GAS RATE SCHEDULE  
PURCHASED GAS ADJUSTMENT CLAUSE (PGA)

MISSOURI

PUBLIC SERVICE COMMISSION

The charges which the Company makes for gas shall be subject to increases or decreases because of increases or decreases in the cost of gas charged by any or all suppliers serving areas described as follows:

Cape Girardeau, Dunklin, Iron, Mississippi, New Madrid, Pemiscot, Ripley, Scott, Stoddard, and Wayne Counties in Missouri; and Clay Craighead, Greene, and Mississippi Counties in Arkansas.

A. Each month the Company will determine its average cost of gas by using the most recent supplier invoices to compute the appropriate adjustment applicable to its rates as follows:

1. The cost of gas purchased in the most recent twelve month period shall be priced on two bases:

(a) at the wholesale base rates of -

Demand: \$2.0905 per Mcf per month; Commodity: 6 7634 REVISION, and

(b) at the wholesale rates in effect during the most recent purchase month.

2. The difference in annual cost determined above shall be divided by the CCF sold during the same twelve month period and the rate per CCF determined to the nearest \$ .00001 will be used as a net adjustment applicable to monthly billings under all of the Company's Gas Rate Schedules not having a purchased gas adjustment clause as part of the schedule. When the Company pays a legally imposed franchise tax based upon gross revenue, the adjustment computed above shall be increased to recover the associated increase in franchise tax.

3. The adjustment so determined shall be applied to customer's billing in the next following revenue month.

B. Each month before applying any purchased gas adjustment, the Company shall transmit to the Commission an Adjustment Statement showing:

1. The computation of the amount of the annual increase or decrease in the cost of purchased gas as determined above.

2. The rate per CCF to be used in computing the Net Adjustment to Company's Gas Service Schedules.

December 16, 1961

**RECEIVED**  
DEC 18 1961

OFFICE OF THE SECRETARY  
PUBLIC SERVICE COMMISSION

Mr. Harvey C. Hubbs, Secretary  
Missouri Public Service Commission  
Jefferson State Office Building  
Jefferson City, Missouri 65101

Dear Mr. Hubbs:

Enclosed is a copy of the Purchased Gas Adjustment calculation and supporting data for our January, 1962, revenue month. The adjustment will be applied to billings beginning December 28, 1961.

The January Purchased Gas Adjustment applicable to the SECO District is down due to a decrease in the demand charge and to variations in the results of operations for the twelve months ended October, 1961, versus the results of operations for the twelve months ended November, 1961.

The January Purchased Gas Adjustment applicable to the Butler District is down from last month's calculation because of variations in the results of operations for the twelve months ended October, 1961, versus the results of operations for the twelve months ended November, 1961.

The January Purchased Gas Adjustment applicable to the Elkhartville District is up from last month's calculation due to an increase in the commodity charge.

Very truly yours,

*Robin Singleton*

Introduction to Accounting and Auditing

# Public Utility Industry

Participant's Guide

© 1980 Deloitte Haskins & Sells  
Printed August, 1980

## 36 Auditing Certain Other Accounts and Transactions

The procedures for physical inventory of liquid fuels stored in tanks generally consist of:

- . measuring the depth from the top of the tank to the level of liquid or using a gauge reading to determine the level of the fuel
- . converting depth measurements to volume measurements adjusted for temperature variances.

When we determine that it is necessary to observe liquid fuel inventories, we should obtain specification charts for the tanks so that the volume specifications can be reviewed for reasonableness during our physical observation.

### NUCLEAR FUEL

Because of the nature and life of nuclear fuel, it is classified as utility plant under the USOA. Amortization is provided using the useful life of the fuel inserted in the nuclear core to reflect consumption of the fissionable material.

The firm has prepared an "Audit Program For Nuclear Fuel" (Form 7490B) which should be used as a guide in testing nuclear fuel and nuclear fuel expense for overstatement, and the accumulated provision for amortization of nuclear fuel for understatement. You should review this program to gain a general familiarity with its contents. Also note that modification of the program is required if nuclear fuel is leased.

