CASE NOS. EO-2022-0040/EO-2022-0193

EXECUTIVE SUMMARY 1
PRUDENCE REVIEW OF EMPIRE’S WINTER STORM URI FUEL AND PURCHASED POWER
COSTS 2

1 **PRUDENCE REVIEW OF EMPIRE’S WINTER STORM URI FUEL AND**
2 **PURCHASED POWER COSTS**

3 Q. Please provide some background on this issue.

4 A. In the Fuel Adjustment Clause (FAC) Fuel Adjustment Rate (FAR) filing for
5 Accumulation Period (AP) 25, Case No. ER-2021-0332, covering the six-month period of
6 September 2020 through February 2021, Liberty requested to defer \$168,720,211 of
7 extraordinary costs associated with the February 2021 cold weather event (Winter Storm Uri).
8 In that case, Company witness Charlotte T. Emery’s direct testimony explained that Winter
9 Storm Uri caused record snowfall and extremely cold temperatures, which affected market
10 prices of fuel and fuel availability. Ms. Emery further stated that natural gas and market prices
11 rose to unprecedented levels, much higher than budgeted levels, and Liberty actually incurred
12 an average energy cost of \$99.24/MWh, which was about 324.5 percent more than the current
13 base factor of \$23.38/MWh.¹

14 The requested deferral of costs was Liberty’s effort to prevent charging customers a
15 substantial rate increase by deferring high costs that would have been included in the FAR
16 filing for AP 25, and instead include the high costs for consideration in a subsequent Liberty
17 general rate case, or other type of application. Potential recovery of the deferred costs
18 through a different means than through a Liberty FAR filing would allow the opportunity to
19 “spread” recovery of the costs out over a longer period than otherwise would be possible using
20 the standard FAR methodology.

21 The requested deferral of costs was also pursuant to Commission Rule 20 CSR 4240-
22 20.090(8)(A)2.A.(XI) which directs that tariff sheet(s) filed to change fuel adjustment rates

¹ Charlotte T. Emery’s Direct Testimony page 10, filed April 1, 2021 (Case No. ER-2021-0332, EFIS Item 3 Public Version); Schedule BMM r-3.

1 include certain information, including, “For the period of historical costs which are being
2 used to propose the fuel adjustment rates... Extraordinary costs not to be passed through, if any,
3 due to such costs being an insured loss, or subject to reduction due to litigation or for any
4 other reason.”

5 In the two subsequent FAC FAR filings for AP26 and AP27, Liberty requested to defer
6 additional extraordinary costs and net credits associated with Winter Storm Uri to this
7 securitization case proceeding. During AP26, Liberty deferred \$23,644,805 of additional
8 extraordinary costs, and during AP27 Liberty deferred \$8,632,928 of net credits.

9 In total, Liberty has requested in this securitization docket recovery of \$193,402,197.90
10 of deferred fuel and purchased power costs, which is 100% of the Winter Storm Uri costs and
11 does not reflect an exclusion of 5% of the fuel and purchased power costs normally made in
12 FAC proceedings, as discussed further below.

13 Q. Can you describe the total energy costs (TEC) and the components that were
14 included as part of the deferred fuel and purchased power costs to be securitized?

15 A. Liberty’s FAC TEC includes three components of costs: fuel costs, costs of
16 purchased power and net emission allowance costs; and two components of revenue: off-system
17 sales revenues, and renewable energy credit (REC) revenues. Although Staff reviewed all
18 components of the TEC during this proceeding, the three major components that impacted the
19 Winter Storm Uri net costs were fuel, purchased power, and off-system sales.

20 Fuel costs are tracked in Uniform System of Accounts (USOA) accounts 501, 506, and
21 547. USOA account 501 reflects the production of steam for the generation of electricity, which
22 are comprised of coal and natural gas generation units, and also fuel oil; account 506, which
23 are expenses associated with air quality control system (AQCS) materials used to reduce

1 emissions as a result of burning fossil fuels in Liberty's generation facilities; and account 547,
2 the natural gas generation facilities using combustion turbine generators and combined cycle
3 units, which are used as peaking units and generally used when demand for electricity increases
4 to a point baseload units cannot meet the demand.

5 Purchased power costs are tracked in USOA account 555. USOA account 555 reflects
6 purchased power costs for long-term purchased power agreements (PPAs), and purchased
7 power costs for purchases of energy from the Southwest Power Pool (SPP) market to serve
8 native load.

9 Off-System Sales Revenues (OSSR) are tracked in USOA account 447. USOA account
10 447 reflects revenues from Liberty's sales of energy from its generation resources into the
11 SPP market.

12 Q. Please describe the work conducted by Staff regarding this application within
13 the scope of the Energy Resources Department?

14 A. Staff analyzed, reviewed, and was able to reconcile the TEC based on the
15 transactions in the FERC accounts related to the calculation of the TEC from three different
16 sources: the general ledger, the monthly reports, and the FAR work papers provided by Liberty.
17 Within the fuel accounts, Staff reviewed the short and long term coal purchase contracts, rail
18 transportation contracts, the advanced procurement plan, and the energy risk management
19 policy. Staff also reviewed fuel invoices for the month of February 2021, including invoices
20 supporting purchases of coal, oil, natural gas, and freight. Within the purchased power costs,
21 Staff reviewed the long-term PPA contracts, the gains and losses from those contracts, and all
22 other SPP related costs.

