In the Matter of Kansas City Power & Light Company's Request for Authority to Implement A General Rate Increase for Electric Service

Case No. ER-2016-0285

#### **AFFIDAVIT OF GEOFF MARKE**

STATE OF MISSOURI ) ) ss COUNTY OF COLE )

Geoff Marke, of lawful age and being first duly sworn, deposes and states:

- 1. My name is Geoff Marke. I am a Regulatory Economist for the Office of the Public Counsel.
- 2. Attached hereto and made a part hereof for all purposes is my rebuttal testimony.
- 3. I hereby swear and affirm that my statements contained in the attached testimony are true and correct to the best of my knowledge and belief.

Alla

Geolf-Marke Regulatory Economist

Subscribed and sworn to me this 6<sup>th</sup> day of January 2017.

JERENE A. BUCKMAN My Commission Expires August 23, 2017 Cole County Commission #13754037

Jérene A. Buckman Notary Public

My Commission expires August 23, 2017.

#### **REBUTTAL TESTIMONY**

#### OF

#### **GEOFF MARKE**

#### **KANSAS CITY POWER & LIGHT COMPANY**

#### CASE NO. ER-2016-0285

#### 1 I. INTRODUCTION

- 2 Q. Please state your name, title and business address.
- A. Geoff Marke, PhD, Economist, Office of the Public Counsel (OPC or Public Counsel), P.O.
   Box 2230, Jefferson City, Missouri 65102.
- 5 || Q. Are you the same Dr. Marke that filed direct and rebuttal testimony in ER-2016-0285?

#### A. I am.

15

16

17

18

19

20

21

#### 7 Q. What is the purpose of your rebuttal testimony?

A. The purpose of this testimony is to respond to the direct testimony regarding:

- Class-Cost-of-Service Studies:
  - Kansas City Power and Light ("KCPL") witness Marisol Miller
  - Missouri Public Service Commission Staff ("Staff") witnesses James A.
     Busch and Sarah L. Kliethermes
  - Missouri Industrial Energy Consumers witness Maurice Brubaker
  - United Stated Department of Energy ("DOE") Michael R. Schmidt
- Rate Design:
  - Division of Energy ("DE") witness Martin R. Hyman
  - Sierra Club witness Douglas Jester
- EV Charging Tariff:
  - KCPL witness Timothy Rush
    - Natural Resource Defense Council ("NRDC") witness Noah Garcia
  - Sierra Club and Renew Missouri ("Renew") witness Douglas Jester

- Brightergy's Requests:
  - Brightergy witness Jessica Oakley

#### II. CLASS COST OF SERVICE STUDIES

- **Q.** Please summarize the various studies results?
- A. There were four studies submitted in total each utilizing a different methodology and producing different outcomes. The production allocation method utilized and the relative rate of returns according to studies can be summarized as follows in Table 1:

Table 1: Breakdown in Class Cost of Service Studies – relative rate of return

	Method	Total	RES	SGS	MGS	LGS	LPS	Lighting
KCPL	Avg &	1.00	0.72	1.48	1.26	1.30	0.88	1.70
	Peak							
Staff	BIP	1.00	1.02	1.25	1.24	1.03	0.65	1.32
MIEC	Avg &	1.00	0.45	1.38	1.30	1.58	1.46	1.70
	Excess							
	(4NCP)							
DOE	4 CP	1.00	0.50	1.34	1.25	1.54	1.27	3.85

#### **Q.** What is OPC's position?

A. Without taking a specific position on any methodology used, OPC's position is that the Company's proposal to apply any increase equally to the remaining classes is not unreasonable. If the Commission elects to bring classes closer to producing the system-average rate of return by incorporating a revenue neutral shift, OPC's recommendation would be aligned with the Staff's proposal to shift \$2,350,215 to Large Power Services.

# Q. Is there anything else the Commission should be cognizant of when setting rates or considering revenue neutral shifts?

