1-30-14 Workshop Input

Informal comments and suggested language changes submitted to EFIS by 2/14/14.

Suggested language for (5)(B) submitted to EFIS by 2/14/14.

Comments on suggested language for (5)(B) submitted to EFIS by 2/21/14.

Proposed Amendment

4 CSR 240-20.100 Electric Utility Renewable Energy Standard Requirements

PURPOSE: This amendment makes changes required by HB 142, 97th General Assembly, and clarifies the rule—sets the definitions, structure, operation, and procedures relevant to compliance with the Renewable Energy Standard. The Secretary is amending [describe where changing], adding [describe additions] and deleting [describe deletions].

(1) Definitions. For the operations (rework) purposes purpose of this amended rule—

(A) Calendar year means a period of three hundred sixty-five (365) days (or three hundred sixty-six (366) days for leap years) that includes January 1 of the year and all subsequent days through and including December 31 of the same year;

(B) Co-fire means simultaneously using multiple fuels in a single generating unit to produce electricity;

(C) Commission means the Public Service Commission of the state of Missouri;

(D) Customer-generator means the owner, lessee, or operator of an electric energy generation unit that meets all of the following criteria:

1. Is powered by a renewable energy resource;

2. Is located on premises that are owned, operated, leased, or otherwise controlled by the party as retail account holder and which corresponds to the service address for the retail account;

3. Is interconnected and operates in parallel phase and synchronization with an electric utility and has been approved for interconnection by said electric utility; and

4. Meets all applicable safety, performance, interconnection, and reliability standards endorsed by of the net metering rule, 4 CSR 240-20.065(1)(C)6. and 4 CSR 240-20.065(1)(C)7.

(E) ~~Department~~ Division means the Division of Energy, Department of Natural Resources Economic Development;

(F) Electric utility means an electrical corporation as defined in section 386.020, RSMo;

(G) General rate proceeding means a general rate increase proceeding or complaint proceeding before the commission where the commission considers in which all relevant factors that may affect the costs or rates and charges of the electric utility are considered by the commission setting rates;

(H) Green pricing program means a voluntary program that provides an electric utility's retail customers an opportunity to purchase renewable energy or renewable energy credits (RECs);

(I) Operational, when used to describe solar electric systems, ~~For purposes operational of solar rebates for solar electric systems~~ "operations" means all of the major components of the on-site solar photovoltaic system have been purchased and installed on the customer generator's

premises and the production of rated net electrical generation ~~can be has been measured~~ by the utility - . (MO Solar Applications - add 'can be measured.' Without 'by the utility' see example form)

(J) PVWatts™ means the site-specific data calculator that uses hourly typical meteorological year weather data and a photovoltaic performance model to estimate annual energy production and costs savings for a photovoltaic solar system. Or equivalent application by DOE.

(K) Rate class means a customer class defined in an electric utility's tariff. Generally, rate classes include Residential, Small General Service, Large General Service, and Large Power Service, but may include additional rate classes. Each rate class includes all customers served under all variations of the rate schedules available to that class;

(L) REC, Renewable Energy Credit, or Renewable Energy Certificate means a tradable certificate, that is either certified by an entity approved as an acceptable authority by the commission or as validated through the commission's approved REC tracking system or a generator's attestation. Regardless of whether RECs have been certified, RECs must be validated through an attestation must be signed by an authorized individual of the company that owns the renewable energy resource. Such attestation shall contain the name and address of the generator, the type of renewable energy resource technology, and the time and date of the generation. An REC represents that one (1) megawatt-hour of electricity has been generated from renewable energy resources. RECs include, but are not limited to, solar renewable energy credits. An REC expires three (3) years from the date the electricity associated with that REC was generated; (renew MO generation in or deliver to MO)

(M) Renewable energy resource(s) means, when used to produce electric energy produced from (leave produced from)-the following: DNR wants to be consistent with the statute

1. Wind;
2. Solar, including solar thermal sources utilized to generate electricity, photovoltaic cells, or photovoltaic panels;
3. Dedicated crops grown for energy production;
4. Cellulosic agricultural residues;
5. Plant residues;
6. Methane from landfills or wastewater treatment;
*Add from statute
7. Clean and untreated wood, such as pallets;
8. Hydropower (not including pumped storage) that does not require a new diversion or impoundment of water and that has generator nameplate ratings of ten (10) megawatts or less; ; (renew MO aggregate capacity)
9. Fuel cells using hydrogen produced by any of the renewable energy technologies in paragraphs 1. through 8. of this subsection; and
10. Other sources of energy not including nuclear that become available after November 4, 2008, and are certified as renewable by rule by the department/division;

(N) RES or Renewable Energy Standard means sections 393.1025 and 393.1030, RSMo;

(O) RESRAM or Renewable Energy Standard Rate Adjustment Mechanism means a mechanism that allows periodic rate adjustments to recover prudently incurred least-cost RES

compliance costs and pass-through to customers the benefits of any savings achieved in meeting the requirements of the Renewable Energy Standard;

(NP) RES compliance costs means prudently incurred costs, both capital and expense, directly related to compliance with the Renewable Energy Standard. Prudently incurred costs do not include any increased costs resulting from negligent or wrongful acts or omissions by the electric utility;

(O)Q RES portfolio requirements mean the numeric values and other requirements established by section 393.1030.1, RSMo, and subsections (2)(C) and (2)(D) of this rule (renewable and solar); (May cause confusion.)

(PR) The RES revenue requirement means the following:

1. All expensed least-cost RES compliance costs (other than taxes and depreciation associated with capital projects) that are included in the electric utility's revenue requirement in the proceeding in which the RESRAM is established, continued, modified, or discontinued; and

2. The costs (i.e., the return, taxes, and depreciation) of any least-cost capital projects whose primary purpose is to permit the electric utility to comply with any RES requirement. The costs of such capital projects shall be those identified on the electric utility's books and records as of the last day of the test year, as updated, utilized in the proceeding in which the RESRAM is established, continued, modified, or discontinued;

(QS) Solar renewable energy credit or S-REC means an REC created by generation of electric energy from solar thermal sources, photovoltaic cells, and photovoltaic panels;

(RT) Staff means all commission employees, except the secretary to the commission, general counsel, technical advisory staff as defined by section 386.135 RSMo, hearing officer, or administrative or regulatory law judge;

(SU) Standard Test Conditions means solar incidence of one (1) kilowatt (kW) per square meter and a cell or panel temperature of twenty-five degrees centigrade (25 °C) as-related-to-for measuring the capability of solar electrical generating equipment;

(TV) Total retail electric sales, or total retail electric energy usage, means the megawatt-hours (MWh) of electricity delivered in a specified time period by an electric utility to its Missouri retail customers as reflected in the retail customers' monthly billing statements; and

(UW) Utility renewable energy resources mean those renewable energy resources that are owned, controlled, or purchased by the electric utility.

(2) Requirements. Pursuant to the provisions of this rule and sections 393.1025 and 393.1030, RSMo, all electric utilities must generate or purchase REC's and S-REC's associated with electricity from renewable energy resources in sufficient quantity to meet both the RES ~~portfolio~~ requirements (~~renewable and solar~~) and RES solar energy requirements respectively on a calendar year basis. Utility renewable energy resources utilized for compliance with this rule must include the REC's or S-REC's associated with the generation. The RES ~~portfolio requirements and the RES solar energy~~ requirements are based on total retail electric sales of the electric utility. The requirements set forth in this rule shall not preclude an electric utility from ~~being able to prudently invest and recovering~~ all of its prudently incurred ~~least-cost investment~~ and costs ~~in-incurred~~ for renewable energy resources that exceed the ~~then current~~ requirements or limits of this rule, ~~and-but~~ are consistent with the prudent implementation of any resource acquisition strategy ~~the electric utility~~ developed in compliance with 4 CSR 240-22, Electric Utility Resource Planning. REC's or S-REC's produced from these additional renewable energy resources ~~shall be eligible to be may~~ shall be eligible to be counted-counted (~~revert back to 'shall be eligible to be counted'~~) toward the RES ~~portfolio~~ requirements: in future years.

(A) ~~Reserved*~~ ~~Reinstate the reserved sections – Renew Missouri~~

(B) The amount of renewable energy resources or REC's ~~associated with renewable energy resources~~ that can be counted towards meeting the RES ~~portfolio~~ requirements are as follows:

1. If the ~~facility generating the~~ renewable energy resources is located in Missouri, the allowed amount is ~~the amount of megawatt-hours (MkWhs)~~ ~~(change back to Megawatt hour)~~ generated by the ~~applicable generating facility resource~~ renewable generating facility, multiplied by one and, further subject to the additional twenty-five hundredths (0.25) to effectuate the credit pursuant to § 393.1030.1, RSMo. and subsection (3)(G) of this rule; and

2. ~~Reserved*~~ ~~Reinstate the reserved sections – Renew Missouri~~

3. REC's created by the operation of customer-generator facilities and acquired by or ~~otherwise transferred to~~ the Missouri electric utility shall qualify for RES compliance if the customer-generator is a Missouri electric energy retail customer, regardless of the amount of energy the customer-generator provides to the associated retail electric provider through net metering in accordance with 4 CSR 240-20.065, Net Metering. REC's are created by the operation of the customer-generator facility, even if ~~a significant amount or the total~~ some amount of electrical energy is consumed on-site at the location of the customer-generator.