1 In addition to this review, Staff reviewed additional information during the course of
2 this proceeding, for Winter Storm Uri and the February 2021 net costs. This review included
3 natural gas imbalances, Southern Star's Operational Flow Order (OFO) penalty waiver
4 requests, and the findings identified in the Utilicast report provided within Liberty witness
5 John Olsen's direct testimony. Staff was also able to analyze, review, and reconcile all SPP
6 resettlements to the amounts actually received in the FAR workpapers provided, as well as
7 review the dispute appeals process and appeal attempts made. Staff also reviewed the
8 Company's fuel procurement activities during Winter Storm Uri.

9 Q. Are there individual Staff witnesses that worked on each part of this review?

10 A. Yes. Staff expert Lisa Wildhaber reviewed all of the fuel costs, while I reviewed
11 all of the purchased power costs and off-system sales revenues. We both collectively reviewed
12 the additional items noted above such as the natural gas imbalances, Southern Star OFO penalty
13 waivers, SPP disputed claims and resettlements received, and the Utilicast report. Staff expert
14 Jordan Hull had a separate review of generation units and generation-related issues, and that is
15 described further in his rebuttal testimony.

16 Q. Are you proposing any disallowances related to the Company's proposed
17 securitized fuel and purchased power costs?

18 A. Yes. I am proposing a disallowance of \$9,670,109.89, which is 5% of the
19 Company's proposed securitized fuel and purchased power costs.

20 Q. Please explain Staff's proposed disallowance of \$9,670,109.89, and the 95%/5%
21 sharing mechanism of the FAC.

22 A. The FAC requires Liberty to accumulate its total energy costs over a six month
23 accumulation period, followed by a six month recovery period during which ninety-five percent

1 (95%) of the over- or under-recovery of Total Energy Costs over or under the Base Energy
2 Costs is either returned to or collected from customers. This mechanism allows the Company
3 to retain 5% of any over-collected amounts and requires the Company to absorb 5% of any
4 under-collected amounts for each accumulation period. Liberty is seeking to recover
5 \$193,402,197.90 in total deferred fuel and purchased power costs, and \$9,670,109.89 is 5% of
6 that total.

7 Q. Please explain how long the 95%/5% sharing mechanism has been in place for
8 Liberty.

9 A. The Commission first authorized a FAC for Liberty in the Company's 2008
10 general rate case (Case No. ER-2008-0093)². Since then, the Commission has approved
11 continuation of Liberty's FAC with modifications in its orders in Liberty's subsequent
12 rate cases, Case Nos. ER-2010-0130, ER-2011-0004, ER-2012-0345, ER-2014-0351,
13 ER-2016-0023, ER-2019-0374, and ER-2021-0312. Every case since the inception of the FAC
14 in the 2008 general rate case, has included a 95%/5% sharing mechanism.

15 Q. In Case No. ER-2019-0374, the case under which the FAC tariffs were in effect
16 for the Winter Storm Uri time period, what was the Company's position on the FAC sharing
17 mechanism?

² In that case, the Commission stated in its *Report and Order*, filed on July 30, 2008: "Empire's fuel adjustment charge shall include an incentive clause providing that 95 percent of any deviation in fuel and purchased power costs from the base level agreed to by the parties shall be passed to customers and 5 percent shall be retained by Empire. This incentive clause will give Empire a sufficient opportunity to earn a fair return on equity as required by Section 386.266 and the Hope and Bluefield decisions. At the same time, it will protect Empire's customers by giving the company an incentive to be prudent in its decisions by not allowing all costs to simply be passed through to customers."

1 A. The Company proposed continuation of its FAC, and to include the current
2 95%/5% sharing mechanism.³ Which again, is ultimately what the Commission has approved
3 in every case since ER-2008-0093.

4 The Commission's *Amended Report and Order* from ER-2019-0374 stated, "The
5 Commission has found on several occasions, and finds here that the 95/5 sharing ratio provides
6 Empire sufficient incentive to operate at optimal efficiency and still provides an opportunity for
7 Empire to earn a fair return on its investment."

8 Q. According to the statute, how can this sharing mechanism be changed?

9 A. In RSMo, 386.266.5 it states, "The Commission shall have the power to approve,
10 modify, or reject adjustment mechanisms submitted under subsections 1 to 4 of this section
11 only after providing the opportunity for a full hearing in a general rate case proceeding,
12 including a general rate proceeding initiated by compliant."

13 Q. Is this a general rate proceeding as referred to in the statute?

14 A. No. This is a securitization case, another mechanism used to recover the
15 extraordinary costs of fuel and purchased power costs, which are traditionally recovered in the
16 FAC mechanism.

17 Q. Why should Winter Storm Uri costs be treated the same as if they were being
18 flowed through an FAC proceeding since Liberty is seeking recovery under a different recovery
19 mechanism?

