1	PROCEEDINGS
2	(Written Entries of Appearance filed.)
3	(EXHIBIT NOS. 1 THROUGH 47 WERE MARKED FOR
4	IDENTIFICATION.)
5	JUDGE RUTH: Good morning. My name is Vicky
6	Ruth, and I'm the Regulatory Law Judge assigned to
7	this case. Today is Monday, January 14, 2002. We are
8	here for a hearing in TO-2002-222 in the matter of the
9	petition of MCImetro Access Transmission Services,

- 10 L.L.C., Brooks Fiber Communications of Missouri, Inc.,

and MCI WorldCom Communications, Inc. for arbitration

- 12 of an interconnection agreement with Southwestern Bell
- 13 Telephone Company under the Telecommunications Act of
- 14 1996.

11

- I want to start with entries of appearance,
- 16 please. And for the MCI parties, I'm going to refer
- 17 to you as WCOM, since most of your pleadings do. Is
- 18 that acceptable?
- 19 MR. LUMLEY: That's fine.
- 20 JUDGE RUTH: Or do you prefer WorldCom?
- 21 MR. LUMLEY: Whatever you're comfortable
- 22 with.
- JUDGE RUTH: We'll probably do WCOM then.
- 24 Okay?
- 25 And you may start.

- 1 MR. LUMLEY: Good morning, your Honor. I'm
- 2 Carl Lumley. I'm joined today by my partner Lee
- 3 Curtis, with the Curtis, Oetting law firm, 130 South
- 4 Bemiston, Suite 200, Clayton, Missouri, 63105.
- 5 And also Steve Morris with WorldCom, and
- 6 we've got a pending entry of appearance for him. He's
- 7 a member of the Texas Bar.
- 8 JUDGE RUTH: All right. Before we move on,
- 9 the pending entry of appearance for Mr. Morris -- you
- 10 said he's a member of the Texas Bar. I assume there
- 11 will be no objections to his appearance in this case?
- MR. LANE: No.
- MR. BATES: No.
- 14 JUDGE RUTH: That motion is granted and his
- 15 appearance is noted for the record.
- 16 Southwestern Bell?
- 17 MR. LANE: Thanks, your Honor.
- 18 Paul Lane, representing Southwestern Bell
- 19 Telephone LP, doing business as Southwestern Bell
- 20 Telephone Company. My address is One SBC Center,
- 21 Room 3520, St. Louis, Missouri, 63101.
- 22 Also appearing with me is Mimi MacDonald of
- 23 my office, and we have filed an entry of appearance
- 24 for Mr. Kridner who is a member of the Texas Bar. And
- 25 I spoke with the parties this morning, and I

- 1 understand they don't have an objection to
- 2 Mr. Kridner's appearance in this case.
- JUDGE RUTH: Thank you.
- 4 And I received a copy this morning, then, of
- 5 Southwestern Bell's entry of appearance for
- 6 Mr. Kridner from Texas. And, again, I assume there
- 7 are no objections, then, to his entry?
- 8 MR. LUMLEY: No objection.
- 9 MR. BATES: No objection.
- 10 JUDGE RUTH: Okay. That motion is granted,
- 11 and his entry of appearance is also noted in the
- 12 record.
- 13 Staff?
- 14 MR. BATES: Thank you, your Honor.
- 15 Bruce Harrison Bates appearing for Staff of
- 16 the Missouri Public Service Commission. My address is
- 17 Post Office Box 360, Jefferson City, Missouri,
- 18 65102-0360.
- 19 JUDGE RUTH: Thank you.
- 20 I wanted to spend just a few minutes talking
- 21 about procedure and some pending motions.
- We will have brief opening statements. They
- 23 will be limited to 20 minutes per party. WorldCom
- 24 will start, followed by Southwestern Bell and then
- 25 Staff.

- 1 As the parties know, there was an order
- 2 issued January 11th dealing with time limitations on
- 3 cross-examination. The parties had filed a request to
- 4 amend the procedural schedule. The procedural
- 5 scheduled had provided cross was limited to ten
- 6 minutes per party per witness, and the motion filed by
- 7 Southwestern Bell, WorldCom, and Staff had indicated
- 8 more time was desirable.
- 9 The parties followed up -- at least WorldCom
- 10 and Southwestern Bell followed up with actual
- 11 estimates of the amount of time they wanted per party.
- 12 However the parties wanted to bank whatever minutes
- 13 they did not use on one witness and use those for
- 14 another witness.
- The Commission issued an order on
- 16 January 11th denying that portion of the request.
- 17 There will be no banking, but allowing the parties to
- 18 have additional time, and the additional time is to be
- 19 equal to the amount filed in those estimates.
- This brings me to WorldCom's time estimates
- 21 indicated that WorldCom wanted to use zero minutes for
- 22 cross-examination of witnesses Averan (sic) -- is that
- 23 the correct pronunciation?
- MR. LUMLEY: Avera.
- JUDGE RUTH: Averan (sic)?

- 1 MR. LUMLEY: Avera.
- 2 JUDGE RUTH: -- Avera and Naughton. And
- 3 instead want to submit the cross-examination portion
- 4 of the transcript from Case No. TO-2001-438. Is that
- 5 correct?
- 6 MR. LUMLEY: Yes, your Honor.
- 7 JUDGE RUTH: Okay. As the notice -- or the
- 8 order that went out on Friday did not approve that
- 9 request. It just made note of it and said it would be
- 10 taken up at today's hearing. That's what I want to do
- 11 now
- 12 WorldCom, I would like you to explain in a
- 13 little more detail then your proposal, and one of the
- 14 things I'm concerned about is whether every portion of
- 15 that transcript you are intending to offer deals
- 16 specifically with the issues here or if portions of it
- 17 will need to be stricken for relevancy.
- MR. LUMLEY: Your Honor, it's our
- 19 understanding that Southwestern Bell has submitted in
- 20 this case the same cost studies that are at issue in
- 21 the 438 case, and this is described in a little more
- 22 detail in Mr. Turner's testimony as he responds to
- 23 them. And because of that duplication, rather than go
- 24 over the same questions again that were just done, you
- 25 know, roughly a month ago in front of the Commission

- 1 and took a full week to accomplish, we just propose to
- 2 submit those transcripts. And each time I will note
- 3 for the record the specific portions of the
- 4 transcripts that I'm offering -- that I'm offering.
- 5 What I've done is copy for each witness
- 6 their full appearance. I included Southwestern Bell's
- 7 redirect if there was any. I'm not going to offer
- 8 that, but on the assumption they might, I went ahead
- 9 and copied that so it would all be in one place.
- 10 So there really should not be any relevancy
- 11 issue because we're talking about the same cost
- 12 studies that are at issue in both proceedings.
- JUDGE RUTH: How lengthy are the portions
- 14 that you are intending to offer for each of the two?
- 15 MR. LUMLEY: For those two, Dr. Avera's runs
- 16 about 50 pages. Mr. Naughton's is about 12 or 13.
- 17 And, additionally, beyond those witnesses, I intend to
- 18 offer the transcripts for the other costs witnesses as
- 19 well from that case; although, I also have questions
- 20 with regard to their specific testimony in this
- 21 proceeding as well because they do go beyond -- this
- 22 case goes beyond those cost studies as well.
- JUDGE RUTH: Okay. Thank you.
- 24 Southwestern Bell, would you like to
- 25 respond?

- 1 MR. LANE: Thank you, your Honor.
- 2 Excuse me. I think probably the appropriate
- 3 use of the transcripts from another case is to impeach
- 4 the witness if the answer elicited on
- 5 cross-examination in this case is different. I think
- 6 it is not proper to introduce the transcripts from the
- 7 other case because the issues don't line up as
- 8 identical, contrary to Mr. Curtis -- I'm sorry --
- 9 Mr. Lumley's position.
- 10 In the 438 case with regard to Dr. Avera, he
- 11 testified on cost of capital, and in that case there
- 12 was competing proposals on cost of capital that had
- 13 been advanced by Staff through the testimony of
- 14 Dr. Johnson and by the joint sponsors in that case, a
- group of CLECs, that was proposed by Mr. Hirshleifer,
- 16 so the cross-examination in that case and the
- 17 questions from the bench in that case to Dr. Avera
- 18 related not only to his testimony of cost of capital
- 19 in that case but also to questions about the Staff's
- 20 recommendation on cost of capital and the joint
- 21 sponsors' recommendation on cost of capital.
- There are no competing cost of capital
- 23 proposals in this case, and it's inappropriate to try
- 24 to bootstrap to get into the record in this case
- 25 without presenting a witness in this case through

- 1 those cross-examination questions.
- The same thing is true for Mr. Naughton.
- 3 His testimony goes to the propriety of the
- 4 depreciation rates that are inherent in Southwestern
- 5 Bell's cost studies that have been submitted in this
- 6 case. And, again, in that case there were competing
- 7 positions advanced by the parties concerning what are
- 8 the appropriate depreciation rates to be utilized.
- 9 No testimony is present in this case from
- 10 any of the parties about what are the appropriate
- 11 depreciation rates, so we have a mismatch of the
- 12 issues in this case that, in my view, make it improper
- 13 to use the transcript and submit those as evidence in
- 14 this case.
- 15 If those were affirmative pieces of evidence
- 16 that WorldCom wanted to introduce, it was incumbent
- 17 upon them under the procedures that the Commission
- 18 adopted to include those in their testimony in this
- 19 case. It is not appropriate at this time -- it is
- 20 appropriate, I think, to use them for purposes of
- 21 impeachment. If they ask questions of the witness
- 22 here and get a different answer than the 438 case,
- 23 obviously, they can use those for impeachment
- 24 purposes.
- 25 JUDGE RUTH: Let me ask you, you mentioned

- 1 that the transcript for both of the witnesses, those
- 2 two witnesses, includes issues that are not part of
- 3 this case. Is it possible to strike the portions of
- 4 the transcript that deal with the other issues and
- 5 admit the portions?
- 6 MR. LANE: I don't believe so, your Honor,
- 7 because we had in that case competing proposals for
- 8 depreciation rates and competing proposals for cost of
- 9 capital, and the questions involved comparing the two
- 10 and analyzing the two. And I don't think it's
- 11 possible to separate out those portions in that case
- 12 because that was the thrust of the case was which one
- 13 of these should we adopt. There is no proposal here
- 14 to adopt anything other than Southwestern Bell's cost
- 15 of capital, for example.
- 16 JUDGE RUTH: Would you like to respond?
- MR. LUMLEY: Yes, your Honor.
- 18 First of all, I disagree with the
- 19 characterization that the issues are different.
- 20 Certainly, there were different witnesses because
- 21 WorldCom was not the only CLEC party to that case and
- 22 there were other witnesses in that case, but the
- 23 issues are identical. The cost studies submitted are
- 24 identical.
- 25 And, in fact, both Staff and WorldCom's

- 1 testimony suggests that the Commission simply wait for
- 2 the decision in the 438 case on those cost studies and
- 3 apply the same results here, but not knowing whether
- 4 the Commission will be comfortable doing that or
- 5 whether it feels it must make some kind of independent
- 6 decision on the studies in the two cases at the same
- 7 time, we wanted to offer that testimony.
- 8 I also disagree with the representation that
- 9 prior testimony of an opposing party can only be used
- 10 for impeachment purposes. While that's certainly a
- 11 valid purpose this testimony is independently
- 12 admissible as the prior testimony of Southwestern Bell
- 13 and its specific sponsored witnesses.
- 14 MR. LANE: Let me make one brief response,
- 15 if I could.
- 16 There was no contention in what Mr. Lumley
- 17 said about what I said earlier; that is, there is no
- 18 competing proposal on cost of capital in this case.
- 19 There is no competing proposal on depreciation rates
- 20 in this case. There is no -- no disagreement as to
- 21 that. That is what the cost examination in that case
- 22 was focused on.
- 23 And to the extent that Mr. Lumley says you
- 24 can introduce something independently of that, to the
- 25 extent that's true -- and I don't believe it is true

- 1 in Missouri. It may be true in federal court, but not
- 2 in Missouri -- that is proper under the Commission's
- 3 rules only if it's introduced as part of the direct
- 4 case of WorldCom, and they did not attach it to any of
- 5 their testimony in this case, and so it can't properly
- 6 come in now even under that theory.
- JUDGE RUTH: Please respond.
- 8 MR. LUMLEY: Very briefly, your Honor, this
- 9 is not part of our direct case. This is not part of
- 10 our witnesses' rebuttal case. This is additional
- 11 cross-examination of Southwestern Bell's witnesses,
- 12 and the hearing is the opportunity to offer
- 13 cross-examination.
- 14 Further, I think the Commission will find
- 15 when they look at these transcripts that it contains
- 16 appropriate testing and probing of Southwestern Bell's
- 17 witnesses' positions on these cost studies. And the
- 18 matters that Mr. Lane is referring to with regard to
- 19 other witnesses I think simply goes to the weight that
- 20 the Commission might attribute to a particular
- 21 question and answer.
- 22 In particular, with regard to cost of
- 23 capital, you would find that the questions, you know,
- 24 challenge the witness as to whether his position is
- 25 correct as compared to other people's thoughts.

- 1 Whether those thoughts are in the record or not, he is
- 2 an expert witness. He's allowed to rely on evidence
- 3 that's not in the record in reaching his opinions, and
- 4 we're allowed to test those opinions with regard to
- 5 information that's not within the record.
- 6 So I don't think there is anything
- 7 inappropriate in these transcripts. I think the
- 8 Commission is certainly experienced enough in dealing
- 9 with cost study matters to be able to attribute
- 10 whatever weight it deems appropriate to this
- 11 cross-examination. And I just -- it seems to me more
- 12 efficient to just submit this so the Commission has it
- 13 so they have the flexibility to do what it is they
- 14 want to do with these cost studies that are at issue
- 15 in two cases simultaneously. The briefs are going to
- 16 be submitted simultaneously, and these cases are going
- 17 to be under submission simultaneously.
- 18 JUDGE RUTH: Can you explain to me again,
- 19 then, why you cannot cross-examine the witness here
- 20 today, why you need to use the testimony from the
- 21 other case? What is it in that other case that you
- 22 don't have here to do the cross-examination here?
- MR. LUMLEY: A couple observations, your
- 24 Honor. First of all, there was a specific set of cost
- 25 studies at issue in this case. It involved setting

- 1 permanent rates for rates that were interim in the
- 2 Missouri 271 agreement. Southwestern Bell has made
- 3 many more cost studies and rates that are at issue in
- 4 this case in its response to our petition.
- 5 That case took a full week to try, and we're
- 6 talking about a case with a larger scope of issues.
- 7 In the case of Dr. Avera, I conducted -- just my
- 8 cross-examination, I believe, it took well over an
- 9 hour. There were not the kind of time limits that
- 10 we're talking about in this case with regard to
- 11 cross-examination.
- 12 This seemed to me to be the most efficient
- 13 way to get this information before the Commission
- 14 without using up a lot of time during this hearing.
- 15 The Commission has already spent a week listening to
- 16 cross-examination of these witnesses. I think it is
- 17 really just a matter that if the Commission wants to
- 18 be able to refer to something from that other case,
- 19 you know, it will be in front of them and in the
- 20 record.
- 21 As I indicated, both WorldCom and Staff have
- 22 suggested that the Commission make its decision in the
- other case and simply use it here, but, obviously, we
- 24 can't control which way the Commission decides to
- 25 approach this matter.

