File No. EO-2012-0074

AFFIDAVIT OF DANA E. EAVES

STATE OF MISSOURI)
) ss
COUNTY OF COLE)

Dana E. Eaves, of lawful age, on his oath states: that he has participated in the preparation of the following Direct/Rebuttal Testimony in question and answer form, consisting of 21 pages of Direct/Rebuttal Testimony to be presented in the above case, that the answers in the following Direct/Rebuttal Testimony were given by him; that he has knowledge of the matters set forth in such answers; and that such matters are true to the best of his knowledge and belief.

Dane E. Eaves

Subscribed and sworn to before me this 14th day of May, 2012.

DIRECT/REBUTTAL TESTIMONY

OF

DANA E. EAVES

UNION ELECTRIC COMPANY d/b/a AMEREN MISSOURI

FILE NO. EO-2012-0074

Q. Please state your name and business address.

A. Dana E. Eaves, P.O. Box 360, Jefferson City, MO 65102.

Q. By whom are you employed and in what capacity?

A. I am a Utility Regulatory Auditor for the Missouri Public Service Commission (“Commission” or “PSC”) in the Energy Unit.

Q. Have you previously filed testimony before the Commission?

A. Yes. Please see Schedule DEE-1 and Schedule DEE-2, attached to this testimony, for the list of cases in which I have previously filed testimony or reports.

Q. Are you the same Dana E. Eaves who participated in the prudency review and preparation of the Public Service Commission Staff's ("Staff") *Prudence Review of Costs and Revenues in the Fuel Adjustment Clause of Union Electric Company, d/b/a Ameren Missouri Related to Ameren Missouri's Contracts with Wabash Valley Power Association and American Electric Power Operating Companies October 1, 2009 through June 20, 2010* ("Staff Report" or "Report") and the proposed recommendation in this case?

A. Yes, I am. On October 28, 2011, the Staff filed its Report attached as Schedule DEE-3 (NP) and DEE-4 (HC). In that report:

Staff recommends the Missouri Public Service Commission (“Commission”) order Ameren Missouri to refund to its customers in its next fuel and purchased

power (“FPA”) rate adjustment the aggregate sum of ** \$26,342,791 **, plus interest accrued at Ameren Missouri’s short-term borrowing rate from May 31, 2011 until the amount is refunded. The basis for Staff’s recommendation is its conclusion that Ameren Missouri was imprudent for not including in its FAC [(Fuel Adjustment Clause)] calculations for adjustment of its FPA rates all the costs and revenues associated with its contracts to sell energy to Wabash and AEP during the period October 1, 2009, through June 20, 2010.

Staff’s conclusion regarding Ameren Missouri’s prudence with respect to the Wabash and AEP contracts mirrors the conclusion it reached during its FAC prudence review of Ameren Missouri’s treatment of the costs and revenues associated with the same contracts during the period March 1, 2009, to September 30, 2009. Staff filed its report for that prudence audit period in File No. EO-2010-0255. There the Commission found Ameren Missouri imprudent and ordered it to refund to its customers \$17,169,838 plus interest accrued at Ameren Missouri’s short-term borrowing rate until the \$17,169,838 is refunded.

Q. Are you also the same Dana E. Eaves who participated in the prudency review of Ameren Missouri’s contracts with Wabash Valley Power Association (“Wabash” or “WVPA”) and American Electric Power Operating Companies (“AEP”)for the period March 1, 2009 through September 30, 2009, that Staff presented in its *Prudence Review of Costs Related to the Fuel Adjustment Clause for the Electric Operations of Union Electric Company, d/b/a AmerenUE* filed August 3, 2010, in File No. EO-2010-0255?

A. Yes, I am.

Q. Did Ameren Missouri contest Staff’s proposed prudency adjustment for the AEP and Wabash prudency issue in File No. EO-2010-0255?

A. Yes, and the Commission issued a *Report and Order*.

Q. Did you file testimony in File No. EO-2010-0255 related to the AEP and Wabash prudency issue?

A. Yes I did.

¹ This number was designated as Highly Confidential in the Staff’s report filed on October 28, 2011. Ameren Missouri made this number public in the hearing in Case No. EU-2012-0027.

1 Q. Was the AEP and Wabash prudency issue in that case any different than the
2 AEP and Wabash prudency issue now?

3 A. No, not other than the period reviewed. Staff's adjustment in this case simply
4 reflects the remaining costs and revenues associated with the AEP and Wabash contracts for
5 the current review period. Staff is recommending this amount should be refunded with the
6 appropriate interest to Ameren Missouri's customers in Ameren Missouri's next Fuel and
7 Purchased Power Adjustment ("FPA") following an order from the Commission in this case.

8 Q. What did the Commission say in its *Report and Order* in File No.
9 EO-2010-0255?

10 A. The Commission provided a summary on page 2, which follows:

11 **Summary**

12 This order determines that Union Electric Company d/b/a Ameren Missouri
13 acted imprudently, improperly and unlawfully when it excluded revenues
14 derived from power sales agreements with AEP and Wabash from off-system
15 sales revenue when calculating the rates charged under its fuel adjustment
16 clause.

17 Q. What is the purpose of your direct/rebuttal testimony in this case?

18 A. I not only present Staff's responses to the direct testimonies of Union Electric
19 Company, d/b/a Ameren Missouri ("Ameren Missouri" or "Company") witnesses Lynn M.
20 Barnes ("Ms. Barnes"), Jaime Haro ("Mr. Haro") and Gary S. Weiss ("Mr. Weiss"), but I also
21 present additional matters to support Staff's prudency disallowance recommendation. In
22 particular, I address the following points:

- 23 • An overview of Ameren Missouri's FAC.
- 24 • The Company's imprudently excluded costs and the revenues related to the
25 AEP contract and the Wabash contract from its FPA calculations for the 3rd,
26 4th, and 5th accumulation periods.

AMEREN MISSOURI'S FUEL ADJUSTMENT CLAUSE

Q. Why does Ameren Missouri have a Fuel Adjustment Clause?

A. As I explained in my direct/rebuttal testimony in File No. EO-2010-0255, as part of Case No. ER-2008-0318, the Commission first authorized Ameren Missouri to use a FAC on January 27, 2009. Ameren Missouri's FAC was, and still is, designed to allow Ameren Missouri to recover or refund under-collection or over-collection of prudently incurred fuel and purchased power costs less off-system sales revenue in a timely manner outside of a general rate case. Ameren Missouri's FAC then had the following formula, the factors of which are defined in its FAC tariff sheets:

$$FPA_{(RP)} = [[(CF + CPP - OSSR - TS - S) - (NBFC \times S_{AP})] \times 95\% + I + R] / S_{RP}^2$$

Q. What does this formula have to do with Staff's proposed prudence adjustment?

A. $FPA_{(RP)}$ is the adjustment for each accumulation period that is included in the FPA charge (now called a "Fuel Adjustment Charge") on Ameren Missouri customers' bills. Staff is proposing a prudence disallowance that affects the CF (Fuel Costs) factor and the OSSR (Off System Sales Revenue) factor used in setting the $FPA_{(RP)}$ for the 3rd, 4th and 5th recovery periods.³

Q. Were Ameren Missouri's current FAC tariff sheets in effect over the time period that you reviewed for this prudence audit?

A. No. The tariff sheets that were in effect over the time period of this prudence audit are attached as Schedule DEE-5.

² See Schedule DEE-5 for complete explanation of components used in formula.

³ Adjustments to the Fuel and Purchased Power Adjustment factor based on the October 1, 2009, to January 31, 2010, February 1, 2010, to May 31, 2010, and June 1, 2010, to September 30, 2010.

1 Q. Do Ameren Missouri's FAC tariff sheets in Schedule DEE-5 define the various
2 components of what should or should not be included in the OSSR factor of the FPA
3 equation?

