agreement, how would that -- that date  
23 is not in the stipulation and agreement, how would  
24 that change your opinion?

25 A. If it's not -- if that agreement is not

1 in any document that KCPL committed to, then unless it  
2 made it orally and is not going to stand by it, then  
3 it wouldn't.

4 Q. So then you track to the definitive  
5 estimate in 2008 instead of the 2006 number?

6 A. Again, I'm a little lost on your line of  
7 questioning.

8 Q. I'm sorry. I think I can do it very  
9 quickly. You agree there was a definitive estimate in  
10 2008. Correct?

11 A. I -- I believe that -- that KCPL's  
12 reforecast --

13 Q. Yes, sir.

14 A. -- where it created a new budget was  
15 based on engineering that was approximately 75 percent  
16 complete and had a better understanding where the  
17 cost's going to be in May of 2008.

18 Q. And that was a definitive estimate?

19 A. I think it meets the criteria outlined by  
20 Mr. Roberts in meeting that, yes.

21 Q. Okay. So when the stipulation and  
22 agreement says, Track cost overruns above the  
23 definitive estimate, you would track the overruns  
24 above the 2008 number. Right?

25 A. No. I think --

1 Q. No?

2 A. -- for the purposes of the stipulation  
3 and agreement and we've been through this --

4 Q. Yes.

5 A. -- the staff agreed to use the control  
6 budget estimate for the definitive estimate at that  
7 time. That's what it was using, that's what it's used  
8 all along.

9 Q. Okay.

10 A. Just that the budget was not completed  
11 with engineering based on definitive estimate  
12 criteria.

13 Q. Okay. And the reason you're using the  
14 2006 control budget estimate -- let me make sure I  
15 understand -- is because you believe that the -- in  
16 the stipulation and agreement, KCPL agreed to provide  
17 the definitive estimate by a date back in 2006?

18 A. Yes. I've seen documents I think from  
19 KCPL where they indicated they had that obligation.

20 Q. Okay. Can you -- do you know which  
21 section of the stipulation and agreement that date  
22 would be in?

23 A. I don't know if it's specifically  
24 outlined in the stipulation and agreement, but I can  
25 locate that document if you'd like.

1 Q. All right. And then just very briefly on  
2 Commissioner Kenney's questions about Alstom, if  
3 Alstom -- I'm going to use a negative so let me warn  
4 you. If Alstom was not late in meeting their  
5 schedule, KCPL would not have been entitled to LDs.  
6 Right?

7 A. Their original schedule, yes.

8 Q. Okay. The -- when the Construction Audit  
9 and Prudence Review that you performed refers to an  
10 R&O that says if Alstom continues to meet deadlines,  
11 you're referring to the original -- you think that R&O  
12 was referring to the original deadlines?

13 A. Well, and KCPL -- Alstom had a deadline.  
14 In the R&O it explained that KCP&L gave Alstom an  
15 extra 47 days.

16 Q. Right.

17 A. Then it set a new target date for  
18 completion and it based its liquidated damages on  
19 that. The Staff did not take issue with the 47 days.

20 Q. Don't have a problem with extending the  
21 47 days?

22 A. We didn't -- we didn't take issue.

23 Q. Prudent decision to make?

24 A. I'm not -- I didn't make evaluation  
25 whether that was prudent or not. We decided not -- we

1 gave -- the 47 days were there. It's only after those  
2 47 days that gave -- KCPL gave Alstom to complete the  
3 work --

4 Q. Yeah.

5 A. -- then if they didn't finish it by then,  
6 that's when the liquidated damages kicked in.

7 Q. Okay. If they did finish it by then,  
8 then you don't have a problem with waiving the LDs,  
9 liquidated damages?

10 A. That's the position that we took in the  
11 adjustment. Now -- and that position was based on  
12 that there were legitimate cost delays, force majeure,  
13 differing site conditions, you know, weather  
14 conditions that were not contemplated in the contract.  
15 To compensate for those criteria, we did not take  
16 issue with the 47 days.

17 Q. By the way, I thought force majeure was  
18 French for it was really cold. You said weather  
19 conditions. Is that -- they're two different things?

20 A. The French word for cold is "froid."

21 Q. Thank you. I think was thinking "force."  
22 It's really "froid." All right. But on that point,  
23 by the way, you acknowledge that there were some  
24 claims being made by Alstom for force majeure.  
25 Correct?

1 A. That there were claims for differing site  
2 conditions?

3 Q. Yes, sir.

4 A. And I think they were also claiming  
5 weather delays that KCPL indicated were suspect.

6 Q. Yes.

7 A. All right.

8 Q. Just to be clear, I think it is in the  
9 audit, but part of Alstom's claim was there's weather  
10 problems that delayed us. Right?

11 A. And whether they -- they identified  
12 weather. They didn't say that the weather was force  
13 majeure that I know of.

14 Q. So two different things; force majeure,  
15 something other than weather; and weather?

16 A. Right. Force majeure kind of implicates  
17 that it's something that happened that's outside of  
18 the control of the entity that's stopped the project.

19 Q. Right. That was my next question.  
20 Kansas City Power and Light's not in control of the  
21 weather?

22 A. Correct.

23 Q. And force majeure indicates that's  
24 something other than in the control of the parties?

25 A. Right. But a certain degree of bad

1 weather is included in the contract.

2 Q. Yes.

3 A. It's a firm fixed price contract.

4 Q. And then there were some other claims by  
5 Alstom that the delays were KCPL's fault?

6 A. Or Burns and McDonnell or Kiewit or other  
7 contractors on -- not on the site.

8 Q. They were blaming a lot of stuff for  
9 those delays?

10 A. Yes.

11 Q. And it really was hard to tell whose  
12 fault they thought it was. Right?

13 A. Well, it's not hard to tell whose fault  
14 they thought it was.

15 Q. Everybody but Alstom's. Right?  
16 Including God?

17 A. I think there were instances where they  
18 admitted that they were late.

19 Q. Okay.

20 A. Yes.

21 Q. All right. Fair enough. We'll get off  
22 that for a minute. I'm sorry. I realize I didn't ask  
23 you -- we were having this discussion about the  
24 definitive estimate. And if you could help us out a  
25 little bit, do you know if the Commission decided to

1 use the 2008 reforecasted budget as the definitive  
2 estimate for purposes of the stipulation and  
3 agreement, what would the disallowances be? what's  
4 the cost over that 2008 budget, just generally?

5 A. I would need to see a K-Report.

6 Q. Okay.

7 A. If I saw one of those, I could do that.

8 Q. Okay. And we don't need do that because  
9 we're all -- I know I'm getting hungry. The -- you  
10 could tell from the K-Report?

11 A. what the total would be -- what the  
12 amount would be in total, yes.

13 Q. So you just take the column that is the  
14 2008 reforecast --

15 A. Reforecasted budget.

16 Q. -- and you'd compare that to?

17 A. The actual whatever date you want  
18 incurred costs.

19 Q. Okay. And on that K-Report then you can  
20 identify what the total amount of overruns is compared  
21 to the 2006 budget. Right?

22 A. Yes.

23 Q. And you can see what it is compared to  
24 the 2008 budget?

25 A. Yes.

1 Q. And you can see what it is compared to  
2 another reforecast that happened after 2008?

3 A. If I recall -- I don't know how many  
4 reforecasted budgets are on there, but I know the  
5 May '08 reforecasted budget is on there.

6 MR. HATFIELD: Thank you, Judge.

7 JUDGE PRIDGIN: Redirect?

8 MS. OTT: If this is a good time for a  
9 break, I don't think this will be -- this isn't going  
10 to be short.

11 JUDGE PRIDGIN: Okay. Give me your  
12 definition of not short.

13 MS. OTT: Could be anywhere over half an  
14 hour or more.

15 JUDGE PRIDGIN: Because I generally have  
16 been, you know, breaking about 6:00 for dinner. Not  
17 that I'm, you know, stuck to that, but I was hoping to  
18 get Mr. Hyneman off the stand and then -- then break  
19 for dinner. Do you --

20 MS. OTT: It will go past 6:00. I can  
21 tell you that. But if you want me to start and then  
22 break in the middle of it?