- 1 JUDGE RUTH: And when is a decision expected
- 2 in the other case?
- 3 MR. LUMLEY: As I said, the briefing
- 4 schedules in these two cases are very close. I mean,
- 5 I think the reply brief in this case actually gets
- 6 submitted shortly before the reply brief in the other
- 7 one. But both cases will be submitted to the
- 8 Commission at almost exactly the same time.
- 9 JUDGE RUTH: You have not forgotten, though,
- 10 the Commission is committed to issuing --
- MR. LUMLEY: No.
- 12 JUDGE RUTH: -- a decision in this case
- 13 prior to March 1st.
- MR. LUMLEY: I understand that. And that's
- 15 part of -- of our concern, is that the Commission is
- 16 in that time bind where it doesn't have the time limit
- in the 438 case, because that's a generic proceeding.
- 18 JUDGE RUTH: We can't necessarily wait on
- 19 that case.
- 20 MR. LUMLEY: Which is why I want you to have
- 21 the information in this case as well.
- 22 JUDGE RUTH: I want to make sure understand.
- 23 There is really two issues then. One is you think
- 24 there is additional information in the transcript from
- 25 the other case that you want to put into this case,

- 1 and then number two is an efficiency argument.
- 2 If you had no time restraints on your
- 3 cross-examination of these two witnesses, would you be
- 4 able to get the material in that you need?
- 5 MR. LUMLEY: I could certainly read the
- 6 questions and expect to get the same answers back,
- give or take a word or two, but, I mean, those
- 8 transcripts alone would consume the week.
- 9 JUDGE RUTH: Well, I thought you said there
- 10 were only 50 pages --
- 11 MR. LUMLEY: That was just for those two
- 12 witnesses.
- JUDGE RUTH: Right. We're on those two
- 14 witnesses now.
- MR. LUMLEY: Sorry.
- JUDGE RUTH: Let me make sure I understand.
- 17 You're referring to not just these two witnesses, but
- 18 all of the witnesses you intend to cross-examine. You
- 19 want to cross-examine them and also offer --
- 20 MR. LUMLEY: The transcripts.
- 21 JUDGE RUTH: -- the transcripts from that
- 22 other --
- MR. LUMLEY: And we're just speaking about
- 24 the cost witnesses where we have this overlap of
- 25 these -- some -- I forget the number. I think it's

- 1 like 35 cost studies that are going to be submitted in
- 2 both proceedings at the same time.
- 3 JUDGE RUTH: And so if you were to
- 4 cross-examine on all of those cost witnesses, you
- 5 think it would take up to a week?
- 6 MR. LUMLEY: If there weren't time limits.
- 7 JUDGE RUTH: If there weren't time limits.
- 8 MR. LUMLEY: We tried that case in a very
- 9 efficient manner, you know, with typically only one
- 10 CLEC attorney asking questions of a witness. There
- 11 was a few exceptions to that, but it was a fairly
- 12 efficiently tried case despite there being many more
- 13 parties than in this case, but it took a full week.
- JUDGE RUTH: Mr. Lane?
- 15 MR. LANE: Your Honor, I'm going respond in
- 16 a couple of ways.
- 17 That case involved, again, not -- you go
- 18 beyond the cost of capital and the depreciation
- 19 witnesses, and we're talking about cost witnesses in
- 20 that case. The same issue that I raised before
- 21 applies as well. In that case there were competing
- 22 cost studies that were advanced by WorldCom and the
- 23 other CLEC witnesses that aren't involved in this
- 24 case, aren't presented in this case. So we have the
- 25 same mismatch of issues here.

- 1 The second point I would like to make is
- 2 that we're both under -- all parties are under time
- 3 limits that the Commission has imposed, and while we
- 4 are happy that the Commission granted some additional
- 5 time to conduct cross-examination, permitting WorldCom
- 6 to have additional time for cross-examination through
- 7 the introduction of transcripts from the other case
- 8 places us at a disadvantage because we don't have the
- 9 equal opportunity, then, to have the same week of
- 10 cross-examination that Mr. Lumley indicates that he
- 11 would like to have.
- 12 So it's not appropriate if we're going to
- 13 have limitations on that -- on cross-examination for
- 14 us to be under that burden and be treated in an
- 15 unequal manner. So I think that's inappropriate for
- 16 this case.
- 17 Again, if these things were something that
- 18 they wanted to introduce as part of their direct case,
- 19 the arbitration rules that the Commission adopted said
- 20 they need to put them in their Direct Testimony,
- 21 attach them to it, and we could have saved ourselves
- 22 this argument. We would argue about the relevancy of
- 23 it, but not whether it would be treating the parties
- 24 unequally from a cross-examination perspective.
- JUDGE RUTH: Mr. Lumley, why is it your

- 1 parties did not submit this as part of your Direct
- 2 Testimony? You mentioned it's additional information
- 3 that's not been prefiled. Why was it not prefiled as
- 4 part of your case?
- 5 MR. LUMLEY: Your Honor, this is not our
- 6 testimony. This is cross-examination of Southwestern
- 7 Bell's witnesses, and I'm submitting it as
- 8 cross-examination. I'm not submitting it as our
- 9 direct case. I'm not submitting it as our rebuttal.
- 10 It's simply the testing of Southwestern Bell's
- 11 testimony.
- 12 And I would point out that Mr. Turner is our
- 13 cost study witness. He was the cost study witness in
- 14 the 438 case, and Southwestern Bell has the same
- 15 opportunity to use that transcript. I don't have any
- 16 problem with them doing it. I don't have any problem
- 17 with them doing it later in the hearing if they are
- 18 not prepared to do it today. But he is the same
- 19 witness, and, in fact, attached his Rebuttal Testimony
- 20 from that case as a schedule to his testimony in this
- 21 case.
- 22 Further, just so the record is clear, I put
- 23 Southwestern Bell on notice of this plan well before
- 24 the filing of the time schedules where I notified the
- 25 Commission of this plan.

- 1 MR. LANE: Just to be clear, there is still
- 2 a mismatch of the issues. Mr. Turner was a witness in
- 3 that case, but he was certainly not the only witness
- 4 in that case. His testimony in that case said he
- 5 relied upon the cost of capital that was submitted by
- 6 Mr. Hirshleifer who is not a party to this case and
- 7 there is no cost of capital in this case proposed by
- 8 other parties.
- 9 He relied upon the depreciation rates, labor
- 10 rates, and support and other factors that were
- 11 introduced by Mr. Rhinehart in that prior case. He's
- 12 not a witness in this case. There is not a -- there
- 13 is not a matching of the issues. And I would also
- 14 point out that to the extent that Mr. Turner made some
- 15 proposals in that 438 case, the specific adjustments
- 16 that he proposed to the Southwestern Bell cost studies
- 17 aren't even a part of this case. That's not attached
- 18 to his testimony in this case as an exhibit. He
- 19 attached just a nonproprietary version without all of
- 20 the adjustments. So, again, there is not a matching
- 21 of the issues between that case and this one.
- JUDGE RUTH: Okay. Thank you.
- 23 Mr. Bates, I'm actually going to put you on
- 24 the spot here for a minute, and if you need to think
- 25 about my question, we can take a break.

- 1 Have you had a chance to review the
- 2 transcripts for at least these two witnesses, Avera
- 3 and Naughton? Are you familiar with their content?
- 4 MR. BATES: No, your Honor, we have not.
- 5 It's been the -- it is Staff's position on
- 6 this issue, however, that we do not object to the
- 7 transcript coming in, but we would prefer that it be
- 8 the entire transcript and not simply selected parts.
- 9 JUDGE RUTH: The entire transcript for that
- 10 witness or for the entire hearing?
- 11 MR. BATES: For those witnesses.
- 12 JUDGE RUTH: Okay. My question is, I want
- 13 to know from Staff's perspective, is there a matching
- 14 of the issues or is there not a matching of the
- 15 issues? Is it bringing in additional elements that
- 16 were not brought out in the prefiled testimony? And I
- 17 don't know if that's something that you can look at on
- 18 a break and give me an idea of what you think or not.
- 19 I will --
- 20 MR. BATES: We'd like to have the
- 21 opportunity to look at it once again after a break.
- 22 Thank you.
- JUDGE RUTH: Okay. What I'm going to do is
- 24 table this discussion for now. I want to move on to a
- 25 few more issues. Then we will take a break off the

- 1 record, and that will also give you an opportunity to
- 2 look at it.
- I want to have a copy, and I can mark it for
- 4 identification purposes only at this point of the two
- 5 transcripts that we're taking -- or that we're talking
- 6 about. But we will move on.
- 7 I believe there is an older pending motion
- 8 from December 19, 2001, where Southwestern Bell filed
- 9 a Motion to File Direct Testimony after December 18,
- 10 and also Southwestern Bell filed a Motion to File
- 11 Schedule 2 attached to the Direct Testimony of
- 12 Thomas F. Hughes after December 18th. Those pending
- 13 motions are both granted.
- On January 8, 2002, Southwestern Bell filed
- 15 a Motion to File the Rebuttal Testimony of June
- 16 Burgess out of time. This motion is also granted.
- I wanted to ask the parties to explain to me
- 18 what changes they propose in the witness schedule as
- 19 far as it's been suggested that one of the witnesses
- 20 at least is not available on the time they were
- 21 scheduled to come. I wanted you-all to explain that
- 22 to me so I can make a note now.
- 23 I'll start with -- Mr. Lane, did you have a
- 24 witness that is not available as scheduled?
- 25 MR. LANE: I think all of our witnesses are

- 1 here now for the case except for Miss Rogers, Jan
- 2 Rogers, who is scheduled, I believe, for Thursday.
- 3 And what she has -- I'm sorry. She's scheduled for
- 4 Friday.
- 5 She has a commitment on Thursday, and what
- 6 we'd asked is to have her moved up to Wednesday, and
- 7 the parties didn't have an objection to that, to take
- 8 her out of turn. My thought was -- is that we may
- 9 well, I hope, finish by Thursday, and we don't want to
- 10 stay around for her to show up on Friday, and that was
- 11 the purpose of that motion.
- 12 With regard to generally, I guess we would
- 13 like, your Honor, to have the understanding that after
- 14 each witness testifies we would ask to have them
- 15 excused. We have some witnesses who after they
- 16 testify have other commitments. I think that goes for
- 17 WorldCom as well.
- 18 JUDGE RUTH: And that's a fair request, but
- 19 what I'll need to do is address each witness
- 20 separately, because there are some that the
- 21 Commissioners have indicated they may want to recall.
- 22 Okay? So at the conclusion of each witness you can
- 23 ask, and I'll verify with the Commissioners if they
- 24 are finished with that particular witness.
- 25 MR. LANE: Okay. Do you know now, your

- 1 Honor, which ones those might be so that we can try to
- 2 see what we can do in terms of scheduling.
- JUDGE RUTH: I don't believe I'm at liberty
- 4 to say without checking with the particular
- 5 Commissioner, so I'll see if I can find more
- 6 information before the day is out. Perhaps after
- 7 lunch we can address that again.
- 8 MR. LANE: Okay. Thanks.
- 9 JUDGE RUTH: Is Ms. Rogers the only witness
- 10 that needs to be taken out of order as far as you know
- 11 at this point?
- 12 MR. LANE: Yes.
- 13 JUDGE RUTH: Okay. We will plan on taking
- 14 her on Wednesday. If there are other changes that
- 15 come up, please let me know as soon as you find out.
- I also want to ask the parties, the witness
- 17 schedule notes that some witnesses will testify on
- 18 more than one issue or one area. When a party is
- 19 doing the cross-examination, the Commissioners have
- 20 requested that, if you can, point out that you are
- 21 moving to a new line of cross-examination, a new area.
- 22 That would aid them as they are viewing the
- 23 transcript. Does that make sense?
- I mean, you may not always be able to. Some
- 25 issues overlap. But when you can point out that we

- 1 are now moving to a different issue, please do so.
- 2 Southwestern Bell filed a Motion to Strike
- 3 Issues 49 and 50 on January 3rd. WorldCom's Response
- 4 was filed on January 9th.
- 5 Do the parties have anything in addition to
- 6 what they have filed on this issue?
- 7 MR. LANE: No, your Honor.
- 8 JUDGE RUTH: No. Okay. World-- I'm sorry.
- 9 Southwestern Bell's Motion to Strike Issues
- 10 49 and 50 is denied. Those issues will remain as part
- 11 of the case.
- 12 On January 9, WorldCom and Southwestern Bell
- 13 filed a Joint Motion to Correct the Decision Point
- 14 List. WorldCom requests changes regarding its
- 15 position on issues 24 and 47. Southwestern Bell
- 16 requests corrections with respect to its witness
- 17 information for issues 12 and 30 and also requests
- 18 changes to its Position Statement on issues 24 and 47.
- 19 That motion to correct the decision point
- 20 list is granted, and the record will so note.
- 21 I assume the parties did not plan on filing
- 22 a substitute document; is that true?
- MR. LANE: That's correct.
- MR. LUMLEY: Correct.
- 25 JUDGE RUTH: Then that will just be filed

- 1 with that decision point list.
- Okay. On January 9th the Commission issued
- 3 an order directing Staff to make a filing on some
- 4 questions that it had regarding attachment 26 to the
- 5 M2A. Staff complied with that request very quickly,
- 6 filed their response on January 11th, 2002. I asked
- 7 that the parties, if you have any response to that
- 8 document, file it as quickly as possible, preferably
- 9 tomorrow morning. If you cannot file it by tomorrow
- 10 morning, then I want you to tell me tomorrow when you
- 11 will be filing it.
- 12 Okay. And when you -- since I will be in
- 13 the hearing room when you file that document, I would
- 14 appreciate it if you either e-mail me before the
- 15 hearing starts with my own copy or bring me a copy
- 16 here.
- 17 Are there any other preliminary matters that
- 18 need to be addressed?
- 19 MR. LANE: I just had one, your Honor.
- 20 I'm assuming that the time for redirect and
- 21 recross-examination based on questions from the Bench
- 22 remains as it was in the original order?
- JUDGE RUTH: Yes. The original order was
- 24 the five minutes for recross based on questions from
- 25 the Bench and ten minutes for redirect. I don't think

- 1 I got that backwards. I think that's --
- 2 MR. LANE: That's correct.
- JUDGE RUTH: Okay. And that will remain the
- 4 same.
- 5 Any other questions?
- 6 MR. LUMLEY: Your Honor, getting back to the
- 7 question of the witnesses, just to make sure we
- 8 understand, is it -- is it necessary for witnesses to
- 9 actually be present in the hearing room, in particular
- 10 when their subject area is not at issue on the stand,
- 11 or are they free to be able to tend to some of their
- 12 other duties outside the hearing room so they are not
- 13 distracting the Commission?
- 14 JUDGE RUTH: Are they available in this
- 15 building but not inside the hearing room?
- MR. LUMLEY: That's one option, or --
- 17 JUDGE RUTH: They are certainly able to be
- 18 elsewhere in the building, and if -- if we need them,
- 19 go get them. Unless they are excused on the record,
- 20 they are expected to be here all week. And the
- 21 Commission is willing to address those issues if other
- 22 parties have a conflict and need to be elsewhere, but
- 23 the Commissioners wanted the general rule to be that
- 24 the witnesses be available unless there is a reason
- 25 for them not to be here.

