## **SYMBOLS**

The following symbols are used for the purposes indicated below:

- C** - Changed regulation.
- D** - Delete or discontinue.
- I** - Increase in a rate.
- M** - Moved from another tariff location.
- N** - New.
- R** - Reduction in a rate.
- T** - Change in text but no change in rate or regulation.

## TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially by section. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1.A
  - 2.1.1.A.1
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a).I
  - 2.1.1.A.1.(a).I.(i)
  - 2.1.1.A.1.(a).I.(i).1
- D. **Check Sheets** - When a tariff filing is made with the PSCM, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made (i.e., the format, etc. remain the same, just revised revision levels on some pages. The tariff user should refer to the latest Check Sheet to determine if a particular sheet within the tariff is the most current on file with the PSCM.

Line blocking Customers can unblock their calling name and/or number information on a per call basis, at no charge, by dialing an access code (\*82 on their Touch-Tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. The blocking of CPN will not be provided on calls originating from Customer-Owned Pay Telephone Service. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

The Company shall not be liable for any claims for damages caused or claimed to have been caused, directly, by the transmission to a Caller ID Customer of a name or telephone number which the calling party of the Caller ID Customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator-handled calls.

## **SECTION 2 - DESCRIPTION OF SERVICE, CONT.**

### **2.5 Operator-Assisted Services, cont.**

#### **2.5.1 Operator Dialed Surcharge**

This surcharge applies to Operator Station and Person-to-Person rated calls when the Customer has the capability of dialing all the digits necessary to complete a call, but elects to dial only the appropriate operator code and requests the operator to dial the called station. The surcharge does not apply to:

- A. Calls where a Customer cannot otherwise dial the call due to defective equipment or trouble on the Navigator Telecommunications, LLC. network; and

The Operator Dialed Surcharge applies in addition to any other applicable operator charges.

#### **2.5.2 Busy Line Verify and Line Interrupt Service**

Upon request of a calling party, the Company will verify a busy condition on a called line. The operator will determine whether the line is clear or in use and report its status to the calling party. The operator will interrupt the call on the called line only if the calling party indicates an emergency and requests interruption.

A charge will apply when:

- A. The operator verifies that the line is busy with a call in progress;
- B. The operator verifies that the line is available for incoming calls; or
- C. The operator verifies that the called number is busy with a call in progress and the Customer requests interruption. The operator will then interrupt the call, advising the called party of the name of the calling party. One charge will apply for both verification and interruption.

Call Trace	NST	6.00

Customers receiving annoying or anonymous calls may request (1) a telephone number change, which will be provided at no charge by Navigator or (2) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the Customer to dial a code (\*57) to automatically request that the following information be recorded:

- (a) the originating telephone number
- (b) the date and time of the call
- (c) the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will activate a voice response script and assist the Customer in establishing an open file. Should the Customer decide to prosecute the call originating party, the Customer should contact Navigator for further instructions. Activation of Call Trace never authorizes Navigator to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's line.
