Stanley Pickens, Presiding Commissioner
Adair County Commission
106 W. Washington
Kirksville, MO 63501

RE: Mark Twain Transmission Project

Dear Commissioner Pickens:

I am writing as counsel to Ameren Transmission Company of Illinois ("ATXI"). ATXI has proposed the construction of a 95-mile span of a 345,000 volt transmission line running from Palmyra to Kirksville and then north to the Iowa border, as well as a 161,000 volt connector transmission line, approximately two miles in length (the "Mark Twain Project" or "Project"). The route associated with the Project, which will improve reliability and help Missouri meet the increasing demand for renewable energy, will cross through Adair County, Missouri.

As part of the Project, ATXI anticipates asking for the assent of the Adair County Commission ("Commission") to construct, erect, place, maintain, own and operate lines and conductors across and over the public roads and highways of Adair County. It is ATXI's intent to work cooperatively with the Commission to ensure that our request, and the proceedings related to our request, are properly handled and comply with Section 229.100 RSMo., which is the statute governing the assent request.

On behalf of my client, ATXI, I am requesting that you provide me with the name of the attorney(s) for the Commission so that I may begin that cooperative process.

On May 29, 2015, ATXI filed an application with the Missouri Public Service Commission ("MPSC"), to obtain a Certificate of Convenience and Necessity for the Mark Twain Transmission Project, in the event the MPSC determines that a certificate is necessary for ATXI to construct the project. It is our expectation that we will have any required assents prior to the issuance of an MPSC order. Therefore, your prompt response would be appreciated.

Please contact me if you have any questions (314.554.3955 or jrosencrants@ameren.com).

Sincerely,

Jeffrey K. Rosencrants
Senior Corporate Counsel
Ameren Services Company

RE: Mark Twain Transmission Project

Dear Commissioner Glasgow:

I am writing as counsel to Ameren Transmission Company of Illinois ("ATXI"). ATXI has proposed the construction of a 95-mile span of a 345,000 volt transmission line running from Palmyra to Kirksville and then north to the Iowa border, as well as a 161,000 volt connector transmission line, approximately two miles in length (the "Mark Twain Project" or "Project"). The route associated with the Project, which will improve reliability and help Missouri meet the increasing demand for renewable energy, will cross through Knox County, Missouri.

As part of the Project, ATXI anticipates asking for the assent of the Knox County Commission ("Commission") to construct, erect, place, maintain, own and operate lines and conductors across and over the public roads and highways of Knox County. It is ATXI's intent to work cooperatively with the Commission to ensure that our request, and the proceedings related to our request, are properly handled and comply with Section 229.100 RSMo., which is the statute governing the assent request.

On behalf of my client, ATXI, I am requesting that you provide me with the name of the attorney(s) for the Commission so that I may begin that cooperative process.

On May 29, 2015, ATXI filed an application with the Missouri Public Service Commission ("MPSC"), to obtain a Certificate of Convenience and Necessity for the Mark Twain Transmission Project, in the event the MPSC determines that a certificate is necessary for ATXI to construct the project. It is our expectation that we will have any required assents prior to the issuance of an MPSC order. Therefore, your prompt response would be appreciated.