- 1 Now, after they testify, if you want to ask
- 2 for that witness to be excused, the Commissioners will
- 3 allow them to be excused unless one of the
- 4 Commissioners think they have some questions that
- 5 might come up still on that one.
- 6 MR. LUMLEY: All right. And with regard to
- 7 that, I actually did not double check this this
- 8 morning, but earlier on my understanding was that
- 9 Mr. Beach who is scheduled to testify on Friday may
- 10 have some commitments. I mean, he's here this
- 11 morning, but may have some commitments in between now
- 12 and Friday that may require him to be outside the
- 13 building. I'm not exactly sure of the details on
- 14 that.
- And, also, just to alert you, all of our
- 16 witnesses are here except for Mr. Price who had some
- 17 travel issues. In theory, we might be able to get to
- 18 him today because he is the first witness in the
- 19 second subject area, and there might be a problem with
- 20 that if we get there very fast. But I'm expecting him
- 21 to be here sometime this afternoon, so, hopefully, it
- 22 won't be an issue, but just to alert you to it.
- JUDGE RUTH: Okay. Thank you.
- 24 Any others?
- 25 (No response.)

- 1 JUDGE RUTH: Then we are going to go off the
- 2 record for a fifteen-minute break.
- 3 Staff, is that sufficient, or do you mean
- 4 20 minutes?
- 5 MR. BATES: Fifteen will be fine. Thank
- 6 you.
- 7 JUDGE RUTH: We are off the record.
- 8 (A discussion was held off the record.)
- 9 JUDGE RUTH: I want to mark just for
- 10 identification purposes only, since we are talking
- 11 about the transcript of the proceeding from
- 12 TO-2001-438, the portion dealing with Mr. Naughton is
- 13 going to be marked for identification purposes as
- 14 Exhibit 48, and then the portion for Mr. Naughton --
- 15 Avera, I'm sorry, is 48, and Naughton is 49. And
- 16 those are for identification purposes only. Back off
- 17 the record.
- 18 (A recess was taken.)
- 19 JUDGE RUTH: We're back from our break and
- 20 we're back on the record.
- 21 Staff, can you address my questions?
- 22 MR. BATES: Yes, your Honor. Thank you very
- 23 much for allowing us to review the documentation.
- 24 Staff has reviewed the transcripts provided by
- 25 Mr. Lumley in this matter.

- 1 As a general starting point, Staff still
- 2 does not have a problem with submitting the transcript
- 3 in this case because we do believe -- we agree with
- 4 WCOM that the issues are basically the same. However,
- 5 we do have a problem as far as how much of it should
- 6 be included in the record if the Commission agrees to
- 7 receive it, because during the cross-examination of
- 8 both of the witnesses in question, they reference
- 9 testimony in prefiled testimony from other witnesses,
- 10 Staff witnesses and other witnesses, and we feel in
- 11 order for the Commission to have a complete record,
- 12 the Commission would also have to receive into
- 13 evidence in this matter their testimony, both the
- 14 questions that they answer from the attorneys and the
- 15 Bench and also their prefiled testimony, or,
- 16 otherwise, the Commission is just not going to be able
- 17 to have the perspective that they need on -- from the
- 18 answers that the witnesses give. In effect, it would
- 19 practically mean admitting the entire record of 438.
- 20 JUDGE RUTH: Mr. Bates, is it your
- 21 understanding that this information is necessary in
- 22 order for the Commission to decide these issues
- 23 appropriately?
- MR. BATES: Excuse me.
- 25 Your Honor, Staff believes that the

- 1 information that's contained in it is necessary, but
- 2 the Commission may be able to elicit that information
- 3 with questions both on cross-examination and from the
- 4 Bench in this case.
- 5 JUDGE RUTH: When you say "may," do you have
- 6 particular concerns that it might not all come out?
- 7 MR. BATES: No, just depending on which
- 8 questions are asked.
- 9 JUDGE RUTH: Thank you.
- MR. BATES: Thank you.
- 11 JUDGE RUTH: Okay. Staff has had an
- 12 opportunity to respond and, therefore, I will let both
- 13 of the parties respond if you have any comments on
- 14 what Staff has said.
- Mr. Lumley?
- MR. LUMLEY: Your Honor, we're still left
- 17 with the basic problem that Southwestern Bell has
- 18 elected to put the same cost studies at issue in this
- 19 case that are already before the Commission in the 438
- 20 docket. And I certainly don't have a problem with the
- 21 Commission just taking judicial notice of the entire
- 22 record in the 438 case so that it has that information
- 23 in front of it here, because, again, the one
- 24 distinction we've got is that this case -- you know,
- 25 the Commission has interpreted the statute as imposing

- 1 a fairly strict time line on it; whereas, the other
- 2 case does not have that.
- 3 Although in theory the cases could be
- 4 decided at the same time, there is a lot of work
- 5 involved in that, too, and I have no idea how the
- 6 Commission is going to approach -- you know, in what
- 7 order the Commission is going to take these cases in
- 8 terms of making its final decisions.
- 9 But I would submit that it really is not
- 10 going to be possible to retry all of those issues in
- 11 full that took a complete week of hearing time and the
- 12 other issues that are involved in this case because
- 13 there is substantially more rates and cost studies at
- 14 issue in Southwestern Bell's testimony in this case
- 15 than in the other one. This is just the overlapping
- 16 portion. This case has a broader range of issues,
- 17 so --
- 18 JUDGE RUTH: So let me ask you what the
- 19 result would be if the Commission does not allow you
- 20 to bring in the transcript or the record from 438?
- 21 MR. LUMLEY: If the Commission were to
- 22 decide the overlapping issues in the 438 case and
- 23 import that decision into this case, I don't think it
- 24 has any effect, but --
- 25 JUDGE RUTH: Okay. I don't think that that

- 1 case will be decided before this one.
- 2 MR. LUMLEY: Okay. Then that poses the
- 3 problem. And for the Commission to be able -- I would
- 4 assume that there is a substantial likelihood that the
- 5 Commission would like its decisions to match up
- 6 because it's considering the same cost studies and the
- 7 same rates. For the Commission to be able to do that,
- 8 it's going to have to have the full record in this
- 9 case to be able to reach the same decision.
- 10 JUDGE RUTH: So a concern of yours would be
- 11 that without the additional cross-examination on these
- 12 same issues from 438 that a different result will be
- 13 reached in this case than what Morris Woodruff and the
- 14 Commission come up with in the other case?
- MR. LUMLEY: Correct.
- 16 JUDGE RUTH: And although not ideal, explain
- 17 to me what the harm would be in that.
- MR. LUMLEY: Well, it will probably depend
- 19 on whose ox is being gored. I mean, we could come out
- 20 with a better result than the CLEC industry as a whole
- 21 or it could be the reverse situation. I don't know.
- JUDGE RUTH: And if it were the reverse,
- 23 what would happen? If decisions were made in this
- 24 case that were not as favorable to your party, for
- instance, as in Morris's 438, what would happen?

- 1 MR. LUMLEY: I think in that situation then
- 2 WorldCom could be placed at a competitive disadvantage
- 3 relative to other CLECs in the state simply because of
- 4 a matter of a few weeks' timing in the submission of
- 5 these cases.
- 6 JUDGE RUTH: And would there be no way out
- 7 of that?
- 8 MR. LUMLEY: It's going to depend on the
- 9 scenario. Based on Southwestern Bell's position about
- 10 how discreet we can be in selecting rates, there may
- 11 not be a way out of it. Based on our position and
- 12 Staff's position, we may still be able to get around
- 13 it through the MFN process, but I would anticipate --
- 14 JUDGE RUTH: Where you would MFN into some
- 15 of Morris Woodruff's --
- MR. LUMLEY: Into a particular rate, your
- 17 Honor, correct. But I would anticipate substantial
- 18 opposition by Southwestern Bell on that point. So
- 19 it's hard to speculate how we would end up.
- 20 JUDGE RUTH: Do you think it's necessary to
- 21 let the entire record in as Staff has indicated might
- 22 be necessary? For instance, Mr. Bates noted that
- 23 some testimony of other witnesses as referenced in
- 24 Exhibits 48 and 49 and that that testimony would need
- 25 to come in. Is it absolutely necessary that that come

- 1 in in order to understand the testimony of
- 2 Mr. Naughton and Mr. Avera?
- 3 MR. LUMLEY: I don't believe so. I think
- 4 you can understand the testimony and take it at its
- 5 face value. But I also don't have a problem with the
- 6 Commission having access to the full record.
- 7 The parties -- you know, it's dir-- it's not
- 8 as if it's a Verizon case that Southwestern Bell
- 9 didn't have full opportunity to ask every question it
- 10 wanted to ask. It's the same parties involved. The
- 11 issues were fully elucidated during a week of hearing,
- 12 and I would indicate also many months of discovery,
- 13 many months of time to prepare testimony. We had much
- 14 more opportunity to be very thoughtful about the
- 15 studies at issue than we've had in the compressed time
- 16 frame in this case.
- 17 So I think it's a very valuable resource for
- 18 the Commission to have access to, and the parties can
- 19 do whatever it is they think is appropriate in the
- 20 briefs in terms of highlighting specific things to
- 21 help the Commission in this case.
- 22 JUDGE RUTH: One of my concerns is,
- 23 basically, if -- if the Commission were to allow these
- 24 transcripts in and then perhaps allow additional ones
- 25 in as suggested by Mr. Bates, you are more than

- 1 doubling the amount of information that's in the
- 2 record at the last minute, and I will have to allow
- 3 Southwestern Bell some time to respond, and I'm not
- 4 quite sure how is appropriate. And then the
- 5 Commissioners will have to synthesize all of that at
- 6 the last minute when the -- the decision in this case
- 7 has to be issued in six weeks or less.
- 8 How -- how would you recommend that
- 9 Southwestern Bell be allowed to respond to all of
- 10 these additional exhibits that you plan on offering?
- 11 MR. LUMLEY: Well, first of all, as I've
- 12 indicated I've already copied, excuse me, the redirect
- 13 sections in case they wanted to do that.
- 14 If the Commission were to just say they are
- 15 going to take judicial notice of the record in that
- 16 case, I don't think there is any further response
- 17 required. It's a fully tried case. You know, it's
- 18 going to be fully briefed. I think Southwestern Bell
- 19 had already a full opportunity to respond to any
- 20 particular points in that case that it wanted to. And
- 21 the reverse would be true for me with regard to the
- 22 points that they made in the record.
- JUDGE RUTH: So is your --
- MR. LUMLEY: And in --sorry.
- 25 In terms of synthesizing the record, I think

- 1 it's incumbent on the parties to do that in the briefs
- 2 and in the proposed decision.
- JUDGE RUTH: So is your proposal to offer
- 4 specific testimony for each witness, or is your
- 5 proposal for the Commission to take judicial notice of
- 6 438?
- 7 MR. LUMLEY: I guess at this point I would
- 8 make the proposals in the alternative. Whichever the
- 9 Commission would prefer, it's okay with me.
- 10 JUDGE RUTH: I will get to you, Mr. Lane.
- But, Mr. Bates, do you have any comment on
- 12 anything that Mr. Lumley has said?
- MR. BATES: No. Thank you, your Honor.
- 14 JUDGE RUTH: Okay. Mr. Lane, would you like
- 15 to respond, please?
- MR. LANE: Yes, your Honor.
- 17 We're still left with the same position that
- 18 we were before, that the record in the other case
- 19 contains a lot of testimony from witnesses that aren't
- 20 present here, both the cross of our witnesses focused
- 21 on testimony of other witnesses that aren't present
- 22 here and proposals that aren't being made here.
- 23 JUDGE RUTH: Could you speak up just a
- 24 little or turn your mike, please? I'm sorry.
- 25 MR. LANE: Okay. We're still left, your

- 1 Honor, with the same position that we were before;
- 2 that is, that the 438 case, the other case we've been
- 3 referencing, is based upon testimony from witnesses
- 4 that aren't present here, cost of capital,
- 5 depreciation, labor rates, support asset factors, et
- 6 cetera. None of that is introduced as a proposal in
- 7 this case, and it's inappropriate to bootstrap this
- 8 case by introducing those cross-examination portions
- 9 that deal with issues that aren't being raised in this
- 10 case because WorldCom has chosen not to pursue and
- 11 propose cost of capital in this case, set up
- 12 depreciation rates in this case, support asset factors
- 13 in this case, labor rates in this case, et cetera.
- 14 And so from that perspective, it would be
- 15 prejudicial to Southwestern Bell to permit them to
- 16 introduce this type of evidence and have the
- 17 Commission consider it when those witnesses aren't
- 18 available for cross-examination in this case.
- 19 JUDGE RUTH: Can -- okay. Go ahead.
- 20 MR. LANE: Well, with regard to judicial
- 21 notice, you can take judicial notice of an order or a
- 22 decision of the Commission, but you can't take
- 23 judicial notice of evidence or testimony in another
- 24 case. That's not the proper scope of this case or
- 25 properly permissible under the law, and so that kind

- 1 proposal made at the last minute doesn't make sense
- 2 and isn't appropriate.
- 3 The issue is whether they can introduce
- 4 these particular cross-examination pieces, and I don't
- 5 believe it's appropriate because those issues don't
- 6 match up because they haven't made an affirmative
- 7 proposal in this case for those things that were
- 8 addressed in the 438 case.
- 9 JUDGE RUTH: So when should they have made
- 10 the affirmative proposals on these particular
- 11 elements?
- 12 MR. LANE: I would say in their Direct
- 13 Testimony, at the very least in their Rebuttal
- 14 Testimony. We introduced all of the cost studies in
- 15 this case in our Direct Testimony.
- 16 JUDGE RUTH: So when you-all introduced
- 17 these same cost studies in your Direct Testimony, then
- 18 they should have at least responded in the Rebuttal,
- 19 is what you're saying?
- MR. LANE: Absolutely.
- JUDGE RUTH: And you're saying they did not?
- 22 MR. LANE: Absolutely.
- JUDGE RUTH: We'll come back to you, but
- 24 would you please respond, Mr. Lumley?
- MR. LUMLEY: Yes. I would disagree.