4 A. Yes, on schedule 5, page 98.3 of Ameren Missouri's FAC tariff sheets
5 (DEE-5), OSSR is defined as follows:

6 OSSR = Revenue from Off-System Sales allocated to Missouri electric
7 operations.
8 Off-System Sales shall include all sales transactions (including MISO revenues
9 in FERC Account Number 447), excluding Missouri retail sales and long-term
10 full and partial requirements sales, that are associated with (1) AmerenUE
11 Missouri jurisdictional generating units, (2) power purchases made to serve
12 Missouri retail load, and (3) any related transmission.

13 **WABASH AND AEP PRUDENCY ISSUE**

14 Q. Did Ameren Missouri request the Commission authorize it to use a FAC?

15 A. Yes, I also presented the following history in File No. EO-2010-0255. On
16 April 4, 2008, in File No. ER-2008-0318, Ameren Missouri filed tariff sheets consisting of
17 electric rate schedules designed to increase its "gross annual electric revenues by
18 approximately \$251,000,000, exclusive of applicable gross receipts, sales, franchise or
19 occupational fees or taxes." Contained within this filing was the Company's request for
20 authorization to employ a fuel and purchased power cost recovery mechanism to comply with
21 rule 4 CSR 240-20.090.

22 Q. Did the Commission authorize Ameren Missouri to use a FAC in that case?

23 A. Yes. As I mentioned earlier in this testimony and in my previously filed
24 testimony in File No. EO-2010-0255, the Commission approved Ameren Missouri's request
25 to implement a FAC on January 27, 2009, with its *Report and Order* issued in Case No.
26 ER-2008-0318. The Commission later modified Ameren Missouri's FAC in Ameren
27 Missouri's next two general electric rate cases, File Nos. ER-2010-0036 and ER-2011-0028.

1 Q. Did a January 28, 2009 ice storm damage Ameren Missouri's transmission and
2 distribution system?

3 A. Yes. Much of Ameren Missouri's transmission and distribution system in
4 southeast Missouri was severely damaged.

5 Q. Did Ameren Missouri describe that storm shortly after it occurred?

6 A. Yes. On page 2 of its *Application for Rehearing and Motion for Expedited*
7 *Treatment* filed on February 5, 2009, in File No. ER-2008-0318, Ameren Missouri, then
8 doing business as AmerenUE, described that storm as follows:

9 2. On Wednesday, January 28, 2009, an extraordinary and devastating ice
10 storm caused damaged to the entire Southeastern region of Missouri, and
11 knocked out the Associated Electric Cooperative, Inc. (AECI) transmission
12 lines through which Noranda Aluminum, Inc.'s (Noranda) New Madrid,
13 Missouri aluminum smelter receives power. Consequently, an unprecedented
14 and significant loss of AmerenUE's retail load and the revenues associated
15 therewith has occurred for a period that cannot at this time be determined...

16 Q. Why did Ameren Missouri file *Application for Rehearing and Motion for*
17 *Expedited Treatment* filed on February 5, 2009?

18 A. It was seeking to change its FAC as shown by paragraph 1 of its application
19 where it stated the following:

20 This Application for Rehearing respecting one aspect of the FAC issue decided
21 in the Report and Order has been filed to avoid an unjust and unwarranted
22 result caused by an act of God – the recent ice storm in Southeast Missouri -
23 that could deprive AmerenUE of up to approximately 45% of the rate relief just
24 granted by the Commission, and that renders the FAC authorized for
25 AmerenUE ineffective in providing AmerenUE with a sufficient opportunity to
26 earn a fair return on equity (ROE). In this Application for Rehearing,
27 AmerenUE proposes a modification to the FAC tariff authorized in the Report
28 and Order that will prevent this loss to AmerenUE while ensuring that
29 customers will be in no worse position than if no ice storm had occurred, and
30 in fact providing the opportunity for windfall benefits to customers, including
31 Noranda.

32 Q. How did the Commission rule on Ameren Missouri's application and motion?

1 A. The Commission denied them on February 19, 2009. In its order denying
2 them, the Commission stated:

3 If the Commission were to grant AmerenUE's application for rehearing it
4 would have to set aside the approved stipulation and agreement regarding the
5 fuel adjustment clause, reopen the record to take evidence on the
6 appropriateness of the proposed change, and make a decision before the March
7 1, 2009 operation of law date. Such action is obviously impossible.

8 Q. How did Ameren Missouri respond to the Commission's denial of its requests?

9 A. On February 27, 2009, eight days after the Commission issued its order,
10 Ameren Missouri entered into a Physical Capacity and Associated Energy (Partial
11 Requirements – baseload) agreement with AEP for 100 megawatts of capacity for the delivery
12 period of March 1, 2009, through May 31, 2010. Two months later, on April 28, 2009,
13 Ameren Missouri entered into an Electric Service Agreement with WVPA to supply system
14 firm capacity in an amount not to exceed 150 megawatts for the delivery period of
15 May 1, 2009, through October 31, 2010.

16 Q. Has Ameren Missouri explained why it entered into these arrangements with
17 AEP and WVPA?

18 A. Yes. Ameren witness Mr. Haro explains in his direct testimony in this case
19 that because of the devastating January 2009 ice storm, Noranda Aluminum, Inc.'s. (Noranda)⁴
20 ability to take load⁵ was impaired. In his direct testimony, on page 4, at lines 9-12, he states,
21 "Because Noranda is Ameren Missouri's largest customer by far, the loss of this substantial
22 load for a long, but at the time indeterminate period created a significant disruption to the
23 Company's portfolio. In the wake of this catastrophic loss, Ameren Missouri's decision to
24 enter into these contracts allowed it to maintain the historical balance of the portfolio."

⁴ Noranda Aluminum, Inc., a Southeast Missouri aluminum smelter and Ameren Missouri's largest customer.

⁵ Ameren Missouri's witness Mr. Haro identifies Noranda's load was reduced by 460 megawatts, page 6, line 11, of his Direct Testimony. Mr. Haro identifies Noranda's full load at 490 MW on page 7, line 5, of his Direct Testimony in File No. EO-2012-0074.

1 Q. At that time was Ameren Missouri's FAC designed to balance its load and off-
2 system sales?

3 A. No. Ameren Missouri's Commission-authorized FAC was designed to allow
4 Ameren Missouri to timely recover from or refund to customers outside of a formal rate case
5 95 percent of the difference between its prudently incurred actual fuel and purchased power
6 costs less off-system sales revenue, and base energy costs as estimated using the Base Energy
7 Cost per kWh rates in its FAC, not to balance its load and off-system sales.

8 Q. During the review period, what were the consequences to Ameren Missouri of
9 Noranda significantly reducing its load, i.e., taking significantly less power from Ameren
10 Missouri?

11 A. Ameren Missouri billed Noranda for less revenue based on its "permanent
12 rates"—the retail rates established based on traditional revenue requirement calculations.

13 Q. Who was at risk for this reduction in revenues from Noranda due to Noranda
14 decreasing its energy consumption?

15 A. Ameren Missouri and its shareholders. Loss of customer load is part of the
16 risk shareholders assume when seeking to earn a return on equity (ROE).

17 Q. But did not Ameren Missouri recover less from Noranda than what the
18 Commission-approved rate applicable to Noranda was designed to collect?

19 A. Yes, but rates are only designed to provide the opportunity to earn revenues,
20 not to guarantee them.

21 Q. What about Ameren Missouri's argument that it was unable to collect its fixed
22 costs attributable to it serving Noranda?