23 JUDGE PRIDGIN: Let me propose this. I'm  
24 fine with breaking for dinner and then allowing a  
25 little extra time because I had heard -- well, let's

1 do this. Let me go off the record and we'll plan to  
2 resume at 7:00.

3           And if it's okay with the parties, we'll  
4 discuss off the record some scheduling possibilities.  
5 And I think -- I had also had some requests of parties  
6 having more time to talk. So if I could take that up  
7 with parties off the record briefly just so I can give  
8 the court reporter a break. I don't know why she  
9 needs to transcribe it.

10           Ms. Kliethermes?

11           MS. KLIETHERMES: While we're still on  
12 the record, we had the outstanding exhibits to be  
13 provided from this morning. And I just needed to  
14 clarify one item for the record. Empire did have  
15 something that they considered sensitive that they  
16 wish redacted from the HC copy of 284.

17           So what I'll be providing to the court  
18 reporter does have a page -- I believe it is pages --  
19 schedule 2, pages 1 and 2 is physically pulled out of  
20 this -- the copies that will be provided, if that  
21 could just be reflected in the record.

22           JUDGE PRIDGIN: Okay. So it -- I'm  
23 looking for 284. Well, my notes may be faulty.

24           MS. KLIETHERMES: It's the direct  
25 testimony of Roberta A. McKiddy.

1 JUDGE PRIDGIN: We discussed it. I'm  
2 sorry. I'd written those numbers down. We discussed  
3 that on the record, but I failed to correct it on my  
4 notes. I'm very sorry. You're correct. So 284 --

5 MS. KLIETHERMES: And again, the pages  
6 that are physically removed is Schedule 2, pages 1 and  
7 2.

8 JUDGE PRIDGIN: All right. Is that still  
9 an NP?

10 MS. CARTER: It's now HC.

11 MS. KLIETHERMES: It's now HC. And we  
12 have provided the NP versions of schedule 28-- of  
13 Exhibit 283.

14 JUDGE PRIDGIN: 284. Right?

15 MS. KLIETHERMES: We have the HC still an  
16 HC of 284 from which two pages of sensitive material  
17 have been removed and the NP version of 283.

18 JUDGE PRIDGIN: Of 283. Now I'm with  
19 you. All right. Anything further before we go off  
20 the record? All right. Ms. Kliethermes, thank you.

21 we will stand in recess until 7:00.

22 Thank you. We're off the record.

23 (A recess was taken.)

24 JUDGE PRIDGIN: All right. Good evening.  
25 We're back on the record. When we broke for dinner, I

1 understood that Ms. Ott had redirect for Mr. Hyneman.  
2 Is there anything -- anything further before she  
3 resumes? Mr. Hyneman, I'll remind you you're under  
4 oath, sir.

5 THE WITNESS: Yes.

6 JUDGE PRIDGIN: Ms. Ott, when you're  
7 ready.

8 REDIRECT EXAMINATION BY MS. OTT:

9 Q. Good evening, Mr. Hyneman.

10 A. Good evening.

11 Q. There were some discussions about Staff  
12 Data Request 490 and 491. Do you remember that?

13 A. Yes.

14 Q. Okay. Now, what did KCPL provide for  
15 Staff to review?

16 A. I believe there was no documents provided  
17 to review.

18 Q. And did Staff follow up with the data  
19 request?

20 A. Well, when I -- I think it was redacted  
21 documents provided.

22 MR. HATFIELD: Judge, I'm sorry. I  
23 just -- I thought we talked about 490 and 491 with  
24 Majors. I don't believe -- I think we were in the  
25 600's on Hyneman. I don't think we talked about those

1 data requests with this witness.

2 MS. OTT: I believe it was in regards to  
3 the R&Os Staff received also along with Dave Elliott  
4 and that's what Data Request 490 and 491 are.

5 MR. HATFIELD: Well, I'm going to object  
6 that it's beyond the scope. I understand it's been a  
7 long day so -- I'm pretty sure that we talked about  
8 those with Mr. Majors and did not discuss those with  
9 Mr. Hyneman.

10 JUDGE PRIDGIN: Ms. Ott?

11 MS. OTT: I believe we did discuss R&Os  
12 and whether or not he reviewed R&Os in which  
13 Mr. Elliott received.

14 JUDGE PRIDGIN: All right. I'll  
15 overrule.

16 BY MS. OTT:

17 Q. Now, Mr. Hyneman, I'm actually -- I'll  
18 just --

19 MS. OTT: May I approach?

20 JUDGE PRIDGIN: You may.

21 MS. OTT: Probably first time I've asked  
22 this week. Sorry.

23 JUDGE PRIDGIN: No problem.

24 BY MS. OTT:

25 Q. I'm going to hand you a copy of an

1 e-mail.

2 A. Yes.

3 Q. Who is this e-mail to?

4 A. It is --

5 MR. HATFIELD: Do you have a copy,  
6 counsel? Thank you.

7 THE WITNESS: It is to Bob Schallenberg  
8 and Christine Davidson.

9 BY MS. OTT:

10 Q. Who is it sent from?

11 A. It's from Tim Rush of KCPL.

12 Q. And is anybody else carbon copied?

13 A. Yes. Jaime Ott, Nathan Williams, Steve  
14 Dottheim, Chuck Hyneman and Keith Majors.

15 Q. And what is the subject matter of this --  
16 this data request -- or this e-mail?

17 A. Data request matters.

18 Q. Okay. Can you read the first two  
19 paragraphs?

20 A. Yes.

21 Q. Just for some background.

22 A. Bob, I appreciated the opportunity to  
23 meet yesterday and discuss issues about our upcoming  
24 rate case and talk about some of the concerns you are  
25 having regarding the discovery process. As I told you

1 yesterday, I am working on a response to your e-mail  
2 and I had hoped to send it out later in the day. I am  
3 sorry for the delay, but I understand that you have  
4 some significant excitement at your offices today. I  
5 hope and pray all is well.

6           The following is my response to your  
7 e-mail. If you would like to discuss or have any  
8 questions, please feel free to give me a call. As I  
9 have noted throughout my response, I would like to get  
10 your issues and concerns addressed as soon as  
11 practical.

12           Q.     And what's the date of this e-mail?

13           A.     It's November 10th, 2009.

14           Q.     And then there's some discussion  
15 regarding data requests and then particularly on  
16 page 3 of 8 of this document he specifically addresses  
17 Data Request 490.

18           MR. HATFIELD: Judge, I'm sorry to  
19 interrupt. I'm concerned this may not be relevant.  
20 This is requesting -- this is in File No. 2010-0259  
21 and the data requests that we were discussing were in  
22 a different case. And so I just -- I'm not -- I want  
23 to make sure that we're talking about the same DRs  
24 because this one -- the DRs I had I thought were in  
25 2011. So I object to the relevance of this e-mail

1 that was in 2010 and contains a stamp on it that it's  
2 in Case EO-2010-0259.

3 JUDGE PRIDGIN: Ms. Ott?

4 MS. OTT: Well, all of the data requests  
5 from the 89 and 90 case were rolled over into the 259  
6 case, which then have been updated through this case  
7 and are relevant. He was discussing the subject  
8 matter of DR 490 regarding R&Os and whether or not  
9 Mr. Hyneman reviewed the R&Os that Dave Elliott  
10 received.

11 MR. HATFIELD: Well, I guess if counsel's  
12 assuring me that it's the same Data Request 490, I'll  
13 take her word on that. But, Judge, I guess -- I know  
14 it's a little unusual, but just to be sure, I would  
15 like to put this e-mail -- I'd like to make sure it's  
16 admitted as an exhibit so that it's clear in the  
17 record exactly what we were talking about. And when  
18 we brief it, we can go back and look at this as an  
19 exhibit.