- 1 Mr. Turner has put his testimony from that other case
- 2 in as a piece of his prepared testimony. I would also
- 3 disagree about the cost of capital and the various
- 4 factors, because as an expert witness, he's relied on
- 5 that information in the proposed rates that are
- 6 attached. He's entitled to do that under Missouri
- 7 law. We don't have to have the information he's
- 8 relying on in reaching his conclusions as part of the
- 9 record.
- 10 I still think by having that information
- 11 from the other case available the Commission can look
- 12 at it more precisely, but he specifically states that
- 13 he's relying on those witnesses that Mr. Lane has
- 14 mentioned in reaching his rate conclusions that are
- 15 part of the record -- or of his prepared testimony.
- 16 JUDGE RUTH: So are you, in effect, saying
- 17 that it's possible to reach the same result that
- 18 WorldCom wants without the additional information
- 19 being brought in?
- MR. LUMLEY: Is it possible? Yes.
- JUDGE RUTH: Why is it unlikely?
- 22 MR. LUMLEY: Well, I'm not -- I don't think
- 23 I'm in a position to guess whether it's likely or not.
- 24 But what I wanted to accomplish was to allow the
- 25 Commission to have -- you know, if they are engaged in

- 1 a debate in the 438 case and they think, Well, what
- 2 about this that leads me to this conclusion over here,
- 3 I wanted them to have the opportunity to have the same
- 4 information from cross-examination of the witnesses so
- 5 that they could cite to the same information and reach
- 6 the same conclusion here, if their goal was to try and
- 7 reach harmonious decisions in the two cases.
- 8 JUDGE RUTH: I want to see if I follow you.
- 9 So that argument is more an issue perhaps of
- 10 time and in-depth? In other words, since this case
- 11 has to be done more quickly, on a compressed time
- 12 frame, if we had more time, you could do the exact
- 13 same cross-examination as was done in the other case,
- 14 make this case last two weeks, and then it all would
- 15 have come in?
- MR. LUMLEY: Correct.
- 17 JUDGE RUTH: Okay. I also want to ask, do
- 18 you have any authority that would allow the Commission
- 19 to take judicial notice of an entire case, including
- 20 the testimony, the exhibits, as opposed to just taking
- 21 judicial notice of an order?
- 22 And, Staff, if you could be thinking if you
- 23 know of any case that allows that too.
- 24 MR. LUMLEY: I believe that the
- 25 administrative law principles allow you to do that. I

- 1 can't present a specific statute or case to you at the
- 2 moment.
- JUDGE RUTH: Okay.
- 4 MR. LUMLEY: But in my experience, I believe
- 5 we've done it before.
- 6 JUDGE RUTH: Well, I thought if you knew of
- 7 a case where it had been done before, even that would
- 8 help.
- 9 MR. LUMLEY: I'm not recalling it at this
- 10 instant, but I'm certain today or tomorrow I can give
- 11 you a specific citation.
- 12 JUDGE RUTH: Okay. Staff, are you aware of
- 13 any case where the Commission has taken judicial
- 14 notice of the entire record of another case?
- MR. BATES: No, your Honor, but I would
- 16 believe that it would be inherent in the Commission's
- 17 power to do so.
- 18 JUDGE RUTH: Okay. Mr. Lane, if you have
- 19 any authority opposing that assertion, please give it
- 20 to me, and you can also respond to Mr. Lumley.
- 21 MR. LANE: Okay. And to respond to
- 22 Mr. Lumley, it's real clear that Mr. Turner has not
- 23 provided all of the information in the 438 case in his
- 24 testimony in this case. What he attached was a
- 25 nonproprietary version of his Rebuttal Testimony in

- 1 that 438 case that did not include some 36 or seven
- 2 attachments that were the results of revised cost
- 3 studies that the joint sponsors in that prior case
- 4 were proposing be utilized in that case to set rates.
- 5 None of those are part of the record in this case.
- 6 With regard to Mr. Lumley's assertion that
- 7 as an expert witness Mr. Turner can rely upon cost of
- 8 capital, labor rates, depreciation, et cetera, that
- 9 were proffered by other witnesses in that other case,
- 10 that is decidedly not correct. An expert who is
- 11 offering testimony in an area in which he is an expert
- 12 is permitted to rely upon information that is commonly
- 13 used by experts in that field to make their
- 14 determination, and it's not hearsay then in that
- 15 respect.
- But that's not the situation we have here.
- 17 Mr. Turner does not purport to be an expert on cost of
- 18 capital. He does not purport to be an expert on
- 19 depreciation rates. He does not purport to be an
- 20 expert on labor rates. That's precisely the reason
- 21 that the joint sponsors in the other case utilized
- 22 other witnesses, Mr. Hirshleifer, Mr. Rhinehart, and
- 23 others to present that information that then became
- 24 the input into the cost studies that Mr. Turner
- 25 proposed in that case.

- 1 And, again, those cost studies' inputs --
- 2 the ability to put that into evidence in this case
- 3 isn't present because they are not making those
- 4 proposals here. And in any event, those aren't even
- 5 attached to his Rebuttal Testimony which is the
- 6 nonproprietary version.
- 7 The problem overall with this is that we
- 8 have a case that's supposed to be dealing with
- 9 specific issues that were raised in the context of
- 10 this arbitration, and to go and pull out information
- 11 from another case that the witnesses aren't here and
- 12 aren't available for cross-examination really is
- 13 clearly improper. Mr. Rhinehart isn't here.
- 14 Mr. Hirshleifer isn't here. All of the other
- 15 witnesses in the case aren't here. Only Mr. Turner is
- 16 here, not all of the other witnesses.
- 17 And it's not proper, and it causes
- 18 Southwestern Bell prejudice and harm if it's required
- 19 to respond in some unidentified way to evidence that
- 20 was proffered in another case by witnesses that aren't
- 21 present for cross-examination in this case.
- JUDGE RUTH: I have a question then.
- 23 So you're suggesting that there is some
- 24 evidence in the other case that was not brought out in
- 25 any form in this case. So with that in mind, are you

- 1 saying that it would not be -- that some results or
- 2 some elements in this case cannot be decided in a
- 3 manner that would be consistent with the other case?
- 4 You're saying there's different factors going into
- 5 each, and depending on how the Commission decides,
- 6 it's quite likely the two cases will not come up with
- 7 consistent results on particular elements?
- 8 MR. LANE: I'm not precisely sure if I
- 9 understand the question. Let me answer it, and, if I
- 10 don't, I'll come back.
- 11 The issues in this case are broader than the
- 12 issues that were involved in the 438 case. That case
- 13 involved only issues that were under the M2A for some
- 14 unidentified or interim rates, I'll say, that were in
- 15 the M2A, and Southwestern Bell agreed in that case
- 16 that we would have a subsequent docket that would set
- 17 permanent rates for those.
- 18 There is another whole series of rates that
- 19 are at issue in this case that weren't even present in
- 20 the other case. So there is not an identity of issues
- 21 between the two cases. The number of cost studies and
- 22 rates that are at issue here is way broader than what
- 23 was at issue in that other case.
- Now, can the -- I'm sorry.
- 25 JUDGE RUTH: So everything that is in the

- 1 other case, 438, though, is it also in this?
- 2 MR. LANE: Those -- the issues from the cost
- 3 studies in that other case are at issue here, yes.
- 4 That is true.
- 5 JUDGE RUTH: Okay.
- 6 MR. LANE: What's not the same in this case
- 7 as in the other case is the evidence that's proposed
- 8 by the parties. WorldCom in this case proposes no
- 9 cost studies of their own, unlike what was proposed by
- 10 the joint sponsors in the 438 case. WorldCom in this
- 11 case proposes no evidence of its own on the factors
- 12 that go into the inputs to those cost studies,
- 13 specifically, as I've said, the cost of capital,
- 14 depreciation rates, factors, et cetera.
- 15 JUDGE RUTH: I want to interrupt you for a
- 16 minute.
- 17 And, Mr. Lumley, can you respond to that
- 18 statement? Mr. Lane has said that WorldCom did not
- 19 propose its own cost studies on some of these. Is
- 20 that true? And if so, why? Why did you not propose
- 21 it here in this case and instead are trying to bring
- 22 in the record from the other case?
- MR. LUMLEY: Well, first of all, Mr. Turner
- 24 does propose the rates, the decision point, what's
- 25 going to be charged for these specific elements, and

- 1 he explains in his nonproprietary testimony how he
- 2 gets to those recommendations. The problem is that
- 3 he's not allowed to use the highly confidential
- 4 information from that other case in this proceeding.
- 5 That's why it's only the nonproprietary version.
- 6 However, his testimony sets out how he gets there,
- 7 what he relies on, and it does have the proposed
- 8 charges for these items.
- 9 I would add that, you know, it remains the
- 10 primary recommendation of WorldCom, and, as I
- 11 understand it, Staff as well that these matters be
- 12 decided in the 438 case or in -- or for the other
- 13 costing issues and pricing issues in a generic
- 14 proceeding and not in the compressed time frame we've
- 15 got here, and that's basically what the Commission did
- 16 in the last AT&T arbitration.
- 17 Nonetheless, Southwestern Bell has injected
- 18 all of these cost studies here in this compressed time
- 19 frame. The witnesses have had very limited time with
- 20 them, and we've presented the best response we can.
- 21 JUDGE RUTH: Back up a minute to the
- 22 statement you just said.
- 23 Were you referring to WorldCom's proposal
- 24 for a two-phase arbitration where interim rates were
- 25 decided in the first and then more -- a more detailed

- 1 second phase would find the final prices?
- 2 MR. LUMLEY: I was referring to the other
- 3 perspective on that and the Commission saying, you
- 4 know, we're not going to resolve these rates in this
- 5 case? We'll resolve them in a generic proceeding and
- 6 then WorldCom and other CLECs will be able to take
- 7 advantage of that decision if and when it's made.
- JUDGE RUTH: Okay.
- 9 MR. LUMLEY: And so I'm looking at it more
- 10 in terms of what our rights will be when that case is
- 11 resolved, not that our prices will be designated as
- 12 interim.
- 13 JUDGE RUTH: Okay. I think I understand
- 14 your point. The problem -- and the Commission dealt
- 15 with this before -- is the Commission believes that
- 16 under the Federal Arbitration Act it is required to
- 17 make a decision on all unresolved issues by that
- 18 federal statutory deadline, which is March 1st. And
- 19 you're again suggesting that we postpone deciding some
- 20 issues until after March 1st.
- MR. LUMLEY: No.
- 22 JUDGE RUTH: You're suggesting we just say
- 23 we decide them however they come out in 438?
- MR. LUMLEY: Well, I think that could be one
- 25 decision, but I'm submitting that what you can say is,

- 1 for example, as Staff proposes on a particular issue,
- 2 it's the M2A rate. That's your rate. However, when
- 3 and if we change that rate in the generic proceeding,
- 4 you'll have the opportunity to take advantage of that
- 5 rate. It may be higher. It may be lower. But all
- 6 CLECs will have equal opportunity once that generic
- 7 proceeding is resolved. And based on the track
- 8 record, that's probably going to be sometime a year or
- 9 so from now in terms of the length of these generic
- 10 cost proceedings.
- I would also suggest, though, that -- I
- 12 mean, the 438 case really is the completion of the
- 13 first AT&T/WorldCom arbitration. There were rates
- 14 that were never quite resolved, and it's many years
- 15 later, and I still feel the Commission is probably
- 16 tying its hands more than it needs to. And I
- 17 certainly feel like it's to our detriment that
- 18 other -- in other cases the Commission has decided to
- 19 take more time.
- JUDGE RUTH: Not in any recent cases.
- MR. LUMLEY: I understand. I agree. But,
- 22 nonetheless, overall, the Commission has recognized it
- 23 takes much more time than the arbitration allows to
- 24 deal with these cost studies and all of the
- 25 information and to really allow the parties to

- 1 investigate the cost studies and have, you know, fair
- 2 discovery opportunities and things like that.
- 3 The Commission reached the conclusion in the
- 4 AT&T arbitration in the 455 case that it just wasn't
- 5 feasible to make those kinds of decisions.
- 6 JUDGE RUTH: Right. And the Commission was
- 7 following that line of reasoning in this case.
- 8 MR. LUMLEY: Right. I understand. And I
- 9 don't really have a problem with the concept that our
- 10 rates wouldn't be interim. What I do think would be
- 11 unfair is that if a decision is made in twelve or
- 12 eighteen months on a generic basis that we not have
- 13 some opportunity to opt into those rates. And I'm not
- 14 suggesting we would only be able to pick the ones that
- 15 go down. I mean, it would have to be a wholesale
- 16 transition.
- 17 JUDGE RUTH: And you're talking about the
- 18 438 case --
- MR. LUMLEY: Correct.
- 20 JUDGE RUTH: -- if the Commission makes a
- 21 decision on that. But, hopefully, it wouldn't be
- 22 twelve to fifteen months?
- MR. LUMLEY: No. In that respect, I'm
- 24 talking about a generic proceeding to address --
- 25 JUDGE RUTH: Okay. From this case.