20 A. As recognized in Liberty witness Karen Hall's direct testimony, one way the
21 Company would be recovering these costs if they were not securitized, would be through the

³ ER-2019-0374, Tarter Direct Testimony, pg. 3, ln 4-5.

1 FAC, which is the mechanism the Company “[t]ypically” uses to recover fuel and related costs
2 it incurs on behalf of its customers.⁴ However, Staff points out that the FAC mechanism is what
3 the Company is required to use to recover fuel and related costs once the FAC has been
4 established and approved by the commission in a general rate proceeding.⁵ Under the FAC
5 mechanism, the Company may defer extraordinary costs, but the FAC mechanism does not
6 authorize recovery of 100% of those extraordinary costs. The Company removed these costs
7 from the FAC and sought recovery of them in this securitization case because recovering the
8 entirety of the extraordinary costs that the Company incurred during Winter Storm Uri would
9 create extreme customer rate impacts, a circumstance often referred to as “rate shock”⁶.
10 However, the fuel and purchased power costs the Company removed from the FAC and is
11 seeking recovery in this securitization case, are the same fuel and purchased power costs that
12 would have otherwise been recovered through the FAC. Liberty’s proposal to securitize 100%
13 of the extraordinary costs of fuel and purchased power costs contradicts the FAC and the
14 95%/5% sharing mechanism that is required to be applied to fuel and purchased power costs. It
15 also causes additional harm to customers in this case that otherwise would not occur through
16 the FAC and the 95%/5% sharing mechanism. Therefore, it is Staff’s position that since the
17 standard recovery of fuel and purchased power costs through the FAC would have required
18 the Company to absorb the 5% portion of these under-collected costs, 5%, or \$9,670,109.89

⁴ EO-2022-0040, Hall Direct Testimony, pg. 8, lines 17-18.

⁵ Commission Rule 20 CSR 4240-20.090(2) states: “An electric utility may only file a request with the commission to establish, continue, or modify a RAM in a general rate proceeding and must rebase base energy costs in each general rate proceeding in which the FAC is continued and modified. Any party in a general rate proceeding may seek to continue, modify, or oppose the RAM. The commission shall approve, modify, or reject such request only after providing the opportunity for a full hearing in a general rate proceeding. The commission shall consider all relevant factors that may affect the costs or overall rates and charges of the petitioning electric utility. The deferral of extraordinary costs through the FAC is authorized by 20 CSR 4240-2.090(8)(A)2.A.(XI).

⁶ EO-2022-0040, DeCoursey Direct Testimony, pg. 5, lines 4-6.

Rebuttal Testimony of
Brooke Mastrogiannis

1 in this case, should not be allowed to be recovered by the Company as part of the total
2 securitized costs.

3 Q. Do any other Staff witnesses address the issue of the 95/5 split of fuel and
4 purchased power costs in rebuttal testimony in this proceeding?

5 A. Yes. Staff witness Kimberly K. Bolin of the Financial and Business Analysis
6 Division also addresses this issue.

7 Q. What is Staff's recommendation in this case regarding the 95%/5% sharing
8 mechanism of total deferred fuel and purchased power costs?

9 A. Staff recommends the Commission Order Liberty to remove the 5% portion of
10 the total deferred fuel and purchased power costs they are seeking to recover as part of its total
11 securitized costs, which is \$9,670,109.89.

12 Q. Does this conclude your rebuttal testimony?

13 A. Yes, it does.

Education and Employment Background

I am a Utility Regulatory Audit Supervisor in the Energy Resources Department of the Missouri Public Service Commission. I have been employed by the Missouri Public Service Commission since May 2014. I previously was a Utility Regulatory Auditor in the Auditing Unit of the Utility Services Department, and a Utility Management Analyst in the Consumer and Management Analysis Unit.

I received a Bachelor of Science degree in Accounting from Lincoln University, in Jefferson City, MO in May of 2012. I then continued to further my education and received my Masters of Business Administration with an emphasis in Accounting in December 2013. In earning these degree's I completed numerous core Accounting and Business classes.

Prior to joining the Commission, I was employed by the State of Missouri - Department of Natural Resources from June 2013 to May 2014 as an Accounting Specialist. My duties entailed: reviewing and monitoring expense account forms to ensure employees followed correct procedures, prepared and set up project and job codes so they could be coded correctly on employee's time sheets, analyzed and prepared necessary cash draws, and also prepared financial information or reports to facilitate budget information and execution.

DIRECT TESTIMONY OF CHARLOTTE T. EMERY
THE EMPIRE DISTRICT ELECTRIC COMPANY
BEFORE THE MISSOURI PUBLIC SERVICE COMMISSION
CASE NO. ER-2021-xxxx

1 **I. INTRODUCTION**

2 **Q. Please state your name and business address.**

3 A. My name is Charlotte T. Emery, and my business address is 602 South Joplin Avenue,
4 in Joplin, Missouri.

5 **Q. By whom are you employed and in what capacity?**

6 A. My employer is Liberty Utilities Services Corp., and I serve as a Senior Manager in the
7 Rates and Regulatory Affairs Department for Liberty’s Central Region, which includes
8 The Empire District Electric Company (“Empire” or “Company”).