(C) The RES ~~portfolio~~ requirements are—

1. No less than two percent (2%) in each calendar year 2011 through 2013;
2. No less than five percent (5%) in each calendar year 2014 through 2017;
3. No less than ten percent (10%) in each calendar year 2018 through 2020; and
4. No less than fifteen percent (15%) in each calendar year beginning in 2021.

(D) At least two percent (2%) of each RES ~~portfolio~~ requirement listed in subsection (C) of this section shall be derived from solar energy. The RES ~~solar energy portfolio~~ requirements for solar energy are—

1. No less than four-hundredths percent (0.04%) in each calendar year 2011 through 2013;
2. No less than one-tenth percent (0.1%) in each calendar year 2014 through 2017;
3. No less than two-tenths percent (0.2%) in each calendar year 2018 through 2020; and
4. No less than three-tenths percent (0.3%) in each calendar year beginning in 2021.

(E) Except as provided in Section (5) below, relating to additional rebates, ~~if~~ least-cost compliance with RES requirements when compared to cost of generating or purchasing electricity from non-renewable sources, taking into proper account future environmental regulatory risk including the risk of greenhouse gas regulation, would raise the retail rates charged to the customers of electric retail suppliers by an average of more than one percent in any year, then ~~renewable mandates required by law such the above RES and RES solar energyporfolio requirements would cause the retail rates of an electric utility to increase on average in excess of one percent (1%) as calculated per section (5) of this rule, then above requirements compliance~~ activities directly associated with those mandates shall be limited so as not to exceed the one percent rate increase cap. ~~to providing renewable energy in amounts that so that the cost of them would not cause retail rates of the electric utility to increase on average one percent (1%) as calculated per section (5) of this rule, provided that REC prioritization follows sect. (5)(D) (Renew Missouri), Ameren prefers language in the variant section . (Ameren wants to go back to original language)~~

(F) If an electric utility is not required to meet the RES portfolio requirements of subsection (C) of this section in a calendar year, because doing so would cause retail rates to increase on average in excess of one percent (1%) as calculated per section (5) of this rule, then the RES solar energyporfolio requirement for solar energy specified in subsection (2)(D) shall be at least two percent (2%) of the cost of the renewable energy resources (Ameren) that can be acquired subject to the one percent (1%) average retail rates limit as calculated per section (5) of this rule. There is no limit on the S-Rec and solar rebate cost as long as all solar cost will not cause retail rates to increase an average of 1% per section 5 of this rule.(MO Solar Application) (Utilities want original language because this section isn't intended to deal with cost)required to reduce its compliance activities in any year in order to ensure that it does not exceed the rate increase cap in Section (2)(E), the utility shall reduce compliance activities in the following order. First, the utility shall reduce costs associated with the purchase of disaggregated RECs from outside Missouri. Second, the utility shall reduce costs associated with purchases of RECs or renewable energy from other utilities in Missouri. Third, the utility shall reduce costs associated with utility-scale renewable energy projects and investments. As a last priority, the utility shall reduce costs associated with distributed renewable energy facilities and programs.

(G) If an electric utility intends to accept proposals for renewable energy resources to be owned by the electric utility or an affiliate of the electric utility, it shall comply with the necessary requirements of 4 CSR 240-20.015, Affiliate Transactions.

(3) ~~Renewable Energy Credits~~RECs and S-RECs. Subject to the requirements of section (2) of this rule, RECs and S-RECs ~~shall~~may be utilized to satisfy the RES requirements of this rule. SRECs shall be utilized to comply with the RES ~~solar energyporfolio~~ requirements for solar energy and ~~S-RECs may also be utilized to comply with-satisfy the non-solar-RES portfolio requirements for other renewable energy resources.~~

(A) ~~The~~RECs or S-RECs are created when energy is generated at a renewable energy generating resource connected to the grid. ~~creation is linked to the associated renewable energy resource.~~ For purposes of retaining RECs or S-RECs, the utility, person, or entity responsible for creation of the REC or S-REC must maintain verifiable records, including generator attestation,

that prove the creation date. The electric utility shall comply with the requirement of this subsection through the registration of the REC in the commission's approved REC tracking system.

(B) ~~An~~ REC may only be used once to comply with this rule. RECs or S-RECs used to comply with this rule may not also be used to satisfy any ~~similar~~ other nonfederal renewable energy standard or requirement. Electric utilities may not use RECs or S-RECs retired under a green pricing program to comply with this rule. ~~An REC or and S-RECs may be used for to~~ ~~compliance~~ comply with the RES ~~portfolio or RES solar~~ requirements of this rule for a calendar year in which it expired so long as it was valid at any time in ~~during some portion of~~ that year.

(C) ~~Customer-generators own the RECs or and S-RECs associated with their customer-generated net-metered renewable energy resources shall be owned by the customer-generator; however, (Ameren) if a customer generator receives a solar rebate, in consideration of such rebate, the customer-generators transfers to the electric utility all right, title, and interest in and to the S-RECs associated with the new or expanded solar electric system that qualifies the customer-generator for the solar rebate for a period of ten (10) years from the date the electric utility confirms the customer-generator's solar electric system is operational. The electric utility shall reduce its cost of compliance and any RESRAM by an amount equal to the value of the RECs assigned by the customer-generator, and shall provide customer-generators with information about the value of the RECs they assigned to the electric utility on an annual basis. The electric utility shall provide guidance to customer-generators on the proper formulation of claims relating to renewable energy generation, in accordance with federal regulations relating to environmental marketing claims, under 16 CFR part 260. (Divide into two separate sections, the before and after. Make sure it doesn't tie to non-rebate RECs)~~

1. All ~~standard offer~~ contracts between electric utilities and the owners of net-metered ~~renewable generation resources that are~~ entered into after the effective date of these rules shall clearly specify ~~whether RECs or S-RECs are assigned by the customer-generator to the electric utility the entity or person who shall owns the RECs or S-RECs associated with the energy generated by the net-metered generation resource, and as well as when the ownership will change, if it will~~ the terms and duration of such assignment.

2. Electric metering associated with net-metered ~~renewable~~ resources shall meet the meter accuracy and testing requirements of 4 CSR 240-10.030, Standards of Quality. ~~For solar electric systems utilizing the provisions of subsection (4)(H) of this rule, no meter accuracy or testing requirements are required.~~

(D) RECs that are generated with fuel cell energy using hydrogen derived from a renewable energy resource are eligible for compliance purposes only to the extent that the energy used to generate the hydrogen did not create RECs.

(E) If ~~an electrical generator co-fires~~ an eligible renewable energy fuel source ~~is co-fired~~ with an ineligible fuel source, only the ~~average annual~~ proportion of the electrical energy output associated with the eligible renewable energy fuel source shall be permitted to count toward compliance with the RES ~~portfolio~~ requirements. For co-fired generation of electricity, the renewable energy resources shall be determined by multiplying the electricity output by the direct proportion of the as-fired British thermal unit (BTU) content of the fuel burned that is a

source of renewable energy resources as defined in this rule to the as-fired BTU content of the total fuel burned.

(F) All electric utilities shall use a commission-designated common central third-party registry for REC accounting for RES ~~portfolio~~ requirements, unless otherwise ordered for good cause shown.

(G) RECs ~~that are~~ created by the generation of electricity by a renewable energy resource physically located in the state of Missouri shall count as one and twenty-five hundredths (1.25) RECs for purposes of compliance with this rule. This additional credit shall not be tracked in the tracking systems specified in subsection (F) of this section. This additional credit of twenty-five hundredths (0.25) shall be recognized when the electric utility files its annual compliance report in accordance with section (7) of this rule.

(H) RECs ~~created by the generation of electricity at~~ ~~that are purchased by an electric utility from~~ a facility that subsequently fails to meet the requirements for renewable energy resources ~~shall continue to beare valid if they were created before~~ ~~through~~ the date ~~theof~~ ~~facility was decertification~~ ~~decertified~~ ~~decertified~~.

(I) Electric utilities required to comply with this rule may purchase or sell RECs, either bilaterally or in any open market system, inside or outside the state, without prior commission approval.

(J) For compliance purposes, ~~electric~~ utilities shall retire RECs in sufficient quantities to meet the RES ~~portfolio~~ requirements of this rule. The RECs shall be retired during the calendar year for which compliance is ~~being achieved~~ ~~sought~~. ~~Electric Utilities~~ ~~utilities~~ may retire RECs during the months of January, February, or March ~~(through April 15)~~ following the calendar year for which compliance is ~~being achieved~~ ~~sought~~ and designate those retired RECs as counting towards the requirements of that previous calendar year. Any RECs retired in this manner shall be specifically annotated in the registry designated in accordance with subsection (F) of this section and the annual compliance report filed in accordance with section (7) of this rule. RECs retired in January, February, or March ~~(through April 15)~~ to be counted towards compliance for the previous calendar year in accordance with this subsection shall not exceed ten percent (10%) of the total RECs necessary to be retired for compliance for that calendar year.

(K) RECs may be aggregated with other RECs ~~and utilized~~ for compliance purposes. RECs shall be issued in whole increments. Any fractional RECs, aggregated or non-aggregated, remaining after certificate issuance will be carried forward to the next reporting period for the specific facility(ies). REC aggregation may be performed by electric utilities, customer-generators, or other ~~parties~~.