20 MS. OTT: And Staff has no problem  
21 marking this as an exhibit.

22 MR. HATFIELD: That would be great. I  
23 think that would resolve my problem, Judge. I'm sorry  
24 to interrupt.

25 JUDGE PRIDGIN: No, that's not a problem.

1 will this be a Staff exhibit?

2 MS. OTT: Yes.

3 JUDGE PRIDGIN: I believe it's 285, but  
4 let me double check. I have in my notes it would be  
5 285.

6 (KCP&L Exhibit No. 285 was marked for  
7 identification.)

8 BY MS. OTT:

9 Q. And then can you read Mr. Rush's response  
10 to Data Request 490?

11 A. Yes. For Staff Data Request 490, Staff  
12 is seeking copies of all documentation supporting the  
13 development, review and -- development, review,  
14 analysis and approval of the contingency and executive  
15 contingency included in the control budget estimate  
16 for environmental upgrades at Iatan 1.

17 KCPL's response did not assert any  
18 privilege or immunity objections related to the Staff  
19 data request. The response indicates that all  
20 documentation supporting the development, review and  
21 analysis and approval of the contingency and executive  
22 contingency included in the control budget estimate  
23 for environmental upgrades at Iatan 1 would be made  
24 available for review.

25 The KCPL response indicates that

1 information was provided to the Staff in early 2008 as  
2 part of its investigation in Case No. EM-2007-0374.  
3 Staff has not been able to identify the information  
4 referenced --

5 Q. Mr. Hyneman, sorry to interrupt.

6 A. Yes.

7 Q. Maybe we're not reading the -- I'm just  
8 rereading Staff Data Request 490.

9 A. Okay. I was reading at the bottom of  
10 page 5.

11 Q. Oh and I was starting on page 3. Sorry.

12 A. My apologies.

13 Q. I was --

14 A. Okay. At page 3, Data Request 490, KCP&L  
15 initially allowed the Staff to review the R&O packets  
16 which were the basis for the development of the  
17 contingency funds for Iatan 1. Commercial issues were  
18 still pending at the time the Staff requested the R&O  
19 packets. Since commercial issues have been resolved  
20 related to Iatan 1, R&O packets were provided in  
21 supplemental response to Data Request 633. KCPL now  
22 explained that R&O packets -- KC-- KC-- KCPL has  
23 explained R&O packets to the Staff, in paren, Dave  
24 Elliott, but will be glad to do so again with you or  
25 any other Staff members.

1 Q. So at this time you hadn't received the  
2 R&O packet? Mr. Elliott had them?

3 A. This says, KCPL has explained R&O packets  
4 to Staff, Dave Elliott. Will be glad to do so again  
5 with you or any Staff members.

6 Q. Okay.

7 A. I don't -- yeah.

8 Q. Were R&Os in existence at the time the  
9 definitive estimate was adopted?

10 A. I don't believe so.

11 MS. OTT: With that, can I move for  
12 Staff -- or KCPL 285?

13 JUDGE PRIDGIN: KCPL 285 has been  
14 offered. Any objection? Hearing none, it is  
15 admitted.

16 (KCP&L Exhibit No. 285 was received into  
17 evidence.)

18 MR. HATFIELD: Judge, to be clear then,  
19 Exhibit 285 is an e-mail consisting of eight pages.  
20 Right?

21 MS. OTT: Correct.

22 MR. HATFIELD: Okay. Thank you.

23 BY MS. OTT:

24 Q. Now, there was some discussion regarding  
25 the Alstom settlement. Did you receive invoices

1 related to the Alstom settlement after December 31st,  
2 2009?

3 A. Invoices? I'm not sure --

4 Q. Did you receive information related to  
5 the Alstom settlement after the Staff preliminary  
6 audit that was filed on December 31st, 2009?

7 A. Yes.

8 Q. Mr. Hatfield was kind of going over the  
9 way you approach a construction audit. Is the way one  
10 conducts a construction audit based on audit  
11 objectives and scope?

12 A. Yes. And audit procedures.

13 Q. Okay. And he was also discussing about a  
14 budget and when you -- when you need a budget in  
15 relationship to a construction project. Does the  
16 importance of a construction budget depend on the  
17 audit objectives and scope?

18 A. Yes.

19 Q. Is it important for the budget to a  
20 construction audit -- is the importance of the budget  
21 to a construction audit dependent on the construction  
22 audit objectives and scope?

23 A. Yes.

24 Q. Now, there was some discussions on -- you  
25 were talking about the fast tracking section of the

1 Staff's November 3rd report and just want to be clear.

2 You didn't author that section, did you?

3 A. No.

4 Q. Okay. And did Mr. Schallenberg make any  
5 adjustments in this case?

6 A. Yes.

7 Q. And what were those adjustments  
8 Mr. Schallenberg made?

9 A. He made the common plant transfer, the  
10 Iatan 1 indirect costs related to common plant and I  
11 believe the permanent auxiliary electric boiler cost  
12 transfer.

13 Q. And is that Staff report supported by an  
14 affidavit?

15 A. Yes.

16 Q. Okay. There was also some discussion  
17 about the definitive estimate in relationship to the  
18 control budget estimate. Did KCPL ask Staff to accept  
19 this CBE as a substitute for the definitive estimate?

20 A. I don't know if they asked. KCPL used  
21 their budget, the 1.685 billion budget, as their  
22 definitive estimate. And Staff did not question their  
23 right to do that or take any action to say that they  
24 can't do that.

25 Q. Did KCPL use the CBE without seeking

1 Staff's opinion regarding its issue?

2 A. I -- I'm aware that KCPL was behind  
3 schedule completing the budget and I know Mr. Giles  
4 has testified that they -- that he contacted Bob  
5 Schallenberg and asked him if, you know, there's going  
6 to be a delay. And he indicated that Mr. Schallenberg  
7 said, you know, just make sure you, you know, get the  
8 numbers right. That's the only contact that I know  
9 between KCPL and the Staff on that.

10 Q. Okay. Going back to your interactions  
11 with Mr. Elliott and Mr. Lange, if Mr. Elliott had  
12 found an adjustment, would he need you to quantify the  
13 value of his adjustment?

14 A. Most likely, yes.

15 Q. And why would he need you to help him  
16 quantify that adjustment?

17 MR. HATFIELD: Object that it calls for  
18 speculation.

19 JUDGE PRIDGIN: I'll overrule. I'll let  
20 him answer if he know. If he doesn't know, he can say  
21 so.

22 THE WITNESS: Well, as Mr. Elliott has  
23 told me on numerous occasions and also has advised  
24 KCPL, he doesn't look at costs. He doesn't -- he  
25 relies on the Staff auditors to handle the costs.

1 BY MS. OTT:

2 Q. Okay. Okay. Mr. Hatfield was also  
3 discussing some language within your testimony and  
4 whether or not you applied two different standards to  
5 the Iatan -- if you applied one standard to the  
6 Iatan 1 project and a different standard to the  
7 Iatan 2 because in your testimony for Iatan 1 you had  
8 imprudence where for Iatan 2 you had imprudence,  
9 inappropriate and unreasonable, I believe.

10 A. Yes.

11 Q. Can I get you to turn to page 61 of your  
12 deposition?

13 A. Yes. I'm there.

14 Q. Okay. And he asked you a question  
15 starting on line 11. Can -- can you read that?

16 MR. HATFIELD: Judge, I'm going to  
17 object. It's improper impeachment to read a witness's  
18 deposition without asking him a question.

19 MS. OTT: This isn't impeachment. I'm  
20 not trying to impeach my witness here. I'm trying to  
21 clarify that Mr. Hatfield was aware that he had two  
22 different standards during his deposition and it  
23 wasn't -- wasn't new.