- 1 MR. LUMLEY: -- the other issues that aren't
- 2 in the 438 case.
- JUDGE RUTH: Okay.
- 4 MR. LUMLEY: Basically, a new consideration
- 5 of things like loop costs, switching costs, things
- 6 like that that --
- 7 JUDGE RUTH: Right. That was the generic
- 8 consideration of the issues in this case. The
- 9 Commission earlier said it would defer ruling on
- 10 whether or not a new generic case would be open.
- 11 MR. LUMLEY: Right. And just to make sure
- 12 I'm clear, we are not in any respect proposing any
- 13 kind of true-up process or anything like that. We're
- 14 just talking about --
- 15 JUDGE RUTH: You want an opt-in provision,
- 16 though.
- 17 MR. LUMLEY: -- an opportunity in the
- 18 future. Correct.
- JUDGE RUTH: Mr. Lane?
- 20 MR. LANE: The issue of a generic
- 21 interconnection proceeding is one that is separate
- 22 from what I understand is pending before you now --
- JUDGE RUTH: Yes.
- 24 MR. LANE: -- and that is whether they can
- 25 introduce portions of or all of the record from

- 1 another case. And in that respect, WorldCom had the
- 2 ability and the right and the duty if they wanted to,
- 3 I assume, to present that information to the
- 4 Commission via their own witnesses in this case. They
- 5 could have presented their own version of the cost
- 6 studies. They could have presented witnesses that
- 7 testified to cost of capital, labor rates,
- 8 depreciation rates, et cetera, and they did not. And
- 9 it would be prejudicial and inconsistent with
- 10 Southwestern Bell's rights to reach out and grab the
- 11 record from another case, or portions of it, and then
- 12 use that as a substantive basis to establish the rates
- 13 in this proceeding with this arbitration.
- 14 JUDGE RUTH: Okay. I want to question you a
- 15 little bit more on that.
- We all know arbitration cases are not the
- 17 same as contested cases. They are really quite
- 18 different, and the Commission is handling this case in
- 19 a somewhat different manner in that it's limiting
- 20 cross-examination in a way that it has not done on a
- 21 standard basis in contested cases.
- 22 So with that in mind that they are
- 23 different, an arbitration case is different than the
- 24 standard contested case that the Commission deals
- 25 with, I want you to explain how it's prejudicial to

- 1 Southwestern Bell for this record to be brought in
- 2 from 438. You keep saying that it's prejudicial, that
- 3 it's inconsistent with your rights. I need you to
- 4 explain how. Just saying it's prejudicial is not
- 5 convincing me.
- 6 And, further, the Commission -- you may not
- 7 agree, but the Commission believes that we could
- 8 handle this case by saying, WorldCom, tell us your
- 9 side. Southwestern Bell, tell us your side. Staff,
- 10 do you have any comments? No cross-examination and
- 11 move forward. So we are opening it up a bit more to
- 12 allow the parties to give us a full record.
- 13 With that in mind, WorldCom would, it seems
- 14 perhaps, argue that they are just trying to make sure
- 15 that the record is full, and you're wanting to keep
- out information that could be seen as relevant.
- 17 MR. LANE: Okay. I guess to start from a
- 18 general perspective, whether this is a contested case
- 19 under Missouri Public Service Commission procedures
- 20 and under the Missouri statutes that identify what a
- 21 contested case is is certainly up in the air. It's
- 22 also up in the air whether Federal Arbitration Act
- 23 requirements or the State Arbitration Act requirements
- 24 apply in this case.
- In any event, all three of those, whichever

- 1 one applies in terms of setting procedural rules and
- 2 the like do require the Commission to grant the basic
- 3 due process rights of the parties. That's a
- 4 constitutional requirement in any kind of state-
- 5 imposed -- in this case federally-imposed --
- 6 obligation that would be resulting in an
- 7 interconnection agreement. When you have basic due
- 8 process rights, those include the right to present
- 9 witnesses, the right to cross-examine witnesses.
- 10 In this case what they have failed to do is
- 11 to bring forward the evidence in this case. They
- 12 haven't presented anything to you on the cost studies.
- 13 They have not made any affirmative proposal on the
- 14 cost studies, and, yet, they want you to go out and
- 15 reach at this stage and say, Well, let's take what
- 16 happens in the 438 case and apply it here even though
- 17 the issues here are clearly much broader than they
- 18 were and are in the 438 case.
- 19 That's what we see as the prejudice to us,
- 20 is that we're not permitted and don't have the right
- 21 to cross-examine the witnesses and the cost study
- 22 analysis that isn't -- that isn't even being presented
- 23 in this case because those witnesses aren't here in
- 24 this case. There is no Mr. Hirshleifer. There is no
- 25 Mr. Rhinehart.

- 1 JUDGE RUTH: And so it's not adequate to
- 2 protect Southwestern Bell's rights to admit those
- 3 additional portions of the testimony as I think was
- 4 somewhat suggested by Staff.
- 5 MR. LANE: No.
- 6 JUDGE RUTH: There was cross-examination of
- 7 those witnesses, so incorporating that into the record
- 8 is not sufficient? How come?
- 9 MR. LANE: Because we're dealing with
- 10 different issues here because the issues are broader.
- 11 We're dealing with cost studies --
- 12 JUDGE RUTH: They are broader, but they are
- 13 not different, are they? They are not inconsistent?
- MR. LANE: There is a group --
- 15 JUDGE RUTH: All of those are part of this.
- 16 MR. LANE: -- of cost studies in that case
- 17 that is a part of this study here. There is also a
- 18 whole slew of additional cost studies that we've
- 19 presented information on here that were not at issue
- 20 in the 438 case and that involve issues including cost
- 21 of capital, et cetera, that there was no --
- JUDGE RUTH: But having more in this one
- 23 doesn't make that one any less true or relevant as to
- 24 what happened there?
- MR. LANE: No. Each case, Judge, has to

- 1 stand on its own. For example, we went through cost
- 2 studies for conditioning loops, for example,
- 3 arbitration cases under the Act, and each time a party
- 4 came to us and said, I want to arbitrate that again,
- 5 it wasn't our ability to say, Well, you know, the
- 6 Commission has already decided this in another case.
- 7 You've got to take that rate. No. It was our
- 8 obligation to come forward and say, Here are our cost
- 9 studies, and you have the right to cross-examine and
- 10 you have the right to put on your own. That's the
- 11 pattern that the Commission has set and that's
- 12 appropriate in my opinion.
- 13 JUDGE RUTH: Okay. I want to ask a
- 14 question.
- 15 And, I think, Mr. Lumley, I might have asked
- 16 this before, but I want to get it clear.
- 17 Why did WorldCom not present as part of its
- 18 affirmative case these elements, these additional --
- 19 this additional record that you're now wanting to
- 20 brick in now? Bell has suggested that you should have
- 21 done that as part of your Direct or at least Rebuttal
- 22 Testimony. Explain to me why that wasn't done or why
- 23 you could not do it, because he seems to have a point.
- MR. LUMLEY: Well, first of all, I would
- 25 submit that we did put forth our affirmative evidence

- 1 in the form of Mr. Turner, not only creating his
- 2 testimony here, but also incorporating his prior
- 3 testimony from that case, and put it directly at
- 4 issue.
- 5 You know, my specific request has to do with
- 6 the cross-examination of Southwestern Bell witnesses.
- 7 That's not my direct evidence. That's not my rebuttal
- 8 evidence. The alternative position of bringing in the
- 9 whole record, I'm just agreeing to that because I
- 10 think -- you know, first of all, Staff proposed it. I
- 11 don't have a problem with the proposal, but, secondly,
- 12 it puts other information in. If Southwestern Bell
- 13 wants to use it, they have their cross-examination of
- 14 Mr. Turner, and things like that.
- 15 But my specific request and all I'm trying
- 16 to specifically accomplish is to put in this
- 17 cross-examination in lieu of redoing it, because I
- 18 can't possibly redo it in the time frame allowed.
- 19 JUDGE RUTH: So then that really comes down
- 20 to just the time issue.
- 21 It seems to me, then, if we had no time
- 22 constraints on this case that --
- MR. LUMLEY: I would just read the
- 24 questions. It's the same witnesses talking about the
- 25 exact same cost studies, and I could just read the

- 1 questions, and they would recite back the answers, you
- 2 know, and all we would have accomplished is consume a
- 3 week of hearing time that's already been done.
- 4 JUDGE RUTH: What's your response on just
- 5 that, Mr. Lane?
- 6 MR. LANE: That wouldn't be -- for things
- 7 that are at issue in this case, he could do that.
- 8 That's fine. And he can ask those questions to the
- 9 witness. But that case dealt with cross-examination
- 10 that dealt with alternative and competing cost of
- 11 capital proposals, depreciation proposals, et cetera.
- 12 That assumes facts that are not in evidence. He
- 13 couldn't ask those questions here and ask them to
- 14 comment on Mr. Hirshleifer's cost of capital and his
- 15 capital structure, et cetera. There isn't any
- 16 evidence in this case of that, so that type wouldn't
- 17 be proper.
- 18 JUDGE RUTH: So would it be proper to
- 19 allow -- if he were, as time goes on, able to identify
- 20 specific portions of the transcript that dealt with
- 21 only the same issues that are in this case, he could
- 22 offer that portion of the cross-examination from the
- 23 record to save time, if he wished? Is that true?
- 24 MR. LANE: Could he do that, I mean --
- 25 JUDGE RUTH: Your objection, then, would no

- 1 longer be valid if he -- if the cross-examination
- 2 didn't deal with those additional portions.
- 3 MR. LANE: If his questions that he asked
- 4 today of the witnesses were based on the evidence that
- 5 were in this case, then that would certainly be
- 6 proper. And if he has some -- the same questions that
- 7 would be proper, I --
- 8 JUDGE RUTH: Okay. But if he tried to then
- 9 ask the exact same questions, you're saying those
- 10 might be improper because they deal with evidence
- 11 that's not --
- 12 MR. LANE: They assume facts not in
- 13 evidence, right.
- 14 JUDGE RUTH: So the witness could answer,
- 15 but their answer would be different because they are
- 16 basing it on the facts of case, or they just wouldn't
- 17 be able to answer?
- 18 MR. LANE: I would object if those questions
- 19 were asked on the basis that the question assumes
- 20 facts that are not in evidence. That objection, I
- 21 would expect it would be sustained, because these
- 22 questions would be based on comparing Mr. Avera's cost
- 23 of capital to that of Staff Witness Johnson to that of
- 24 the other witnesses, and so you can't ask questions
- 25 like, Isn't it true the Commission should adopt

- 1 Mr. Hirshleifer's cost of capital in capital
- 2 structure? I would object to that as assuming facts
- 3 that aren't in evidence in the case.
- 4 JUDGE RUTH: Quickly, now.
- 5 MR. LUMLEY: Yes, your Honor.
- 6 I would disagree that it's objectionable.
- 7 We're talking about in each case expert witnesses, and
- 8 you are allowed to cross-examine an expert witness and
- 9 test their opinions beyond the scope of record
- 10 evidence. These witnesses are actually aware of
- 11 what's been testified in the other case, and it would
- 12 be legitimate to test whether they still adhere to
- 13 their positions knowing that other people have
- 14 proffered contrary opinions.
- 15 JUDGE RUTH: Okay. I think I'm finished if
- 16 you want to sit down.
- 17 First, let me say I'm going to make my
- 18 ruling and we're going to move on. If a party is
- 19 going to file a Motion for Reconsideration, because of
- 20 the time restraints, you're going to have to get it in
- 21 by tomorrow. And responses -- and if you're going to
- 22 do that, it might be helpful if you at least give the
- 23 other side a heads up so that they can file their
- 24 response at the latest on Wednesday morning when we
- 25 start.

- 1 Preferably, if they know you're going to do
- 2 that, then they can maybe file it the same day.
- 3 Because if I make a ruling, you file a motion for
- 4 reconsideration, and the Commission reverses itself,
- 5 we will need to backtrack, and I don't want to get any
- 6 farther along -- and I'm just saying that's an "if,"
- 7 but I'm shortening the time on that just in case.
- 8 Where we're at is we're discussing whether
- 9 or not to allow this additional evidence in as
- 10 exhibits from 438, and I'm going to sustain
- 11 Southwestern Bell's motion (sic). It is not going to
- 12 be allowed in.
- 13 That means we will also have to give
- 14 WorldCom an opportunity to revise your estimated time
- 15 for cross-examination of the two witnesses that you
- 16 had planned on just offering testimony for. And we
- 17 can do that one of a couple of ways. We can
- 18 either, if you're prepared, go ahead and you can
- 19 submit your revised estimates now, or we can move on
- 20 to the next witnesses after that.
- 21 MR. LUMLEY: What I would like to do, your
- 22 Honor, is allocate 15 minutes to Dr. Avera and take
- 23 five minutes away from Mr. Cass, Mr. Makarewicz and
- 24 Mr. Barch.
- JUDGE RUTH: What about Mr. Naughton?

- 1 MR. LUMLEY: I will not ask any questions of
- 2 him.
- 3 With regard to tendering the exhibits, how
- 4 do you want to go about that?
- 5 JUDGE RUTH: Tendering the exhibits, then,
- 6 for each of the other witnesses that you had planned
- 7 to offer --
- 8 MR. LUMLEY: Right.
- 9 JUDGE RUTH: I assume, then, you're still
- 10 wanting to offer them for the record?
- 11 MR. LUMLEY: I think I need to do that, but
- 12 I'm comfortable doing it at your convenience as
- 13 opposed to trying to cram it in at any particular
- 14 time.
- 15 JUDGE RUTH: Okay. I'm not sure I follow.
- MR. LUMLEY: Whenever you want to do it. I
- 17 don't necessarily need to do it with each witness, you
- 18 know, if there is a particular break, or maybe we can
- 19 get it all premarked or something.
- 20 JUDGE RUTH: Why don't we do that with
- 21 today's lunch break, at least start working on that.
- 22 You will have to tell me if more time is needed also.
- Okay. I'm going to go off the record for
- 24 about two minutes. I suggest you might want to hang
- 25 around. I'm just going to let the Commissioners know

- 1 that we are ready for opening statements.
- 2 If you want to take a quick five-minute
- 3 break, that's fine. Stay close.
- We're off the record.
- 5 (A recess was taken.)
- 6 JUDGE RUTH: We are back on the record in
- 7 TO-2002-222, and we're ready for opening statements.
- 8 I'll remind you to please come up to the
- 9 lectern and use the microphone.
- 10 We will begin with WorldCom.
- MR. MORRIS: Good morning, Commissioners.
- 12 I'm Steve Morris. I'm a senior attorney
- 13 with WorldCom.
- 14 JUDGE RUTH: You'll need to adjust the
- 15 microphone. I can't hear you very well.
- MR. MORRIS: Okay. I'll start over.
- 17 I'm Steve Morris. I'm a senior attorney
- 18 with WorldCom. I handle their regulatory matters in a
- 19 four-state area including Missouri, Kansas, Oklahoma,
- 20 and Arkansas.
- 21 What I'm going to do in opening statement
- 22 this morning is go through and identify our witnesses
- 23 and highlight the subjects or issues that they will be
- 24 addressing and what we feel their testimony will
- 25 demonstrate in this hearing.