9 **Q. Please describe your educational and professional background.**

10 A. I graduated from College of the Ozarks, Point Lookout, Missouri, in 2000 with a
11 Bachelor of Science degree with a major in Accounting. I have been a Certified Public
12 Accountant ("CPA") in the State of Missouri since 2006. I was hired by Empire in July
13 2016 as a Rates Analyst and promoted to my current position as a Senior Manager in
14 the Rates and Regulatory Affairs Department in May 2020. Prior to joining the
15 Company, I worked for six years in the regulated insurance industry in Springfield,
16 Missouri as a Director of Accounting. In addition, I have nine years of public
17 accounting experience working for both a national and “Big Four” accounting firm. My
18 primary roles at these organizations included serving as a supervisor for financial
19 statement audits and a tax consultant.

20 **Q. Have you previously testified before the Missouri Public Service Commission**
21 **(“Commission”) or any other regulatory agency?**

1 A. Yes. I have testified on behalf of Empire before this Commission, as well as before the
2 Kansas Corporation Commission, the Arkansas Public Service Commission, and the
3 Oklahoma Corporation Commission. The case references are attached to this testimony
4 as Schedule CTE-1.

5 **Q. What is the purpose of your testimony?**

6 A. The purpose of my testimony is to support the Fuel & Purchased Power Adjustment
7 Clause (“FAC”) rate tariff that has been filed by Empire. The FAC rate tariff reflects
8 the actual energy costs incurred by the Company, less an adjustment pertaining to
9 “extraordinary costs” associated with the February 2021 cold weather event (“Storm
10 Uri”), during the six-month period September 2020 through February 2021. The six-
11 month period is an Accumulation Period specified in the Company’s FAC tariff that
12 was approved by the Commission in its Report and Order issued in Case No. ER-2016-
13 0023 and its Report and Order issued in Case No. ER-2019-0374. When factoring in
14 the Storm Uri adjustment, being made pursuant to Rule 20 CSR 4240-
15 20.090(8)(A)2AXI, the current period Fuel Adjustment Rate (“FAR”) for the
16 Accumulation Period ending February 2021 and the Recovery Period ending
17 November 2020 is \$0.0000.

18 **Q. Are you sponsoring any schedules with your testimony?**

19 A. Yes. I am sponsoring the following schedules:
20 ○ Schedule CTE-1 (provides a listing of previous case references);
21 ○ Schedule CTE-2 (contains the basic information and the FAC formula the Company
22 used to calculate the FARs which have been included in the proposed revised FAC
23 rate tariff sheet 17q); and
24 ○ Schedule CTE-3 (detailed information required by 20 CSR 4240-20.090(8)(A)(2)).

1 **Q. Does the Company’s FAC tariff include provisions that are designed to limit**
2 **Empire’s FAC recovery to the actual cost of energy?**

3 A. Yes. The Company’s FAC and the Commission’s rule governing FACs include two
4 safeguards limiting FAC recovery to actual, prudently incurred energy costs. The first
5 safeguard is a true-up process that ensures the FAC collections during the Recovery
6 Period do not exceed actual energy costs incurred during the Accumulation Period.
7 The second safeguard involves a requirement that Empire’s energy costs be subjected
8 to periodic Prudence Reviews, to ensure only prudently incurred energy costs are
9 passed through to customers using the FAC. Empire’s operation of the FAC has been
10 audited by the Commission’s staff through August 31, 2019. Staff filed its report in
11 File No. EO-2020-0059 finding no imprudence on the part of Empire. Commission
12 Staff filed a Notice on March 4, 2021 in File No. EO-2021-0281 indicating they started
13 their Ninth Fuel Adjustment Clause Prudence Review encompassing the period of
14 September 1, 2019 through February 28, 2021.

15 **Q. Do you believe Empire’s Fuel Adjustment Clause is reasonable and appropriate?**

16 A. Yes. There was much discussion and debate concerning Empire’s FAC tariff in Case
17 No. ER-2008-0093, in which the Commission ultimately approved Empire’s initial
18 FAC tariff. Additional discussions have occurred in subsequent cases, including the
19 recently concluded rate case (ER-2019-0374). The Company’s FAC filing is being
20 made in accordance with the Commission’s rules governing the FAC and in accordance
21 with the FAC tariff approved for Empire.

22 **II. EXECUTIVE SUMMARY**

23 **Q. Please describe Empire’s FAC and FAR filing obligations.**

1 A. The Commission’s rule governing fuel and purchased power cost recovery mechanisms
2 for electric utilities – specifically 20 CSR 4240-20.090(8) – requires the Company to
3 make periodic FAC filings that are designed to enable Commission review of the actual
4 fuel costs, purchased power costs, cost of consumables associated with the power
5 plants’ air quality control system (“AQCS”), net cost of emission allowances, revenue
6 from the sale of renewable energy credits (“REC”), and off-system sales margins
7 (collectively referred to as total energy costs) that the Company has incurred during an
8 Accumulation Period. In addition, these periodic filings are designed to adjust the FAC
9 rates up or down, to reflect the actual energy costs incurred during the Accumulation
10 Period. Empire’s FAC tariff calls for two annual filings: a filing covering the six-
11 month Accumulation Period running from September through February and a second
12 filing covering the Accumulation Period running from March through August. Any
13 increases or decreases in rates approved by the Commission, or that take effect by
14 operation of law, are then collected from or refunded to customers over two six-month
15 Recovery Periods: June through November and December through May.