### GAS INVENTORIES--DISTRIBUTION COMPANIES

In general, gas distribution companies purchase natural gas from pipeline companies under tariffs approved by the FERC. These tariffs normally include a demand charge and a commodity charge. The demand charge is intended to recover the fixed costs associated with the pipeline service and is based on the maximum daily quantity of gas under the contract. The pipeline company is required to supply the distribution company's requirements up to this maximum daily demand. Therefore, unit costs for gas purchased are lowest when maximum daily demand quantities are being purchased. This is difficult to achieve, however, because most distribution companies have a large number of heating customers whose requirements vary significantly with the temperature.

The use of underground storage reservoirs has increased in recent years to balance pipeline supplies with varying demand requirements. Gas purchased by a distribution company for storage is generally maintained in a storage field owned and administered by the pipeline company.

Liquified natural gas can also be stored by a distribution company to meet peak daily requirements or to meet base load.

Where gas is stored by a pipeline company that is independent of our client, we should confirm quantities with the company. For gas stored by our client, we should:

- . review the method used to determine volume
- . review the controls and procedures as they relate to injections of gas or liquid into storage and withdrawals from storage
- . test injections and withdrawals to meter records
- . analytically review volumes in storage in relation to gas purchases and sales
- . where significant, consider whether it is necessary to engage a specialist to measure stored gas.

We should also review the client's method of accounting for nonrecoverable gas and determine that such balances are included in the appropriate property account rather than in inventory.

#### OPERATING REVENUES OF ELECTRIC, GAS AND WATER UTILITIES

Although the primary objective of testing utility revenues is the same as it is for other business enterprises, there are certain characteristics of utility service which should be emphasized.

Utility service is generally provided by a direct connection between the company's facilities and the customer premises (wire or pipe) and is generally measured by a meter located on the customer premises. Furthermore, the utility prices are subject to price regulation and the utility is often required to record and report revenues by customer classification.

In testing revenues for reasonableness we should:

- . review client procedures for accounting for meters. Meters installed should be reconciled with accounts billed. Meters in stock and installed should be reconciled to continuing property records.
- . make sure that the client retains meter read cards if we are going to use them as an independent sales record.

TONY V. TURNER

Q. Please state your name and business address.

A. I am Tony V. Turner and my business address is 7373 West 107th Street, Overland Park, Kansas, 66212.

Q. What is your occupation and by whom are you employed?

A. I am a public utility consultant in the firm of Drees Dunn Lubow and Company. My primary responsibilities with the firm include assisting in engagements by public utility companies, state commissions and intervenors relating to such utility matters as utility rate case accounting, cost of service studies, rate of return determinations and rate design studies.

Q. Would you summarize your background?

A. I graduated from the University of Missouri at Columbia in December of 1971, receiving a Bachelor of Science Degree in Business Administration, with a major in accounting. In December, 1977, I received a Master of Business Administration degree, with a finance concentration, from the University of Missouri.

From 1972 until 1976, I was employed by the Missouri Public Service Commission where I was primarily involved in analyzing utility company rate filings and presenting staff findings in regard to those filings.

Since January, 1978, I have continued my work in the public utility field with the firm of Drees Dunn Lubow and

GR-79-126

Q. Would you describe how the adjusted test year rate base was developed in the Company's Exhibit.

A. Yes, sir. The rate base supporting Associated's gas service operations is detailed in Sections 3 through 6. A summary of the components of the adjusted Missouri gas utility rate base or investment, in total and by district, is shown on Schedule 1 of Section 3 while the remaining schedules in Sections 3 through 6 serve as supporting evidence for the summary. The utility rate base for Missouri operations, in total and by districts, summarized on Schedule 1 of Section 3 is carried forward to Section 2B, Schedule 2, and used in the computation of the required increase in gross revenue.

The adjusted utility rate base was developed in a manner consistent with the determination of the corresponding level of operations in that the recorded balances were adjusted and normalized to reflect a test period level of investment. Furthermore, rate base components were identified by district either by direct assignment or by allocation. On schedules where rate base components are allocated, the basis of allocation is cross-referenced to Section 12.

Q. Returning now to your determination of operating income as adjusted, would you describe the adjustments listed on Schedule 5 of Section 9A?

A. Operating revenues have been increased by \$385,200 to recognize the revenues that would have been reported had the Company's present tariffs been in effect throughout the twelve months

GR-79-126

ASSOCIATED NATURAL GAS COMPANY

CASE NO. GR-79-126

Prepared Testimony of Richard C. Kwentus

Q. What is your name and address?

A. Richard C. Kwentus, St. Louis County, Missouri.

Q. What is your position with the Missouri Public Service Commission?

A. I am a Public Utility Accountant.

Q. Please describe your educational background.

A. I attended the University of Missouri - St. Louis, from which I received a Bachelor of Science in Business Administration, with a major in accounting, in December 1977.

