

APPENDIX LOCAL NUMBER PORTABILITY

1. PROVISION OF LOCAL NUMBER PORTABILITY

- 1.1 SBC MISSOURI and CLEC shall provide local number portability (LNP) in accordance with requirements of the Act, the rules and orders of the FCC, and the guidelines of the North American Numbering Council (NANC).

2. REQUIREMENTS FOR LNP

- 2.1 SBC MISSOURI and CLEC shall follow industry guidelines regarding LNP.
- 2.2 Either party shall be permitted to block default-routed call to protect the public switched telephone network from overload, congestion, or failure propagation.
- 2.3 When a ported telephone number becomes vacant, e.g., the telephone number is no longer in service with the original End User, the ported telephone number will be released back to the carrier owning the switch in which the telephone number's NXX is native.
- 2.4 Each Party shall become responsible for the End User's other telecommunications related services and features, e.g. E911, Directory Listings, Operator Services, Line Information Database (LIDB), once that party has ported the End User's telephone number to their switch.
- 2.5 Limitations of Service
 - 2.5.1 Telephone numbers can be ported as a basic network offering only within SBC Missouri rate centers as approved by State Commissions. "Porting within rate centers" refers to the physical location of the end user. If the end user changes his physical location from one rate center to another, he may not retain his telephone number (which indicates the old rate center) as a basic network (non FX) offering. An end user may retain his phone number assignment when moving from one rate center to another by receiving tariffed FX service from his new service provider or by the use of a Tariffed "Remote Call Forwarding" offering from his new service provider. The term "FX" in this attachment refers to number assignments and moves outside of rate centers, and is different from the term "FX" in the Compensation attachment which refers number assignments and moves outside of a mandatory local calling area.
 - 2.5.2 Telephone numbers in the following SBC MISSOURI NXXs shall not be ported: (i) SBC MISSOURI Official Communications Services (OCS) NXXs; and (ii) 555, 976, 950,956, 976, 900 TNs (iii) N11 TNs (such as 411, 911, etc.) (iv) 800, 888, 877, 866 TNs (v) Disconnected or unassigned TNs..
 - 2.5.3 Telephone numbers with NXXs dedicated to choke/High Volume Call-In (HVCI) networks are not portable via LRN. Choke numbers will be ported as described in Section 3.6 of this Appendix.
- 2.6 Service Description
 - 2.6.1 The LRN software of the switch in which an NXX is native determines if the called party is in a portable NXX. When a calling party places a Telephone call, if the called party is in a portable NXX, a query will be launched to the LNP database, to determine whether or not the called number has been ported.
 - 2.6.2 When the called number has been ported, an LRN will be returned to the switch that launched the query. Following the query, the LRN of the called number will appear in the Called Party Number (CdPN) field of the SS7 message, and the called number then will appear in the Generic Address Parameter (GAP) field.
 - 2.6.3 When the query does not return a LRN, the call will be completed based upon the dialed digits.
 - 2.6.4 When the LNP database is queried, the Forward Call Identifier (FCI) field's entry will be changed from 0 to 1 by the switch triggering the query, regardless of whether the called number has been ported or not.
 - 2.6.5 Where technically feasible, the Parties shall populate the Jurisdictional Identification Parameter (JIP) field with the first six (6) digits (NPA NXX format) of the appropriate LRN of the originating switch.

2.7 Pricing

- 2.7.1 With the exception of lawful query charges, the parties agree not to charge each other for ordering, provisioning, or conversion of ported telephone numbers as a means for the other to recover the costs associated with LNP. Notwithstanding the foregoing, SBC MISSOURI may charge CLEC LNP end user surcharges, provided that the conditions set forth in 47 CFR § 52.33 are met.

