

INVESTING IN MISSOURI // 2014 INTEGRATED RESOURCE PLAN

Chapter 1- Executive Summary

Highlights	1
1.1 Transitioning to a More Fuel Diverse Portfolio.....	2
1.2 Our Need for New Generating Resources.....	4
1.3 Resource Options for Meeting Our Needs.....	6
1.4 Planning Assumptions.....	10
1.5 Ameren Missouri's Preferred Resource Plan.....	12
1.6 EPA's Proposed Clean Power Plan.....	16
1.7 Conclusion.....	18

Chapter 1 - Appendix A

Chapter 2 - Planning Environment

Highlights	1
2.1 General Economic Conditions	1
2.2 Financial Markets	3
2.3 Load Growth.....	4
2.4 Reliability Requirements.....	7
2.5 Energy Markets	7
2.5.1 Natural Gas Market.....	8
2.5.2 Coal Market.....	11
2.5.3 Nuclear Fuel Market.....	13
2.5.4 Electric Energy Market.....	15
2.5.5 Power Capacity Market.....	16
2.5.6 Renewable Energy Standard	17
2.6 Environmental Regulation	18
2.7 Price Scenarios	21
2.8 Compliance References	25

Chapter 3 - Load Analysis and Forecasting

Highlights	1
3.1 Energy Forecast	1
3.1.1 Historical Database	3
3.1.2 Forecast Vintage Comparison.....	4
3.1.3 Service Territory Economy.....	7
3.1.4 Economic Drivers.....	11
3.1.5 Energy Forecasting.....	12
3.1.6 Sensitivities and Scenarios	25
3.1.7 Planning Case Forecast.....	29
3.1.8 Forecast Results	30

3.2	Peak and Hourly System Load Forecast Energy Forecast	37
3.2.1	Historical Peak and System Load	39
3.2.2	Profile Shapes.....	41
3.2.3	Peak Load Forecast.....	47
3.2.4	Hourly System Load Forecast.....	52
3.2.5	Forecast Results	55
3.2.6	Planning Case Peak Demand Forecast	56
3.2.7	Peak Demand - Extreme Weather Sensitivity	60
3.3	Weather Normalization	62
3.4	Future Research Projects	64
3.5	Compliance References	66

Chapter 3 - Appendix A

Chapter 4 - Existing Supply Side Resources

Highlights	1
4.1 Existing Generation Portfolio	2
4.1.1 Existing Coal Resources	3
4.1.2 Existing Gas & Oil Resources	6
4.1.3 Existing Nuclear Resources	6
4.1.4 Existing Renewable and Storage Resources	7
4.1.5 Levelized Cost of Energy Evaluation for Existing Resources	10
4.1.6 Planned Changes to Existing Non-Coal Resources	11
4.2 Existing Coal Generation Evaluation	13
4.2.1 Reliability Trends.....	13
4.2.2 Operations and Maintenance Costs.....	16
4.2.3 Capital Expenditures	17
4.2.4 Potential Conversion of Meramec Units to Natural Gas	18
4.3 Potential Expansion of Existing Hydroelectric Resources	19
4.3.1 Keokuk Hydroelectric Expansion Opportunities	19
4.4 Efficiency Improvements	20
4.4.1 Existing Facility Efficiency Options.....	20
4.4.2 Existing Energy Center Efficiency Options.....	22
4.5 Compliance References	24

Chapter 4 - Appendix A

Chapter 4 - Appendix B

Chapter 5 - Environmental Compliance

Highlights	1
5.1 Overview	2
5.2 Major Environmental Laws	3
5.2.1 Current Laws.....	3
5.3 Water Environmental Laws.....	11
5.3.1 Current Laws.....	11
5.3.2 Possible Future Water Environmental Initiatives	13
5.4 Solid Waste Environmental Laws	14
5.4.1 Current Laws.....	14
5.4.2 Possible Future Solid Waste Environmental Initiatives	15
5.5 Compliance Assumptions	16
5.5.1 Air Environmental Laws	17
5.5.2 Water Environmental Laws	19
5.5.3 Solid Waste Environmental Laws.....	20
5.5.4 Other Environmental Laws.....	21
5.5.5 Summary.....	21
5.6 Compliance References	22