23 A. That argument is meritless and is irrelevant to this prudence review. The issue
24 here is the effect on Ameren Missouri's FAC. Absent its FAC, Ameren Missouri could have

1 taken, as it attempted to do, the energy it was no longer delivering to Noranda to increase its
2 off-system sales, and then kept the revenues from those off-system sales, i.e., basically
3 replace revenues from Noranda with revenues from increased off-system sales revenues.
4 However, Ameren Missouri's FAC, as it was in effect for this time, required that the revenues
5 from those off-system sales flow through the FAC as a reduction to Ameren Missouri's fuel
6 and purchased power costs captured by its FAC.

7 Q. Do Ms. Barnes and Mr. Haro describe the off-system sales contracts the
8 Company entered into with Wabash and AEP as long-term requirements sales?

9 A. Yes, just as they did in File No EO-2010-0255.

10 Q. Has the Commission already found that the Wabash and AEP sales contracts
11 are not long-term full or partial requirements contracts for purposes of Ameren Missouri's
12 FAC?

13 A. Yes. The Commission found they are not long-term full or partial
14 requirements contracts under the tariff language of Ameren Missouri's FAC that was in effect
15 for the period March 1, 2009 through September 30, 2009 in File No. EO-2010-0255. In its
16 Report and Order in File No. EO-2010-0255 the Commission stated:

17 The Commission concludes that the Wabash and AEP contracts are not long-
18 term full or partial requirements contracts as defined by Ameren Missouri's
19 tariff. They simply do not have the characteristics to qualify as such contracts.
20 Ameren Missouri calls them such, but it must stretch the definition beyond the
21 breaking point to do so.

22
23 If Ameren Missouri's definition were accepted, nearly any sales contract of
24 over one-year duration would qualify as a long-term full or partial
25 requirements contract that could be excluded from the fuel adjustment clause.
26 Ameren Missouri would be able to choose unilaterally to define an off-system
27 sale out of the fuel adjustment clause and thereby increase its profits at the
28 expense of its ratepayers. Such a broad definition would render the tariff's
29 definition of off-system sales nearly meaningless and would make the fuel
30 adjustment clause extremely one-sided in a way that was not intended by the
31 Commission or by the parties to the stipulation and agreement that presented

1 that tariff language to the Commission for approval. Ameren Missouri
2 describes its contracts with Wabash and AEP as long-term full or partial
3 requirements contracts, but, to paraphrase MIEC's witness, Maurice Brubaker,
4 calling a dog a duck does not make it quack, and calling Ameren Missouri's
5 contracts with Wabash and AEP long-term full or partial requirements
6 contracts does not make them so.

7 Q. Is the tariff language of Ameren Missouri's FAC that was in effect for this
8 prudency review period of October 1, 2009 through May 31, 2011, different?

9 A. For the period October 1, 2009 to June 20, 2010, it is not. For the period
10 June 21, 2010 to May 31, 2011, it is, and that is why Staff is not proposing any prudency
11 adjustment for the AEP and Wabash contracts in this case for this later period.

12 Q. On page five of her direct testimony Ms. Barnes testifies:

13 While I can't offer a legal opinion on the matter, as I understand it, not
14 following the tariff is not a matter of whether the Company was "prudent", but
15 rather, is an allegation that the Company did not follow the law, because, as I
16 understand it, a tariff is effectively the law.

17 Does Staff agree with Ms. Barnes's understanding that not following the law does not
18 raise prudency issues?

19 A. No, not at all. Generally a reasonable person would comply with a tariff when
20 making a decision that the tariff controls in some way; therefore, not complying with a tariff
21 in such circumstances raises a prudency issue. It is appropriate for Staff to review and
22 determine the proper application of tariffs in FAC prudency review cases and make
23 recommendations to the Commission as to whether an electric utility has complied with its
24 tariff. The Commission gave the following guidance regarding prudency in its *Report and*
25 *Order* in File No. EO-2010-0255:

26 5. The Commission established its standard for determining the prudence of a
27 utility's expenditures in a 1985 decision. In that decision, the Commission
28 held that a utility's expenditures are presumed to be prudently incurred, but, if
29 some other participant in the proceeding creates a serious doubt as to the

1 prudence of the expenditure, then the utility has the burden of dispelling those
2 doubts and proving the questioned expenditure to have been prudent.⁶

3 Q. Does Ms. Barnes claim ratepayers are receiving a “windfall” from the ice
4 storm?

5 A. Yes, on several occasions in her testimony in this case, just as she did in File
6 No. EO-2010-0255, she claims Ameren Missouri’s ratepayers have received a windfall as a
7 result of the ice storm.

8 Q. Did the Commission address this claim of ratepayer windfall in File No.
9 EO-2010-0255?

10 A. Yes, I believe so. In the Commission’s *Report and Order* in that case, at pages
11 21-22, the Commission stated the following:

12 Ameren Missouri contends that the revenue it received from the Wabash and
13 AEP contracts merely replaced the revenue it lost from Noranda and therefore,
14 its ratepayers are no worse off than they would have been had there been no ice
15 storm.

16 Ameren Missouri’s argument would however deprive its ratepayers of the
17 benefit of the bargain implicit in the Commission’s approval of the fuel
18 adjustment tariff language proposed in the stipulation and agreement among
19 the parties to the rate case, ER-2008-0318. The bargain implicit in the
20 approved fuel adjustment clause is that ratepayers will pay more to help the
21 company when the utility’s fuel costs rise or offsetting revenue from off-
22 system sales drop. On the other hand, ratepayers will benefit from decreased
23 rates if fuel costs drop or offsetting revenue from off-system sales increase.
24 Here offsetting revenue from off-system sales, as those revenues were defined
25 in the tariff, increased and ratepayers should have benefited in the amount of
26 \$17,169,838. However, Ameren Missouri sought to deprive ratepayers of that
27 benefit by branding the Wabash and AEP contracts as long-term full or partial
28 requirements contracts when they do not qualify as such under the terms of the
29 company’s tariff. In doing so, Ameren Missouri acted contrary to the
30 requirements of its tariff and therefore acted inappropriately.

⁶ In the Matter of the First Prudence Review of Costs Subject to the Commission-Approved Fuel Adjustment Clause of Union Electric Company, d/b/a Ameren Missouri Case No. EO-2010-0255, Report and Order, page 16.

1 Q. Ms. Barnes claims in her direct testimony, at pages 11-12, that, during the
2 prudence review period, Ameren Missouri did not achieve sufficient revenues for it to realize
3 its “authorized rate of return”—the rate of return the Commission used as a factor in
4 determining rates, does she not?

5 A. Yes, she does, and she provides a chart, on page 12 of her direct testimony,
6 comparing the Company’s authorized and earned returns on equity during the review period.

7 Q. Does the Commission set rates for Ameren Missouri to guarantee that Ameren
8 Missouri realizes its “authorized rate of return”?

9 A. Certainly not. The Commission sets rates to provide the utility with an
10 *opportunity*, not a *guarantee*, for that utility to obtain sufficient revenues from future sales for
11 the utility to realize its “authorized rate of return.” There are many factors involved that can
12 influence an electric utility’s ability to earn its “authorized rate of return.” For example, in an
13 extremely hot summer, a utility may realize a higher rate of return than its “authorized rate of
14 return” because its weather sensitive customers use more energy than the energy they would
15 use in the “normal” summer that was used for purposes of setting the rates.