16 **Q. Please provide an overview of your Direct Testimony in support of the FAC rate**
17 **tariff filed by Empire.**

18 A. Since the implementation of the Company’s FAC, the variable cost of fuel and
19 purchased power used by the Company’s Missouri customers has varied from the base
20 fuel and energy cost established in rates. For the Accumulation Period September 2020
21 through February 2021, Empire’s actual total energy costs eligible for the FAC have
22 been higher than the base energy cost included in the Company’s Missouri rates by
23 approximately \$176,248,936. Under normal circumstances, the Company would file a
24 FAC rate tariff that is designed to recover 95 percent of the energy cost differences, or

1 approximately \$167,436,489. However, the Company is seeking approval to defer
2 \$168,720,211 of “extraordinary costs.” Considering the deferral amount pertaining to
3 the Storm Uri extraordinary costs, the Company proposes to use the remaining credit
4 balance of \$1,283,722 in the Accumulation Period to offset the under-recovery of the
5 prior Recovery Period from its Missouri customers. Later in my testimony, I provide
6 greater detail surrounding the extraordinary circumstances that have impacted this
7 filing.

8 Empire seeks to offset the under-recovery balance as result of the Recovery Period
9 ending November 30, 2020 from customers of approximately \$1,293,237 and the
10 impact of the interest offset of approximately \$(9,515) with the net credit balance of
11 \$(1,283,722) which occurred during the Accumulation Period ending February 2021.
12 The Recovery Period under-recovery amount is further described in the true-up
13 testimony that is provided in a separate filing of under-recovered energy costs from the
14 prior Recovery Period ending November 30, 2020. With the inclusion of \$(9,515) for
15 interest offset, this brings the total Fuel and Purchase Power Adjustment to \$0.0000.
16 This total represents the Fuel and Purchased Power Adjustment (“FPA”).

17 As reflected in the rate tariff filed by the Company, Empire has developed two FARs
18 designed to recover the FPA, each of which is based on forecasted retail Missouri sales
19 over the next Recovery Period: a FAR of \$0.0000 per kilowatt-hour (kWh) for primary
20 service; and a FAR of \$0.00000 per kWh for secondary service. As filed, these FARs
21 will enable Empire to defer a significant portion of the Storm Uri extraordinary fuel
22 costs to a future general rate case to determine a more reasonable recovery period, to
23 the benefit of Empire’s Missouri customers. Further, it allows for the net over-

1 collection that occurred during the Accumulation Period months of September 2020 –
2 January 2021 to offset some of the costs that were incurred in February 2021.

3 **III. THE PROPOSED FAC RATE ADJUSTMENT**

4 **Q. Why has Empire filed an FAC-related rate tariff at this time?**

5 A. As noted, Rule 20 CSR 4240-20.090(8) and Empire’s FAC tariff require the Company
6 to make periodic FAC filings that enable the Commission to review Empire’s actual
7 fuel, purchased power, AQCS costs, off-system sales, REC revenue, and net costs of
8 emissions allowances, so that the Company’s FAC rates can be adjusted to reflect the
9 actual energy costs the Company incurs to provide electric service to its Missouri
10 customers. Empire’s Missouri FAC tariff calls for two FAC adjustment filings per
11 year: (1) a filing covering the six-month Accumulation Period running from September
12 through February; and (2) a filing covering the Accumulation Period running from
13 March through August. Empire is seeking an increase in its FAC rates to reflect 95%
14 of the difference between the energy costs built into its base Missouri rates and
15 Empire’s actual Missouri energy costs for the Accumulation Period, less the deferral
16 of \$168,720,211 in “extraordinary costs” and a true-up of the costs recovered during
17 the Recovery Period ending November 30, 2020. This recovery via the FAC rates will
18 be reflected on the Missouri customers’ bills over the six-month Recovery Period
19 running from June 2021 through November 2021.

20 **Q. How did Empire’s average energy costs for the Accumulation Period compare to**
21 **the costs included in base rates?**

22 A. Empire’s average energy costs per kWh increased above the level built into its base
23 electric rates, which is why the FAC rate tariff filed by the Company seeks an increase
24 in the rates charged to the Missouri customers. More specifically, Empire’s Missouri

1 base rates included an average cost of energy per kWh of net system production of
2 \$0.02415 from September 1 through September 15 and \$0.02338 from September 16
3 through February 28, 2021. Empire actually incurred average energy costs of \$0.09924
4 per kWh during the Accumulation Period, which is \$0.07586 per kWh, or about 324.5
5 percent more, than the average cost built into current base rates.