18 A. Yes. The Commission should consider that regardless of the outcome of this rate case,
19 ratepayers not fortunate enough to be able to "opt out" are going to be exposed to a bill

1 2

3

4 5

6

7 8

9

10

increase in the form of increased cost recovery though the Company's Missouri Energy Efficiency Investment Act ("MEEIA") surcharge. The MEEIA surcharge expense will be significantly greater moving forward then at any previous time. Beginning in 2017, the Company will be collecting program costs and throughput disincentive recovery from *both* Cycle I and Cycle II as well as over \$10 million in performance incentive profit. It should be noted that the Company exceeded its Commission-approved budget by 260%<sup>1</sup> to be able to be awarded the full performance incentive. These costs are outside of this rate case and consequently have not had been subject to same level of scrutiny traditionally afforded within the context of a rate case.

III. RATE DESIGN

#### 11 || Customer Charge

12 Q. Please

Please summarize the positions by parties regarding the residential customer charge.

- A. The Company is proposing an 11% increase to the customer charge. Both the Staff and Sierra
   Club/Renew Missouri witnesses have recommended no increase.
- 15 **Q.** What is OPC's position?

A. OPC is recommending that the Commission maintain the current residential customer charge of \$11.88. If an increase in rates is ordered, OPC advocates the increase be administered through the energy charge that places more control of the bill in low-income and fixed-income households and does not penalize efficient, conservative and environmentally responsible ratepayers. Increased customer charges are an inequitable and inefficient means to address utility revenue recovery and subsequently reinforce future supply-side investment at a time of increasing costs.

<sup>1</sup> OPC made our initial pleading on the over-budget concern in KCPL's MEEIA Cycle I docket EO-2014-0095 on October 16, 2015.

#### Inclining Block Rates

A.

#### Q. Please summarize DE's recommendation?

DE witness Martin Hyman performed a bill frequency and impact analyses for residential general use customers based on both KCPL's propose rates and an inclining block rate design by DE. Those analyses support moving KCPL's residential general use rate towards a flat structure in the winter and an inclining structure in the summer.

Q. What is OPC's position?

A. OPC supports DE's position. The proposed inclining block rate would have the desired effect of sending an efficiency-inducing price signal to higher usage ratepayers with an added benefit of reducing bills for low-usage ratepayers including low-income households. Based on Company specific data presented in my revenue requirement rebuttal testimony, low-income households use approximately \*\* \*\* less annual average energy than their non-low-income counterparts. Moreover, low-income households place considerably less of a demand burden on the grid in both the summer and winter seasons compared to their non-low-income counterparts on average. In addition to meeting equity criteria, this rate design is also fashioned in such a manner as not to induce rate shock even if rates increase.

18 IV. EV CHARGING TARIFF

19 Q. Please summarize the positions by parties regarding the EV charging tariff.

A. The Company proposes that the EV charging be priced with an energy and session charge. The energy charge per kWh for a Level 2 charges would be the average price per kWh for KCPL's residential class, including volumetric and customer charges as well as applicable riders. The energy charge per kWh for a Level 3 charger would be the average price per kWh for KCPL's small general service class including volumetric and customer charges as well as applicable riders. The Company also proposes that individual charging station "hosts"

1

2

3

4

5

6

8

9

10

11

12

16

17

18

19

20

21

include a session charge that would not exceed \$6.00 per hour, which may be prorated.
Finally, KCPL proposes that a charging station host would have the option of paying for any or all of the various charges for participants at the host site. Staff supports this proposal on the condition that all revenues, expenses and investment associated with the program are recorded below-the-line in order to hold ratepayers harmless.

Sierra Club recommends a time-of-use energy charge.

7 Q. What is OPC's position?

A. OPC does not believe that utility-sponsored EV charging stations are an essential service. Consistent with testimony filed previously in this case, OPC recommends that these capital investments should be borne by shareholders and be recovered below the line. The Company's non-regulated services will presumably price the charging sessions based on what the market will accept.

13 **V. BR** 

#### **BRIGHTERGY'S REQUESTS**

#### 14 Q. Please state the purpose of Brightergy's direct testimony?

15 A. According to Brightergy witness Oakley:

The purpose of my testimony is to encourage Kansas City Power & Light Company ("KCP&L" or the "Company") and the Commission to move forward on several policy fronts that will allow the state to transition from a centralized, coal-based energy generation system to a more distributed system which will allow for competition and safe integration of renewable generation systems.