16 Q. How does Ameren Missouri’s FAC impact its ability to earn its “authorized
17 rate of return”?

18 A. Ameren Missouri’s FAC is designed to allow it to recover its prudently
19 incurred fuel and purchased power costs outside of a general rate case. Ameren Missouri’s
20 FAC benefits Ameren Missouri greatly because of the volatility in fuel and purchased power
21 costs and because these costs are one of, if not the greatest of, the costs the Company incurs in
22 providing electric service to its customers. Ameren Missouri’s FAC allows the Company to
23 recover these costs much quicker than it would through permanent rates in the traditional
24 manner (general rate case). Ameren Missouri’s FAC should give it an even greater

1 opportunity to earn its “authorized rate of return.” Although she did so in terms of “return on
2 equity” rather than “rate of return,” Ms. Barnes explained this in her direct testimony in
3 Ameren Missouri’s 2010 general electric rate case, File No. ER-2010-0036, at page 3, lines
4 14-18, as follows:

5 Continuing to track changes in net fuel costs, which continue to be volatile and
6 beyond the Company’s control, allows increases in those costs to be recovered
7 on a more timely basis, which provides the Company with improved cash
8 flows and a better opportunity to earn a fair return on equity, both of which
9 will help the Company maintain its credit quality in the current economic
10 climate.

11 Q. Ms. Barnes claims that Ameren Missouri would be harmed if the revenues
12 received from AEP and Wabash capacity and energy sales are flowed through the FPA
13 calculation in Ameren Missouri’s FAC, does she not?

14 A. Yes, she makes that claim.

15 Q. Has Staff quantified the reduction in Ameren Missouri’s revenues, if the costs
16 and revenues associated with AEP and Wabash capacity and energy sales are flowed through
17 the FPA calculation for accumulation periods 3, 4 and 5?

18 A. Yes. For the period October 1, 2009, through June 20, 2010, Staff’s
19 quantification is the \$26,342,791 for accumulation periods 3, 4, and 5, plus interest accrued at
20 Ameren Missouri’s short-term borrowing rate from May 31, 2011, until the amount is
21 refunded. Staff did not quantify the amounts for any subsequent period after June 20, 2010,
22 because Ameren Missouri’s FAC changed then and Staff is not asserting this AEP and
23 Wabash prudence issue exists after June 20, 2010. As I stated earlier that it’s the amount
24 Staff recommends the Commission order be refunded to Ameren Missouri’s ratepayers as a
25 prudence review adjustment concurrently with Ameren Missouri’s next FAC true-up
26 adjustment.

1 Q. Would Ameren Missouri customers be harmed if this amount was not properly
2 applied to Ameren Missouri's FPA calculation?

3 A. Yes. When the Commission approved a FAC for Ameren Missouri, the risk of
4 changes in Ameren Missouri's fuel costs were shifted from Ameren Missouri to its retail
5 customers. If those customers are required to assume this risk, then they should benefit when
6 Ameren Missouri's fuel and purchased power costs go down. If this amount is not returned to
7 Ameren Missouri's customers, then they would be denied the benefit of having this amount
8 returned to them through the Fuel Adjustment Charge on their bills, but they will have taken
9 on the risk of paying increased fuel and purchased power costs. It would be very one-sided if
10 Ameren Missouri's customers have the risk of increases in fuel and purchased power costs
11 less off-system sales revenue, but not the benefits of reductions in fuel and purchased power
12 costs less off-system sales revenue.

13 Q. Earlier you testified that Ms. Barnes and Mr. Haro describe the off-system
14 sales contracts the Company entered into with Wabash and AEP as long-term requirements
15 sales. Does Ms. Barnes claim that the revenue and costs associated with the AEP and Wabash
16 contracts should not be included in the FPA calculation because they are long-term
17 requirement sales?

18 A. Yes, on page 11 of her direct testimony, starting on line 15, she testifies as
19 follows:

20 Q. Was Ameren Missouri able to enter into contracts that reflected long-
21 term requirements sales?

22 A. Yes. As explained by Mr. Haro, Ameren Missouri was able to enter into
23 two such sales with AEP and Wabash.

24 Q. Do Ms. Barnes or Mr. Haro define the term "long-term partial requirements
25 sales" in their direct testimony?

1 A. No, they do not.

2 Q. Is the definition of long-term full or partial requirements sales, as used in
3 Ameren Missouri's FAC tariff sheets, important?

4 A. Yes, it is very important as it relates to how the Wabash and AEP contracts are
5 to be treated, i.e., whether the revenues and costs associated with them are included or
6 excluded in the FPA calculations.

7 Q. Are long-term full or partial requirements sales defined in Ameren Missouri's
8 FAC tariff sheets?

9 A. No. No definitions for the terms describing the Wabash and AEP contracts are
10 contained in the tariff.

11 Q. Do not electric utilities classify the nature of sales contracts in reports they file
12 with this Commission and at the FERC each year.

13 A. Yes.

14 Q. Are those classifications helpful for defining long-term full or partial
15 requirements sales as those terms are used in Ameren Missouri's FAC tariff sheets?

16 A. I believe so.

17 Q. Did Ameren Missouri file such a report for 2010?

18 A. Yes, under its corporate name of Union Electric Company.

19 Q. What classifications of the nature of sales contracts are in that report?

20 A. On page 310 the following statistical classifications are listed:

21 RQ – for requirements service. Requirements service is service which the
22 supplier plans to provide on an ongoing basis (i.e., the supplier includes
23 projected load for this service in its system resource planning). In addition, the
24 reliability of requirements service must be the same as, or second only to the
25 supplier's service to its own ultimate consumers.

1 LF – for long-term service. “Long-term” means five years or Longer and
2 “firm” means that service can not be interrupted for economic reasons and is
3 intended to remain reliable even under adverse conditions (e.g., the supplier
4 must attempt to buy emergency energy from third parties to maintain deliveries
5 of LF service). This category should not be used for Long-term firm service
6 which meets the definition of RQ service. For all transactions identified as LF,
7 provide in a footnote the termination date of the contract defined as the earliest
8 date that either buyer or setter can unilaterally get out of the contract.
9

10 IF – for intermediate-term service. The same as LF service except that
11 “intermediate-term” means longer than one year but less than five years.
12

13 SF – for short-term firm service. Use this category for all firm services
14 where the duration of each period of commitment for service is one year or
15 less.
16

17 LU – for Long-term service from a designated generating unit. “Long-term”
18 means five years or Longer. The availability and reliability of service, aside
19 from transmission constraints, must match the availability and reliability of
20 designated unit.
21

22 IU – for intermediate-term service from a designated generating unit. The
23 same as LU service except that “intermediate-term” means Longer than one
24 year but Less than five years.

25 Q. Did Ameren Missouri classify the AEP and Wabash contracts in this report?

26 A. Yes, on page 310, at lines 7 and 12, Ameren Missouri classified the AEP
27 contract (American Electric Power Cooperative [sic]) as RQ and SF, respectively, and at line
28 8 it classified the Wabash contract as RQ.

29 Q. Is that the same way Ameren Missouri classified these contracts in its 2009
30 annual report?

31 A. No. Although Ameren Missouri’s 2009 annual report had the same
32 classifications, as I testified in Case No. EO-2010-0255, on page 310, at lines 11 and 12, of
33 that report Ameren Missouri classified the AEP contract as IF and SF, respectively, and on
34 line 9, it classified the Wabash contract as IF.

1 Q. In which of these annual reports has Ameren Missouri correctly classified the
2 AEP and Wabash contracts?

3 A. It is Staff's opinion Ameren Missouri correctly classified them in its 2009
4 annual report and misclassified them in its 2010 annual report. Ameren Missouri filed its
5 2009 annual report before the Commission's decision in that case and in Staff witness Dana
6 E. Eaves' Direct/Rebuttal Testimony in File No. EO-2010-0255, Staff claimed Ameren
7 Missouri had correctly designated the classification of these contracts and therefore were not
8 subject to the exclusion provided for in Ameren Missouri's FAC tariff. Ameren Missouri
9 filed its 2010 annual report after the Commission's decision in File No. EO-2010-0255. How
10 Ameren Missouri classified the AEP and Wabash contracts in its 2009 annual report is
11 consistent with the Commission's decision in File No. EO-2010-0255, but how it classified
12 them in its 2010 annual report is not.