6 **Q. Does Empire seek to recover all of these costs at this time?**

7 A. No. Under normal circumstances and pursuant to Empire’s FAC tariff, the Company
8 would request to collect from its Missouri customers 95 percent of the energy cost
9 differences or approximately \$167,436,489. However, at this time, the Company is
10 seeking to defer \$168,720,211 of “extraordinary costs” pursuant to Rule 20 CSR 4240-
11 20.090(8)(A)2AXI. Considering the deferral of “extraordinary costs” pertaining to
12 Storm Uri, the Company proposes to use the remaining credit balance of \$(1,283,722)
13 to offset the under-recovery amount of \$1,293,237 of the prior Recovery Period ending
14 November 30, 2020 and the respective interest amount of \$(9,515.40). After reflecting
15 these adjustments/deferrals, this results in an average of \$0.00000 per kWh sold during
16 the upcoming Recovery Period.

17 **Q. What is provided for in subpart XI of Rule 20 CSR 4240-20.090(8)(A)2A?**

18 A. For the period of historical costs which are being used to propose the fuel adjustment
19 rates, this rule subpart provides that “(e)xt extraordinary costs not to be passed through, if
20 any, due to such costs being an insured loss, or subject to reduction due to litigation or
21 for any other reason” should be provided.

22 **Q. With Empire’s request to assist its customers by deferring certain costs that would**
23 **otherwise be due in the near future under the Company’s FAC tariff, how will the**
24 **proposed FAC change impact the monthly bill for a typical residential customer?**

1 A. For Missouri residential customers using 1,000 kWh per month, the electric bill will
2 increase by approximately \$1.90 per month over the six-month period June 2021
3 through November 2021, when the requested FAC factor of \$0.0000 is applied to their
4 bill and the previous FAC credit factor of (\$0.00190) is eliminated from their bill.

5 **Q. Did the average energy cost vary from expectations?**

6 A. Yes, as there were extraordinary circumstances that impacted the current Accumulation
7 Period of September 2020 – February 2021. The actual average energy cost was
8 \$99.24/MWh. This was 324.5% higher than the FAC current base factor of
9 \$23.38/MWh. The primary driver of this result was due to the severe winter storm event
10 that occurred in February 2021. In general, this weather event (Storm Uri) included
11 extreme cold temperatures that greatly impacted the demand for electricity, generating
12 unit operations, market and fuel prices, and fuel availability. The south-central states,
13 including the Company’s service territory, experienced some of its coldest
14 temperatures in decades. During this winter event, natural gas and market prices rose
15 to unprecedented levels, which were much higher than a normalized budget would
16 assume. These factors contributed to the actual total FAC eligible energy cost per MWh
17 being above the Company budget of \$22.68/MWh by approximately 337.5% percent.

18 **Q. Please further describe the weather event that resulted in the extreme cold**
19 **temperatures that impacted Missouri customers.**

20 A. An arctic blast brought frigid air into the central United States, including Missouri and
21 surrounding states, which resulted in record snowfall and low temperatures. In
22 response to the extreme temperatures and high energy demand, the Company issued an
23 Internal Peak Advisory on Saturday, February 13, 2021. In addition, the Company

1 issued an External Peak Advisory on February 14, 2021, which remained in effect until
2 noon on February 19, 2021.

3 **Q. Did the Company communicate with customers and other stakeholders during the**
4 **weather event?**

5 A. Yes. Company representatives provided frequent updates to Commission Staff and the
6 Office of the Public Counsel during the event. The Company communicated with its
7 customers utilizing a Peak Advisory to Customers via social media, Company website,
8 and an email to electric customers with email addresses on file. The Company also had
9 communications to large industrial and commercial customers to curtail energy to allow
10 for that energy to be redirected to residential customers and critical facilities. On
11 February 15, after the Southwest Power Pool (“SPP”) announced an Energy Emergency
12 Alert Level 3, the Company also incorporated local media updates and interviews.
13 Throughout the remaining part of the weather event, the Company continued to use all
14 forms of communication to inform customers of requests to conserve energy and if
15 additional controlled service interruptions were expected due to SPP Alerts.

16 **Q. Did the Company provide any additional notifications to the Commission in**
17 **respect to anticipated impacts of the weather impact on customer rates?**

18 A. Yes. The Company filed, on February 26, 2021, a Notice of Intended Case Filing (EU-
19 2021-0274), stating that the Company “intends to file an application requesting an
20 Accounting Authority Order (“AAO”) and modification of its Fuel and Purchased
21 Power Adjustment (“FAC”) tariff sheets.” The Notice also stated the Company “will
22 seek an AAO to allow the Company to assist its customers by deferring certain costs
23 that would otherwise be due in the near future under the Company’s FAC tariff. An
24 AAO and modification of the FAC tariff are necessary due to the unusually high fuel

1 costs and resulting financing costs incurred by Liberty on behalf of its customers during
2 the Extraordinary weather event that occurred in February 2021.”