24 MR. HATFIELD: Oh, stipulate.

25 JUDGE PRIDGIN: Very good. Overruled.

1 BY MS. OTT:

2 Q. Can you read question 11?

3 A. Line 11?

4 Q. Or sorry, yeah. Line 11.

5 A. Yes. Question: Here's what I'm  
6 wondering. On page 2, line 12 you refer to Iatan  
7 unit 1 costs that were imprudently incurred. And on  
8 page 3, line 1 you refer to Iatan unit 1 -- unit 2  
9 costs that were imprudent, unreasonable or not a  
10 benefit to Missouri ratepayers. Why are you making  
11 the distinction between unit 1 and unit 2 there?

12 Answer: The statement on line 11 and  
13 line -- the statement on line 11 and 12 is incomplete.  
14 It should say, Imprudent, unreasonable or  
15 inappropriate. It's just an incomplete statement. It  
16 should be consistent with the statement made on  
17 page 3.

18 Q. Okay. Thank you. So that was clarified  
19 during your deposition?

20 A. Yes.

21 Q. All right. Now, there was some  
22 discussion a little bit later on in the evening about  
23 the cost control system and whether or not it had the  
24 capability or it could identify and explain the cost  
25 overruns. Has KCPL's cost control system ever

1 produced the identity of cost overruns for the Iatan  
2 project?

3 A. It has never produced an identity and an  
4 explanation of any cost overrun over the definitive  
5 estimate.

6 Q. So was Staff never given an explanation  
7 related to the identification of the cost overruns?

8 A. There are some explanations of some cost  
9 overruns in a document, yes. But the Staff was never  
10 provided with the document explaining and identifying  
11 any cost overrun over the definitive estimate.

12 Q. Now, you were also -- in that, you had  
13 some discussion about a variance. Are you saying --  
14 were you trying to say that all budget variances are  
15 cost overruns?

16 A. No.

17 Q. So variance could or could not be a cost  
18 overrun?

19 A. Yes.

20 Q. Okay.

21 A. A variance is just a difference plus or  
22 minus from budget. Cost overrun would be the amount  
23 in excess of the control budget estimate including the  
24 contingency, plus cost overruns, less cost underruns.  
25 That's the net cost overrun.

1 Q. So has Staff received the explanation for  
2 the cost overruns in this case?

3 A. No. The Staff has not received any  
4 documentation describing and identifying the cost  
5 overruns over the definitive estimate.

6 Q. Now, does Staff make disallowances for  
7 unsubstantiated costs?

8 A. Yes.

9 Q. So is Staff's disallowance for the cost  
10 overruns because the overruns above the CBE are not  
11 in -- not documented in accordance with the  
12 stipulation and agreement?

13 A. Yes.

14 Q. There was also some discussions on your  
15 other data requests which have been marked as  
16 Exhibits 94 through I think 99 and some discussions on  
17 the date in which they were -- they were issued to  
18 KCPL. Does Staff still have to prepare another audit  
19 regarding Iatan project?

20 A. Yes. A number of those data requests  
21 were based on KCPL's surrebuttal and rebuttal  
22 testimony. When they filed testimony, we issued data  
23 requests to get information about that testimony.  
24 Other data requests were written with -- in the nature  
25 of obtaining information to update or complete the

1 audit hopefully in -- in the future. And one part  
2 being the true-up audit that I think needs to be filed  
3 in February.

4 Q. And is this audit supposed to be based on  
5 costs through October 31st, 2010?

6 A. Yes. The true-up audit is.

7 Q. And when's that due?

8 A. It's late February I think is the date  
9 that it's due.

10 Q. And will this be -- will that February  
11 true-up be the final audit report for the Iatan  
12 project?

13 A. No. I don't believe so. That's the cost  
14 up through October 31st, 2010. I'm sure the remaining  
15 costs will be reviewed some time in the future.

16 Q. There was also some discussion about the  
17 liquidated damages and your opinion. You weren't  
18 offering a legal opinion about the Alstom settlement,  
19 were you?

20 A. No.

21 Q. Okay. I just -- there was -- wanted to  
22 clear that up. Now, Mr. Hatfield had you going  
23 through the specific adjustments, I think they were  
24 looking at Schedule 1 and 2 and what's been referred  
25 to as Mr. Dottheim's exhibit that he passed out in his

1 opening, the comparison and he went line by line  
2 through --

3 A. Right.

4 Q. -- your adjustments.

5 A. I was using Schedule 1-1 and 1-2 to the  
6 Staff November report.

7 Q. And just want to be clear on the last  
8 part. Did you reduce the cost overruns by the  
9 adjustments -- by the specific adjustments you made?

10 A. Yes.

11 Q. Okay. And why did you do that?

12 A. Well, the staff wanted to make sure that  
13 any adjustments its ma-- it made came strictly out of  
14 the cost overruns. It didn't make any adjustments to  
15 the actual budget to construct, procure and are on  
16 direct costs and it didn't make any adjustment for  
17 cost in the \$220 million contingency. It just made  
18 adjustments based on the cost overruns.

19 Q. Okay.

20 A. So even if -- if it found problems with  
21 contingency, it did not adjust any numbers that it --  
22 that were in the contingency. Only the above -- the  
23 amounts over and above.

24 Q. Then there was also around that time  
25 discussion on the documentation of the cost overruns.

1 Do you have an opinion on whether the cost overruns  
2 are adequately documented?

3 A. We haven't seen any document identifying  
4 and describing the cost overruns.

5 Q. Is -- continue.

6 A. As -- in -- in the regulatory plan  
7 stipulation and agreement.

8 Q. Now, if KCPL were to identify and explain  
9 any cost overruns above the definitive estimate, would  
10 the Staff auditors' work be complete with the  
11 identification and explanation of the cost overruns?

12 A. No. At that time we would review that  
13 document for costs that were imprudent, inappropriate,  
14 unreasonable or not of benefit to Missouri ratepayers  
15 based on that documentation.

16 Q. Now, are there still costs that Staff  
17 will have to audit for -- for the true-up for Iatan 1,  
18 Iatan 2 and the common plant?

19 A. Yes.

20 Q. And you also had some discussions with  
21 Mr. Hatfield about the crane accident. Does the crane  
22 accident involve Schiff Hardin?

23 A. Schiff Hardin and another contractor that  
24 I believe Schiff recommended, Packer Engineering, had  
25 a lot of cost involved in the crane accident. They

1 charged hours to it. And I don't have the dollar  
2 amount, but those costs were charged to the crane  
3 accident project number.

4 Q. There was also some discussion on the  
5 Alstom adjustment for Iatan 2 and whether or not you  
6 interviewed the Ernst & Young auditors or the LogOn  
7 individuals or the STS individuals. Did Staff do any  
8 analysis related to these auditors or evaluations?

9 A. Well, the Staff did -- and I was asked if  
10 I interviewed anybody from LogOn. And I didn't  
11 interview anybody from LogOn. I did have a meeting  
12 with Mr. Carl Churchman, who's the vice president of  
13 construction, which we discussed LogOn construction  
14 and why he brought them on, the purpose they were  
15 there and what they would be doing. And Mr. Churchman  
16 is the person who brought LogOn to the Iatan  
17 construction projects.

18 Q. And in regards to Ernst & Young, LogOn  
19 and Strategic Talent Solutions, did you review any of  
20 their materials?

21 A. I reviewed, yes, all the Ernst & Young  
22 reports and they assisted KCPL's internal audit. And  
23 I reviewed the engagement letter and the STS report  
24 that it filed to KCPL on the Iatan projects.

25 Q. Now, there was discussion about if the

1 Commission were to adopt Staff's policy in this matter  
2 and the effect that it -- it may have or may not have  
3 going forward. But I kind of want to go in the  
4 reverse of what Mr. Hatfield asked you.

5           If the Commission were to disallow costs  
6 caused by the company's failure to comply with its  
7 agreement, would future construction audit projects  
8 have a cost control system that would identify and  
9 explain cost overruns over cost baseline?

