Re: Assessment of Iatan 1 retro-fit and Iatan 2

Dear Ms. Pope:

The West Platte R-2 School Board is disappointed in your letter of May 23, 2008. We sincerely do not understand what your process and methodology are in assessing the largest construction project in Platte County history.

We also continue to be concerned about newspaper reports of cost overruns at Iatan and, in examining the numbers provided to us earlier by KCP&L, we are unable to see any overruns included in your assessment. In your letter, you mention DeLoitte & Touche did an audit. Please provide us a copy. It may help us in regard to the cost overrun issue if we can look at an independent audit examining your assessment process and conclusions.

You have made it clear you think you are helping our district by using soft costs coupled with an assessment at less than 100%. We truly do not understand. As one of the beneficiaries of your assessment process, we would like to be a part of your process.

We also do not understand any sort of concession on the Iatan I retrofit. It was our understanding that KCP&L was arguing for a "discount" (its word) based on the risk involved in the construction of Iatan II, a new power plant. Iatan I is a thirty-year-old plant where there should not be the same risk factors and we feel should have no assessment concessions.

We are a public board trying to discharge our duties and responsibilities and repeat our request for a meeting with you. As always, we are available to discuss at your convenience. My cell number is (816)804-0249 and Kyle Stephenson's office number is (816) 640-2236.

Sincerely,

Bill Taylor  
Board President