- Dan Aronson is WorldCom's Director of
- 2 Carrier Access Billing Services, and his testimony
- 3 will demonstrate that as an intraLATA toll provider,
- 4 Southwestern Bell should bear the responsibility for
- 5 billing its customers; that is, its intraLATA
- 6 customers for intraLATA toll calls.
- 7 Mr. Aronson's testimony will also
- 8 demonstrate or address the related operational issue
- 9 of handling a PIC'd intraLATA toll call in a UNE-P
- 10 environment.
- 11 Michael Beach is WorldCom vice-president of
- 12 the West Region Telco and Line Cost Management. His
- 13 division covers 27 states and has responsibility for
- 14 implementation of interconnection agreements, OSS
- 15 support, and implementation of billing audits and
- 16 payments. Mr. Beach has been with the company 27
- 17 years.
- 18 His testimony addresses Southwestern Bell's
- 19 BFR process, whether it should change, the
- 20 availability of technical publications, and whether
- 21 it's appropriate to include language from Southwestern
- 22 Bell -- SBC's 13-state agreement in this Missouri
- 23 interconnection agreement that we're asking for.
- 24 Ed Caputo is WorldCom's Director of Operator
- 25 and Directory Services. He's been with the company

- 1 eleven years in the OS and DA areas. The issues he
- 2 addresses and what his testimony will demonstrate is
- 3 that Southwestern Bell is required to provide CLECs
- 4 with customized routing via feature group D trunks
- 5 designated by the CLEC.
- 6 His testimony will also address whether Bell
- 7 is required to provide OS/DA as a UNE until it
- 8 provides such customized routing. We believe that his
- 9 testimony will so demonstrate.
- 10 Roseann Kendall is a Senior Project Manager
- in WorldCom's West Region Carrier Management Group,
- 12 Mike Beach's group that I just referred to earlier.
- 13 Her responsibilities include resolving OSS
- 14 issues with Southwestern Bell. She is also WorldCom's
- 15 primary point of contact for Southwestern Bell's
- 16 change management forums.
- 17 Her testimony covers various LIDB issues,
- 18 and her testimony will show that WorldCom should have
- 19 access to the LIDB database during the local service
- 20 request process, that Southwestern Bell should bear
- 21 responsibility for populating the LIDB with erroneous
- 22 default information, and that WorldCom should not be
- 23 held responsible for the accuracy of its data; that is
- 24 WorldCom's data, in Southwestern Bell's LIDB -- that's
- 25 line information database -- if WorldCom has no direct

- 1 access to the LIDB.
- 2 Mike Lehmkuhl is a regulatory specialist in
- 3 the operator services area for WorldCom. He's been in
- 4 the telecommunications industry for ten years, both as
- 5 an attorney, a consultant, and recently as an employee
- 6 of WorldCom.
- 7 His testimony focuses on call-related
- 8 database issues and, secondly, directly assistance
- 9 listing information. His testimony with regard to
- 10 call-related databases will demonstrate that LIDB
- 11 isn't an unbundled network element, or UNE, that the
- 12 calling name database, sometimes called CNAM, is a UNE
- 13 and should be available on a bulk basis. There should
- 14 be no local use restrictions for the use of the LIDB,
- 15 and, as to directory assistance listing issues, that
- 16 the directory assistance database should be TELRIC
- 17 priced as it is a UNE.
- 18 Mike McKanna is a Senior Manager of Local
- 19 Exchange Carrier Billing and Collection and Business
- 20 Analysis for WorldCom. He's been with WorldCom for
- 21 six years in that area and also addressing collection,
- 22 fraud, high toll, and credit and collection practices.
- 23 Prior to that, he was employed by May
- 24 Department Stores in the comptroller's organization
- 25 and addressed the issue of billing and collection

- 1 while he was at May.
- 2 His testimony addresses the issue of what is
- 3 called alternately billed traffic, or ABT. That's
- 4 traffic such as collect calls, third-party billing,
- 5 credit card calls, things like that.
- 6 His testimony will demonstrate that the
- 7 originating carrier ultimately bears the burden of
- 8 such a call being uncollectible, not the terminating
- 9 carrier who is simply acting as a billing agent for
- 10 the originating carrier. His testimony will also show
- 11 that the terminating carrier should be able to collect
- 12 many of these uncollectible charges from the
- 13 originating carrier.
- Don Price is a Senior Manager in the
- 15 Competition Policy Group in the Western Region Public
- 16 Policy Group of WorldCom. He's been with MCI WorldCom
- 17 for 15 years, and prior to that spent five years at
- 18 GTE and three years at the Texas Public Utilities
- 19 Commission addressing a variety of public policy
- 20 issues involving telecom.
- 21 His testimony will demonstrate that Bell
- 22 should be required to maintain its systems. If it
- 23 were to maintain certain features and functionalities,
- 24 if it chooses to change out equipment, at least
- 25 through the term of the agreement, the interconnection

- 1 agreement, that Bell should be required to combine
- 2 elements that are ordinarily combined, that Bell
- 3 should provide enhanced extended loops, ELS, or E-L-S,
- 4 without use restrictions, that stand alone
- 5 multiplexing should be provided, that Bell should
- 6 offer unbundled dedicated transport between itself and
- 7 third parties, that CLECs are impaired without access
- 8 to local switching, and, finally, that Bell should
- 9 provide via electronic feed emergency public agency
- 10 numbers to WorldCom.
- 11 Mike Schneider -- Schneider is a commercial
- 12 attorney with WorldCom. He's been with the company
- 13 about six years working in network facilities and
- 14 carrier transactions, most recently dealing with
- 15 interconnection agreements.
- 16 His testimony addresses various G, Ts and
- 17 Cs, general terms and conditions issues, including the
- 18 unnecessary limitation of liability of language
- 19 proposed by Southwestern Bell, whether Bell should
- 20 waive its rights to the "necessary and impair test,"
- 21 and sort of a related issue, whether WorldCom should
- 22 waive its right to challenge the agreement, and,
- 23 finally, if the directory listing information
- 24 attachment should contain a specific breach of
- 25 contract language from the G, Ts, and Cs contained in

- 1 the agreement.
- 2 Finally, Steve Turner is the principal with
- 3 Kaleo Consulting. The Commission is well aware of
- 4 Mr. Turner. He's testified extensively, not only at
- 5 this Commission, but in, you know, various commissions
- 6 around the country.
- 7 He previously worked as a research engineer
- 8 for General Electric and worked for AT&T for over ten
- 9 years and was extensively involved in AT&T's local
- 10 operations.
- 11 Mr. Turner will testify on various costing
- 12 issues. We feel his testimony will demonstrate that
- 13 the Commission should re-examine UNE loop rates given
- 14 21st century technology in light of the \$6 billion
- 15 that Southwestern Bell has publicly stated it is
- 16 committing to Project Pronto, that unbundled switching
- 17 should be flat rated, that the daily use fee should be
- 18 eliminated, and the signaling point code rate should
- 19 also be eliminated.
- Thank you for your time and consideration.
- JUDGE RUTH: Just a moment.
- By my notes, you have, let's see, at least
- 23 ten minutes left for your opening statement. I won't
- 24 require you to state anything further, but you might
- 25 want to give the Commissioners a brief overview of

- 1 your theory of the case. And one of the things that
- 2 was mentioned in this discussion previously about
- 3 WorldCom, Mr. Lumley indicated that if the Commission
- 4 makes a decision on certain elements or portions here,
- 5 you want an opt-in provision for 438. You might
- 6 explain that in a little bit more detail for the
- 7 benefit of Commissioners.
- 8 MR. MORRIS: Okay. This all goes back to
- 9 what I will -- what I will characterize as the
- 10 Commission's unduly restrictive reading of the time
- 11 line set out in Section 252(C)(4) of the Telecom Act
- 12 regarding time lines for arbitrations.
- 13 As an add-on to that, let me just say that
- 14 in the states that I'm responsible for, I'm not aware
- 15 of any Commission taking such a confining view and
- 16 limiting its -- giving it -- limiting the opportunity
- 17 of the Commission to fully address certain issues,
- 18 one, or either that -- or as in the case in Texas, I
- 19 believe the Texas Commission has set up a generic
- 20 Project Pronto proceeding to address the UNE loop
- 21 rates in light of the new network architecture and
- 22 21st century technology.
- 23 I say that for backdrop because what -- to
- 24 answer your question, Judge Ruth, what we're now faced
- 25 with is an arbitration with a time line imposed where,

- 1 as a practical matter, neither we nor the Commission,
- 2 which I believe the Staff has suggested, has any
- 3 meaningful opportunity to examine the banker boxes
- 4 full of cost studies in this proceeding. It simply
- 5 can't be done.
- 6 And what we were addressing in the -- with
- 7 respect to the 438 case was the timing, and that is
- 8 this -- under the procedural schedule imposed in this
- 9 case, this case has to be wrapped up prior to any
- 10 likely decision being issued in 438. As the
- 11 Commissioners are well aware, you spent the entire
- 12 week addressing those 35 or 36 cost issues in the 438
- 13 docket, and I will submit to you that if you remember
- 14 your Vin diagrams in mathematics, the 438 case is
- 15 essentially a subset, a small circle of the issues
- 16 that we have that you have to address in this case.
- 17 And the -- excuse me -- the one concern that
- 18 I have is that in the desire to wrap up this case in
- 19 the time you've imposed on yourselves and everybody
- 20 else, that the decision may not be as thoroughly
- 21 fleshed out and reasoned as the decision that we hope
- 22 and expect you-all to issue in the 438 case given the
- 23 time differences, and address -- and hearing the
- 24 evidence, having a reasonable opportunity to conduct
- 25 discovery, and, you know, whatever.

- 1 What Judge Ruth was talking about is if --
- 2 we would like -- we, WorldCom, would like the
- 3 opportunity to opt into the 438 rates once the
- 4 Commission issues a decision in that case. Of course,
- 5 you know, whether we do or not is going to be a
- 6 function of what we do -- or what order results in
- 7 this case as to those issues, as to, I'll call it, the
- 8 438 issues, some 35 or 36 UNE rates in issue in here
- 9 and in 438.
- 10 Does that answer your question?
- 11 JUDGE RUTH: Yes. Thank you. Thank you
- 12 very much.
- MR. MORRIS: Thank you.
- 14 Mr. Lane?
- MR. LANE: Thank you, your Honor.
- My name is Paul Lane, and I represent
- 17 Southwestern Bell in this case, along with Mimi
- 18 MacDonald and Kirk Kridner, each of whom will also be
- 19 participating.
- 20 First, let me say I appreciate that the
- 21 Commission has given some additional time to the
- 22 parties for cross-examination in this case. I think
- 23 the amount of time that originally had been set wasn't
- 24 adequate, and we appreciate that. I know there is
- 25 some concern about our ability to get done by Friday,

- 1 and I will assure you we will do our best and commit
- 2 to do whatever we need to do to get done in a timely
- 3 fashion.
- 4 Let me give an overview of this case. It's
- 5 a negotiation leading to an arbitration under the
- 6 Telecommunications Act of 1996. There were several
- 7 avenues that were available to WorldCom in connection
- 8 with those negotiations, one of which was to opt into
- 9 the Missouri 271 agreement, or M2A, and they could
- 10 have opted into that in whole, but they chose not to
- 11 do that.
- 12 They could have opted into that agreement in
- 13 relevant part, meaning in compliance with the
- 14 attachment 26 of the M2A, and they did that in part,
- 15 but not in part. Where they did is they took resale
- 16 attachments, 1 through 5, which are all grouped
- 17 together, and they followed attachment 26 for those
- 18 purposes.
- 19 They took the performance plan of
- 20 measurements and remedies that are in attachment 17
- 21 and their associated appendices, and they took various
- 22 other parts in the M2A, and they did that in
- 23 compliance with attachment 26.
- 24 But they didn't follow the requirements of
- 25 attachment 26 of the M2A for purposes of unbundled

- 1 network elements, or UNEs, either for terms and
- 2 conditions or for prices.
- 3 Mr. Smith, a Southwestern Bell witness,
- 4 attached attachment 26 to his testimony in this case,
- 5 and if you refer to that or refer to the M2A, you will
- 6 see that under the section designated "UNEs," that the
- 7 legitimately related provisions are specified there,
- 8 and it indicates that attachments 6 through 10 and
- 9 appendices are legitimately related, meaning that if a
- 10 CLECs wants to take something concerning UNEs out of
- 11 the M2A that they need to take all of attachments 6
- 12 through 10.
- 13 WorldCom didn't want to do that here. And
- 14 that's their right. They are not required to. But
- 15 when they choose not to, then all of the terms and
- 16 conditions that are in attachments 6 through 10 are at
- 17 issue in this case, and the parties then need to
- 18 negotiate, and if they are not able to reach
- 19 agreement, then they arbitrate.
- 20 We did reach agreement with regard to the
- 21 wording of attachments 7, 8, and 9 in this case which
- 22 are part of the UNEs, and we agreed that each side
- 23 would follow the terms and conditions of the M2A for
- 24 that.
- 25 But it's important to note that they didn't

- 1 opt into attachments 7 through 9 of the M2A. The
- 2 parties negotiated the same language there to come to
- 3 what works out to be the same result. But they
- 4 couldn't opt into that because you would have to
- 5 take, and they had to take, attachments 6 and 10 as
- 6 well, and they preferred not to do that.
- 7 With regard to attachment 6, it appears to
- 8 be WorldCom's proposal in this case that they would
- 9 like to take most of the non-price terms and
- 10 conditions and most of the pricing terms from the M2A
- 11 but not others. Is that legitimate? It's clearly not
- 12 legitimate under the M2A itself.
- 13 As I indicated, page 2 of attachment 26
- 14 identifies that you have to take attachments 6 through
- 15 10 and their associated appendices under the M2A. You
- 16 can't take just those portions that you find favorable
- 17 and try to modify those that you would like a better
- 18 deal on.
- 19 Can they come to the Commission and say,
- 20 Well, I understand that I have to negotiate and
- 21 arbitrate all of attachments 6 and 10, but for my
- 22 position in the case my proposal is I want what's in
- 23 the M2A except for some of the non-price terms, and
- 24 I'll take most of the price terms from the M2A, but
- 25 not loops and switching.