(L) Fractional RECs may be aggregated with other fractional RECs and utilized for compliance ~~purposes~~ ~~with this rule~~.

(4) Solar Rebate. Pursuant to section 393.1030, RSMo, and this rule, electric utilities shall include in their tariffs a provision regarding retail account holder rebates for solar electric systems. These rebates shall be available to Missouri electric utility retail account holders who install new or expanded solar electric systems, ~~comprised of photovoltaic cells or phtovoltaic panels. (Ameren) that become operational after December 31, 2009. The minimum amount of the rebate shall be two dollars (\$2.00) per installed watt up to a maximum of twenty-five (25) kW per retail account. To qualify for the solar rebate and the Standard Offer Contract of subsection (H) of this section, the customer-owned or leased solar generating equipment shall be interconnected with the electric utility's system.~~

(A) The retail account holder must be an active account holder on the electric utility's system and in good payment standing at the time an application for rebates is submitted.

(B) The solar electric system must be permanently installed on the account holder's premises. As installed, the solar electric system shall be situated in a location where a minimum of eighty-five percent (85%) of the solar resource is available to the system as verified by the customer or the customer's installer at the time of installation.

(C) The installed solar electric system must remain in place on the account holder's (customer-generator's) premises for ~~the duration of its useful life which shall be deemed to be ten (10) years, and must be designed to have a useful life typical in the industry at the time of such installation. , unless determined otherwise by the commission. The solar electric systems useful life is at least thirty (30) years. (MO Solar App) (OPC would consider if there's a warranty for 30 years)~~

(D) Solar electric systems installed by retail account holders must consist of equipment that is commercially available and factory new when installed on the original account holder's premises, and the principal system components (i.e., photovoltaic modules and inverters) shall be covered by a functional warranty from the manufacturer for a minimum period of ten (10) years, unless determined otherwise by the commission, with the exception of solar battery components. Rebuilt, used, or refurbished equipment is not eligible to receive the rebate. For any applicable retail account, rebates shall be limited to twenty-five (25) kW. Retail accounts which have been awarded rebates for an aggregate of less than twenty-five (25) kW shall qualify to apply for rebates for system expansions up to an aggregate of twenty-five (25) kW. Systems greater than twenty-five (25) kW but less than one hundred (100) kW in size shall be eligible for a solar rebate up to the twenty-five (25) kW limit of this section.

(E) The solar electric system shall meet all requirements of 4 CSR 240-20.065, Net Metering, ~~or a tariff approved by the commission for customer-owned generation.~~

(F) The electric utility may ~~inspect physically audit retail account holder~~ customer-generator owned solar electric systems for which it has paid a solar rebate pursuant to this section, at any reasonable time, with prior notice of at least three (3) business days provided to the retail account holder. Advance notice is not required if there is good reason to believe the unit poses a safety risk to the retail account holder, the premises, the utility's electrical system, or the utility's personnel.

(G) For the purpose of determining the amount of the solar rebate, the solar electric system wattage rating shall be established as the direct current wattage rating provided by the original manufacturer with respect to standard test conditions.

Karl Rábago 2/13/14, 5:12 PM I have NO COMMENT ON THIS PROVISION

(H) Standard Offer Contracts.

1. The electric utility may at ~~the utility's~~ its discretion, offer a standard contract for the purchase of S-RECs created by the customer-generator's installed solar electric system.

2. If the electric utility chooses to offer a standard offer contract, the electric utility shall file ~~and seek commission approval of~~ tariff sheets detailing the provision of the contract no later than November 1 each year for the following compliance year. Workpapers documenting the purchase prices shall be submitted with the tariff filing.

3. No customer-generator is required by this rule to sell any or all S-RECs to the electric utility; ~~however, an electric utility may condition payment of rebates on assignment of RECs and S-RECs. a condition of receiving a solar rebate from an electric utility is that all right, title and interest in and to the RECs associated with the new or expanded solar electric system that qualifies the customer-generator for the solar rebate is transferred to the electric utility paying the rebate for a period of ten (10) years from the date the electric utility confirms the customer-generator's solar electric system is operational. Move new language to it's own paragraph—KCPL.~~

(I) ~~Electric utilities that have purchased S-RECs under a one (1)-time lump sum payment in accordance with subsection (H) of this section may continue to account for purchased S-RECs even if the owner of the solar electric system ceases to operate the system or the system is decertified as a renewable energy resource. S-RECs originated under this subsection shall only be utilized by the original purchasing utility for compliance with this rule. S-RECs originated under this subsection shall not be sold or traded.~~ Do not delete and expand to cover S-RECs acquired from HB 142. —

~~(J) Electric utilities that have purchased S-RECs under a one (1)-time lump sum payment or otherwise have acquired or otherwise transferred right, title and interest in and to S-RECs associated with solar rebates annually shall estimate, using PVWatts, or actually measure the S-RECs generated from the customer-generator's operational solar electric system utilize the associated S-RECs in equal annual amounts over the lifetime of the purchase agreement.~~

(K) The electric utility shall provide ~~a the rebate offer for solar rebates within thirty (30) days of application and shall provide the (look again)any~~ solar rebate payment to qualified ~~retail account holders~~customer-generators within ~~thirty (30) calendar~~fifteen (15) calendar days of ~~verification confirming confirmation that the customer-generator's that the solar electric system is fully operational.~~ Consistent with 4 CSR 240-20.065(9), customer-generators have up to twelve months from when they apply for a solar rebate for the utility to confirm the customer-generator's solar electric system is operational. Applicants who have received a solar rebate offer shall have up to twelve (12) months from the date of receipt of a rebate offer to demonstrate full operation of their proposed solar electric system. Full operation means the purchase and installation on the retail account holder's premises of all major system components of the on-site solar electric system and production of rated electrical generation. If full operation is not achieved within six (6) months of acceptance of the Standard Offer Contract or rebate offer, in order to keep eligibility for the rebate offer and/or the Standard Offer Contract, the applicant shall file a report with the electric utility demonstrating substantial project progress and indicating continued interest in the rebate. The six (6)-month report shall include proof of purchase of the majority of the solar electric system components, partial system construction,

~~and building permit if required by the jurisdictional authority. Customers who do not demonstrate substantial progress within six (6) months of receipt of the rebate offer, or achieve full operation within one (1) year of receipt of rebate offer, will be required to reapply for any solar rebate.~~ The electric utility may create incentives and offer streamlined processes for customer who can confirm operational status in less than twelve months.

1. The solar rebates per installed watt up to a maximum of twenty-five ~~kolowatts~~ kilowatts (25 kW) per retail account are:

- A. \$2.00 per watt for systems that become operational on or before June 30, 2014;
- B. \$1.50 per watt for systems that become operational between July 1, 2014 and June 30, 2015 (inclusive);
- C. \$1.00 per watt for systems that become operational between July 1, 2015 and June 30, 2016 (inclusive);
- D. \$0.50 per watt for systems that become operational between July 1, 2016 and June 30, 2019 (inclusive);
- E. \$0.25 per watt for systems that become operational between July 1, 2019 and June 30, 2020 (inclusive); and,
- F. \$0.00 per watt for systems that become operational after June 30, 2020.

~~G.~~ An electric utility may offer solar rebates after July 1, 2020 through a Commission-approved tariff.

(L) An electric utility may, through its tariff, require submission of applications for solar rebates ~~to be submitted up to one hundred eighty-two (182)~~ ninety (90) days prior to the June 30 operational dates. The electric utility will pay the pre-June 30 rebate amount as defined in this subsection to customer-generators who comply with the submission and system operational requirements on or before June 30 of the following year. Customers that fail to meet the submission or system operational requirements on or before the June 30 date will receive the post-June 30 rebate amount if the electric utility confirms their solar electric systems are operational within one year of their application.

~~(L)~~(M) Unless the Commission orders otherwise, ~~if the electric utility solar rebate program or the payment of additional rebates for an electric utility causes the utility to meet or exceed the maximum average retail rate impact limits of section ((S)2.)~~(E) or section (5) of this rule, the solar rebates shall be paid on a first-come, first-served basis, as determined by the solar -system operational date. Any solar rebate applications that are not honored in a particular calendar year due to the requirements of this subsection shall be the first-come, first-served applications considered in the following calendar year. ~~The electric utility shall maintain a waiting list for rebate applicants in the event that applications are withdrawn or expire.~~

~~(M)~~(N) An electric utility shall maintain on its website, current information related to:

1. The electric utility's solar rebate application and review processes, including standards for determining application eligibility;
2. The solar rebate amount associated with pending applications that have been submitted, but not yet reviewed.
3. The current level of solar rebate payments; and,

4. The rebate amount associated with applications that are approved, but where the solar electric system is not yet operational. ~~(Add sentence about pool)~~

(5) Retail Rate Impact.