13 Q. Did you testify earlier that this classification information is reported to other
14 government agencies?

15 A. Yes. This information is reported to the Federal Energy Regulatory
16 Commission in the Financial Report FERC Form No. 1.

17 Q. Did Ameren Missouri report its sales contracts with Public Authorities
18 (Municipals) in its 2010 Annual Report?

19 A. Yes, on pages 310 and 311, lines 2 through 6, of its 2010 Annual Report,
20 Ameren Missouri lists the following Public Authorities: Missouri Public Utility Alliance;
21 Kahoka, Missouri; Kirkwood, Missouri; Marceline, Missouri; and Perry, Missouri.

22 Q. Did it include revenues from these sales contracts in its FPA calculations for
23 this audit period of October 1, 2009 through May 31, 2011?

24 A. No. They were excluded.

1 Q. Do you know when Ameren Missouri initially entered into each these
2 contracts?

3 A. No. In response to Staff's Data Request 58 in File No. EO-2010-0255,
4 Ameren Missouri stated, "Ameren Missouri is unable to ascertain the dates requested."

5 Q. Does Staff know if Ameren Missouri has provided wholesale service to all of
6 these Public Authorities?

7 A. Yes. Staff has reviewed the Company's Annual Reports for year ending 2006,
8 2007, 2008, and 2009, and Ameren Missouri listed each of these Public Authorities as a
9 customer. Staff notes that Centralia, Missouri and Hannibal, Missouri are no longer listed,
10 and Missouri Public Utility Alliance was included, being added in the 2010 Annual Report.

11 Q. Do you know whether Ameren Missouri's sales contracts relationships with
12 these Public Authorities are ongoing?

13 A. Yes, during the deposition of Mr. Haro on November 19, 2010, he stated that
14 the current contracts were new contracts replacing contracts that had expired. He indicated
15 that these relationships have existed for many years, and the relationships are of such duration
16 that he was unaware if records of initial contracts could be found.

17 Q. How did Ameren Missouri classify its services to these Public Authorities in
18 its 2010 Annual Report?

19 A. Ameren Missouri classified each of them as RQ. As stated earlier, this
20 classification is requirements service, *i.e.*, service that the supplier plans to provide on an
21 ongoing basis and includes in its projected load when system resource planning. In addition,
22 the reliability of requirements service must be the same as, or second only to, the supplier's
23 service to its own ultimate consumers.

1 Q. What is the significance of the RQ designation to the AEP and Wabash
2 prudence issue at hand?

3 A. Ameren Missouri is claiming that for purposes of the FPA calculations for its
4 FAC the AEP and Wabash contracts should be treated similarly to the Public Authority
5 contracts that are designated RQ on its annual reports. However the characteristics of AEP
6 and Wabash contracts and the Public Authority contracts are significantly different. First, the
7 term of the AEP and Wabash contracts are significantly shorter than those of the Public
8 Authorities' contracts. Unlike its contracts with the Public Authorities, the AEP and Wabash
9 contracts have not been included in Ameren Missouri's Integrated Resource Plan process.
10 Also, the AEP and Wabash contracts were not included in Ameren Missouri's net system
11 input during any rate case proceeding. Finally, the sales to AEP and Wabash have not been
12 included in determining jurisdictional allocation factors, but the sales resulting from the
13 contracts with the Public Authorities were.

14 Q. Does Mr. Haro claim it was prudent for Ameren Missouri to enter into the
15 contracts with AEP and Wabash?

16 A. Yes. In his direct testimony he testifies that entering into contracts with AEP
17 and Wabash "was part of the sound, prudent management of the Company's power sales
18 portfolio."⁷

19 Q. Has Staff ever claimed it was imprudent for Ameren Missouri to enter into
20 these contracts with AEP and Wabash?

21 A. No. Staff has only claimed that it was imprudent of Ameren Missouri to
22 exclude the revenue and costs associated with these contracts from the calculation of the
23 FPA's in Ameren Missouri's FAC for accumulation periods 3, 4 and 5.

⁷ Haro Direct Testimony, page 4, lines 3-4

1 Q. Ms. Barnes claims in her direct testimony that the “Staff may desire customers
2 to gain a windfall from the ice storm to the Company’s detriment.” Does Staff have that
3 desire?

4 A. No. Staff’s proposed adjustment in this case has nothing to do with picking
5 winners or losers, or creating windfalls for any of the parties affected by this proposed
6 adjustment. Staff’s proposed adjustment is to properly account for revenue and costs for
7 Ameren Missouri’s Commission-approved FAC. As I testified earlier, if Ameren Missouri’s
8 customers are required to assume the risk of a FAC, then they should benefit when fuel and
9 purchased power costs go down, as offset by additional off-system sales.

10 Q. Do you agree with Ms. Barnes’ following assertion at the close of her direct
11 testimony: “And the end result of Ameren Missouri’s actions was that customers were paying
12 the same electric bills as if the ice storm hadn’t occurred, no more and no less”?⁸

13 A. No. Ameren Missouri’s customers are not in the same position as if the ice
14 storm hadn’t occurred, since they are paying the expensive restoration costs Ameren Missouri
15 incurred due to the ice storm. In fact, most of the costs associated with the 2009 ice storm are
16 in current customer rates. Also, under the FAC terms in effect for accumulation periods 3, 4
17 and 5, and their associated recovery and true-up periods, the bills of Ameren Missouri’s
18 customers should have reflected over \$26 million less because the costs and revenues for the
19 AEP and WVPA contracts should have been accounted for in the FAC. So far this still has
20 not happened.

21 Q. Does not Mr. Weiss claim in his direct testimony that Staff has failed to
22 account for a settlement amount of \$3.3 million related to the “W” factor added to Ameren
23 Missouri’s FAC starting June 21, 2010, as part of the *Second Nonunanimous Stipulation and*

⁸ Barnes Direct Testimony, page 14, lines 4-5

1 | *Agreement* (Stipulation and Agreement) the Commission approved and ordered the parties to
2 | comply with in Case No. ER-2010-0036?

3 | A. Yes he does. Staff was aware of this settlement, but believes it does not affect
4 | the correct adjustment.

5 | Q. Why does Staff believe this settlement does not affect the adjustment?

6 | A. This settlement amount is just that - a settlement amount - and in no way
7 | should it be construed that the \$3.3 million dollars agreed to in the Stipulation and Agreement
8 | was an offset to customer refund amounts in future periods. Mr. Weiss is simply reading
9 | something that does not exist in the Stipulation and Agreement. Ms. Lena M. Mantle
10 | provides Staff's response to Mr. Weiss's argument in her direct/rebuttal testimony in this
11 | case.

12 | Q. Does this conclude your direct/rebuttal testimony?

13 | A. Yes, it does.

Staff Report on Prudence Review of Costs and Revenues Related to Ameren Missouri's Sales Contracts with Wabash Valley Power Association and American Electric Power Operating Companies

Executive Summary

Staff of the Missouri Public Service Commission ("Staff") has limited its review in this report to Union Electric Company, d/b/a Ameren Missouri's ("Ameren Missouri") treatment under its fuel adjustment clause ("FAC") of the costs and revenues associated with its contracts to sell energy to Wabash Valley Power Association ("Wabash") and American Electric Power Operating Companies ("AEP") during the period October 1, 2009, through June 20, 2010. Staff will file another report in this file by February 29, 2012, of its comprehensive prudence review of Ameren Missouri's actions under its fuel adjustment clause for the period October 1, 2009, through May 31, 2011. Staff will not repeat in that report its review, analysis and recommendation presented here.