3 **Q. Has the Commission itself taken any action regarding the February 2021 cold**
4 **weather event?**

5 A. Yes. On February 24, 2021, in File No. AO-2021-0264, the Commission ordered its
6 Regulatory and Customer Experience Departments, with assistance as needed from
7 other departments within its Industry Analysis and Financial and Business Analysis
8 Divisions, to investigate Missouri’s electrical and natural gas utilities’ preparation for
9 and response to Missouri’s February 2021 extreme cold and to report its findings to the
10 Commission.

11 **Q. Is the Company seeking to recover what it deems “extraordinary costs” related to**
12 **Storm Uri through the proposed FAR?**

13 A. No. The Company is seeking to defer \$168,720,211 related to February’s extreme cold
14 temperatures, in conjunction with netting the balance of \$(1,283,722) with the under-
15 recovery amount of \$1,293,237 which occurred during the Recovery Period ending
16 November 30, 2020 and the respective interest amount of \$(9,515). This will bring the
17 FAR, for Accumulation Period ending February 2021, to \$0.00000.

18 **Q. Is Empire requesting specific language from the Commission regarding these**
19 **“extraordinary costs” being pulled from the FAC mechanism?**

20 A. Yes, specific language is needed from the Commission regarding the deferral of these
21 FAC-eligible fuel costs, in order for the Company to be able to assist its Missouri
22 customers in this manner. For these costs to remain as a deferred debit (182.3) on the
23 Company’s Generally Accepted Accounting Principles (“GAAP”) financial
24 statements, the Company needs to have a reasonable expectation of recovery. Because

1 these costs would normally have been recoverable from customers (subject to a
2 prudence review), as they are FAC-eligible fuel costs incurred on behalf of Missouri
3 customers, Empire requests language in an order in this proceeding providing that
4 Empire continues to have a reasonable expectation of recovery of these deferred costs.
5 In order for Empire to assist its Missouri customers in this manner, it is important that
6 the Commission's traditional AAO language not be included in the Commission's
7 order regarding the fuel costs being deferred as part of this proceeding.

8 **Q. Do you expect the average energy costs eligible for the FAC to be higher or lower**
9 **than the base during the next Accumulation Period from March 2021 through**
10 **August 2021?**

11 A. Based upon a review of the Company's internal budget and underlying assumptions,
12 Empire does not anticipate a notable difference between the FAC tariff in effect during
13 the Accumulation Period of March 2021 – August 2021, which includes an FAC base
14 factor of \$23.38/MWh.

15 **Q. Please describe how the Company is proposing to recover the energy cost**
16 **increases experienced during the September 2020 – February 2021 Accumulation**
17 **Period?**

18 A. The FAC rate tariff filed by Empire will apply a FAR of \$0.00000 for primary and
19 \$0.00000 for secondary service to the actual Missouri retail kWh sales that take place
20 during the June 1, 2021 to November 30, 2021 Recovery Period. The proposed FARs
21 were calculated in accordance with Empire's authorized FAC tariff. I have attached to
22 my testimony, as Schedule CTE-2, an exemplar copy of one of the Company's
23 approved FAC tariff sheets. In addition to the tariff sheet, I have included a monthly
24 analysis of the energy costs and energy cost recovery that has taken place during the

1 Accumulation Period on page 2 of Schedule CTE-2. Schedule CTE-2 contains the
2 basic information and the FAC formula that the Company used to calculate the FARs
3 which have been included in the proposed revised FAC rate tariff sheet 17q. The
4 Empire FAC tariff and the formula included therein were approved by the Commission
5 in Case Nos. ER-2016-0023 and ER-2019-0374.

6 **Q. How were the various values used to determine the proposed FARs shown on**
7 **schedule CTE-2 developed?**

8 A. The data upon which Empire based the values for each of the variables in the approved
9 FAR formula are included on the schedule and came from Empire's books and records.
10 Schedule CTE-2 contains the basic information that is required to calculate the
11 proposed change in the FAR. In addition, the Company has filed the detailed
12 information required by 20 CSR 4240-20.090(8)(A)(2) with this testimony as Schedule
13 CTE-3. Additional information about the true-up amount is being filed concurrently in
14 a separate docket. Also, as required by 20 CSR 4240-20.090, the Company is separately
15 providing these workpapers to all parties of record in Case No. ER-2019-0374.

16 **Q. Is Empire in compliance with the provisions of the Commission's FAC rule**
17 **concerning periodic reporting and surveillance?**

18 A. Yes. Empire has complied with all provisions of Commission Rules 20 CSR 4240-
19 20.090(5) and (7) governing periodic reports and surveillance using the Commission's
20 electronic filing system and by providing copies of the periodic compliance reports and
21 copies of surveillance reports to the other parties at the same time they were filed with
22 the Commission.