(A) The ~~average~~ retail rate impact, as calculated in subsection (5)(B), may not ~~exceed~~ result in an average increase in rates in any one year of more than one percent (1%) for least-cost, prudent costs ~~directly attributable to meeting RES portfolio requirements and payment of solar rebates of renewable energy resources directly attributable to RES compliance.~~ The retail rate impact shall be calculated annually on an incremental basis for each planning year that includes the addition of renewable generation directly attributable to RES compliance through procurement or development of renewable energy resources, ~~For planning purposes the~~ compliance costs associated with RES requirements shall be amortized over the useful life of the renewable energy generation for which costs are incurred, and such plans should take account of recurring costs and benefits of renewable energy generation for a period of ten years from the date that the facility is operational. retail rate impact shall be averaged over the succeeding a baseline ten (10)-year period utilizing actual and projected RES compliance cost data as set out in this section. The baseline ten-year period used in each annual retail rate impact calculation shall incorporate a maximum of five years of the most recent actual RES compliance cost data, if available, with projected RES compliance cost data used for the remainder of the ten-year baseline period. If less than five years of actual RES compliance cost data is available as of the date of the required retail rate impact calculation, the data utilized for the remainder of the ten-year baseline period for which actual data is not available shall be projected RES compliance cost data. No costs shall be included in the actual RES compliance cost amounts that were incurred prior to the effective date of the RES rule. -If, between planning filings, the utility's preferred resource plan business plan becomes materially inconsistent with the baseline, or if the utility determines that the baseline is no longer appropriate, the utility shall notify the commission within sixty (60) days of the utility's determination and shall serve notice on all parties to the most recent compliance plan filing and all parties to the most recent RESRAM proceeding. The notification shall include a description of all changes to the baseline, and the rationale for each change, ~~and shall exclude renewable energy resources owned or under contract prior to the effective date of this rule. Carry-over provision (insert subsection). Use original language with modifications as needed.~~

(B) The ~~RES-average~~ retail rate impact of the RES shall be determined by subtracting the total retail revenue requirement incorporating ~~the full costs of an~~ incremental non-renewable generation and purchased power portfolio from the total retail revenue requirement ~~including an~~ of an incremental RES-compliant generation and purchased power portfolio. -The non-renewable generation and purchased power portfolio shall be determined by adding to the utility's existing ~~non-renewable~~ generation and purchased power resource portfolio ~~in place as of the beginning of the ten-year baseline period (any economical renewable generation)~~ actual and projected-potential additional non-renewable resources sufficient to meet the utility's needs on a least-cost basis ~~for the next ten (10) years within the baseline period~~ over a ten-year period following the calculation, taking into account the full costs of such resources and of the infrastructure required to use the energy from those resources, as well as the full future cost of

environmental regulation risk including the risk of greenhouse gas regulation. The RES-compliant portfolio shall be determined by adding to the utility's existing generation and purchased power resource portfolio in place as of the beginning of the ten-year baseline assessment period an amount of actual and projected, least-cost RES-compliant renewable resources and rebate program expenses sufficient to achieve the standards set forth in section (2) of this rule and an amount of actual and projected least-cost non-renewable resources, the combination of which is sufficient to meet the utility's needs for the next ten (10) years within the baseline period, taking into account the full avoided costs associated with renewable energy generation of any kind. The projected future cost of RES requirements compliance should be reduced by the potential value of avoided costs associated with compliance with a federal clean energy or renewable energy standard. —Direct least-cost administrative and program costs associated with meeting REQ requirements shall be included as RES requirements compliance costs. Assumptions regarding projected—These —renewable energy resource additions will utilize the most recent electric utility resource planning analysis and other credible evidence of the costs and benefits of renewable energy generation, including full avoided costs. These comparisons will be conducted utilizing the actual and —projections—projected of the incremental revenue requirement for new renewable energy resources, less the all costs avoided avoided costs due to the addition of renewable resources over the full life of those resources, including avoided cost of fuel not purchased; avoided financing and administrative costs; the avoided cost of transmission and distribution infrastructure, operations, and repairs; avoided fuel price volatility risk; and other known and measurable avoided costs for reliability and a few others including but not limited to for non-renewable energy resources due to the addition of renewable energy resources in lieu of continuing to generate or purchase electricity from entirely non-renewable sources. The calculation for determining the added cost for environmental regulatory risk for the non-renewable portfolio shall address the various risk factors associated with potential additional environmental regulation of greenhouse gases, water use and emissions, non-carbon air emissions, surface and subsurface land impacts, and other downstream environmental impacts of the generation, transmission, and distribution of electricity. In addition, the electric utility must assess the potential risks of environmental regulation of natural gas and coal development and extraction upstream of the use of such fuels for generation of electricity. In assessing such risks, the electric utility shall consider compliance costs, control costs, impacts on the electric utility's financial ratings, and other risk factors associated with the need to meet potential environmental regulations of all kinds. Court of Appeals double counting. A comparison of renewable and non-renewable will capture..... include a list of all elements and calculations. Transmission and distribution that didn't need to be built. Capitol and O&M cost benefits. In addition, the projected impact on revenue requirements by non-renewable energy resources shall be increased by the expected value of greenhouse gas emissions compliance costs, assuming that such costs are made at the expected value of the cost per ton of greenhouse gas emissions allowances, cost per ton of a greenhouse gas emissions tax (e.g., a carbon tax), or the cost per ton of greenhouse gas emissions reductions for any greenhouse gas emission reduction technology that is applicable to the utility's generation portfolio, whichever is lower. Needs to remain. Calculations of the expected value of costs associated with greenhouse gas emissions shall be derived by applying the probability of the occurrence of future greenhouse gas regulations to expected level(s) of

costs per ton associated with those regulations over the next ten (10) yearsover the period for which non-renewable resource additions are projected within the RES retail rate impact calculation. The evaluation of environmental regulatory risk shall take into account the full likely operating life of the electricity generation resources included in the non-renewable portfolio. Any variables utilized in the modeling shall be consistent withbased on values established in prior rate proceedings, electric utility resource planning filings, or RES compliance plans, unless specific justification is provided for deviationsand updated annually for improvements in characterizing cost and risk information. The comparison of the rate impact of renewable and non-renewable energy resources shall be conducted only when the electric utility proposes to add incremental renewable energy resource generation directly attributable to meeting Missouri RES compliance through the procurement or development of renewable energy resources. Resources prior to rule in both portfolios. After rule and not RES compliance in both portfolios. Direct vs indirect costs? Net costs? Costs of resources directly attributable to? See definitions.

(C) In addition to other RES requirements established in this rule, until June 30, 2020, if the maximum average retail rate increase charged to customers, and ignoring the costs associated with an electric utility's investment in solar-related projects, would be less than or equal to one percent (1%) in any one year, then the electric utility shall pay additional solar rebates. In such a year, additional solar rebates shall be paid up to the amount that would produce a rate increase charged to customers in an amount equal to the difference of one percent (1%) and retail rate increase calculated wwhen ignoring the electric utility's solar-related investments. The amount of such additional rebate payments may be included in electric utility rates. Notwithstanding any provision to the contrary in this rule, even if the payment of additional solar rebates will produce a maximum average retail rate increase of greater than one percent when an electric utility's solar-related investments are included in the calculation, the additional solar rebate costs shall be included in the prudently incurred costs to be recovered as RES requirement costs. Utility investment in solar-related projects shall include investments associated with initiating, owning, or operating such projects, and shall not include rebate or net metering program costs. Solar Rebates-rebate payments and additional rebate payments -made during any calendar year in accordance with section (4) of this rule shall be amortized over a solar electric system 30-year life and only the amortized annual rebate cost shall be included in the cost of generation from renewable energy resourcescompliance with RES requirements. -In any calendar year retail rate impact calculation.-

(D) For purposes of the determination in accordance with subsections (B) and (C) of this section, if the ~~revenue requirement~~ average retail rate increase in any year caused by RES requirements ~~including the RES-compliant resource mix, averaged over the succeeding ten (10)-year baseline period,~~ exceeds 1%, the revenue requirement that includes the non-renewable resource mix by more than one percent (1%), the utility shall adjust downward the proportion of renewable resources so that the average ~~annual revenue requirement differential~~ retail rate increase in that year does not exceed one percent (1%). In making such adjustments, the electric utility shall follow the priority order established in section (2.)(F) of this rule. ~~When adjusting downward the proportion of renewable energy resources, the utility shall give first priority to reducing or eliminating the amount of RECs not associated with electricity delivered to Missouri (how to define) Generation resources directly connected to the grid that is operated by the RTO that delivers (sold) electricity to the utilities customers. In making this adjustment, the solar requirement shall be in accordance with subsection (2)(F) of this rule. Prudently incurred costs to comply with the RES portfolio standard requirements, and passing this rate impact test, may be recovered in accordance with section (6) of this rule or through a rate proceeding outside or in a general rate case. HB 142 section should be inserted. 393.1030.2.1-~~

(E) Costs or benefits attributed to compliance with a federal renewable energy standard or portfolio requirement shall be considered as part of compliance with the Missouri RES if they would otherwise qualify under the Missouri RES without regard to the federal requirements.*
Reserved

(F) If the electric utility determines the maximum average retail rate increase charged to customers as a result of RES compliance as calculated in accordance with subsection (B) of this section, and will exceed the higher of 1% or the amount allowed after paying additional rebates under subsection (C) of this section in any year, the electric utility should reduce RES requirements costs in accordance with the priority order established in section (2.)(F) of this rule. Should the electric utility reach the point where it believes it must suspend paying rebates, it must file an application with the commission seeking to cease such rebate payments provided for in subsection (F) will be reached in any calendar year, the electric utility may cease paying rebates to the extent necessary to avoid exceeding the maximum average retail rate increase with the commission, at least sixty days in advance, to suspend the solar rebate provisions in its tariff for the remainder of the calendar year. Such –

1. The filing with the commission to suspend the electric corporation's solar rebate tariff provision shall include:

A. Its 1. The electric utility's calculations reflecting that the maximum average retail rate increase will be reached, with supporting documentation;

B. 2. A proposed procedural schedule; and

3. C. A description of the process that it will use to cease or conclude the solar rebate payments to solar customers if the commission suspends its solar rebate tariff provision.