In this report Staff recommends the Missouri Public Service Commission ("Commission") order Ameren Missouri to refund to its customers in its next fuel and purchased power ("FPA") rate adjustment the aggregate sum of ** _____ **, plus interest accrued at Ameren Missouri's short-term borrowing rate from May 31, 2011 until the amount is refunded. The basis for Staff's recommendation is its conclusion that Ameren Missouri was imprudent for not including in its FAC calculations for adjustment of its FPA rates all the costs and revenues associated with its contracts to sell energy to Wabash and AEP during the period October 1, 2009, through June 20, 2010.

Staff's conclusion regarding Ameren Missouri's prudence with respect to the Wabash and AEP contracts mirrors the conclusion it reached during its FAC prudence review of Ameren Missouri's treatment of the costs and revenues associated with the same contracts during the period March 1, 2009, to September 30, 2009. Staff filed its report for that prudence audit period in File No. EO-2010-0255. There the Commission found Ameren Missouri imprudent and ordered it to refund to its customers \$17,169,838 plus interest accrued at Ameren Missouri's short-term borrowing rate until the \$17,169,838 is refunded.

Background

The Commission first authorized Ameren Missouri to use a FAC in Ameren Missouri's 2008 general electric rate case, File No. ER-2008-0318. (At that time Ameren Missouri was doing business as Ameren UE.) In Ameren Missouri's next two general electric rate cases, File Nos. ER-2010-0036 and ER-2011-0028 the Commission approved and ordered modifications to that FAC.

Missouri statute and Commission rule, Section 386.266.4(4) RSMo (Supp. 2011) and 4 CSR 240-20.090(7), respectively, require prudence reviews of an electric utility's FAC at no less frequently than eighteen-month intervals. This is Staff's second prudence review of Ameren Missouri's FAC. Staff is filing its second prudence review of Ameren Missouri's FAC in two separate reports. In this first report in this file, Staff presents its analysis of how Ameren Missouri treated costs and revenues related to its contracts to sell energy to Wabash and AEP during the third, fourth, and fifth accumulation periods of Ameren Missouri's FAC. In its second report, to be filed by February 29, 2012, Staff will present its analysis of Ameren Missouri's treatment of all other expenses and revenues associated with its FAC for the entirety of its third, fourth, fifth, sixth, and seventh accumulation periods (October 1, 2009 through May 31, 2011).

Ameren Missouri's third FAC accumulation period was October 1, 2009, through January 31, 2010. The fourth accumulation period was February 1, 2010, through May 31, 2010. The fifth accumulation period was June 1, 2010, through September 30, 2010. However, Staff's first report is limited to the period October 1, 2009, through June 20, 2010, because new rates took effect on June 21, 2010, that changed Ameren Missouri's FAC and how the costs and revenues associated with the Wabash and AEP contracts were treated¹.

Ameren Missouri's FAC tariff language that was, and is, in effect for the period October 1, 2009, through June 20, 2010, is the same FAC tariff language that was subject to dispute in File No. EO-2010-0255. On pages 17 to 22 of its April 27, 2011, *Report and Order* in that case the Commission stated the following:

¹ Change referred to is the inclusion of "N" factor in the Original Sheet Nos. 98.8 through 98.14

Decision

The language from Ameren Missouri's tariff that is in question is as follows:

Off-System Sales shall include all sales transactions (including MISO revenues in FERC Account Number 447), excluding Missouri retail sales and long-term full and partial requirements sales, that are associated with (1) AmerenUE Missouri jurisdictional generating units, (2) power purchases made to serve Missouri retail load, and (3) any related transmission.

As explained more fully in the findings of facts section of this report and order, that definition of off-system sales determines what revenue is to be run through the fuel adjustment clause subject to a 95/5 sharing mechanism. Ameren Missouri is able to keep 100 percent of revenue that the definition excludes from off-system sales, which explains the company's desire to exclude revenue derived from the Wabash and AEP sales from off-system sales.

Some confusion was injected into the hearing by Staff's misreading of part of the tariff language. That misreading derives from a confusingly placed comma in the definition. Staff would read the second part of the definition as if there were no comma between "sales" and "that." Thus, the definition would state "excluding Missouri retail sales and long-term full and partial requirements sales that are associated with (1) AmerenUE Missouri jurisdictional generating units, (2) power purchases made to serve Missouri retail load, and (3) any related transmission." In other words, the numbered provisions at the end of the sentence would modify "long-term full and partial requirement sales". However, there is a comma before "excluding" and after "sales", and that creates a parenthetical expression that modifies "all sales transactions" at the start of the sentence.

The intended meaning of the definition would be clearer if it were rearranged as follows:

Off-System Sales shall include all sales transactions (including MISO revenues in FERC Account Number 447) that are associated with (1) AmerenUE Missouri jurisdictional generating units, (2) power purchases made to serve Missouri retail load, and (3) any related transmission, excluding Missouri retail sales and long-term full and partial requirements sales.

Aside from grammatical construction, the correctness of that meaning of the definition is clear because if the numbered provisions at the end of the sentence are taken to be limitations on the exclusion rather than the inclusion, then all sales transactions would be unlimited and off-system sales would be defined as including transactions that are associated with non-Missouri

jurisdictional generating units. That would not be a reasonable interpretation of the definition.

No one questions the exclusion of Missouri retail sales from the definition of off-system sales, but the intended meaning of the exclusion of “long-term full and partial requirements sales” is much less clear. In interpreting the meaning of the phrase “long-term full and partial requirements sales,” the Commission must look first to the plain and ordinary meaning of those words and may look beyond those words only if their meaning is ambiguous. In the context of Ameren Missouri’s sales of electric power to Wabash and AEP, those words are ambiguous. They are not defined anywhere in the tariff and they do not have a plain and ordinary meaning outside the tariff. Therefore, the Commission will attempt to ascertain the intent of Staff, Ameren Missouri, and the other parties when they agreed to this tariff language through their stipulation and agreement.

The parties presented arguments about the tariff language as if there were two provisions to be interpreted, “long-term” and “full and partial requirement sales.” However, the tariff language can best be understood as a single provision, a description of a type of sale that is to be excluded from the definition of off-system sales.

The type of sale to be excluded is described in the Edison Electric Institute and FERC Form 1 definitions as “requirements service.” That is the type of sales contract that Ameren Missouri had entered into with municipal utilities, cooperatives, and other investor owned utilities over the years. It is also a type of sales contract that has become much less common in recent years, as the wholesale electric market has become less regulated.

The key phrase in the definition of “requirements service” is the requirement that the supplier plans to provide such service “on an ongoing basis (i.e. the supplier included projected load for this service in its system planning).” As the wholesale electric market has changed in recent years, Ameren Missouri has moved away from requirements service contracts, leaving only the remnant municipal requirements contracts, which Ameren Missouri intends to not renew when their terms expire.

The tariff’s definition of long-term full and partial requirements sales was not limited to municipal customers, but by the time the parties were negotiating the language of the tariff, those were the only such existing customer contracts that would fall within the definition. That also explains the statement that Lena Mantle testified she heard from a representative of Ameren Missouri during those negotiations. Since the municipal contracts were the only ones in existence at that time that would fall within the definition, it is reasonable to conclude that Ameren Missouri’s employees would name those contracts when asked about the definition of long-term full and partial requirements sales.

Thus, the tariff’s definition of off-system sales was intended to exclude requirements sales of the type exemplified by the existing

requirements sales to the municipalities. The question then becomes, are the Wabash and AEP contracts the sort of requirements sales that fall within the intent of the tariff?

The Commission concludes that the Wabash and AEP contracts are not long-term full or partial requirements contracts as defined by Ameren Missouri's tariff. They simply do not have the characteristics to qualify as such contracts. Ameren Missouri calls them such, but it must stretch the definition beyond the breaking point to do so.