Chapter 5 - Appendix A

Chapter 5 - Appendix B

Chapter 6 - New Supply Side Resources

Highlights	1
6.1 Thermal Resources	2
6.1.1 Potential Coal and Gas Options.....	2
6.1.2 Potential Nuclear Resources.....	4
6.2 Potential Renewable Resources.....	8
6.2.1 Potential Landfill Gas Projects	8
6.2.2 Potential Hydroelectric Projects	11
6.2.3 Potential Anaerobic Digestion Projects	14
6.2.4 Potential Biomass Projects	15
6.2.5 Potential Solar Projects.....	23
6.2.6 Potential Wind Resources.....	26
6.2.7 Renewable Supply	30
6.3 Potential Storage Resources.....	31
6.4 Power Purchase Agreements.....	34
6.5 Final Candidate Resource Options.....	34
6.6 Compliance References	36

Chapter 6 - Appendix A**Chapter 6 - Appendix B****Chapter 6 - Appendix C****Chapter 6 - Appendix D****Chapter 7 - Transmission and Distribution**

Highlights	1
7.1 Transmission	2
7.1.1 Existing System.....	2
7.1.2 Regional Transmission Organization Planning	2
7.1.3 Ameren Missouri Transmission Planning	6
7.1.4 Avoided Transmission Cost Calculation Methodology	7
7.1.5 Transmission Impacts of Potential Ameren Missouri Generation Resource Additions/Retirements & Power Purchases/Sales.....	8
7.1.6 Cost Allocation Assumptions for Modeling	12
7.1.7 Advanced Transmission System Technologies.....	12
7.1.8 Ameren Missouri Affiliates Relationship	16
7.2 Distribution.....	17
7.2.1 Existing System.....	17
7.2.2 System Inspection.....	19
7.2.3 System Planning	21
7.2.4 Peak Demand Reduction via Voltage Control	24
7.2.5 System Efficiency.....	24
7.2.6 Distributed Generation	27
7.2.7 Advanced Distribution System Technologies	27
7.2.8 Ameren Missouri's Smart Grid Plan	29
7.2.9 Advanced Technology Investment Strategy	36
7.3 Compliance References	39

Chapter 7 - Appendix A**Chapter 7 - Appendix B****Chapter 8 - Demand-Side Resources**

Highlights	1
8.1 Implementation Plan Summary.....	2
8.1.1 Introduction	2
8.2 DSM Potential Study	6
8.2.1 2013 Ameren Missouri DSM Potential Study	6
8.3 Portfolio Programs.....	13

8.3.1	Proposed Portfolio Programs	13
8.3.2	Portfolio Overview	14
8.3.3	DSM Portfolios Considered	19
8.4	8.4Evaluation Measurement and Verification (EM&V)	27
8.4.1	Existing EM&V Model	27
8.4.2	Proposed EM&V Model	27
8.4.3	Stakeholder Considerations	30
8.5	Outreach, Marketing and Communications	31
8.6	The Planning Process	31
8.6.1	Cost Effectiveness Defined	31
8.6.2	New Web-Based Technical Reference Manual (TRM)	34
8.6.3	Program Design Process	36
8.6.4	Interactive Effects	40
8.7	Demand Response Potential	41
8.7.1	Definition(s) of Demand Response	41
8.7.2	Ameren Missouri History of Implementation of Customer Demand Response Programs	43
8.7.3	Ameren Missouri Capacity Position	48
8.7.4	Market Prices for Capacity	49
8.7.5	Demand Side Management Program Qualification to Participate in MISO Markets and Resource Adequacy Construct	53
8.7.6	Determination of Realistic Achievable and Maximum Achievable Demand Response Potential	54
8.7.7	Capacity Equivalence	56
8.7.8	Demand Response Program Effective Useful Lives	57
8.7.9	Peak Time Rebate (PTR) Programs	58
8.7.10	FERC National Assessment of DSM Potential-2009	58
8.7.11	2013 DR Potential Study Results	60
8.7.12	Ameren Missouri DR Pilot Consideration for 2016-2018	62
8.8	Targeted DSM	64
8.8.1	Spring Forest Situation Analysis	65
8.9	Distributed Generation and Combined Heat and Power Potential	66
8.9.1	CHP Case Studies	67
8.9.2	DG/CHP Technology Options	68
8.9.3	DG/CHP Potential	70
8.10	Demand-Side Rate Potential	71
8.10.1	Approach	71
8.10.2	Demand-Side Rate Potential Results	74
8.11	2016 – 2018 Implementation Plan	77
8.11.1	Overview	77