3. The commission shall rule on the a properly formatted and materially complete suspension filing within sixty days of the date it is filed. If the commission determines the maximum average retail rate increase will be reached the conditions regarding average retail rate charges will be met, the commission shall authorize the electric utility to suspend solar rebate payments. –

4.— The electric utility shall continue to process and pay applicable solar rebates ~~until a final~~during the period between the properly submitted filing and the commission ruling. The electric utility shall make a compliance filing showing payments made during commission consideration of the application to cease or suspend payments and may seek cost recovery for those expenses.—

A. ~~If continuing to pay solar rebates causes the electric utility to exceed the maximum average retail rate increase, the excess payments shall not be considered to have been imprudently incurred for that reason.~~

(6) Cost Recovery and Pass-through of Benefits. An electric utility outside or in a general rate proceeding may file an application and rate schedules with the commission to establish, continue, modify, or discontinue a Renewable Energy Standard Rate Adjustment Mechanism (RESRAM) that shall allow for the adjustment of its rates and charges to provide for recovery of prudently incurred costs or pass-through of benefits received as a result of compliance with the RES requirements; provided that the ~~increased RES compliance retail rate annual average retail rate charged to customers impact on average retail customer rates~~ does not exceed one percent (1%) ~~in any one year. of the Commission-determined annual revenue requirement of the electric utility in its most recent general rate proceeding as determined by section (5) of this rule.~~ In all RESRAM applications, the increase in electric utility revenue requirements shall be calculated as the amount of additional RES compliance costs incurred since the electric utility's last RESRAM application or general rate proceeding, net of any reduction in RES compliance costs included in the electric utility's prior RESRAM application or general rate case, and any new RES compliance benefits. ~~(1% needs to be consistent with Section 5) Annual impact rate does not exceed 1% as defined in Section 5.~~

(A) For all RESRAM filings except the initial filings by the electric utility ~~If the actual increase in utility revenue requirements is less than two percent (2%), subsection (B) of this section shall be utilized. If the actual increase in utility revenue requirements is equal to or greater than two percent (2%), subsection (C) of this section shall be utilized.~~ For the initial filing by the electric utility in accordance with this section, subsection (CB) of this section shall be utilized as well, except that the staff, and individuals or entities granted intervention by the commission, may file a report or comments no later than one hundred twenty (120) days after the electric utility files its application and rate schedules to establish an RESRAM.

1. The pass-through of benefits has no single-year cap or limit.

2. Any party in a rate proceeding in which an RESRAM is in effect or proposed may seek to continue as is, modify, or oppose the RESRAM. The commission shall approve, modify, or reject such applications and rate schedules to establish an RESRAM only after providing the opportunity for an evidentiary hearing.

3. If the electric utility incurs approved costs in complying with the RES requirements that exceed the amount allowed in any one year, ~~one percent (1%) annual rate limit determined in accordance with section (56) of this rule for any year,~~ those excess costs may be carried forward to future years for cost recovery under this rule. Any costs carried forward shall have a carrying cost applied to them monthly equal to the electric utility's cost of short-term borrowing rate. These carried forward costs plus accrued carrying costs plus additional annual costs remain subject to the ~~one percent (1%) annual rate limit on increased average retail rate charged to customer~~ for any subsequent years. In any calendar year that costs from a previous compliance year are carried forward, the carried forward costs will be considered for cost recovery prior to any new costs for the current calendar year.

4. For ownership investments in eligible renewable energy technologies in an RESRAM application, the electric utility shall be entitled to a rate of return equal to the electric utility's most recent authorized rate of return on rate base. Recovery of the rate of return for investment in renewable energy technologies in an RESRAM application is subject to the ~~one percent (1%) annaul limit on inceased average retail rate charges to customers specified in section (§65) and (6) of this rule.~~ Rate of return on utility investments in solar-related projects shall be ignored with other solar-related utility investments for purposes of calculating increased average retail rate charges to customers, as set forth in section (5) of this rule.

5. Upon the filing of proposed rate schedules with the commission seeking to recover costs or pass-through benefits of RES compliance, the commission will provide general notice of the filing.

6. The electric utility shall provide the following notices to its customers, with such notices to be approved by the commission in accordance with paragraph 7. of this subsection before the notices are sent to customers:

A. An initial, one (1)-time notice to all potentially affected customers, such notice being sent to customers no later than when customers will receive their first bill that includes an RESRAM, explaining the utility's RES compliance and identifying the statutory authority under which it is implementing an RESRAM;

B. An annual notice to affected customers each year that an RESRAM is in effect explaining the continuation of its RESRAM and RES compliance; and

C. An RESRAM line item on all customer bills, which informs the customers of the presence and amount of the RESRAM.

7. Along with the electric utility's filing of proposed rate schedules to establish an RESRAM, the utility shall file the following items with the commission for approval or rejection, and the Office of the Public Counsel (OPC) may, within ten (10) days of the utility's filing of this information, submit comments regarding these notices to the commission:

A. An example of the notice required by subparagraph (A)6.A. of this section;

B. An example of the notice required by subparagraph (A)6.B. of this section; and

C. An example customer bill showing how the RESRAM will be described on affected customers' bills in accordance with subparagraph (A)6.C. of this section.

8. An electric utility may effectuate a change in RESRAM no more often than one (1) time during any calendar year, not including changes as a result of paragraph 11. of this subsection.

9. Submission of Surveillance Monitoring Reports. Each electric utility with an approved RESRAM shall submit to staff, OPC, and parties approved by the commission a Surveillance Monitoring Report. The form of the Surveillance Monitoring Report is included herein.

A. The Surveillance Monitoring Report shall be submitted within fifteen (15) days of the electric utility's next scheduled United States Securities and Exchange Commission (SEC) 10-Q or 10-K filing with the initial submission within fifteen (15) days of the electric utility's next scheduled SEC 10-Q or 10-K filing following the effective date of the commission order establishing the RESRAM.

B. If the electric utility also has an approved fuel rate adjustment mechanism or environmental cost recovery mechanism (ECRM), the electric utility shall submit a single Surveillance Monitoring Report for the RESRAM, ECRM, the fuel rate adjustment mechanism, or any combination of the three (3). The electric utility shall designate on the single Surveillance Monitoring Report whether the submission is for RESRAM, ECRM, fuel rate adjustment mechanism, or any combination of the three (3).

C. Upon a finding that a utility has knowingly or recklessly provided materially false or inaccurate information to the commission regarding the surveillance data prescribed in this paragraph, after notice and an opportunity for a hearing, the commission may suspend an RESRAM or order other appropriate remedies as provided by law.

10. The RESRAM will be calculated as a percentage of the customer's energy charge for the applicable billing period.

11. Commission approval of proposed rate schedules, to establish or modify an RESRAM, shall in no way be binding upon the commission in determining the ratemaking treatment to be applied to RES compliance costs during a subsequent general rate proceeding when the commission may undertake to review the prudence of such costs. ~~In the event~~If the commission disallows, during a subsequent general rate proceeding, recovery of RES compliance costs previously in ~~a~~ RESRAM, or pass-through of benefits previously in ~~a~~ RESRAM, the electric utility shall offset its RESRAM in the future as necessary to recognize and account for any such costs or benefits. The offset amount shall include a calculation of interest at the electric utility's short-term borrowing rate as calculated in subparagraph (A)26.A. of this section. The RESRAM offset will be designed to reconcile such disallowed costs or benefits within the six (6)-month period immediately subsequent to any commission order regarding such disallowance.

12. At the end of each twelve (12)-month period that ~~a~~ RESRAM is in effect, the electric utility shall reconcile the differences between the revenues resulting from the RESRAM and the pretax revenues as found by the commission for that period and shall submit the reconciliation to the commission with its next sequential proposed rate schedules for RESRAM continuation or modification.

13. An electric utility that has implemented ~~an~~ RESRAM shall file revised RESRAM rate schedules to reset the RESRAM to zero (0) when new base rates and charges become effective following a commission report and order establishing customer rates in a general rate proceeding that incorporates RES compliance costs or benefits previously reflected in ~~an~~ RESRAM in the utility's base rates. If an over- or under-recovery of RESRAM revenues or over- or under-pass-through of RESRAM benefits exists after the RESRAM has been reset to zero (0), that amount of over- or under-recovery, or over- or under-pass-through, shall be tracked in an account and considered in the next RESRAM filing of the electric utility.

14. Upon the inclusion of RES compliance cost or benefit pass-through previously reflected in ~~an~~ RESRAM into an electric utility's base rates, the ~~electric~~ utility shall immediately thereafter reconcile any previously unreconciled RESRAM revenues or RESRAM benefits and track them as necessary to ensure that revenues or pass-through benefits resulting from the RESRAM match, as closely as possible, the appropriate pretax revenues or pass-through benefits as found by the commission for that period.