If Ameren Missouri's definition were accepted, nearly any sales contract of over one-year duration would qualify as a long-term full or partial requirements contract that could be excluded from the fuel adjustment clause. Ameren Missouri would be able to choose unilaterally to define an off-system sale out of the fuel adjustment clause and thereby increase its profits at the expense of its ratepayers. Such a broad definition would render the tariff's definition of off-system sales nearly meaningless and would make the fuel adjustment clause extremely one-sided in a way that was not intended by the Commission or by the parties to the stipulation and agreement that presented that tariff language to the Commission for approval. Ameren Missouri describes its contracts with Wabash and AEP as long-term full or partial requirements contracts, but, to paraphrase MIEC's witness, Maurice Brubaker, calling a dog a duck does not make it quack, and calling Ameren Missouri's contracts with Wabash and AEP long-term full or partial requirements contracts does not make them so.

Ameren Missouri also argues that it did not act imprudently in entering into the Wabash and AEP contracts and that nothing it did has harmed ratepayers. On that basis, it argues that the Commission has no basis to find the imprudence necessary to require it to refund money to its ratepayers.

Ameren Missouri bases that argument on the fact that had there been no ice storm and Noranda had not been forced to curtail its production and resulting purchases of electricity, the money Noranda paid to Ameren Missouri would not have been flowed through the fuel adjustment clause and the company would not have had to share 95 percent of that revenue with its ratepayers. Ameren Missouri contends that the revenue it received from the Wabash and AEP contracts merely replaced the revenue it lost from Noranda and therefore, its ratepayers are no worse off than they would have been had there been no ice storm.

Ameren Missouri's argument would however deprive its ratepayers of the benefit of the bargain implicit in the Commission's approval of the fuel adjustment tariff language proposed in the stipulation and agreement among the parties to the rate case, ER-2008-0318. The bargain implicit in the approved fuel adjustment clause is that ratepayers will pay more to help the company when the utility's fuel costs rise or offsetting revenue from off-system sales drop. On the other hand, ratepayers will benefit from decreased rates if fuel costs drop or offsetting revenue from off-system sales increase.

Here offsetting revenue from off-system sales, as those revenues were defined in the tariff, increased and ratepayers should have benefited in the amount of \$17,169,838. However, Ameren Missouri sought to deprive ratepayers of that benefit by branding the Wabash and AEP contracts as long-term full or partial requirements contracts when they do not qualify as such under the terms of the company's tariff. In doing so, Ameren Missouri acted contrary to the requirements of its tariff and therefore acted inappropriately.

The facts here are not materially different from those Staff and the Commission reviewed and considered in File No. EO-2010-0255. In its *Report and Order* in that case the Commission provided the following summary on page 2:

Summary

This order determines that Union Electric Company d/b/a Ameren Missouri acted imprudently, improperly and unlawfully when it excluded revenues derived from power sales agreements with AEP and Wabash from off-system sales revenue when calculating the rates charged under its fuel adjustment clause.

Review Standard

In evaluating prudence, Staff reviews for whether a reasonable person making the same decision would find both the information the decision-maker relied on and the process the decision-maker employed was reasonable based on the circumstances at the time the decision was made, i.e., without the benefit of hindsight. The decision actually made is disregarded and the review is an evaluation, instead, of the reasonableness of the information the decision-maker relied on and the decision-making process the decision-maker employed. If either the information relied upon or the decision-making process employed was imprudent, then an examination is made to determine whether the imprudent decision caused any harm to ratepayers. Only if an imprudent decision resulted in harm to ratepayers, will Staff recommend the Commission find the utility imprudent.

Analysis

The facts and circumstances of Ameren Missouri's energy sales contracts to Wabash and AEP during the period October 1, 2009, through June 20, 2010, are no different than they were for the period March 1, 2009, to September 30, 2009. They were the subject of the Commission's Report and Order in File No. EO-2010-0255 for the period March 1, 2009, to

September 30, 2009, where the Commission found Ameren Missouri was imprudent for excluding the costs and revenues associated with its Wabash and AEP energy sales contracts from its FAC.

Conclusion

Based on its review, Staff concludes Ameren Missouri was imprudent for not including all costs and revenues associated with certain sales of energy to Wabash and AEP during the period of this prudence review in determining adjustments to its FPA rates. With regard to the Wabash and AEP contracts, the facts here are not materially different from those that existed for File No. EO-2010-0255, only the period of time under Ameren Missouri's FAC is different. Staff concludes the Wabash and AEP energy sales during this period should have been treated as off-system sales for purposes of Ameren Missouri's FAC, and, therefore, a total refund amount of \$** _____ ** (\$** _____ ** from accumulation period 3, \$** _____ ** from accumulation period 4, and \$** _____ ** from period 5 (June 1, 2010 through June 20, 2010) which includes interest through May 31, 2011 and should be made to Ameren Missouri electric customers as a result of Ameren Missouri's imprudence.

Recommendation

Staff recommends that the Commission order Ameren Missouri to refund the amount of \$** _____ ** in FPA filing number 8 which is scheduled for December 1, 2011, with a preceding recovery period of February 1, 2012 to September 30, 2012, following a Commission *Order* in this case, and include interest at the Company's short-term borrowing rate from June 1, 2011 through the time the refund is made. The result will then be used in determining the new FPA rates used for calculating the Ameren Missouri FAC charge billed to customers.

*** RIDER FAC****FUEL AND PURCHASED POWER ADJUSTMENT CLAUSE****APPLICABILITY**

This rider is applicable to kilowatt-hours (kWh) of energy supplied to customers served by the Company under Service Classification Nos. 1(M), 2(M), 3(M), 4(M), 5(M), 6(M), 7(M), 8(M), 11(M), and 12(M).

Costs passed through this Fuel and Purchased Power Adjustment Clause (FAC) reflect differences between actual fuel and purchased power costs, including transportation, net of Off-System Sales Revenues (OSSR) (i.e., Actual Net Fuel Costs) and Net Base Fuel Costs (factor NBFC, as defined below), calculated and recovered as provided for herein.

For purposes of this FAC, the true-up year shall be from March 1 through the last day of February of the following year. The Accumulation Periods and Recovery Periods are as set forth in the following table:

<u>Accumulation Period (AP)</u>	<u>Filing Date</u>	<u>Recovery Period (RP)</u>
February through May	By August 1	October through September
June through September	By December 1	February through January
October through January	By April 1	June through May

Accumulation Period (AP) means the historical calendar months during which fuel and purchased power costs, including transportation, net of OSSR for all kWh of energy supplied to Missouri retail customers are determined.

Recovery Period (RP) means the billing months as set forth in the above table during which the difference between the Actual Net Fuel Costs during an Accumulation Period and NBFC are applied to and recovered through retail customer billings on a per kWh basis, as adjusted for service voltage level.

The Company will make a Fuel and Purchased Power Adjustment (FPA) filing by each Filing Date. The new FPA rates for which the filing is made will be applicable starting with the Recovery Period that begins following the Filing Date. All FPA filings shall be accompanied by detailed workpapers supporting the filing in an electronic format.

FPA DETERMINATION

Ninety five percent (95%) of the difference between Actual Net Fuel Costs and NBFC for all kWh of energy supplied to Missouri retail customers during the respective Accumulation Periods shall be reflected as an FPA_c credit or debit, stated as a separate line item on the customer's bill and will be calculated according to the following formulas.

For the FPA filing made by each Filing Date, the FPA_c rate, applicable starting with the Recovery Period following the applicable Filing Date, to recover fuel and purchased power costs, including transportation, net of OSSR, to the extent they vary from Net Base Fuel Costs (NBFC), as defined below, during the recently-completed Accumulation Period is calculated as:

$$FPA_{(RP)} = [(CF + CPP - OSSR - TS - S) - (NBFC \times S_{AP})] \times 95\% + I + R / S_{RP}$$

The FPA rate, which will be multiplied by the voltage level adjustment factors set forth below, applicable starting with the following Recovery Period is calculated as:

$$FPA_C = FPA_{(RP)} + FPA_{(RP-1)} + FPA_{(RP-2)}$$

where:

FPA_C = Fuel and Purchased Power Adjustment rate applicable starting with the Recovery Period following the applicable Filing Date.