8.11.2 Timing Issues Associated with Proposed Plan.....	78
8.11.3 Recommendation for Framework to Adjust MEEIA Cycle 2016-2018 Program Designs	81
8.11.4 Potential Uncertainty	86
8.12 MEEIA Cycle 2016-2018 Technical Reference Manual (TRM).....	87
8.13 R&D Issues that will Evolve from 2014 to 2016	89
8.13.1 Residential Light Program Design for 2016–2018.....	89
8.13.2 Smart Thermostats.....	90
8.13.3 Prepay.....	92
8.13.4 LED Street Lights	95
8.13.5 Small Business Direct Install (SBDI) Program.....	98
8.13.6 Weekly Customer Usage Updates	99
8.13.7 Electric Vehicles.....	99
8.14 Compliance References	102

Chapter 8 - Appendix A

Chapter 8 - Appendix B

Chapter 8 - Appendix C

Chapter 9 - Integration and Risk Analysis

Highlights	1
9.1 Alternative Resource Plan Attributes	2
9.2 Capacity Position.....	3
9.3 Pre-Analysis	9
9.4 Planning Objectives	12
9.5 Determination of Alternative Resource Plans	14
9.6 Sensitivity Analysis	18
9.6.1 Uncertain Factors.....	19
9.6.2 Sensitivity Analysis Results.....	25
9.7 Risk Analysis	27
9.7.1 Risk Analysis Results.....	28
9.8 Conclusions from Integration and Risk Analysis.....	30
9.9 Resource Plan Model	31
9.10 Compliance References	34

Chapter 9- Appendix A

Chapter 10 - Strategy Selection

Highlights	1
10.1 Planning Objectives	2
10.2 Assessment of Alternative Resource Plans	4
10.2.1 Scoring of Alternative Resource Plans	4
10.2.2 DSM Portfolio Considerations	7
10.3 Preferred Plan Selection	11
10.4 Contingency Planning	13
10.4.1 DSM Cost Recovery and Incentives	13
10.4.2 Expansion of Distributed Generation	14
10.4.3 Loss of Large Customer Load	15
10.4.4 Incremental Wind Additions	16
10.4.5 Greenhouse Gas Regulation	17
10.4.6 Optionality for New Generation	19
10.5 Resource Acquisition Strategy	20
10.5.1 Preferred Plan	21
10.5.2 Contingency Plans	22
10.5.3 Expected Value of Better Information Analysis	22
10.5.4 Implementation Plan	24
10.5.5 Monitoring Critical Uncertain Factors	27
10.6 Compliance References	29

Chapter 10 - Appendix A

Chapter 10 - Appendix B

Chapter 10 - Appendix C

Chapter 11 - Stakeholder Process

Highlights	1
11.1 Stakeholder Group	2
11.2 Stakeholder Workshop	2
11.3 Stakeholder Comments on Draft Report	3
11.3.1 Comments of Staff	3
11.3.2 Comments of Sierra Club and NRDC	7
11.4 Special Contemporary Issues	11
11.5 Post-Filing Activities	14