15. In addition to the information required by subsection (B) or (C) of this section, the electric utility shall also provide the following information when it files proposed rate schedules with the commission seeking to establish, modify, or reconcile ~~an~~ RESRAM:

A. A description of all information posted on the utility's website regarding the RESRAM; and

B. A description of all instructions provided to personnel at the utility's call center regarding how those personnel should respond to calls pertaining to the RESRAM.

16. RES compliance costs shall ~~only be recovered through an~~ RESRAM or as part of a general rate proceeding and shall not be considered for cost recovery through an environmental cost recovery mechanism, ~~or~~ fuel adjustment clause or interim energy charge.

17. Pre-existing adjustment mechanisms, tariffs, and regulatory plans. The provisions of this rule shall not affect—

A. Any adjustment mechanism, rate schedule, tariff, incentive plan, or other ratemaking mechanism that was approved by the commission and in effect prior to ~~the effective date of this rule~~September 30, 2010; and

B. Any experimental regulatory plan that was approved by the commission and in effect prior to ~~the effective date of this rule~~September 30, 2010.

18. Each electric utility with an RESRAM shall submit, with an affidavit attesting to the veracity of the information, the following information on a monthly basis to the manager of the auditing ~~department unit~~ of the commission and ~~the to~~ OPC. The information ~~may shall~~ (make consistent with E) be submitted to the manager of the auditing department through the electronic filing and information system (EFIS). The following information shall be aggregated by month and supplied no later than sixty (60) days after the end of each month when the RESRAM is in effect. The first submission shall be made within sixty (60) days after the end of the first complete month after the RESRAM goes into effect. It shall contain, at a minimum—

A. The revenues billed pursuant to the RESRAM by rate class and voltage level, as applicable;

B. The revenues billed through the electric utility's base rate allowance by rate class and voltage level;

sundes Jan 10, 4:27 PM Added Text	

C. All significant factors that have affected the level of RESRAM revenues along with workpapers documenting these significant factors;

D. The difference, by rate class and voltage level, as applicable, between the total billed RESRAM revenues and the projected RESRAM revenues;

E. Any additional information ~~ordered by~~ the commission ~~to orders~~ be provided; and

F. To the extent any of the requested information outlined above is provided in response to another section, the information only needs to be provided once.

19. Information required to be filed with the commission or submitted to the manager of the auditing ~~department unit~~ of the commission and to OPC in this section shall also be, in the same format, served on or submitted to any party to the related rate proceeding in which the RESRAM was approved by the commission, periodic adjustment proceeding, prudence review, or general rate case to modify, continue, or discontinue the same RESRAM, pursuant to the procedures in 4 CSR 240-2.135 for handling confidential information, including any commission order issued thereunder.

20. A person or entity granted intervention in a rate proceeding in which an RESRAM is approved by the commission shall be a party to any subsequent related periodic adjustment proceeding or prudence review, without the necessity of applying to the commission for intervention: ~~and the Commission shall issue an order identifying them.~~ In any subsequent general rate proceeding, such person or entity must seek and be granted status as an intervenor to be a party to that case. Affidavits, testimony, information, reports, and workpapers to be filed or submitted in connection with a subsequent related periodic adjustment proceeding, prudence review, or general rate case to modify, continue, or discontinue the same RESRAM shall be served on or submitted to all parties from the prior related rate proceeding and on all parties from any subsequent related periodic adjustment proceeding, prudence review, or general rate case to modify, continue, or discontinue the same RESRAM, concurrently with filing the same with the commission or submitting the same to the manager of the auditing ~~department unit~~ of the commission and OPC, pursuant to the procedures in 4 CSR 240-2.135 for handling confidential information, including any commission order issued thereunder.

21. A person or entity not a party to the rate proceeding in which an RESRAM is approved by the commission may timely apply to the commission for intervention, pursuant to sections 4 CSR 240-2.075(2) through (4) of the commission's rule on intervention, respecting any related subsequent periodic adjustment proceeding, or prudence review, or, pursuant to sections 4 CSR 240-2.075(1) through (5), respecting any subsequent general rate case to modify, continue, or discontinue the same RESRAM. If no party to a subsequent periodic adjustment proceeding or prudence review objects within ten (10) days of the filing of an application for intervention, the applicant shall be deemed as having been granted intervention without a specific commission order granting intervention, unless, within the above-referenced ten (10)-day period, the commission denies the application for intervention on its own motion. If an objection to the application for intervention is filed on or before the end of the above-referenced ten (10)-day period, the commission shall rule on the application and the objection within ten (10) days of the filing of the objection.

sundes Jan 10, 4:27 PM Deleted: department	
sundes Jan 10, 4:27 PM Added Text	

22. The results of discovery from a rate proceeding where the commission may approve, modify, reject, continue, or discontinue an RESRAM, or from any subsequent periodic adjustment proceeding or prudence review relating to the same RESRAM, may be used without a party resubmitting the same discovery requests (data requests, interrogatories, requests for production, requests for admission, or depositions) in the subsequent proceeding to parties that produced the discovery in the prior proceeding, subject to a ruling by the commission concerning any evidentiary objection made in the subsequent proceeding.

23. If a party which submitted data requests relating to a proposed RESRAM in the rate proceeding where the RESRAM was established or in any subsequent related periodic adjustment proceeding or prudence review wants the responding party to whom the prior data requests were submitted to supplement or update that responding party's prior responses for possible use in a subsequent related periodic adjustment proceeding, prudence review, or general rate case to modify, continue, or discontinue the same RESRAM, the party which previously submitted the data requests shall submit an additional data request to the responding party to whom the data requests were previously submitted which clearly identifies the particular data requests to be supplemented or updated and the particular period to be covered by the updated response. A responding party to a request to supplement or update shall supplement or update a data request response from a related rate proceeding where an RESRAM was established, reviewed for prudence, modified, continued, or discontinued, if the responding party has learned or subsequently learns that the data request response is in some material respect incomplete or incorrect.

24. Each rate proceeding where commission establishment, continuation, modification, or discontinuation of an RESRAM is the sole issue shall comprise a separate case. The same procedures for handling confidential information shall apply, pursuant to 4 CSR 240-2.135, as in the immediately preceding RESRAM case for the particular electric utility, unless otherwise directed by the commission on its own motion or as requested by a party and directed by the commission.

25. In addressing certain discovery matters and the provision of certain information by electric utilities, this rule is not intended to restrict the discovery rights of any party.

26. Prudence reviews respecting an RESRAM. A prudence review of the costs subject to the RESRAM shall be conducted no less frequently than at intervals established in the rate proceeding in which the RESRAM is established.

A. All amounts ordered refunded by the commission shall include interest at the electric utility's short-term borrowing rate. The interest shall be calculated on a monthly basis for each month the RESRAM rate is in effect, equal to the weighted average interest rate paid by the electric utility on short-term debt for that calendar month. This rate shall then be applied to a simple average of the same month's beginning and ending cumulative RESRAM over-collection or under-collection balance. Each month's accumulated interest shall be included in the RESRAM over-collection or under-collection balances on an ongoing basis.

B. The staff shall submit a recommendation regarding its examination and analysis to the commission not later than one hundred eighty (180) days after the staff initiates its prudence audit. The staff shall file notice within ten (10) days of starting its prudence audit. The commission shall issue an order not later than two hundred ten (210) days after the staff

Deleted: n

commences its prudence audit if no party to the proceeding in which the prudence audit is occurring files, within one hundred ninety (190) days of the staff's commencement of its prudence audit, a request for a hearing.

(I) If the staff, OPC, or other party auditing the RESRAM believes that insufficient information has been supplied to make a recommendation regarding the prudence of the electric utility's RESRAM, it may utilize discovery to obtain the information it seeks. If the electric utility does not timely supply the information, the party asserting the failure to provide the required information shall timely file a motion to compel with the commission. While the commission is considering the motion to compel the processing time line shall be suspended. If the commission then issues an order requiring the information to be provided, the time necessary for the information to be provided shall further extend the processing time line. For good cause shown the commission may further suspend this time line.

(II) If the time line is extended due to an electric utility's failure to timely provide sufficient responses to discovery and a refund is due to the customers, the electric utility shall refund all imprudently incurred costs plus interest at the electric utility's short-term borrowing rate. The interest shall be calculated on a monthly basis in the same manner as described in subparagraph (A)26.A. of this section.

(B) RESRAM ~~filing requirements for less than two percent (2%) actual increase in utility revenue requirements.~~

1. When an electric utility files proposed rate schedules pursuant to sections 393.1020 and 393.1030, RSMo, and the provisions of this rule, the commission staff shall conduct an examination of the proposed RESRAM.

2. The staff of the commission shall examine and analyze the information submitted by the electric utility to determine if the proposed RESRAM is in accordance with provisions of this rule and the statutes governing the RES and shall submit a report regarding its examination to the commission not later than sixty (60) days after the electric utility files its proposed rate schedules.

3. The commission may hold a hearing on the proposed rate schedules and shall issue an order to become effective not later than one hundred twenty (120) days after the electric utility files the proposed rate schedules.

4. If the commission finds that the proposed rate schedules or substitute filed rate schedules comply with the applicable requirements, the commission shall enter an order authorizing the electric utility to utilize said RESRAM rate schedules with an appropriate effective date, as determined by the commission.

