- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff - When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th Revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level-.

3.1 Timing of Calls

3.1.1 When Billing Charges Begin and End for Phone Calls

MISSOURI
Public Service Commission

The Customer's long distance usage charge is based on the actual usage of the Underlying Carrier's network. Usage begins when the called party picks up the receiver, (i.e. when 2 way communication, often referred to as "conversation time" is possible). A call is terminated when the calling or called party hangs up.

3.1.2 Billing Increments

The minimum call duration for billing purposes is 1 minute for a connected call and calls beyond 1 minute are billed in 1-minute increments.

3.1.3 Uncompleted Calls

There shall be no charges for uncompleted calls.

3.2 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V& H Coordinates Tape and Bell's NECA Tariff NO. 4.

FORMULA:

The square
root of:

$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

3.3 Minimum Call Completion Rate

A Customer can expect a call completion rate of not less than 98% for all "1+" dialing.

Travel Card Service is a travel card service offered to residential and business customers who subscribe to the Long Distance Service calling plan. Customers using the Company's travel card service access the service by dialing a 1-800 number followed by an account identification number and the number being called. This service permits subscribers utilizing the Company's travel card to make calls at a single per minute rate. Calls are billed in one (1) minute increments after the initial minimum period of one (1) minute. There are no nonrecurring or monthly recurring charges. No travel card surcharge applies.

3.4.4 Prepaid Calling Cards

The Company's prepaid calling cards are available in various minute denominations. Calling card prices are inclusive of state and local taxes, which are required to be paid on usage of the underlying telecommunications service when that service originates and terminates within a particular tax jurisdiction. Calling card prices do not include federal excise tax or state and local taxes which are required to be paid at the point of sale.

For billing purposes, call timing is rounded up to the next full minute increment after a minimum initial period of one (1) minute. These rates apply twenty-four hours per day, seven days per week.