Q. What has been the nature of your duties while in employ of the Commission.

A. I have, under the direction of the Assistant Director of Utilities, Division of Accounting, participated in rate case audits to determine the validity of proposed rate increases, along with other miscellaneous duties within the Accounting Department.

Q. With reference to Case No. GR-79-126, which schedules and adjustments are you sponsoring?

A. I am sponsoring the following schedules:

Schedule 1 - Balance Sheet as Recorded at October 31, 1978

Schedule 2 - Plant in Service as Recorded and Adjusted

Schedule 3 - Adjustments to Plant in Service

Schedule 4 - Reserve for Depreciation and Amortization

Schedule 5 - Adjustments to Reserve for Depreciation and Amortization

Schedule 6 - Computation of Working Capital

Schedule 7 - Rate Base

Additionally, I am sponsoring all the adjustments relating to Plant

in Service on schedule 3, and adjustments to Reserve for Depreciation on schedule 5. I am also sponsoring adjustments A-14-1, A-14-2, A-14-3, A-15-1, A-16-3 on schedule 9. All of the above adjustments are described in the appropriate schedule.

Q. Does this conclude your testimony?

A. Yes, sir, it does.

## PREPARED TESTIMONY

OF

BRADLEY R. LEWIS

01 Q. Please state your name and address.

02 A. I am Bradley R. Lewis and my business address is 9101  
03 West 110th Street, Overland Park, Kansas.

04

05 Q. What is your present occupation?

06 A. I am a Public Utility Consultant in the firm of Drees  
07 Dunn Lubow & Company. My responsibilities with the  
08 firm consist mainly of working on public utility mat-  
09 ters, such as the determination of the cost of service,  
10 cost allocation, and rate design.

11

12 Q. What is your educational background?

13 A. I graduated from the University of Missouri at Columbia  
14 in December, 1974, with a Bachelor of Science Degree in  
15 Business Administration. I am a Certified Public  
16 Accountant and have completed a portion of the graduate  
17 work required for a Masters of Business Administration  
18 Degree.

19

20 Q. What experience have you had in the public utility  
21 field?

22 A. I was employed by the Missouri Public Service  
23 Commission as a utility accountant for approximately  
24 three years. My responsibilities included the review

01 Q. Please explain the two schedules included in Section F.  
02 A. Schedules 1 and 2 provide the details supporting the  
03 accumulated reserve for depreciation and amortization  
04 of gas plant in service, including its jurisdictional  
05 allocation.

06

07 Q. Have you prepared schedules supporting the elements of  
08 the rate base labeled as cash working capital and  
09 accrued taxes?

10 A. Yes, Schedule 1 of Section G reflects the determination  
11 of cash working capital necessary for the Company to  
12 operate on a day-to-day basis. Based upon the invest-  
13 ment required to meet expenses until such costs are  
14 recovered through the receipt of revenues from its  
15 customers, the Company must supply the funds necessary  
16 to pay expenses incurred in providing gas utility ser-  
17 vice. Cash working capital, to be included in the uti-  
18 lity rate base, has been determined according to a 45  
19 day lag between the incurrence of cash expenditures and  
20 the recovery through revenue receipts. Cash working  
21 capital allowance on a total company basis is  
22 \$920,940; the total Missouri portion being \$635,648.

23

24 Average accrued taxes for the Company have been calcu-  
25 lated to be used as an offset to the cash working capi-  
26 tal requirements. Schedule 3 of Section G is concerned

01 with these accrued taxes. The cash working capital  
02 allowance was completely offset by accrued taxes, as is  
03 readily apparent on Schedule 1 of Section D.

04  
05 Q. Please continue with your explanation of the remaining  
06 components of the rate base.

07 A. Materials and supplies, liquified natural gas stored,  
08 stores expense undistributed, deferred cost of  
09 purchased gas, and gas stored underground are items of  
10 investment which vary throughout the year due to season-  
11 al fluctuations. In order to arrive at a represen-  
12 tative amount for these components of the rate base,  
13 average balances were calculated on Schedule 4 of  
14 Section G.

