

Radio Frequency Exposure Causing Mutation of Eggs

[February 17, 2014](#)[News and Updates](#)[JensenWorks Technology](#)

Wireless technology seems like a great idea, the problem is we aren't electrically compatible. Our 60 Hz electrical grid in North America function with appliances, equipment or devices that operate at 60 Hz. If they didn't the equipment wouldn't run efficiently or safely.

Smart Meters, cellphones and Wi-Fi use frequencies that are 900 MHz to 5 GHz. That is 900 million cycles per second to 5 billion cycles per second. Towers, their antennas, routers and other wireless infrastructure are bathing areas so we can use wireless. The real problem is there are reasons we wire devices because nothing in existence runs at those frequencies. [Safety Code 6](#) in Canada uses the same science standards as the FCC but admits the mechanisms were missing linking the frequencies to adverse health effects. They left out the millions or trillions of frequencies of biological systems as well as the routers and antennas hitting all life. The frequencies are illegal as applied. Safety standards only considered tissue was heating, they left out the fact intricate electrical systems are electromagnetically induced. Ohm's law wasn't considered or used and it wasn't understood cell voltages in your body are changed.

Volts = amps x resistance ($V = I \times R$) Power(watts) = volts X amps. If you look at a spec plate on an appliance in your home, you can determine how many watts the appliance in your home uses. A cell in your body has -70 mV and that voltage will change but none of that information was used when it comes to safety.

The information below is critically important to you. You will read that authors radiated chicken eggs with frequencies and the chicks were mutated as you can see in the pictures.

A smart meter will go on your home and the meters, relays, routers, collectors will radiate a fetus, a baby, a baby girl's eggs 24/7. Chickens hatch in 21 days and the chicks were mutated, girl's eggs will be radiated for years until they become of age to be able to get pregnant. When they get pregnant, if they get pregnant, what will happen to the baby? All of this to read energy consumption remotely and this isn't addressing the problems to buildings, infrastructure, agriculture, fish, trees and literally everything in the coverage area.

Here is a picture from a must read book called "Cellular Radiation, Is This our Next Titanic?" by Dr. David R. James & Ora James Murphy. Ph: 1-877-300-4880 Ext 102. Look at the picture and think of your children or wives as well as all life. After mutation, what happens when a species can't reproduce anymore?

Last week we got calls from veterans whose grand children had deformities at birth, extra fingers, autism, eye problems and other unthinkable challenges to be considered.