- 1 Is that a legitimate position for them to
- 2 take in this case? The answer to that is in part yes,
- 3 but in part no. I'm going to separate the non-price
- 4 terms and conditions from the price terms and
- 5 conditions.
- 6 With regard to the price -- excuse me -- the
- 7 non-price terms and conditions of attachment 6, they
- 8 generally can, if they want, propose that that's their
- 9 position in the case. But they can't propose
- 10 legitimately under the Act certain parts of the
- 11 non-price terms and conditions of the M2A because
- 12 parts of it are voluntary proposals on Southwestern
- 13 Bell's part that go beyond the Act and can't be
- 14 imposed in an arbitration.
- 15 Chief among those is the issue of combining
- 16 unbundled network elements that aren't combined in our
- 17 network today. That was a voluntary offering that we
- 18 made under the M2A that the Eighth Circuit has made
- 19 clear in two separate occasions. It's not something
- 20 that is required by the Act or can be imposed in an
- 21 arbitration under the Act. So they can't propose --
- 22 even though they purport to in this case, they can't
- 23 propose those and the Commission can't adopt those
- 24 non-priced terms and conditions that aren't -- that
- 25 can't be lawfully imposed.

- 1 With regard to the other non-price terms and
- 2 conditions, they certainly can propose them if they
- 3 are lawful, but Southwestern Bell has an equal right
- 4 to propose different terms on those particular items.
- 5 With regard to pricing terms from the M2A,
- 6 that's really a different matter. That's because the
- 7 Act imposes some specific requirements on what parties
- 8 are to do with regard to prices and what the
- 9 Commission is to do. And under the Act under
- 10 Section 252(D)(1) there is an obligation to set prices
- 11 that are based on cost. And the FCC has said that
- 12 costs must be done pursuant to a total element long
- 13 run incremental cost, or TELRIC, standard.
- 14 Has MCI -- excuse me. Has WorldCom shown
- 15 that the rates in the M2A meet the TELRIC
- 16 requirements? No, they haven't proposed any testimony
- 17 in this case to that effect.
- 18 Can the Commission go outside the record of
- 19 this case to take terms and conditions of prices from
- 20 the M2A? I think not. The evidence needs to be in
- 21 the record here. But even if the Commission could go
- 22 to the source of those M2A rates, would they be cost-
- 23 based for purposes of this case? I think the answer
- 24 to that is clearly no. And there is two reasons for
- 25 that.

- 1 The first is that many of the rates in the
- 2 M2A were derived from the first AT&T arbitration which
- 3 was Case No. TO-97-40. While the Commission followed
- 4 the TELRIC method in that case and utilized the cost
- 5 studies that Southwestern Bell had proposed, the
- 6 Commission made a number of adjustments to TELRIC
- 7 costs that in our view drove those rates below that
- 8 which a proper application of the TELRIC methodology
- 9 would yield.
- 10 And I would point out as the Commission --
- 11 some of you are new and some were there, but
- 12 Southwestern Bell didn't have the opportunity back in
- 13 that 97-40 case to contest the proposed adjustments.
- 14 The Commission never did have a hearing because they
- 15 simply accepted a Staff proposal, and while they had
- 16 said they were going to have a hearing, for whatever
- 17 reason didn't, and that was something that obviously
- 18 caused us some problems and we appealed that case.
- 19 But we feel that those rates, while we're
- 20 voluntarily willing to offer them for purposes of the
- 21 M2A, they are not appropriate in our view outside of
- 22 the M2A because they yield rates lower than that which
- 23 proper TELRIC application would yield.
- 24 But whether you agree with our position on
- 25 the 97-40 rates or not, I think it's undeniable that

- 1 the M2A reflects additional price reductions that
- 2 Southwestern Bell made specifically for purposes of
- 3 resolving questions and issues raised in connection
- 4 with our getting into the long distance market. And
- 5 we made voluntary reductions that aren't cost-based,
- 6 and there's certainly no evidence that those were
- 7 necessary to comply with TELRIC.
- 8 Specifically, for purposes of the M2A, we
- 9 made voluntary reductions of 18 1/2 percent for the
- 10 per-minute-of-use switching charges, we made an
- 11 18 1/2 percent reduction on most of the transport
- 12 charges. We made a 10 percent reduction on average
- 13 for loops, none in the urban area, but much greater
- 14 than 10 percent in the rural areas, for an overall
- 15 average of 10 percent. And we reduced nonrecurring
- 16 charges under the M2A by an additional 25 percent.
- 17 It's real clear that there is no evidence in
- 18 this case that those rates from the M2A are cost-based
- 19 pursuant to TELRIC. In fact, they are lower in our
- 20 view than what TELRIC would require.
- 21 At the end of the day, the Commission
- 22 can't -- and WorldCom can't adopt the M2A rates while
- 23 varying switching and loop rates as they seek to do
- 24 here, nor is there any cost basis to support setting
- 25 lower switching or loop rates as WorldCom would like.

- 1 WorldCom has offered no cost studies on these UNEs and
- 2 has not proposed any specific adjustments to
- 3 Southwestern Bell's cost studies. All WorldCom has
- 4 done is point to rates from another state, but rates
- 5 from another state is not proof of cost in Missouri.
- 6 The Commission already rejected the same
- 7 claim in the AT&T arbitration case, the most recent
- 8 one, TO-2001-455, where the Commission found that
- 9 rates below M2A obviously weren't appropriate for
- 10 Missouri. The Commission said that on page 20 of that
- 11 order.
- 12 Southwestern Bell has pointed out in its
- 13 testimony in this case that other states have higher
- 14 rates for loops and higher rates for switching than
- 15 are contained in the M2A, but those don't provide a
- 16 basis to set rates in this case any more than
- 17 WorldCom's pointing to rates from Illinois, Michigan,
- 18 and New York which they say are lower.
- I think the purpose of what WorldCom has
- 20 done by pointing to Illinois and to Michigan is to
- 21 create the impression to the Commission that these
- 22 rates in the M2A in Missouri are inappropriately low.
- 23 And I would ask the Commission to look closely to
- 24 Mr. Hampton, Southwestern Bell's witness in this case,
- 25 who has attached two studies from independent sources

- 1 that do a survey of rates in all of the states.
- 2 One of the sources was the Director of
- 3 Consumer Advocate in West Virginia, which looked in
- 4 the spring of 2001 at all of the rates in the
- 5 50 states plus the District of Columbia and found that
- 6 the rates that are set -- that were set in 97-40, and,
- 7 again, before we made those reductions, that even at
- 8 that point that Southwestern Bell's rates in Missouri
- 9 as set by the Commission were in the middle to lower
- 10 middle of rates around the country.
- 11 The second study that Mr. Hampton attached
- 12 is a -- is from the Commerce Capital Markets, which is
- 13 an investment banking advisory service that goes to
- 14 the investment community, and it looked at the rates
- 15 again. These now were the M2A rates. And, again, the
- 16 same result is attached. Southwestern Bell's rates in
- 17 Missouri in the M2A are in the middle to lower middle
- 18 of other states.
- 19 So the Commission should not come away with
- 20 the impression that the rates in the M2A as they exist
- 21 today are out of line with the rates in other states.
- 22 They are not.
- 23 I think WorldCom has backed away from its
- 24 claims in its Petition that it can't be profitable
- 25 under the M2A rates. I think they recognize that

- 1 that's not a proper source of inquiry, but
- 2 Southwestern Bell has presented evidence through
- 3 Mr. Hughes that there is clear evidence and ability of
- 4 CLECs under the rates with which we have in the M2A
- 5 for them to be profitable. And those rates are
- 6 substantially below that which Southwestern Bell
- 7 recovers on a retail basis from its customers when you
- 8 consider the full gamut of revenue that are available
- 9 to CLECs, meaning they get basic local, they get
- 10 access services, they get vertical services, they get
- 11 toll. All of those things help make them profitable
- 12 if they want to provide the service.
- 13 The only other evidence that WorldCom
- 14 presents in this case is unsupported claims that rates
- 15 must be too high because Southwestern Bell has merged
- 16 with Ameritech and rates must be too high because
- 17 Southwestern Bell has started to implement its Project
- 18 Pronto architecture.
- 19 Mr. Smallwood addresses those in his
- 20 testimony. He makes one point I think very clear, and
- 21 that is, when you look at the merger savings or when
- 22 you look at Project Pronto implementation, what
- 23 Southwestern Bell is discussing in its investment
- 24 community there is the relationship of those items to
- 25 its embedded existing network. That is different than

- 1 the network that you have to look at for purposes of
- 2 TELRIC which requires you to look at forward-looking,
- 3 completely efficient, most modern network available.
- 4 And our cost studies reflect that already.
- 5 There doesn't need to be adjustments because of
- 6 Project Pronto or adjustments because of the
- 7 SBC/Ameritech merger because saving from that are
- 8 already implicit in our cost studies because they are
- 9 based on the most efficient, forward-looking network.
- 10 What about the alternative requests that
- 11 WorldCom has? Let's have some future generic docket
- 12 to look at rates if we're not going to do it here.
- 13 That's the same proposal that was advanced by AT&T in
- 14 the 455 case that I referenced earlier. It was
- 15 rejected by the Commission as inconsistent with the
- 16 statute, and we think that result still holds.
- 17 The statute contemplates that you will have
- 18 bilateral negotiations between a CLEC and an ILEC and
- 19 that if they are not able to reach agreement, those
- 20 issues with which they can't agree are brought to
- 21 arbitration. We can't have a generic docket, because
- 22 that's not consistent, we think, with the
- 23 contemplation of the Act.
- We think it's also a fruitless exercise even
- 25 if it's lawful. If the costs as determined by the

- 1 Commission are greater now than they were then, the
- 2 M2A rates still remain available to any CLEC that
- 3 wants them. So no higher rates would result, and the
- 4 CLECs would remain free to take the M2A rates.
- If some costs were lower, that still
- 6 wouldn't be something that we think of as appropriate
- 7 to explore because you need to take the entirety of
- 8 the rates, and, in addition, there is provisions in
- 9 the M2A, as I mentioned earlier, that go beyond the
- 10 law such as combinations that CLECs would nevertheless
- 11 want.
- 12 From our perspective, there is no way that
- 13 any future proceeding would result in higher rates,
- 14 and, in our view, it's not a reasonable approach since
- 15 it would be a one-way binding on Southwestern Bell but
- 16 not on CLECs who could continue to arbitrate or who
- 17 could continue to take the M2A rates.
- 18 The final reason we don't think it's
- 19 appropriate to have a generic docket at this time
- 20 relates to the TELRIC standard itself. As the
- 21 Commission may be aware, the FCC's TELRIC standard is
- 22 on review now at the Supreme Court. At this point the
- 23 Eighth Circuit has said that it's acceptable to look
- 24 on a forward-looking basis, but they have thrown out
- 25 that portion of the FCC's TELRIC rules that say you

- 1 have to price costs based on the most efficient
- 2 network possible and the most modern network possible.
- 3 That's pending in front of the Supreme Court.
- 4 We don't know what they'll do, but whatever
- 5 they do, it's going to have some significant impact on
- 6 any "generic docket" that the Commission might be
- 7 interested in having. We will be spending a lot time
- 8 and effort to do something that -- under a standard
- 9 that may no longer be the standard.
- 10 If it were appropriate, which we don't think
- 11 it is, to have some sort of generic docket, it should
- 12 be conducted after we know what the Supreme Court does
- 13 with the TELRIC standard and after we know what the
- 14 FCC does in response to that Supreme Court decision.
- 15 And I would note that the M2A rates remain
- 16 available to carriers through March -- until March of
- 17 2005, so those rates stay good and are in effect
- 18 during that period of time.
- 19 I think probably the appropriate resolution
- 20 for this case is either one of two. Either you should
- 21 find that the cost studies that Southwestern Bell has
- 22 submitted are appropriate and adopt the rates and tell
- 23 WorldCom that that's what they should take in this
- 24 case, or if the Commission doesn't want to do that,
- 25 what will happen in any event is that WorldCom will

- 1 take the M2A, will take attachment 6 through 10.
- 2 I think it's appropriate for you to direct
- 3 them to do that, much as you did in the AT&T case with
- 4 one caveat: In the AT&T case, the Commission didn't
- 5 make it clear that AT&T had to take all of
- 6 attachments 6 and 10 and couldn't vary some of the
- 7 provisions in there. And we filed an application for
- 8 rehearing in that case that eventually became moot
- 9 because I think AT&T recognized that and they agreed
- 10 that they would take the M2A attachments 6 through 10,
- 11 and they wouldn't then need to have the Commission set
- 12 different non-price terms and conditions.
- 13 Given the time restraints, I won't go into
- 14 all of the other issues, but I would note that most
- 15 of these issues that we have here involve
- 16 attachment 6 or 10, and if the Commission directs
- 17 WorldCom to take attachments 6 and 10 of the M2A, this
- 18 would resolve almost all of the issues. It would
- 19 resolve issues 1 through 23, 25 through 28, 30 through
- 20 39, 45 and 46, and 48 through 50. The only issues
- 21 which would still be remaining for the Commission to
- 22 determine would be those that relate to general terms
- 23 and conditions under the M2A and those that relate to
- 24 attachment 18, directory listing information.
- 25 Everything else is resolved under the M2A if you take

- 1 all of attachments 6 through 10.
- Now, if the Commission goes a different
- 3 route and looks on an individual basis at each term
- 4 and condition under attachment 6 and 10, I think three
- 5 points need to be made.
- 6 First is that some of those things, as I
- 7 indicated earlier, were voluntarily given by
- 8 Southwestern Bell in the M2A and can't be imposed by
- 9 the Commission. There are several of those. We
- 10 identify those in our testimony. Staff agrees with us
- 11 on some. I'm not sure of their position on others,
- 12 and we'll explore that on cross-examination.
- 13 The second point is that it should be a
- 14 two-way street. If WorldCom is not bound to take all
- of the terms and conditions of the M2A, simply
- 16 pointing to a term or condition from attachment 6
- 17 should be binding on Southwestern Bell. We ought to
- 18 have the same opportunity to explain why it's
- 19 appropriate to vary that in some respect and we would
- 20 ask the Commission to consider those.
- 21 The third reason is that there are some
- 22 provisions that have no counterpart in the M2A but are
- 23 proposals that we think are inappropriate for various
- 24 reasons, and our testimony goes into that. One
- 25 example is intraLATA toll where WorldCom appears to

- 1 try to force Southwestern Bell to be a provider of
- 2 toll to its customers, and we don't undertake to do
- 3 that, and the Commission considered a similar proposal
- 4 in the AT&T arbitration and rejected that as beyond
- 5 the Commission's authority.
- 6 In summary, I would say that WorldCom has
- 7 failed to present any evidence to support its adoption
- 8 of certain M2A prices and not others and certain terms
- 9 and conditions non-price from attachment 6 and 10 and
- 10 not others. The Commission should either adopt
- 11 Southwestern Bell's proposals in this regard and
- 12 utilize Southwestern Bell's cost studies in this case
- 13 in that regard, or direct WorldCom to take those
- 14 attachments 6 through 10 of the M2A in its entirety
- 15 and consistent with attachment 26.
- And with regard to the remaining issues, we
- 17 believe the Commission should adopt those that we
- 18 propose with regard to the general terms and
- 19 conditions and with regard to attachment 18 which is
- 20 the DLI attachment.
- 21 Thank you.
- JUDGE RUTH: Thank you.
- 23 Mr. Bates?
- MR. BATES: Thank you, your Honor.
- 25 And good morning, Commissioners.

