

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

**GREATER JEFFERSON CITY CONSTRUCTION
COMPANY, INC., and EDWARD P. STOREY,**

Complainants,

v.

AQUA MISSOURI, INC.

Respondent.

Case No. WC-2007-0303

COMPLAINANTS' STATEMENT OF POSITION

1. Is the Quail Valley Waste Water Treatment Facility capable of handling an additional 32 homes?

a. If not, how many more can it handle?

COMPLAINANTS: **Yes. Studies show that the facility can handle 40 additional homes at the current census for a total of 120 homes.**

2. If not, who is responsible for expanding the plant?

COMPLAINANTS: **Developer is willing to extend mains to those lots which do not have mains to them. Aqua would have to expand the capacity of the plant as the plant was designed and built to handle the entire development.**

3. Did Complainants apply for additional hookups and, if so, did Respondent deny such application?

COMPLAINANTS: **Yes. Ed Storey was told that 80 homes was all that could be connected.**

4. If Complainants did apply for additional hookups, how many were applied for?

COMPLAINANTS: Complainants orally requested additional hookups and were denied. Subsequently, after engineering studies were performed, Complaints requested 10 hookups immediately with others to follow.

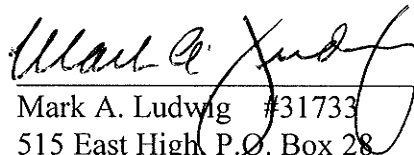

5. If Respondent did deny such application, was Respondent's denial of additional hookups wrongful, intentional, and without just cause or excuse?

COMPLAINANTS: Yes.

6. What was the original designed capacity of the Waste Water Treatment Facility?

COMPLAINANTS: The facility was designed and built to handle the entire development of Quail Valley.