22 Q. What specific recommendations does Ms. Oakley make?

23 A. Ms. Oakley recommends that:

<ul> <li>proposing; rather it appears to be a blanket level recommendation.</li> <li>OPC has taken the position that until KCPL has fully deployed AMI to all of its customers and has updated its customer and billing information system this recommendation is premature. OPC is supportive of allowing customer more control over their electricity costs and is not opposed to TOU rates for commercial customers in principle. However, we reserve the right to comment on specific proposed designs in future cases.</li> <li>Do you agree with Ms. Oakley's suggestion that KCPL should be able to recover costs for compliance from the RES?</li> <li>A. KCPL can already do this.</li> </ul>		Custin	
<ul> <li>4 Energy Standard ("RES");</li> <li>5 Begin a study of Value of Solar ("VOS") policy;</li> <li>6 Require the Company to provide customer use data more freely; and</li> <li>7 Consider the Company's request for a future test year framework in its ratemaking process.</li> <li>9 Q. Do you agree that the Commission should institute TOU rates to commercial customers?</li> <li>11 A. Not in this case. Furthermore, I am not aware of any specific TOU rate that Brightergy is proposing; rather it appears to be a blanket level recommendation.</li> <li>13 OPC has taken the position that until KCPL has fully deployed AMI to all of its customers and has updated its customer and billing information system this recommendation is premature. OPC is supportive of allowing customer more control over their electricity costs and is not opposed to TOU rates for commercial customers in principle. However, we reserve the right to comment on specific proposed designs in future cases.</li> <li>18 Q. # Q. Do you agree with Ms. Oakley's suggestion that the Commission should "begin a study of Value of Solar policy?"

A. Not at this time. Although OPC is appreciative of Ms. Oakley's suggestion, we are unaware of any "standard" Value of Resource ("VOR") methodology (almost all VOR studies have been Value of Solar "VOS" studies). There are also different types of "valuation" studies available such as EPRI's *Integrated Grid Benefit-Cost Framework*.<sup>2</sup> Moreover, OPC would insist that any future cost-benefit analysis (regardless of the specific framework utilized) should also inform the Commission as to *which* customers would benefit from the results. That is, a valuation analysis needs to be tied to a rate impact analysis to examine what an increase in solar would mean in terms of the overall impact on bills for non-solar customers. Ideally, this would include both the long-term change in customer rates as well as the year-to-year impacts.

It would be an understatement to say that there are *many* potential hurdles that would need to be overcome before a credible study could begin. The transaction costs in actual money, labor and perhaps most importantly, time, cannot be understated. Moreover, any study would need to account for the dynamic policy, legal and regulatory landscape at both the state and federal levels as well as changes to the energy markets. As it stands, OPC cannot support Brightergy's recommendation, especially when such a recommendation is void of any context.

# Q. Do you agree with Ms. Oakley's suggestion that KCPL become more transparent with its billing practices?

A. Yes. OPC supports such billing practices and is currently awaiting feedback from the
 Company regarding data requests as it relates to billing practices and procedures. As an aside,
 OPC has also previously sponsored testimony regarding recommendations related to billing
 transparency that it now wishes to update. This is specifically in regards to the customer

<sup>2</sup> EPRI (2015) The Integrated Grid: A Benefit-Cost Framework. <u>http://www.epri.com/abstracts/Pages/ProductAbstract.aspx?ProductId=000000003002004878</u>

> disclaimer language concerning large capital investments as it relates to rooftop solar and energy efficiency.

#### Q. Please continue.

OPC would like to modify our recommendation based on positive feedback we received from the Company in the last GMO rate case (ER-2016-0156) and which we inadvertently omitted in this cases direct testimony. This includes specific signed consent for transaction from the third-party trade ally (or implementer) and the Company for certain MEEIA programs (as specified in my direct testimony) as well as any future rooftop solar installation. KCPL would be required to maintain electric copies of these disclaimers with signed consent for future reference, including Commission Staff and OPC audits. The consent modification can be found in Figure 1 and 2 respectively:

A.