FPA_{RP} = FPA Recovery Period rate component calculated to recover under/over collection during the Accumulation Period that ended prior to the applicable Filing Date.

$FPA_{(RP-1)}$ = FPA Recovery Period rate component from prior FPA_{RP} calculation, if any.

$FPA_{(RP-2)}$ = FPA Recovery Period rate component from FPA_{RP} calculation prior to $FPA_{(RP-1)}$, if any.

CF = Fuel costs incurred to support sales to all retail customers and Off-System Sales allocated to Missouri retail electric operations, including transportation, associated with the Company's generating plants. These costs consist of the following:

a) For fossil fuel or hydroelectric plants:

(i) the following costs reflected in Federal Energy Regulatory Commission (FERC) Account Number 501: coal commodity, applicable taxes, gas, alternative fuels, fuel additives, Btu adjustments assessed by coal suppliers, railroad transportation, switching and demurrage charges, railcar repair and inspection costs, railcar depreciation, railcar lease costs, similar costs associated with other applicable modes of transportation, fuel hedging costs (for purposes of factor CF, hedging is defined as realized losses and costs minus realized gains associated with mitigating volatility in the Company's cost of fuel and purchased power, including but not limited to, the Company's use of futures, options and over-the-counter derivatives including, without limitation, futures contracts, puts, calls, caps, floors, collars, and swaps), hedging costs associated with SO2 and fuel oil

adjustments included in commodity and transportation costs, broker commissions and fees associated with price hedges, oil costs, ash disposal revenues and expenses, and revenues and expenses resulting from fuel and transportation portfolio optimization activities; and

(ii) the following costs reflected in FERC Account Number 547: natural gas generation costs related to commodity, oil, transportation, storage, capacity reservation charges, fuel losses, hedging costs, and revenues and expenses resulting from fuel and transportation portfolio optimization activities;

b) Costs in FERC Account Number 518 (Nuclear Fuel Expense).

CPP = Costs of purchased power reflected in FERC Account Numbers 555, 565, and 575, excluding MISO administrative fees arising under MISO Schedules 10, 16, 17, and 24, and excluding capacity charges for contracts with terms in excess of one (1) year, incurred to support sales to all Missouri retail customers and Off-System Sales allocated to Missouri retail electric operations. Also included in factor "CPP" are insurance premiums in FERC Account Number 924 for replacement power insurance (other than relating to the Taum Sauk Plant) to the extent those premiums are not reflected in base rates. Changes in replacement power insurance premiums (other than those relating to the Taum Sauk Plant) from the level reflected in base rates shall increase or decrease purchased power costs. Additionally, costs of purchased power will be reduced by expected replacement power insurance recoveries (other than those relating to the Taum Sauk Plant) qualifying as assets under Generally Accepted Accounting Principles. Notwithstanding the foregoing, concurrently with the date the "TS" factor is eliminated as provided for in this tariff, the premiums and recoveries relating to replacement power insurance coverage for the Taum Sauk Plant shall be included in this CPP Factor.

OSSR = Revenues from Off-System Sales allocated to Missouri electric operations.

Off-System Sales shall include all sales transactions (including MISO revenues in FERC Account Number 447), excluding Missouri retail sales and long-term full and partial requirements sales, that are associated with (1) AmerenUE Missouri jurisdictional generating units, (2) power purchases made to serve Missouri retail load, and (3) any FILED related transmission.

* RIDER FAC

FUEL AND PURCHASED POWER ADJUSTMENT CLAUSE (CONT'D.)

- TS = The Accumulation Period value of Taum Sauk. This factor will be used to reduce actual fuel costs to reflect the value of Taum Sauk, and will be credited in FPA filings (of which there are three each year as shown in the table above), until the next rate case or, if sooner, until Taum Sauk is placed back in service. This value is \$22.7 million annual for each true-up year as determined in the rate proceeding in which this FAC was established, one third of which (i.e., \$7.56 million) will be applied to each Accumulation Period.
- S = The Accumulation Period value of Blackbox Settlement Amount of \$3 million annually, which shall expire on September 1, 2010. One third of the annual value (\$1 million) shall be applied to each Accumulation Period. For the Accumulation Period during which the factor expires, the factor shall be prorated according to the number of days during which it was effective during that Accumulation Period.
- I = Interest applicable to (i) the difference between Actual Net Fuel Costs (adjusted for Taum Sauk and factor "S") and NBFC for all kWh of energy supplied to Missouri retail customers during an Accumulation Period until those costs have been recovered; (ii) refunds due to prudence reviews (a portion of factor R, below); and (iii) all under- or over-recovery balances created through operation of this FAC, as determined in the annual true-up filings provided for herein (a portion of factor R, below). Interest shall be calculated monthly at a rate equal to the weighted average interest rate paid on the Company's short-term debt, applied to the month-end balance of items (i) through (iii) in the preceding sentence.
- R = Under/over recovery (if any) from currently active and prior Recovery Periods as determined for the annual FAC true-up adjustments, and modifications due to adjustments ordered by the Commission (other than the adjustment for Taum Sauk as already reflected in the TS factor), as a result of required prudence reviews or other disallowances and reconciliations, with interest as defined in item I.
- S_{AP} = Supplied kWh during the Accumulation Period that ended prior to the applicable Filing Date, at the generation level.
- S_{RP} = Applicable Recovery Period estimated kWh, at the generation level, subject to the FPA_{RP} to be billed.

* Indicates Addition.

* RIDER FACFUEL AND PURCHASED POWER ADJUSTMENT CLAUSE (CONT'D.)

NBFC = Net Base Fuel Costs are the net costs determined by the Commission's order as the normalized test year value (and reflecting an adjustment for Taum Sauk, consistent with the term TS) for the sum of allowable fuel costs (consistent with the term CF), plus cost of purchased power (consistent with the term CPP), less revenues from off-system sales (consistent with the term OSSR), less an adjustment (consistent with the term "S"), expressed in cents per kWh, at the generation level, as included in the Company's retail rates. The NBFC rate applicable to June through September calendar months ("Summer NBFC Rate") is 1.001 cents per kWh. The NBFC rate applicable to October through May calendar months ("Winter NBFC Rate") is 0.690 cents per kWh.

To determine the FPA rates applicable to the individual Service Classifications, the FPA_c rate determined in accordance with the foregoing will be multiplied by the following voltage level adjustment factors:

Secondary Voltage Service	1.0888
Primary Voltage Service	1.0492
Large Transmission Voltage Service	1.0147

The FPA rates applicable to the individual Service Classifications shall be rounded to the nearest 0.001 cents, to be charged on a cents/kWh basis for each applicable kWh billed.

TRUE-UP OF FAC

After the completion of each true-up year, the Company will make a true-up filing by May 1 of each year (starting by May 1, 2010) with the Commission. Such filings shall be made by May 1 of every subsequent year until all fuel and purchased power costs accumulated during the effective period of the FAC have been recovered and true-up. Any true-up adjustments or refunds shall be reflected in item R above, and shall include interest calculated as provided for in item I above.

The true-up adjustment shall be the difference between the revenues billed and the revenues authorized for collection during the true-up year.

GENERAL RATE CASE/PRUDENCE REVIEWS

The following shall apply to this Fuel and Purchased Power Adjustment Clause, in accordance with Section 386.266.4, RSMo. and applicable Missouri Public Service Commission Rules governing rate adjustment mechanisms established under Section 386.266, RSMo:

The Company shall file a general rate case with the effective date of new rates to be no later than four years after the effective date of a Missouri Public Service Commission order implementing or continuing this Fuel and