5. At the time an electric utility files proposed rate schedules with the commission seeking to establish, modify, or reconcile ~~an~~ RESRAM, it shall submit its supporting documentation regarding the calculation of the proposed RESRAM and shall serve ~~the Office of the Public Counsel~~ OPC with a copy of its proposed rate schedules and its supporting documentation. The utility's supporting documentation shall include workpapers showing the calculation of the proposed RESRAM and shall include, at a minimum, the following information:

A. A complete explanation of all of the costs, both capital and expense, incurred for RES compliance that the electric utility is proposing be included in rates and the specific account used for each item;

B. The state, federal, and local income or excise tax rates used in calculating the proposed RESRAM, and an explanation of the source of and the basis for using those tax rates;

C. The regulatory capital structure used in calculating the proposed RESRAM, and an explanation of the source of and the basis for using the capital structure;

D. The cost rates for debt and preferred stock used in calculating the proposed RESRAM, and an explanation of the source of and the basis for using those rates;

E. The cost of common equity used in calculating the proposed RESRAM, and an explanation of the source of and the basis for that equity cost;

F. The depreciation rates used in calculating the proposed RESRAM, and an explanation of the source of and the basis for using those depreciation rates;

G. The rate base used in calculating the proposed RESRAM, including an updated depreciation reserve total incorporating the impact of all RES plant investments previously reflected in general rate proceedings or RESRAM application proceedings initiated following enactment of the RES rules;

H. The applicable customer class billing methodology used in calculating the proposed RESRAM, and an explanation of the source of and basis for using that methodology;

I. An explanation of how the proposed RESRAM is allocated among affected customer classes, if applicable; and

J. For purchase of electrical energy from eligible renewable energy resources bundled with the associated RECs or for the purchase of unbundled RECs, the cost of the purchases, and an explanation of the source of the energy or RECs and the basis for making that specific purchase, including an explanation of the request for proposal (RFP) process, or the reason(s) for not using an RFP process, used to establish which entity provided the energy or RECs associated with the RESRAM.

~~(C) RESRAM for equal to or greater than two percent (2%) actual increase in utility revenue requirements.—~~

~~1. If an electric utility files an application and rate schedules to establish, continue, modify, or discontinue an RESRAM outside of a general rate proceeding, the staff shall examine and analyze the information filed in accordance with this section and additional information obtained through discovery, if any, to determine if the proposed RESRAM is in accordance with provisions of this rule and the statutes governing the RES. The commission shall establish a procedural schedule providing for an evidentiary hearing and commission report and order regarding the electric utility's filing. The staff shall submit a report regarding its examination and analysis to the commission not later than seventy-five (75) days after the electric utility files its application and rate schedules to establish an RESRAM. An individual or entity granted intervention by the commission may file comments not later than seventy-five (75) days after the electric utility files its application and rate schedules to establish an RESRAM. The electric utility shall have no less than fifteen (15) days from the filing of the staff's report and any intervenor's comments to file a reply. The commission shall have no less than thirty (30) days from the filing of the electric utility's reply to hold a hearing and issue a report and order approving the electric utility's rate schedules subject to or not subject to conditions, rejecting the electric utility's rate schedules, or rejecting the electric utility's rate schedules and authorizing the electric utility to file substitute rate schedules subject to or not subject to conditions.—~~

~~2. When an electric utility files an application and rate schedules as described in this subsection, the electric utility shall file at the same time supporting direct testimony and the following supporting information as part of, or in addition to, its supporting direct testimony:—~~

~~A. Proposed RESRAM rate schedules;—~~

~~B. A general description of the design and intended operation of the proposed RESRAM;—~~

~~C. A complete description of how the proposed RESRAM is compatible with the requirement for prudence reviews;—~~

~~D. A complete explanation of all the costs that shall be considered for recovery under the proposed RESRAM and the specific account used for each cost item on the electric utility's books and records;—~~

~~E. A complete explanation of all of the costs, both capital and expense, incurred for RES compliance that the electric utility is proposing be included in rates and the specific account used for each cost item on the electric utility's books and records. —~~

~~F. A complete explanation of all of the costs, both capital and expense, incurred for RES compliance that the electric utility is proposing be included in base rates and the specific account used for each cost item on the electric utility's books and records;—~~

~~G. A complete explanation of all the revenues that shall be considered in the determination of the amount eligible for recovery under the proposed RESRAM and the specific account where each such revenue item is recorded on the electric utility's books and records;—~~

~~H. A complete explanation of any feature designed into the proposed RESRAM or any existing electric utility policy, procedure, or practice that can be relied upon to ensure that only prudent costs shall be eligible for recovery under the proposed RESRAM;—~~

~~I. For each of the major categories of costs, that the electric utility seeks to recover through its proposed RESRAM, a complete explanation of the specific rate class cost allocations and rate design used to calculate the proposed RES compliance revenue requirement and any subsequent RESRAM rate adjustments during the term of the proposed RESRAM; and—~~

~~J. Any additional information that may have been ordered by the commission in a prior rate proceeding to be provided. —~~

~~3. When an electric utility files rate schedules as described in this subsection, and serves upon parties as provided in paragraph (A)20. of this section, the rate schedules must be accompanied by supporting direct testimony, and at least the following supporting information:—~~

~~A. The following information shall be included with the filing:—~~

~~(I) For the period from which historical costs are used to adjust the RESRAM rate:—~~

~~(a) REC costs differentiated by purchases, swaps, and loans;—~~

~~(b) Net revenues from REC sales, swaps, and loans;—~~

~~(c) Extraordinary costs not to be passed through, if any, due to such costs being an insured loss, or subject to reduction due to litigation, or for any other reason;—~~

~~(d) Base rate component of RES compliance costs and revenues;—~~

~~(e) Identification of capital projects placed in service that were not anticipated in the previous general rate proceeding; and—~~

~~(f) Any additional requirements ordered by the commission in the prior rate proceeding;—~~

~~(II) The levels of RES compliance capital costs and expenses in the base rate revenue requirement from the prior general rate proceeding;—~~

~~(III) The levels of RES compliance capital cost in the base rate revenue requirement from the prior general rate proceeding as adjusted for the proposed date of the periodic adjustment;—~~

~~(IV) The capital structure as determined in the prior rate proceeding;—~~

~~(V) The cost rates for the electric utility's debt and preferred stock as determined in the prior rate proceeding;—~~

~~(VI) The electric utility's cost of common equity as determined in the prior rate proceeding;—~~

~~(VII) The rate base used in calculating the proposed RESRAM, including an updated depreciation reserve total incorporating the impact of all RES plant investments previously reflected in general rate proceedings or RESRAM application proceedings initiated following enactment of the RES rules; and—~~

~~(VIII) Calculation of the proposed RESRAM collection rates; and—~~

~~B. Work papers supporting all items in subparagraph (C)3.A. of this section shall be submitted to the manager of the auditing department and served upon parties as provided in paragraph (A)20. in this section. The work papers may be submitted to the manager of the auditing department through EFIS. (leave in the different percentages)–~~

~~(DC)~~ Alternatively, an electric utility may recover RES compliance costs without use of the RESRAM procedure through rates established in a general rate proceeding. In the interim between general rate proceedings the electric utility may defer the costs in a regulatory asset account, and monthly calculate a carrying charge on the balance in that regulatory asset account equal to its short-term cost of borrowing. All questions pertaining to rate recovery of the RES compliance costs in a subsequent general rate proceeding will be reserved to that proceeding, including the prudence of the costs for which rate recovery is sought and the period of time over which any costs allowed rate recovery will be amortized. Any rate recovery granted to RES compliance costs under this alternative approach will be fully subject to the annual retail rate impact requirements limit set forth in section (56) of this rule.

(7) Annual RES Compliance Report and RES Compliance Plan. Each electric utility shall file an RES compliance report no later than April 15 to report on the status of the utility's compliance with the renewable energy standard RES and the electric utility's compliance plan as described in this section for the most recently completed calendar year. The initial annual RES compliance report shall be filed by April 15, 2012, for the purpose of providing the necessary information for the first RES compliance year (2011). Each electric utility shall file an annual RES compliance plan with the commission. The plan shall be filed no later than April 15 of each year.

(A) Annual RES Compliance Report.

1. The annual RES compliance report shall provide the following information for the most recently completed calendar year for the electric utility:

A. Total retail electric sales for the utility, as defined by this rule;

B. Total jurisdictional revenue from the total retail electric sales to Missouri customers as measured at the customers' meters;

C. Total retail electric sales supplied by renewable energy resources, as defined by section 393.1025(5), RSMo, including the source of the energy;

D. The number of RECs and S-RECs created by electrical energy produced by renewable energy resources owned by the electric utility. For the electrical energy produced by these utility-owned renewable energy resources, the value of the energy created. For the RECs and S-RECs, a calculated REC or S-REC value for each source and each category of REC;

E. The number of RECs acquired, sold, transferred, or retired by the utility during the calendar year;

F. The source of all RECs acquired during the calendar year;

G. The identification, by source and serial number, of any RECs that have been carried forward to a future calendar year;

H. An explanation of how any gains or losses from sale or purchase of RECs for the calendar year have been accounted for in any rate adjustment mechanism that was in effect for the electric utility;

I. For acquisition of electrical energy and/or RECs from a renewable energy resource that is not owned by the electric utility, except for systems owned by customer-generators, the following information for each resource that has a rated capacity of ten (10) kW or greater:

(I) Facility Name, addresslocation (city, state), and owner of the facility;

(II) An affidavit from the owner of the facility certifying tThat the energy was derived from an eligible renewable energy technology and that the renewable attributes of the energy have not been used to meet the requirements of any other local or state mandate;

(III) The renewable energy technology utilized at the facility;

(IV) The dates and amounts of all payments from the electric utility to the owner of the facility; and

(V) All meter readings used for calculation of the payments referenced in part (IV) of this paragraph;

J. For acquisition of electrical energy and/or RECs from a customer generator,(if requested or can be seen in audit)

(I) Location (zip code);

(II) Name of aggregated subaccount in which RECs are being tracked in;

(III) Interconnection date;

(IV) Annual estimated or measured generation;

(V) The start and end date of any estimated or measured RECs being acquired.