1 **Q. If FAC Sheet 17q is approved by the Commission, what safeguards exist to ensure**
2 **the FAC revenue collected by Empire does not exceed the actual total energy cost**
3 **incurred by Empire during the Accumulation Period?**

4 A. As mentioned earlier, Empire’s FAC and the Commission’s rules provide two
5 mechanisms designed to limit the FAC amounts collected from customers to Empire’s
6 actual, prudently incurred energy costs. First, at the end of each Recovery Period the
7 Company is required to true-up the amounts collected from customers through the FAR
8 with the total energy costs that were actually incurred during the Accumulation Period
9 to which the FAR applies. In addition, Empire’s energy costs are subjected to periodic
10 prudence reviews to ensure that only prudently incurred energy costs are collected from
11 customers through the FAC. These two mechanisms serve as checks that ensure that
12 the Company’s Missouri customers pay only the prudently-incurred, actual cost of
13 energy used to provide electric service in Missouri (less the 5% Empire absorbs or
14 retains as required by the Commission’s orders) – no more and no less.

15 **Q. What action is Empire requesting from the Commission with respect to the FAC**
16 **rate tariff that the Company filed on April 1, 2021?**

17 A. As provided by 20 CSR 4240-20.090(8), Staff has thirty days from the date the FAC
18 rate tariff is filed to conduct a review and to make a recommendation to the
19 Commission as to whether the rate tariff complies with the Commission’s FAC rules,
20 the requirements of Section 386.266, RSMo, and Empire’s approved FAC. The
21 Commission has sixty days from the date of the Company’s filing to either approve the
22 rate tariff or to allow it to take effect by operation of law. Empire believes its FAC
23 filing satisfies all the requirements of applicable statutes, the Commission’s rules, and
24 Empire’s approved FAC. As such, the Company requests, following Staff’s review, the

1 Commission approve revised FAC sheet 17q to be effective as of June 1, 2021, which
2 is the first day of the Recovery Period prescribed in Empire’s FAC tariff.

3 **IV. CASE NO. ER-2019-0374 FAC TARIFF CHANGES**

4 **Q. What changes were ordered surrounding Empire’s FAC tariff as a result of the**
5 **Company’s last general rate case (ER-2019-0374)?**

6 A. In summary, the base factor changed from \$0.02415 per kWh to \$0.02338 per kWh
7 effective September 16, 2020. In addition, changes were made regarding the eligible
8 accounts, primary and secondary voltage rates, language regarding the Company’s
9 wind projects, along with other administrative tariff changes.

10 **Q. Did the above changes have an impact on the Accumulation Period of September**
11 **2020 – February 2021 or the Recovery Period of June 2020 – November 2020?**

12 A. Yes.

13 **Q. Please explain.**

14 A. The effective date of the base energy cost occurred on September 16, 2020, which falls
15 within the timeframe for this Accumulation Period. However, the Recovery Period
16 calculations were not impacted, as that period was prior to the effective date of the new
17 tariff sheets.

18 **Q. Please explain the Commission’s decision regarding the Missouri Joint Municipal**
19 **Electric Utility Commission (“MJMEUC”) revenue.**

20 A. The Commission held “that the FAC tariff should not be revised to allow revenue from
21 MJMEUC contracts to flow through the FAC.”¹ In other words, the Commission held
22 that the MJMEUC revenue should not flow through Empire’s FAC.

¹ ER-2019-0374, Report and Order, page 64.

1 **Q. Did the Commission order any additional reporting for Empire related to the**
2 **MJMEUC contract?**

3 A. Yes. The Commission ordered “additional reporting for Liberty-Empire to file with its
4 FAC monthly reports and Fuel Adjustment Rate filing workpapers, including a detailed
5 listing of all costs incurred due to the MJMEUC contracts and the revenues that the
6 Company receives from MJMEUC.”²

7 **Q. Are these additional reporting requirements included in this FAC filing?**

8 A. Yes.

9 **Q. Does this conclude your Direct Testimony?**

10 A. Yes.

² Ibid.

ISSUED BY Sheri Richard, Director Rates and Regulatory Affairs, Joplin, MO

PUBLIC VERSION

¹The Missouri Energy Ratio (J), on line 4, is calculated by dividing the Missouri retail kWh sales by the Total system kWh sales for the current accumulation period as specified by the tariff.

²The (TEC-B)*J, on line 5, is calculated by taking the sum of (TEC-B)*J for each month of the accumulation period. Therefore, because each month is weighted differently, the amount on line 5 will not necessarily equal the product of lines three and four.

³For this accumulation period only, the Fuel and Purchased Power Adjustment (FPA), on line 11, is calculated by taking the total of \$167,436,489, on line 7, and reducing it by the extraordinary cost of \$168,720,211, that the Company is seeking to defer, for a net of (\$1,283,722). The True-Up Amount of \$1,293,237, on line 8, and Interest Expense of (\$9,515), on line 10, are added to the net of (\$1,283,722). This brings the Total Fuel and Purchased Power Adjustment to \$0.

As shown on the revised tariff sheet submitted in this case, the base fuel factor for the accumulation period is \$23.38

Extraordinary fuel costs in the amount of \$168,720,211.25 attributable to the February 2021 Winter Storm Event have been withheld from the current FAC filing to mitigate an immediate and extreme impact to our customers' rates. Empire intends to eventually recover these costs through either a modification to the FAC tariff or a general rate case.

Other than the above mentioned Extraordinary Costs, Empire did not incur any other extraordinary costs not to be passed through due to such costs being an insured loss, or subject to reduction due to litigation or for any other reason.