10           A. No. This project was unique in that  
11 extent. And it's because of the regulatory plan,  
12 stipulation and agreement. That agreement which  
13 allowed what they call amortizations or, in effect, a  
14 prepayment of a cost to construct the Iatan plant,  
15 that's something I believe is unique, had never been  
16 done before in Missouri.

17           And to compensate the other party to that  
18 agreement, they wanted to make sure that if there were  
19 cost overruns on the Iatan project, the CEP projects,  
20 that those cost overruns would be identified and  
21 explained. And that's a consideration they got for  
22 giving up and allowing KCPL to recover the  
23 amortizations in rates during the project.

24           Q. Okay. But if the Commission were to not  
25 adopt Staff's policy and the -- with the cost

1 overruns, would it encourage other -- could it  
2 encourage other companies to not comply with a  
3 requirement to identify and explain cost overruns and  
4 discourage them from having to identify them in the  
5 future?

6 A. I believe it would, yes.

7 Q. I think on re-- recross you were  
8 discussing the definitive estimate and the control  
9 budget estimate again. If the control budget estimate  
10 was a definitive estimate, would that facilitate the  
11 identification, exploration of cost overruns?

12 A. I don't know if there's any distinction.  
13 KCPL used their control budget estimate and called it  
14 a definitive estimate. I don't think anybody has  
15 agreed what the definition of the definitive estimate  
16 is. KCPL defined it as their control budget estimate.  
17 That's the budget they agreed to track to. The Staff  
18 has accepted that. It hasn't said, you know, you need  
19 a better budget. It said this is the budget that  
20 we're going to use in our audits. So I don't think  
21 there's any disagreement on what budget it's going to  
22 be tracked to.

23 And my comment on definitive estimate is  
24 based on Mr. Roberts' description of his opinion of  
25 definitive estimate, which I believe is something in

1 the neighborhood of 75 percent engineering complete.  
2 Mr. Meyer said that the term "definitive estimate" is  
3 no longer used. He referred to Ace, which is the  
4 industry standard in construction that they don't use  
5 the term any longer because nobody knows what it  
6 means, it's vague.

7           But -- so my knowledge of definitive  
8 estimate is based on what Mr. Roberts used and what  
9 the Commission addressed in the wolf Creek order, that  
10 definitive estimate was definition of a plant that's  
11 efficiently constructed.

12           Q.     Okay. I'm sorry. I guess you also  
13 used -- you've also seen a definition of definitive  
14 estimate from the wolf Creek case. Is that what you  
15 just said?

16           A.     Yes.

17           Q.     Have parties in this case agreed to a  
18 definition of definitive estimate?

19           A.     No. But the Commission has identified a  
20 description of definitive estimate in the wolf Creek  
21 case.

22           Q.     There was some discussion of your  
23 disallowances of the Schiff Hardin fees. Have you  
24 ever participated in rate case adjustments in any of  
25 your -- any of your tenure here at the Commission?

1 A. Yes.

2 Q. And can you explain a little bit about  
3 that?

4 A. Well, normally during rate case we look  
5 at legal fees outside services for reasonableness  
6 and -- and appropriateness. And we make decisions  
7 based on adjustments, based on -- based on those  
8 reviews.

9 Q. Are you aware if the Commission has ever  
10 made an adjustment for a law firm used in -- like an  
11 out-of-state law firm made an adjustment to reflect  
12 more Missouri rates?

13 A. Yes. I believe I sponsored an adjustment  
14 in a 2002 Missouri Gas Energy rate case for an outside  
15 counsel from New York who came here and fees the Staff  
16 determined were excessive. And I believe the  
17 Commission upheld that adjustment in its order. But I  
18 would have to see the order to refresh my memory.

19 Q. I think I might have that order you're  
20 talking about in front of me, but we'll see. I have  
21 it flagged what I think you might be referring to. I  
22 could be incorrect.

23 A. Yeah. Well, it's 2004-- GR-2004-0209 is  
24 the rate case.

25 Q. And what's the caption of that case?

1 A. This is the Missouri Public Service  
2 Commission Report and Order.

3 Q. And just state the title of the case, you  
4 know, the case caption.

5 A. Oh, it's in the matter of Missouri Gas  
6 Energy's tariffs to implement a general rate increase  
7 for natural gas service.

8 Q. And what is the issue date of this order?

9 A. September 21st, 2004.

10 Q. And the effective date?

11 A. October 2nd, 2004.

12 Q. All right. Now, is this that case that  
13 you were referring to?

14 A. Yes.

15 Q. And on page 76, is that addressing the  
16 adjustment --

17 A. Yes.

18 Q. -- that you made?

19 Can you read the paragraph starting with,  
20 Eric? Well, actually --

21 A. You mean before --

22 Q. Will you start with, In this case?

23 A. The tab highlight -- yes.

24 Q. Start with, In this case, to give a  
25 little background.

1           A.     In this case, MGE or perhaps Southern  
2 Union choose to hire Kasowitz, Benson, Torres,  
3 Friedman Law Firm out of New York. MGE explained that  
4 it chose that firm because it had previously  
5 represented Southern Union in other complex litigation  
6 and the company was very pleased with the results  
7 obtained in that case.

8                     The other litigation for which the  
9 Kasowitz firm had represented Southern Union was,  
10 however, a merger and acquisition case and this case  
11 was the firm's first litigated regulatory rate case.

12                     Eric Herschmann and Michael Fay of the  
13 Kasowitz firm did a good job of representing their  
14 client at the hearing. But the firm charged up to  
15 \$690 per hour for its work. That rate is far higher  
16 than the typical rates charged by lawyers appearing  
17 before the Commission. The company is certainly  
18 entitled to hire lawyers with whom it is comfortable,  
19 but it would not be fair to require ratepayers to pay  
20 such high rates.

21                     The Commission will reduce the rate to  
22 \$200 per hour, which is the rate charged by MGE's  
23 local counsel. The -- the \$16,250.75 in expenses  
24 incurred by the Kasowitz firm will be allowed. The  
25 total allowed for representation -- representation by

1 Kasowitz, Benson, Torres and Friedman is \$188,200.75.

2 Q. Thank you. Okay. Mr. Hatfield also had  
3 you go through several of your 26 data request  
4 responses to KCPL to you. And since we discussed  
5 several of them, I'd like to have all of them marked  
6 as an exhibit. That would be Exhibit 2--

7 JUDGE PRIDGIN: This is 286.

8 MS. OTT: And it would be HC unless the  
9 company would decide to declassify it.

10 JUDGE PRIDGIN: This is HC; is that  
11 correct?

12 MS. OTT: Unless the company would decide  
13 otherwise.

14 JUDGE PRIDGIN: We'll call it HC.

15 (KCP&L Exhibit No. 286-HC was marked for  
16 identification.)

17 MS. OTT: And unless you want me to go  
18 through all of them, I can just move for the  
19 admission.

20 MR. HATFIELD: Whatever you think.

21 MS. OTT: Well, if you're going to  
22 object, then I'll go through each of them, but if  
23 you're going -- I'll move to admit.

24 MR. HATFIELD: Judge, the only objection  
25 we would have is that on page 11 in response to --

1 well, I've read this before. On page 11 the response  
2 to No. 26, Mr. Hyneman -- well, might I voir dire the  
3 witness with one question?

4 JUDGE PRIDGIN: You may.

5 VOIR DIRE EXAMINATION BY MR. HATFIELD:

6 Q. Mr. Hyneman, would you turn to page 11,  
7 your response to No. 26?

8 A. Yes.

9 Q. The second paragraph says, According to  
10 the Journal of Forensic and Investigative Accounting.  
11 Do you see that?

12 A. Yes.

13 Q. The paragraphs after that --

14 A. Yes.

15 Q. -- down to the end of that page are all  
16 direct quotes from an article. Correct?

17 A. Yes. I'm sorry. Article cited here.

18 Q. Right. And all of this is direct quotes  
19 verbatim from that article?

20 A. To the best of my recollection, it is.

21 MR. HATFIELD: So, Judge, I'd object to  
22 that as hearsay, but have no objection to the  
23 remainder of the exhibit.