2.8 "N-1" Query Methodology

- 2.8.1 The parties shall follow the "N-1" query methodology in performing queries of the LNP database, as provided below. As provided by Industry standards, the "N-1" carrier is the carrier in the call routing sequence immediately prior to the terminating carrier's end office, or the terminating carrier's end office tandem. The "N-1" carrier shall perform the LNP database query. If the "N-1" carrier fails to perform the LNP database query, the terminating carrier shall perform a query of the LNP database, and shall be permitted to change the N-1 carrier for the query.
- 2.8.2 For interLATA or intraLATA toll calls, the originating carrier will pass the call to the appropriate toll carrier, which will perform a query of the LNP database and efficiently route the call to the appropriate terminating local carrier, either directly or through an access tandem office. Where one carrier is the originating local service provider (LSP) and the other carrier is the designated toll carrier, the designated toll carrier is the "N-1" carrier. The originating LSP will not query toll calls delivered to the toll carrier or charge the toll carrier for such queries.
- 2.8.3 For local calls to ported numbers, the originating carrier is the "N-1" carrier. The originating carrier will query the LNP database and route the call to the appropriate terminating carrier.
- 2.8.4 For local calls to any NXX from which at least one number has been ported, the Party that owns the originating switch shall query an LNP database as soon as the call reaches the first LNP-capable switch in the call path. The Party that owns the originating switch shall query on a local call to an NXX in which at least one number has been ported via LNP prior to any attempts to route the call to any other switch. Prior to the first number in an NXX being ported via LNP at the request of a CLEC, SBC MISSOURI may query all calls directed to that NXX and provided that SBC MISSOURI's queries shall not adversely affect the quality of service to CLEC's customers or end-users as compared to the service SBC MISSOURI provides its own customers and end-users.
- 2.8.5 A Party shall be charged for an LNP query by the other Party only if the Party to be charged is the N-1 carrier and it was obligated to perform the LRN-PNP query but failed to do so, pursuant to conditions set forth in CFR 47, Section 52.33. The only exception will be if the FCC rules (Docket No. 95-116) that the terminating carrier may charge the N-1 carrier for queries initiated before the first number is ported in an NXX.
- 2.8.6 Rates, terms and conditions for LNP queries performed by SBC MISSOURI will be governed by FCC No. 73 Access Services Tariff, Section 34, or a successor tariff.
- ## 2.9 Ordering
- 2.9.1 Porting of numbers marked as portable in the Local Exchange Routing Guide (LERG) will be initiated via Local Service Requests (LSR) based on Ordering and Billing Forum (OBF) recommendations.
- 2.9.2 When an LSR is sent to one Party by the other Party to initiate porting via LNP, the receiving Party shall return, at the appropriate time, a Firm Order Confirmation (FOC).
- 2.9.3 For the purposes of this Attachment, the parties may use a project management approach for the implementation of LSRs for large quantities of ported numbers or for complex porting processes. With regard to such managed projects ("projects"), the parties may negotiate implementation details such as, but not limited to: Due Date, Cutover Intervals and Times, Coordination of Technical Resources, and Completion Notice.

3. PROVISIONING

- 3.1 The Parties will remove a ported number from the end office from which the number is being ported, as close to the requested time as possible, not to exceed 59 minutes, except under the conditions listed below in 3.1.1, 3.1.2 and 3.1.3,. The 59-minute period shall commence upon the Frame Due Time (FDT) shown on the receiving party's LSR, or as otherwise negotiated by the parties on a project basis. The parties recognize that it is in the best interest of the consumer for this removal to be completed in the most expedient manner possible. Therefore, SBC MISSOURI and CLEC agree that a 30-minute interval is a goal towards which both companies will work, however both CLEC and SBC MISSOURI recognize that there will be instances where the interval may be up to 59 minutes.
- 3.1.1 Unconditional ten digit trigger. If the unconditional LNP trigger is set, calls originating from the old switch will query the database and route to the new switch without the number being disconnected. The ported number must be removed at the same time that the unconditional LNP trigger is removed.
- 3.1.2 Project orders. Project requests will negotiate time frames for the disconnect of the numbers in the old switch.
- 3.1.3 Coordinated Orders. Orders worked on a coordinated basis will be coordinated until the numbers are disconnected in the old switch.
- 3.2 The Parties agree to provide unconditional Ten Digit Trigger wherever technically feasible.
- 3.3 SBC MISSOURI and CLEC shall cooperate in the process of porting numbers from one carrier to another so as to limit service outage for the ported subscriber. SBC MISSOURI and CLEC will use their best efforts to update their respective Local Service Management Systems (LSMS) from the NPAC SMS data within 15 minutes after receipt of a download from the NPAC SMS (the current North American Numbering Council goal for such updating).
- 3.4 At the time of porting a number via LNP, the Party from which the number is being ported shall insure that the LIDB entry for that number is deprovisioned.
- 3.5 Mass Calling
 - 3.5.1 Both SBC MISSOURI and CLEC are required to offer number portability of telephone numbers with "choke" (i.e., mass calling) NXXs in a manner that complies with the FCC's criteria.
- 3.6 Operator Services, LIDB/LVAS and Directory Assistance
 - 3.6.1 The Provisions of this Agreement pertaining to Operator Services, LIDB/LVAS and Directory Assistance shall also apply when LNP is in place.
- 3.7 Porting of DID Block Numbers
 - 3.7.1 DID block numbers shall be portable in the same manner as other local telephone number, subject to the modifications and/or limitations provided herein.
 - 3.7.2 SBC MISSOURI and CLEC shall offer number portability to customers for any portion of an existing DID block without being required to port the entire block of DID numbers.
 - 3.7.3 SBC MISSOURI and CLEC shall permit customers which port a portion of DID numbers to retain DID service on the remaining portion of the DID numbers, provided such is consistent with applicable tariffs.