15  
16 Average balances for prepayments were also included in  
17 the rate base. Schedule 2 of Section G shows the  
18 calculation of the average balances for prepayments.

19  
20 Q. Why have you included accumulated deferred income taxes  
21 in the utility rate base?

22 A. In addition to the Company's traditional sources of  
23 capital, tax savings resulting from timing differences  
24 ~~can be~~ utilized as a source of funds, in that amounts  
25 ~~charged currently to income yet deferred for payment in~~  
26 ~~future years are accumulated as reserves at no cost.~~

SECTION 6  
SCHEDULE 4

A. Yes, I have, with the assistance of other members of the Missouri Public Service Commission Staff.

Q. Which schedules will you be sponsoring?

A. I will be sponsoring Schedules 11, 12, 13, 14, 15 and 16.

Q. Could you please explain these schedules?

A. Schedules 11, 12, 13 and 14 are Staff's computation of rate base for total Missouri and each respective district.

Schedule 11 - Total Missouri Rate Base  
Schedule 12 - Southeast Missouri Rate Base  
Schedule 13 - Kirksville Rate Base  
Schedule 14 - Butler Rate Base

Staff computes the rate base for each of the above using the same methodology. Therefore, I will discuss the computations of the different categories to be applied to all schedules noting if an exception exists. "Total Plant-In-Service" was derived by taking December 31, 1981 plant balances. The "Depreciation Reserve" was derived by taking December 31, 1981 reserve balances. "Net Plant-In-Service" is computed by netting the "Depreciation Reserve" from "Total Plant-In-Service". "Materials and Supplies" and "Prepayments" were calculated by using a 13 month average of the book balances for each account. The figures for "Cash Working Capital" will be reflected in Schedules 17, 18, 19 and 20 and will be discussed by Staff Witness Baumhoer in her testimony. The "Tax Offset" and "Interest Offset" balances will also be addressed by Staff Witness Baumhoer. "Customer Deposits" and "Deferred Taxes" each represent December 31, 1981 balances as recorded. The "Rate Base" figure is computed by netting each figure together as prescribed on each schedule.

Case No.:

Bradley R. Lewis

Direct Testimony

Associated Natural Gas Company

GR-83-205

Q. Have you prepared schedules supporting the elements of the rate base labeled as cash working capital and accrued taxes?

A. Yes, Schedule 1 of Section G reflects the determination of cash working capital necessary for the Company to operate on a day-to-day basis. Based upon the investment required to meet expenses until such costs are recovered through the receipt of revenues from its customers, the Company must supply the funds necessary to pay expenses incurred in providing gas utility service. Cash working capital, to be included in the utility rate base, has been determined according to a 45 day lag between the incurrence of cash expenditures and the recovery through revenue receipts. Cash working capital allowance on a total company basis is \$970,284; the total Missouri portion being \$662,710.

Average accrued taxes for the Company have been calculated to be used as an offset to the cash working capital requirements. Schedule 3 of Section G is concerned with these accrued taxes. The cash working capital allowance was reduced by \$30,373 for the Missouri jurisdictional rate base. As you can see, only the Southeast Missouri jurisdiction requires a cash working capital allowance over accrued taxes.

Q. Please continue with your explanation of the remaining components of the rate base.

A. Materials and supplies, liquified natural gas stored, stores

expense undistributed, deferred cost of purchased gas, and gas stored underground are items of investment which vary throughout the year due to seasonal fluctuations. In order to arrive at a representative amount for these components of the rate base, average balances were calculated on Schedule 4 of Section G.

Average balances for prepayments were also included in the rate base. Schedule 2 of Section G shows the calculation of the average balances for prepayments.

- Q. Why have you included accumulated deferred income taxes in the utility rate base?
- A. In addition to the Company's traditional sources of capital, tax savings resulting from timing differences can be utilized as a source of funds, in that amounts charged currently to income yet deferred for payment in future years are accumulated as reserves at no cost to the company. They represent an interest free loan from the United States Treasury as an incentive to invest in capital goods.

Since these funds are available to the Company at zero cost, they should be recognized as a source of capital to support the utility investment. Based on previous findings of this Commission, accumulated deferred income taxes was limited to timing differences of over one year's duration. Those timing differences include: rate case expense, liberalized

BEFORE THE  
PUBLIC SERVICE COMMISSION OF MISSOURI  
PREPARED DIRECT TESTIMONY  
OF  
LAVERNE E. HEITHOFF

1  
2  
3  
4  
5  
6  
7 Q. What is your name and address?