24 JUDGE PRIDGIN: All right. 26 -- excuse  
25 me, objection is overruled. 286-HC is admitted.

1 (KCP&L Exhibit No. 286-HC was received  
2 into evidence.)

3 REDIRECT EXAMINATION (CONT'D) BY MS. OTT:

4 Q. Okay. Mr. Hyneman, you also had some  
5 discussion about the campus relocation. And I know  
6 that came up as well last night, but there was some  
7 information on what information you relied on to make  
8 that adjustment. So are you familiar with Staff Data  
9 Request 730?

10 A. Yes.

11 Q. Okay. Do you have a copy of it in front  
12 of you?

13 A. No. No.

14 Q. Okay.

15 A. But I believe that's the data request  
16 that I referenced in the Staff report.

17 Q. Well, I'll hand you a copy of it. And  
18 I -- I believe -- can you -- well, read what Staff  
19 Data Request 730 is.

20 A. Yes. It's a data request in Case No.  
21 ER-2009-0089 written on October 21st, 2009. The  
22 information was provided by Carl Churchman, requested  
23 by Chuck Hyneman. And it's a question related to the  
24 code X016 construction trailer relocation, also known  
25 as the campus relocation.

1 Q. Okay. And can you read number four?

2 A. Yes. Question four: what are the  
3 reasons why the trailers were moved?

4 The answer: The original campus design  
5 and location was developed in the summer and -- summer  
6 of and fall of 2006. The facility construction began  
7 in the summer of 2006. The initial trailers onsite  
8 were for KCP&L, Kissick, Pullman and Alstom, each of  
9 whom mobilized to the site in late summer and fall of  
10 2006.

11 In the summer of 2007, the balance of  
12 plant contractor, Kiewit, developed the ro-- a revised  
13 plan for laydown space needed for access to the  
14 turbine generator building. This plan included  
15 providing a new path for the unloading -- for  
16 unloading the turbine generator into the turbine bay.  
17 Kiewit's plan necessitated the moving of the existing  
18 campus's trailers to provide the area for the laydown  
19 space.

20 Additionally, Kiewit's plan of where it  
21 wanted to locate the erection cranes caused safety  
22 concerns because Kiewit would be lifting loads near or  
23 over the campus.

24 Q. Okay. I'm going to -- I'm trying to  
25 understand the difference between the auditing and

1 engineering review of this so I'm going to attempt to  
2 draw something and maybe you can explain it to me.  
3 And my understanding from visiting the Iatan plant and  
4 how it's laid out.

5           so if I can -- so here would be the  
6 river. And then this would be Iatan (drawing). And  
7 my understanding then -- and I'm not a very good  
8 drawer as you can all see. Is that the campus was  
9 located here (drawing). Is that your understanding so  
10 far or your understanding of the campus relocation --

11           A.     Yes.

12           Q.     -- prior to move?

13                     So they were supposed to bring in the  
14 boiler off -- off the river from a barge?

15           A.     Right.

16           Q.     And it needed to get over here  
17 (indicating). So there was two options from --  
18 understanding that you could crane the boiler over the  
19 Iatan or you could move the campus over 100 feet?

20           A.     That's my understanding.

21           Q.     Okay. So from the engineering  
22 perspective, from what I understand -- I don't know if  
23 you were in the room for Mr. Elliott -- is the risk of  
24 moving it over was greater than moving the campus to  
25 the side?

1 A. Yes. He did not take issue with the fact  
2 that they should move the campus.

3 Q. So if you move the campus over 100 feet,  
4 it incurred cost. What would be the auditing  
5 perspective of this campus relocation?

6 A. Well, the perspective that -- that the  
7 auditing staff would look at is in the initial  
8 drawings of the site, why would the campus be re--  
9 located so close to where the cranes would have to  
10 move the turbine into the unit? Now, if presumably  
11 it -- presumably if it was designed correctly, there  
12 would be enough space between the campus and where  
13 the -- the boiler had to go.

14 Q. So your adjustment is from a cost  
15 perspective?

16 A. Yes. What -- why did it have to be  
17 moved? Was the design incorrect? Why because Kissick  
18 became the balance of plant contractor all of a sudden  
19 was the campus location not correct?

20 Q. Okay. I think that cleared it up.

21 A. The additional -- see, charged to the  
22 project were the initial cost for the location of the  
23 campus, for the trailers and everything. That cost  
24 had already been charged to the project. By moving  
25 it, you're doubling up the cost. And according to

1 KCPL, there were no efficiency or savings. It was  
2 just extra work that's already been paid for, but it  
3 had to be paid for again.

4 And the Staff did not get sufficient  
5 explanation of -- of why that cost needed to be  
6 incurred and why its ratepayers need to pay twice for  
7 that cost.

8 Q. Okay. You and Mr. Hatfield also had some  
9 discussions about the budget and the CBE and whether  
10 or not needed to have the budget in place in order  
11 to -- if the budget had to be -- you had to have the  
12 design before the budget. Do you recall any of that  
13 discussion?

14 A. I don't recall that specific statement.

15 Q. All right. Let me see if I can better  
16 explain. Okay. How about in regards to the  
17 definitive estimate and the control budget and whether  
18 or not the definitive estimate was necessary at the  
19 time the budget was created?

20 A. The de-- the term "the definitive  
21 estimate" was a requirement for the regulatory plan.  
22 And the KCPL would have a definitive estimate. The  
23 term "definitive estimate" was not defined in the  
24 regulatory plan or any other document. KCPL used  
25 their December 2006 control budget estimate and they

1 classified that as a definitive estimate.

2           And the Staff has not contested KCPL's  
3 right to -- to call that a definitive estimate and I  
4 don't think any party in the case has agreed to what  
5 a -- the exact definition of a definitive estimate is.

6           Q.     I'm going to hand you -- I'd actually  
7 like to have this marked and then --

8           JUDGE PRIDGIN: This will be KCPL 287.

9 BY MS. OTT:

10          Q.     And can you look this over and tell me if  
11 you've ever seen this document before?

12                   (KCP&L Exhibit No. 287 was marked for  
13 identification.)

14          THE WITNESS: Yes.

15 BY MS. OTT:

16          Q.     Have you -- did you read -- and what is  
17 this e-mail? Who's it from?

18          A.     It's from Chris Giles.

19          Q.     To?

20          A.     To Mike chesser.

21          Q.     And anyone carboned?

22          A.     John Grimwade.

23          Q.     And what's the date of this e-mail?

24          A.     Wednesday May 3rd, 2006.

25          Q.     And the subject?

1 A. Risk for cost increases.

2 Q. Does it appear from this e-mail that  
3 the -- that it provides the company's position  
4 regarding the risk of recovery for costs increased  
5 above the CPE?

6 MR. HATFIELD: I'm going to object to a  
7 lack of foundation as to what it indicates. If we  
8 want to put the e-mail into the record, I have no  
9 objection to putting an exhibit in, but I do object to  
10 asking the witness to characterize an e-mail that he  
11 did not write.

12 MS. OTT: well, can you -- well, I can  
13 save some time and just put it in the record.

14 MR. HATFIELD: No objection

15 JUDGE PRIDGIN: KCPL 287 is admitted.

16 (KCP&L Exhibit No. 287 was received into  
17 evidence.)

18 BY MS. OTT:

19 Q. But I am going to ask a couple questions  
20 regarding this e-mail. Does this e-mail indicate that  
21 the definitive cost estimate would not be available or  
22 meaningful until bidding results were known?

23 A. Yes.

24 Q. Does this e-mail indicate that the  
25 accuracy of the definitive cost estimate would not be

1 available or meaningful until a design had been  
2 reached at a certain level?

