**TARIFF FORMAT**

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new Pages are occasionally added to the tariff. When a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current Page version on file with the PSCM. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the PSCM follows in its tariff approval process, the most current Page number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:

2.  
2.1  
2.1.1  
2.1.1.A.  
2.1.1.A.1.  
2.1.1.A.1.(a)  
2.1.1.A.1.(a).I.  
2.1.1.A.1.(a).I.(i).  
2.1.1.A.1.(a).I.(i).(1).

**SECTION 4 – SERVICE CHARGES AND SURCHARGES, (CONT'D.)****4.4 Carrier Presubscription****4.4.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier that the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

**4.4.2 Presubscription Options** - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

**Option A:** Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.

**Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

**Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

**4.4.2 Presubscription Options, (Cont'd.)**

**Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription

**Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

**Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

**4.4.3 Rules and Regulations**

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

**SECTION 4 – SERVICE CHARGES AND SURCHARGES, (CONT'D.)****4.4 Carrier Presubscription, (Cont'd.)****4.4.4 Presubscription Procedures**

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in Section 7.4 of this tariff. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

**SECTION 4 – SERVICE CHARGES AND SURCHARGES, (CONT'D.)****4.5 Public Telephone Surcharge**

In order to recover Company expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the A#@ symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

**SECTION 5 – LOCAL EXCHANGE SERVICE****5.1 General**

Local exchange service is offered to business and residential Customers on a presubscription basis from equal access originating end offices only. Usage rates, per call charges and monthly fees may apply. In addition, applicable Service Order and other non-recurring charges may apply. Call timing is defined in the description for each service. Service is available 24 hours a day, 7 days a week. Service is available where technically feasible and where facilities permit.

Local Exchange services cannot be used to originate calls to caller-paid information services (e.g., 900, 976) provided by other companies. Calls to those numbers and other numbers used for caller-paid information services will be blocked by the Company switch.

**5.2 Call Timing for Usage Sensitive Services**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.1.1** Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- 5.1.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 5.1.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 5.1.4** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 5.1.5** All times refer to local time.

**SECTION 6 – SUPPLEMENTAL SERVICES, (CONT'D.)****6.1 Optional Calling Features, (Cont'd.)****6.1.2 Caller ID**

This feature enables the Customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a Customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, only to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to the Company: (1) private, nonprofit, tax exempt, domestic violence intervention agencies and (2) federal, state and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the Customer by dialing an access code immediately prior to placing a call. Line blocking Customer can unblock their CPN information on a per call basis, at no charge, by dialing an access code (\*82 on their touch tone pad of 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their touch tone pad of 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification Customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

**SECTION 6 – SUPPLEMENTAL SERVICES, (CONT'D.)****6.1 Optional Calling Features, (Cont'd.)****6.1.2 Caller ID, (Cont'd.)**

Any Customer subscribing to Caller ID will be responsible for the provision of a display device that will be located on the Customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID Subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator handled calls.

**6.1.3 Call Trace**

Customers receiving annoying or anonymous calls may request (1) a telephone number change, which will be provided at no charge by the Company, or (2) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the Customer to dial a code (\*57) to automatically request that the following information be recorded: originating telephone number, the date and time of the call, the date and time call trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll free number, which will active a Voice Response Script and assist the Customer in establishing an open file. Should the Customer decide to prosecute the call originating party, the Customer should contact the Company for further instructions. Activation of Call Trace never authorizes the Company to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's telephone line.

At the Customer's request, installation and/or maintenance may be performed outside Company regular business hours, or (in sole discretion of the Company and subject to any conditions it may impose) in hazardous locations. In such cases, charges based on the cost of labor, material, and other costs incurred by or charged to the Company will apply. If installation is started during regular business hours, but at the Customer's request, extends beyond regular business hours into time periods including, but not limited to, weekends, holidays, and/or night hours, additional charges may apply.

**10.3 Individual Case Basis (ICB) Arrangements**

Arrangements will be developed on a case-by-case basis in response to a bona fide special request from a Customer or prospective Customer to develop a competitive bid for a service not generally offered under this tariff. Rates quoted in response to such competitive requests may be different than those specified for such services in this tariff. ICB rates will be offered to the Customer in writing and on a nondiscriminatory basis.

ICB rates will be structured to recover Company cost of providing the service. Terms of specific ICB arrangements will be made available to the Commission upon request on a proprietary basis. ICB rates will not be used for switched services.