8 A. My name is LaVerne E. Heithoff. My business address is 2900 Power & Light  
9 Building, Kansas City, Missouri 64105.

10  
11 Q. By whom are you employed and in what capacity?

12 A. I am a partner in the firm of Troupe Kehoe Whiteaker & Kent and am  
13 employed as a public utility consultant in the Utility Department.

14  
15 Q. Would you explain the business activities of Troupe Kehoe Whiteaker & Kent?

16 A. The firm is a partnership engaged in the general practice of public  
17 accounting. The practice, in addition to the traditional auditing and tax  
18 services, provides system and management services, operational and manage-  
19 ment audits, computer services, economic analyses, and a complete public  
20 utility regulatory and consulting service including cost of service, rate of  
21 return, allocation of cost of service and rate design. The firm, with offices  
22 in Kansas City, provides client services on a nationwide basis.

23  
24 Q. What type of clientele is represented by Troupe Kehoe Whiteaker & Kent in  
25 the field of utility regulation?

26 A. The firm has represented and presently represents all segments of the utility

1 Q. Please refer to Section C, Schedule 4 and discuss.

2 A. Schedule 4 merely shows a reconciliation of Company plant adjustments at  
3 March 31, 1983. Column B shows total plant as recorded by the Company.  
4 Column C shows plant Adjustment No. 1. Column D shows plant Adjustment  
5 No. 2. Column E shows the adjustment made by the Company in its  
6 application for plant intended to be sold to the City of Kennett. Column G  
7 shows adjusted plant in service at March 31, 1983. The sources of the various  
8 column amounts are shown on the bottom of the page.  
9

10 Q. Please refer to Section C, Schedule 5 and discuss.

11 A. Schedule 5 shows gas plant in service as adjusted as of March 31, 1983. Total  
12 Missouri plant as adjusted is \$25,503,420.  
13

14 Q. Please refer to Section C, Schedule 6 and discuss.

15 A. Schedule 6 shows the accumulated reserve for depreciation and amortization  
16 as adjusted and as recorded at March 31, 1983. The only adjustment made to  
17 the reserve for depreciation is the deduction for the accumulated reserve  
18 related to plant to be sold to the City of Kennett. The total accumulated  
19 reserve for depreciation and amortization for the State of Missouri is  
20 \$10,742,303, as shown in Column F.  
21

22 Q. Please refer to Section D, Schedule 1 and discuss.

23 A. Schedule 1 of Section D shows the other rate base items included in rate  
24 base. These consist of the 13-month average balance of materials and  
25 supplies - Account 154; Liquid Natural Gas Stored Underground - Account  
26 164; Stores Expense Undistributed - Account 163; and Gas Stored

1 Underground - Account 164.201. The average balances for these accounts are  
2 \$281,319, \$168,849, \$60,276 and \$564,070, respectively. The bottom half of  
3 Schedule 1 also shows the allocation of these various rate base items between  
4 Arkansas, Southeast Missouri, Kirksville and Butler. The amounts shown on  
5 this page are carried forward to Schedule 1 of Section B.

6  
7 Q. Why did you use the 13-month average balances for these accounts?

8 A. I used the 13-month average balances for these accounts because this  
9 methodology tends to eliminate the fluctuation in the various accounts during  
10 any test period. In addition, the 13-month average balance methodology was  
11 used in Company's prior rate case proceeding and was accepted by the Staff  
12 in that proceeding.

13  
14 Q. Please refer to Schedule 2 of Section D and discuss your schedule on  
15 prepayments.

16 A. Schedule 2 sets forth the 13-month average balances of prepaid insurance  
17 included in Account 165.001 and prepaid life insurance included in Account  
18 165.002. The 13-month average balances for these accounts are \$45,056 and  
19 a negative \$619 balance respectively. The allocated amounts shown on the  
20 bottom of Schedule 2 are carried forward to Schedule 1 of Section B.

21 Prepayments represent a cash investment made by the Company upon  
22 which it should receive a return on the average balance.

23  
24 Q. Did you include accumulated deferred income taxes on liberalized  
25 depreciation as a rate base item?

26 A. Yes. Reference to Schedule 1 of Section B shows that I have used