3 A. No. Not that I see.

4 Q. Do you know when KCPL -- or if they ever  
5 asserted that the definitive cost estimate would not  
6 be available or meaningful until the project reached a  
7 certain level of design completion?

8 A. No.

9 MS. OTT: I have nothing further. Thank  
10 you.

11 JUDGE PRIDGIN: All right. Ms. Ott,  
12 thank you.

13 MR. HATFIELD: Judge, just a quick  
14 question. Ms. Ott asked about DR No. 0730. Did we  
15 mark that as an exhibit?

16 JUDGE PRIDGIN: I'm not sure.

17 MS. OTT: I don't believe we marked it as  
18 an exhibit. I believe we read some of it.

19 MR. HATFIELD: Could we mark it as an  
20 exhibit and introduce it into the record?

21 MS. OTT: I don't even know -- let me  
22 see.

23 MR. HATFIELD: Here, I'll give it back to  
24 you.

25 MS. OTT: I have no problem with it, but

1 we'll have to run copies.

2 JUDGE PRIDGIN: This would be a Staff  
3 exhibit or KCPL? I just need a number.

4 MS. OTT: I mean it can be a Staff  
5 exhibit.

6 JUDGE PRIDGIN: Okay. Exhibit No. 288.

7 Ms. Ott, you're offering that?

8 MS. OTT: Yes.

9 JUDGE PRIDGIN: Objections?

10 Hearing none, it is admitted. All right

11 Mr. Hyneman, thank you very much, sir. You may step  
12 down.

13 (KCP&L Exhibit No. 288 was marked for  
14 identification.)

15 (KCP&L Exhibit No. 288 was received into  
16 evidence.)

17 JUDGE PRIDGIN: Are we ready for  
18 Mr. Schallenberg?

19 MS. OTT: sure.

20 JUDGE PRIDGIN: Do you need just a moment?

21 MR. DOTTHEIM: Yeah.

22 JUDGE PRIDGIN: Take five minutes? we'll  
23 be off the record until 8:10.

24 (A recess was taken.)

25 JUDGE PRIDGIN: All right. We're back on

1 the record. Mr. Schallenberg has taken the stand.  
2 Before I administer the oath, let me inquire. I  
3 believe when Mr. Henderson took the stand, he hadn't  
4 pre-filed any testimony and so it was a little  
5 different in the order of cross in that --

6 MR. FISCHER: Judge, I think this is a  
7 staff witness though. Mr. Henderson was called on  
8 behalf of KCPL.

9 JUDGE PRIDGIN: Right. So even though he  
10 hasn't filed testimony, he's just going to be crossed  
11 because he sponsored some cost of service information.  
12 Is that correct?

13 MS. OTT: Yes. He filed -- it's the cost  
14 of -- staff report in the staff's direct case and he  
15 sponsored adjustments.

16 JUDGE PRIDGIN: Just double checking. I  
17 was trying to get this to go smoothly. All right.  
18 Anything further before he takes the oath? All right.  
19 Mr. Schallenberg if you'll raise your right hand to be  
20 sworn, please.

21 (Witness sworn.)

22 JUDGE PRIDGIN: Thank you very much, sir.  
23 You may have a seat.

24 And Ms. Ott, anything before he stands  
25 cross?

1 ROBERT SCHALLENBERG, having been sworn, testified as  
2 follows:

3 DIRECT EXAMINATION BY MS. OTT:

4 Q. Can you please state your name for the  
5 record.

6 A. Robert E. Schallenberg.

7 Q. And whom are you employed, in what  
8 capacity?

9 A. I'm employed by the Missouri Public  
10 Service Commission and I'm employed as the utility  
11 services division director.

12 Q. And are you the same Robert Schallenberg  
13 who sponsored adjustments in Staff's construction  
14 audit of Iatan that was filed on August 6th, 2010 that  
15 has been admitted as KCPL 204 and Staff's construction  
16 audit of Iatan dated November 3rd, 2010 marked as KCPL  
17 Exhibit 205?

18 A. I have the November 3rd here and I did  
19 sponsor adjustments in this one. If it's similar to  
20 this, I don't have the August one in front of me. I  
21 would have sponsored the common plant and probably  
22 auxiliary boiler issue in a prior report.

23 Q. Okay.

24 MS. OTT: with that, they're both already  
25 admitted. I'll tender him for cross-examination.

1 THE WITNESS: I did have a correction.

2 BY MS. OTT:

3 Q. Oh, I'm sorry.

4 A. That's all right. On page 3 of both the  
5 highly confidential that we filed and then the highly  
6 confidential after the company designation, on page 3  
7 in the second line it says, Item 2 found to be  
8 imprudent or inappropriate and not charged to Iatan 1.

9 Q. Yes.

10 A. That should be charged. The "not" should  
11 be taken out. And then the next line following it has  
12 three found to be imprudent or inappropriate and not  
13 charged. It should be charged. The "not" should be  
14 removed in those two cases. And it's the same on both  
15 of these exhibits.

16 Q. Okay. Do you have any other changes?

17 A. No.

18 MS. OTT: All right. With that, I'll  
19 tender Mr. Schallenberg for cross-examination.

20 JUDGE PRIDGIN: Ms. Ott, thank you.  
21 Mr. Mills?

22 MR. MILLS: Just briefly.

23 CROSS-EXAMINATION BY MR. MILLS:

24 Q. Mr. Schallenberg, at a high level, can  
25 you explain to me the roles of Dave Elliott, Keith

1 Majors, Chuck Hyneman, yourself and Mr. Henderson in  
2 this audit or review process? who did what and why?

3 A. Well, this audit is a continuation of the  
4 other audits that were ordered by the Commission to be  
5 done out of the -- I call them 89 and 90 cases. That  
6 would be the prior KCP&L rate case and the prior GMO  
7 rate case. And the Commission ordered audits to be  
8 done of -- at the time Iatan 1 and the common plant  
9 for Iatan 1 initially. There was also in initial  
10 order Jeffrey was included and I think Sibley, but  
11 their subsequent orders removed Jeffrey and Sibley.

12 And it ended up that we had to do a -- at  
13 the -- after the rate case settlement, we had to do an  
14 audit report on 12/31/09 of Iatan 1 and common plant  
15 needed to operate Iatan 1. We filed that report and  
16 then in response to that report, KCP&L -- I guess  
17 they're the ones that initiated the 259. I know the  
18 Staff didn't.

19 So we got in the non-- non-contested,  
20 contested case about the 12/31/09 report, which  
21 generated more Commission orders giving us new dates  
22 to complete audit reports by a date that was certain  
23 with no more audit activity after that.

24 And I believe it was that order that also  
25 inserted Mr. Henderson into a supervisory role that he

1 wasn't -- I mean he is my supervisor and he's also  
2 Natelle Dietrich's supervisor who has the energy  
3 department where Mr. Elliott works. Mr. Henderson got  
4 more actively involved and was put on a requirement to  
5 report our activities after the 259 case and orders.

6           The Commission, upon finding that by  
7 following the completion requirement that KCPL was  
8 asking, then created non-auditable costs because they  
9 couldn't be audited, they're still going to be  
10 incurred by those cut-offs. The Commission then  
11 removed those fixed dates which expanded it into --  
12 basically where we're at is what we agreed to in 89  
13 where we filed in this case Iatan 1 and Iatan 2  
14 together and did true-ups.

15           Mr. Elliott's scope in this was he was  
16 allowed to do his engineering review as he had done in  
17 the past or as he saw -- as he saw fit, which he had  
18 been making, subsequent to the 89 cases, visits to  
19 Iatan and reviewing information. He was allowed to do  
20 basically whatever scope he wanted and we did not  
21 attempt to interfere in any way or even attempt to  
22 influence his reviews.

23           And I became -- I guess at first I was in  
24 charge because I was the only one doing it when the  
25 Commission first ordered the quick audits. And then

1 Mr. Hyneman was given to this -- to the project or to  
2 assist me because auditing made a few changes I guess  
3 in his work scope.