JK. The total number of customers that applied and received a solar rebate in accordance with section (4) of this rule;

KL. The total number of customers that were denied a solar rebate and the reason(s) for each denial;

LM. The amount of funds expended by the electric utility for solar rebates, including the price and terms of future S-REC contracts associated with the facilities that qualified for the solar rebates;

MN. An affidavit documenting the electric utility's compliance with the RES compliance plan as described in this section during the calendar year. This affidavit will include a description of the amount of over or under compliance costs that shall be adjusted in the electric utility's next compliance plan; and

~~NO~~. If compliance was not achieved, an explanation why the electric utility failed to meet the RES.

2. On the same date that the electric utility files its annual RES compliance report, the utility shall post an electronic copy of its annual RES compliance report, excluding highly confidential or proprietary material, on its website to facilitate public access and review.

3. On the same date that the electric utility files its annual RES compliance report, the utility shall provide the commission with separate electronic copies of its annual RES compliance report including and excluding highly confidential and proprietary material. The commission shall place the redacted electronic copies of each electric utility's annual RES compliance reports on the commission's website in order to facilitate public viewing, as appropriate.

(B) RES Compliance Plan.

1. The plan shall cover the current year and the immediately following two (2) calendar years ~~number of years in the baseline time period, all analysis in the baseline time period~~. The RES compliance plan shall include, at a minimum—~~regardless of anything else in the rule~~.

A. A specific description of the electric utility's planned actions to comply with the RES;

B. A list of executed contracts to purchase RECs (whether or not bundled with energy), including type of renewable energy resource, expected amount of energy to be delivered, and contract duration and terms;

C. The projected total retail electric sales for each year;

D. Any differences, as a result of RES compliance, from the utility's preferred resource plan as described in the most recent electric utility resource plan filed with the commission in accordance with 4 CSR 240-22, Electric Utility Resource Planning;

E. A detailed analysis providing information necessary to verify that the RES compliance plan is the least cost, prudent methodology to achieve compliance with the RES;

F. A detailed explanation of the calculation of the RES retail impact limit calculated in accordance with section (5) of this rule. This explanation should include the pertinent information for the planning interval which is included in the RES compliance plan; and

G. Verification that the utility has met the requirements for not causing undue adverse air, water, or land use impacts pursuant to subsection 393.1030.4. RSMo, and the regulations of the ~~Department of Natural Resources~~Division.

(C) Upon receipt of the electric utility's annual RES compliance report and RES compliance plan, the commission shall establish a docket for the purpose of receiving the report and plan. The commission shall issue a general notice of the filing.

(D) The staff of the commission shall examine each electric utility's annual RES compliance report and RES compliance plan and file a report of its review with the commission within forty-five (45) days of the filing of the annual RES compliance report and RES compliance plan with the commission. The staff's report shall identify any deficiencies in the electric utility's compliance with the RES.

(E) ~~The Office of the Public Counsel~~OPC and any interested persons or entities may file comments based on their review of the electric utility's annual RES compliance report and RES compliance plan within forty-five (45) days of the electric utility's filing of its compliance report with the commission.

(F) The commission shall issue an order which establishes a procedural schedule, if necessary.

(8) Penalties. An electric utility shall be subject to penalties of at least twice the average market value of RECs or S-RECs for the calendar year for failure to meet the targets of section 393.1030.1, RSMo, and section (2) of this rule.

(A) Any allegation of a failure to comply with the RES ~~requirements~~ shall be filed as a complaint under the statutes and regulations governing complaints.

(B) An electric utility shall be excused if it proves to the commission that failure was due to events beyond its reasonable control that could not have been reasonably mitigated or to the extent that the maximum average retail rate impact increase, as determined in accordance with section (5) of this rule, would be exceeded.

(C) Any penalty payments assessed by the courts shall be remitted to the ~~department~~division. These payments shall be utilized by the ~~department~~division for the following purposes:

1. Purchase RECs or S-RECs in sufficient quantity to offset the shortfall of the utility to meet the RES ~~portfolio~~ requirements; and

2. Payments in excess of those required in paragraph (C)1. of this section shall be utilized to provide funding for renewable energy and energy efficiency projects. These projects shall be selected by the ~~Department of Natural Resources~~division in consultation with the staff.

(D) Upon determination by the commission that an electric utility has not complied with the RES, penalty amounts shall be calculated by determining the electric utility's shortfall relative to the RES ~~portfolio-total~~ requirements ~~and RES-(total and solar)-energy requirements~~ for the calendar year. The penalty amount recommended by the commission to the court of jurisdiction shall be twice the average market value during the calendar year for RECs or S-RECs in sufficient quantity to make up the utility's shortfall for RES total requirements or RES solar energy requirements. The average market value for RECs or S-RECs for the calendar year shall be based on RECs and S-RECs utilized for compliance with this rule. A recommended average market value for the compliance period shall be calculated by the staff. ~~The Office of the Public Counsel~~OPC and any interested persons or entities may file comments based on their review of the staff's recommendation. The commission may issue an order which establishes a further procedural schedule, or the commission may determine the average market value as part of the complaint proceeding.

(E) Any electric utility that is subject to penalties as prescribed by this section shall not seek recovery of the penalties through section (6) of this rule or any other rate-making activity. ~~Penalties imposed under this rule may not be included by an electric utility as a RES compliance cost under section (5) or (6) of this rule.~~

(9) Nothing in this rule shall preclude a complaint case from being filed, as provided by law, on the grounds that an electric utility is earning more than a fair return on equity, nor shall an electric utility be permitted to use the existence of its RESRAM as a defense to a complaint case based upon an allegation that it is earning more than a fair return on equity.

(10) ~~Waivers and~~Variances. Upon written application, and after notice and an opportunity for hearing, the commission may ~~waive or~~grant a variance from ~~any~~ provision of this rule for good cause shown.

sundes Jan 13, 7:48 AM Deleted: waive or

(A) The granting of a variance to one (1) electric utility which ~~waives or otherwise~~ affects the required compliance with a provision of this rule does not constitute a ~~waiver~~ ~~variance~~ respecting, or otherwise affect, the ~~required~~ compliance ~~required~~ of any other electric utility.

(B) The commission may not ~~waive or~~ grant a variance from this rule in total.

AUTHORITY: section 393.1030, RSMo Supp. 2009 and sections 386.040 and 386.250, RSMo 2000. Original rule filed Jan. 8, 2010, effective Sept. 30, 2010.*

**Original authority: 386.040, RSMo 1939; 386.250, RSMo 1939, amended 1963, 1967, 1977, 1980, 1987, 1988, 1991, 1993, 1995, 1996; and 393.1030, RSMo 2007, amended 2008.*

***Ruling by the Joint Committee on Administrative Rules.** On July 1, 2010, the Joint Committee on Administrative Rules voted to disapprove subsection (2)(A) and paragraph (2)(B)2. of 4 CSR 240-20.100. Those portions contained provisions on geographic sourcing. The committee considered those portions which were disapproved to be held in abeyance and asked that they not be published.

Public Service Commission action. On January 26, 2011, the Public Service Commission filed an order with the Administrative Rules Division of the Office of the Secretary of State withdrawing the geographic sourcing provisions found in subsection (2)(A) and paragraph (2)(B)2. of 4 CSR 240-20.100. This commission order renewed the request of the Public Service Commission submitted by letter with its final order of rulemaking on July 6, 2010, that subsection (2)(A) and paragraph (2)(B)2. not be published in the **Code of State Regulations** and that these portions of the rule not become effective. A copy of this order appeared in the April 1, 2011, issue of the **Missouri Register** (36 MoReg 1002–1007).

Legislative action. On January 24, 2011, Senate Concurrent Resolution No. 1 regarding 4 CSR 240-20.100 was adopted by the Senate and was concurred in by the House of Representatives on February 1, 2011. On February 16, 2011, the governor sent a letter to the speaker of the Missouri House of Representatives and the president pro tem of the Missouri Senate serving as notice of his action on the resolution. This concurrent resolution upheld a ruling issued by the Joint Committee on Administrative Rules disapproving subsection (2)(A) and paragraph (2)(B)2. of 4 CSR 240-20.100. The concurrent resolution permanently disapproves and suspends the final order of rulemaking for the proposed amendment to the above stated subsection and paragraph. The concurrent resolution and the letter from the governor were published in the April 1, 2011, issue of the **Missouri Register** (36 MoReg 1008–1011).