4           And then later Mr. Majors was brought in  
5 to do this to assist in terms of having three auditors  
6 to do the Iatan projects. So that's how we ended up  
7 as a band of brothers, so to speak.

8           Q.     And -- and describe the interplay between  
9 the engineering part of the audit that Mr. Elliott was  
10 doing and the cost part of the audit that you and  
11 Mr. Hyneman and Mr. Majors were doing.

12           A.     Well, Mr. Elliott does what he calls an  
13 engineering review. I -- I know that from that  
14 engineering review we always get a in-service date and  
15 in-service testimony telling us when the project is  
16 fully operational and used for service, which I know  
17 also that during an engineering review Mr. Elliott  
18 looks at other -- or gets other information. But I've  
19 never seen from an engineering review anything come  
20 out of it other than the in-service date  
21 certification.

22           That's -- and now the Commission -- one  
23 of the Commission's orders -- one of the initial ones  
24 said that we were to use all the information that the  
25 Staff had in-house. So we -- we had to take the data

1 requests that we had from the 89 and 90 case and merge  
2 that with the information that Mr. Elliott had, which  
3 at that time that he gave it to us was change orders.  
4 Unfortunately, there was a glitch. He only gave us  
5 the change orders for Iatan 1 and I didn't discover  
6 that error until much later in the process.

7           And then we also merged the -- the  
8 information from the acquisition case -- some people  
9 try to call it a merger case -- of EM-2007-0374. And  
10 in accordance with the Commission's order, those three  
11 databases were combined and then used to build off of  
12 for the audits that you see today.

13           Q.     And was the role of Mr. Elliott and the  
14 relationship of Mr. Elliott's role to the -- what I'll  
15 call the cost auditor's role the same in this case as  
16 it has been in prior cases?

17           A.     From what I -- what I -- what I've seen,  
18 it's had the -- the similar result from past  
19 engagements. Usually in his work, we get a in-service  
20 certification that the plants are in-service. And  
21 then in cases where he works with auditors, there have  
22 been adjustments that have come, but they're sponsored  
23 by the auditors. And usually when there's no auditor  
24 assigned to his projects, we get in-service  
25 certifications only.

1 MR. MILLS: Judge, that's all I have.

2 Thank you.

3 JUDGE PRIDGIN: Mr. Mills, thank you.

4 Mr. Schwarz?

5 MR. SCHWARZ: No questions.

6 JUDGE PRIDGIN: KCP&L, Mr. Fischer?

7 CROSS-EXAMINATION BY MR. FISCHER:

8 Q. Good evening, Mr. Schallenberg. Did you  
9 ask Mr. Hyneman to sponsor specific adjustments to the  
10 Staff's construction audit report?

11 A. Are you talking about the most recent  
12 one?

13 Q. That November 3rd.

14 A. I didn't ask him to do -- I -- I -- I  
15 told him he could do all the adjustments that he was  
16 willing to do and I would do any adjustments that he  
17 wasn't willing to pick up.

18 Q. Did you testify in your deposition that  
19 we took that -- whenever I asked you that question, I  
20 told him that he could put in whatever adjustments he  
21 wanted. I didn't -- I didn't sit down and say yes to  
22 this adjustment and no to that adjustment or you have  
23 to make this adjustment or you can't make that  
24 adjustment. I didn't do that.

25 A. You want me to read that portion of my

1 deposition?

2 Q. I'm just asking if you recall -- it's on  
3 page 144 if you want to check.

4 A. I mean I can go check. I think that's  
5 consistent with what I just said, but if you want the  
6 exact language out of my deposition.

7 Q. well, I just want to make sure that's  
8 what you said.

9 A. well, I mean I told -- I gave you the  
10 answer today to your question. I'll go back and look  
11 at what I said at the deposition if that's what you  
12 want.

13 Q. No. I don't want you to take any more  
14 time if that answer's consistent with your answer  
15 today.

16 A. I mean I think it is, yes.

17 MR. FISCHER: Okay. That's all I have.  
18 Thank you, Judge.

19 JUDGE PRIDGIN: All right. Redirect?

20 MS. OTT: I don't have -- I do have one.

21 REDIRECT EXAMINATION BY MS. OTT:

22 Q. Mr. Schallenberg, do you fully support  
23 all of Staff's adjustments in its Staff report?

24 A. I believe the -- the adjustments, yes. I  
25 mean I -- probably personally in some cases I probably

1 would have -- my rationale would be somewhat  
2 different, the dollar amount may be somewhat  
3 different, but in my dollar amounts the adjustments  
4 probably would be larger than those sponsored by  
5 Mr. Majors and Mr. Hyneman.

6 Q. So you don't disagree with any of the  
7 adjustments Mr. Majors or Mr. Hyneman has made?

8 A. No.

9 MS. OTT: Okay. I have nothing further.

10 JUDGE PRIDGIN: All right. Thank you.  
11 Mr. Schallenberg, thank you very much, sir. You may  
12 step down.

13 COMMISSIONER KENNEY: Hey, Judge?

14 JUDGE PRIDGIN: Commissioner Kenney, I'm  
15 sorry. I did not know you were there.

16 COMMISSIONER KENNEY: No, I was hiding.  
17 I don't have any questions, Mr. Schallenberg. Thank  
18 you. I was just going to ask the judge a question.  
19 I'm sorry.

20 JUDGE PRIDGIN: That's quite all right.  
21 Mr. Schallenberg, thank you.

22 Can we do this -- do you want this on the  
23 record, Commissioner, or off?

24 COMMISSIONER KENNEY: No, no, it doesn't  
25 have to be. I was going to ask what your plans were

1 for the rest of the night but maybe you were getting  
2 to that.

3 JUDGE PRIDGIN: That's exactly where we  
4 were going. I was going to see if we could discuss  
5 scheduling off the record. I'm sorry, Mr. Dottheim.  
6 Did you have something?

7 MR. DOTTHEIM: Yes. Still with the Iatan  
8 issue there's the -- the matter with the ruling last  
9 week of the Commission where the Staff sought to  
10 subpoena for hearing three witnesses or three  
11 individuals who were not specified as -- who did not  
12 have testimony filed in the case, Mr. Terry Bassham,  
13 Ms. Denise Shewmaker and Mr. David McDonald.  
14 Mr. Bassham and Ms. -- and Ms. Shewmaker have been  
15 deposed. The Commission permitted the -- the  
16 deposition of Mr. McDonald which took place this --  
17 this Tuesday.

18 And what's -- still is yet to occur is  
19 the Staff specifying what portions of the depositions  
20 it seeks to place in the record and the -- the company  
21 responding to that.

22 JUDGE PRIDGIN: All right.

23 MR. DOTTHEIM: So I think that in  
24 particular is -- is what remains of Iatan other than I  
25 think I may not have offered Exhibit I guess it's KCPL

1 Exhibit 215-HC which I utilized in the  
2 cross-examination of Mr. Steven Jones, the project  
3 execution plan

4 JUDGE PRIDGIN: That's consistent with my  
5 notes.

6 MR. DOTTHEIM: And I'd like to offer that  
7 at this time.

8 JUDGE PRIDGIN: Any objection to 251-HC?  
9 Hearing none, it is admitted.

10 (KCP&L Exhibit No. 251-HC was received  
11 into evidence.)

12 JUDGE PRIDGIN: Mr. Dottheim, thank you.  
13 I would like to discuss scheduling and -- and ask  
14 counsel if they object to doing that off the record?

15 MS. OTT: No. But I do have copies of  
16 that staff exhibit that was put in and I don't  
17 remember the number, but it's DR 730.

18 MR. SCHWARZ: 288.

19 JUDGE PRIDGIN: Perfect. Thank you.  
20 288. All right. If there's nothing further, we'll  
21 stand in recess until 8:30. All right. We'll go off  
22 the record then. Thank you.

23 (WHEREUPON, the hearing was adjourned  
24 until 8:30 a.m., January 28, 2011.)