- I will be fairly brief this morning.
- 2 I would like to state that the Staff has
- 3 worked very hard on this case and from, I think, the
- 4 perspective that the Commission wanted it to take,
- 5 that of a neutral third party. Staff has evaluated
- 6 the proposals of the parties from the perspectives
- 7 basically of technical feasibility and also of
- 8 consumer interest.
- 9 As the testimony is elicited from the stand
- 10 in this case, Staff may have some clarifications as
- 11 far as recommendations that will add to what it has
- 12 placed in its Staff evaluation, and we would be
- 13 interested in having the opportunity to put that into
- 14 our briefs.
- 15 Staff would like to state and thank
- 16 Southwestern Bell and WorldCom for their cooperation
- 17 in this matter. They've been very forthcoming with
- 18 information that has enabled Staff to put the Staff
- 19 evaluation together with the most possible information
- 20 we had available, and I think the parties have worked
- 21 conscientiously as the Commission has envisioned to
- 22 put this information before it.
- 23 Briefly, Section 252(I) of the
- 24 Telecommunication Act of 1996 states that a local
- 25 exchange carrier shall make available any

- 1 interconnection service or network element provided
- 2 under an agreement approved under this section to
- 3 which it is a party to any other requesting
- 4 telecommunications carrier upon the same terms and
- 5 conditions as those provided in the agreement.
- 6 In this matter, WorldCom has exercised that
- 7 right and chosen to exercise the Most Favored Nation
- 8 option for certain provisions of the M2A while
- 9 choosing to negotiate and arbitrate other provisions.
- 10 Attachment 26 which has been discussed here
- 11 already extensively this morning states in the
- 12 relevant part that the agreement is expressly limited
- 13 to the item or items or section or sections into
- 14 which the CLEC MFNs under section 252(I). This
- 15 attachment 26 is legitimately related to each and
- 16 every item or items and section or sections of the
- 17 Missouri 271 agreement. The prices as set forth in
- 18 the appendix pricing UNE schedule of prices are
- 19 legitimately related to each and every item or items
- 20 in section or sections of the Missouri 271 agreement
- 21 to which they apply.
- Now, in this matter, WorldCom has elected to
- 23 MFN into the M2A with the exception of four
- 24 attachments and one appendix, those being
- 25 attachment 6, UNE; attachment 10, provision of

- 1 customer usage data, UNE; attachment 18, mutual
- 2 exchange of directory listing information;
- 3 attachment 27, alternately billed traffic, new; and
- 4 appendix pricing UNE, schedule of prices.
- 5 According to attachment 26, WorldCom must
- 6 accept all legitimately related provisions into which
- 7 a CLEC MFNs under section 252(I); however, as
- 8 previously noted, attachment 26 specifically states
- 9 that the agreement is expressly limited to the item or
- 10 items or section or sections into which the CLEC MFNs.
- 11 WorldCom has agreed to these conditions.
- 12 As WorldCom has specifically chosen to
- 13 negotiate and/or to arbitrate the aforementioned
- 14 attachments and appendix, Staff is of the opinion and
- 15 belief that the legitimately related provision of
- 16 attachment 26 does not apply to them. Of course, any
- 17 section within those attachments or appendix to which
- 18 WorldCom has MFNed are subject to the conditions of
- 19 attachment 26. However, WorldCom has agreed to abide
- 20 by the provisions of attachment 26 in these instances
- 21 as well.
- 22 Finally, Staff would respectfully suggest to
- 23 the Commission that it order the parties to file a
- 24 final draft of the language after the Commission makes
- 25 its determination in this case in order to allow Staff

- 1 to review it for conformance to the Commission's
- 2 order. Staff believes that this will produce the best
- 3 possible product at the end in conformance with the
- 4 Commission's wishes and intentions.
- 5 Thank you very much.
- 6 JUDGE RUTH: Thank you, Mr. Bates.
- We will move on to calling the first
- 8 witness. I believe that is WorldCom.
- 9 Proceed.
- 10 MR. LUMLEY: Thank you, your Honor.
- 11 We call Steve Turner to the stand.
- 12 (Witness sworn.)
- JUDGE RUTH: Thank you.
- 14 Please be seated.
- 15 STEVEN E. TURNER testified as follows:
- 16 DIRECT EXAMINATION BY MR. LUMLEY:
- Q. Would you state your name, please?
- 18 A. Steven E. Turner.
- 19 Q. And on whose behalf are you testifying in
- 20 this case?
- 21 A. MCImetro Access Transmission Services, LLC,
- 22 Brooks Fiber Communications of Missouri, Inc., and MCI
- 23 WorldCom Communications, Inc.
- Q. And did you cause to be prepared and
- 25 submitted in this case Direct Testimony that's been

- 1 marked as Exhibit 1?
- 2 A. Yes, I did.
- 3 Q. And, likewise, did you prepare and cause to
- 4 be submitted in this case Rebuttal Testimony that's
- 5 been marked as Exhibit 2?
- 6 A. Yes, I did.
- 7 Q. Considering first your Direct Testimony, do
- 8 you have any corrections to make?
- 9 A. Yes, I do. On page 30, there's two
- 10 corrections I need to make.
- 11 There is a footnote 19 which needs to be
- 12 deleted. It was not supposed to be there, and so ${\tt I}$
- 13 would just propose deleting footnote 19 and the text
- 14 that's down below for it.
- 15 And then, secondly -- footnote 19, by the
- 16 way, is in line 15 of my testimony.
- 17 And then on line 19, there's a number there
- 18 that has a "begin confidential" and "end confidential"
- 19 around the number \$1.30, and that number is not
- 20 confidential. And so the "***begin confidential"
- 21 needs to be deleted, and the "end confidential***"
- 22 needs to also be deleted.
- 23 Q. Any other corrections to your Direct
- 24 Testimony?
- 25 A. No.

- 1 Q. Turning now to your Rebuttal Testimony, do
- 2 you have any corrections to that document?
- 3 A. Yes, I do.
- 4 Q. Would you state those?
- 5 A. On page 2 at line 4, the reference there
- 6 says DPL item No. 12. It should say DPL item Nos. 12
- 7 and 50.
- 8 And then just prior the question mark at the
- 9 end of line 5, the following text should be inserted:
- 10 "And should the Commission delete the 8 cent per
- 11 transaction charge for local account maintenance."
- 12 And then the only other correction is if you
- 13 go to line 12 in the question, the number six needs to
- 14 be changed to seven.
- 15 Q. Any other corrections to your Rebuttal
- 16 Testimony?
- 17 A. No
- 18 Q. With the corrections that you've stated
- 19 today in mind, if I asked you the questions that are
- 20 set forth in your Direct and Rebuttal Testimony today,
- 21 would your answers be the same?
- 22 A. Yes, they would.
- MR. LUMLEY: With that, your Honor, I offer
- 24 Exhibits 1 and 2 into the record, and tender the
- 25 witness for cross-examination.

1	JUDGE RUTH: Thank you.
2	First, Exhibit No. 1 is Mr. Turner's Direct
3	Testimony. Are there any objections to this document?
4	MR. BATES: No objection.
5	JUDGE RUTH: Southwestern Bell?
6	MR. LANE: No, your Honor.
7	JUDGE RUTH: It is received into the record.
8	(EXHIBIT NO. 1 WAS RECEIVED INTO EVIDENCE.)
9	JUDGE RUTH: Exhibit 2 is Mr. Turner's
10	Rebuttal Testimony. Are there any objections to this
11	document?
12	MR. BATES: No objection.
13	JUDGE RUTH: Okay. It is also received into
14	the record.
15	(EXHIBIT NO. 2 WAS RECEIVED INTO EVIDENCE.)
16	JUDGE RUTH: Thank you.
17	It's my understanding the parties propose
18	that Southwestern Bell do the cross-examination first;
19	is that correct?
20	MR. LANE: Yes, your Honor.
21	JUDGE RUTH: And your witness schedule
22	indicates you will take no more than 45 minutes for
23	this witness.

ASSOCIATED COURT REPORTERS, INC. (573)S636-7551 JEFFERSONOCITY,,MON65101

108

JUDGE RUTH: We will -- I propose then we go

MR. LANE: Yes, your Honor.

- 1 ahead and go until about a quarter after and take a
- 2 break at that time for lunch.
- 3 MR. LANE: Okay. That's fine.
- 4 CROSS-EXAMINATION BY MR. LANE:
- 5 Q. Good morning, Mr. Turner.
- 6 A. Good morning.
- 7 Q. You're aware this is an arbitration under
- 8 the 1996 Telecom Act. Right?
- 9 A. Yes, I am.
- 10 Q. Okay. And you're also aware, are you not,
- 11 that the Act imposes specific requirements on how
- 12 unbundled network elements, or UNEs, are to be priced.
- 13 Right?
- 14 A. Yes, I am.
- 15 Q. Okay. And it's fair to say that
- 16 section 252(D)(1) of the Act provides that UNEs are to
- 17 be priced based on cost. Correct?
- 18 A. That is one of the requirements that I
- 19 recall in that section. I believe there's a few
- 20 others, but that's correct.
- Q. And it's also fair to say that the FCC has
- 22 defined "cost" to be applied under what they've
- 23 designated as the total element long run incremental
- 24 cost, or TELRIC standard. Right?
- 25 A. That's correct.

- 1 Q. It's also fair to say that WorldCom hasn't
- 2 presented any cost studies of its own in this case.
- 3 Correct?
- 4 A. That would be correct.
- 5 Q. The only cost studies that were submitted in
- 6 this case are from Southwestern Bell. Right?
- 7 A. That's correct.
- 8 Q. Have you or any other WorldCom witness
- 9 presented evidence on Southwestern Bell's cost of
- 10 capital that is an input to various numbers of
- 11 Southwestern Bell's cost studies in this case?
- 12 A. In this proceeding?
- Q. Right.
- 14 A. No.
- 15 Q. Have you or any other WorldCom witness
- 16 presented evidence on depreciation rates that are used
- 17 in the various Southwestern Bell cost studies that
- 18 have been submitted in this proceeding?
- 19 A. No.
- Q. It's also fair to say that with regard to
- 21 all cost studies that are not at issue in the 438 case
- 22 that neither you nor any other WorldCom witness has
- 23 presented any evidence of specific adjustments that
- 24 you propose to be made to the Southwestern Bell cost
- 25 studies on those elements?

- 1 A. You're talking about the ones other than the
- 2 35 cost studies that are referenced at the end of my
- 3 Rebuttal Testimony?
- 4 Q. Yes.
- 5 A. I would say that that is not correct.
- 6 Q. Okay. Have you proposed specific
- 7 adjustments to -- let's take Southwestern Bell's loop
- 8 cost study?
- 9 A. The testimony that I provided indicates that
- 10 the investments associated with the Project Pronto
- 11 initiative should be reflected in the cost study. The
- 12 testimony I provided in this proceeding identifies
- 13 that there would be common cost changes because of the
- 14 mergers that SBC has participated in since the first
- 15 round of loop studies have been done and that those
- 16 common cost changes should be reflected in your cost
- 17 studies.
- 18 Q. All right. Let me be more precise in my
- 19 question, then, if I wasn't.
- 20 Neither you nor any other WorldCom witness
- 21 has presented specific numerical adjustments to
- 22 Southwestern Bell's cost studies with regard to loops
- 23 in this case. Correct?
- A. No. I was unable to do that.
- 25 Q. The same is true for switching and transport

- 1 studies, that neither you nor any other WorldCom
- 2 witness has presented specific numerical adjustments
- 3 to Southwestern Bell's cost studies on those issues.
- 4 Correct?
- 5 A. Switching would be correct. Transport would
- 6 be incorrect.
- 7 Q. Okay. And transport, is that because
- 8 there's some reference to that in your Rebuttal
- 9 Testimony in the schedule that you attach from the 438
- 10 case?
- 11 A. That's correct. And my testimony, the text
- 12 contained within that has very specific issues related
- 13 to transport that I identify there.
- 14 Q. Okay. And to get to that, then, you attach
- 15 a copy of your testimony in the 438 case -- your
- 16 Rebuttal Testimony is attached as an exhibit to your
- 17 Rebuttal Testimony in this case. Correct?
- 18 A. Yes, sir, that's correct.
- 19 Q. But what you've attached is the
- 20 nonproprietary version which excludes all of the
- 21 thirty-something attachments that you had proposed in
- 22 your proprietary version in the 438 case. Correct?
- 23 A. It does not exclude all of them, but what I
- 24 did to be cautious was I excluded confidential
- 25 exhibits in an effort to be careful not to disclose

- 1 numbers or information that I had received through
- 2 discovery in Case No. 438 but did not necessarily
- 3 have -- given the limited amount of time, was unable
- 4 to confirm that I had those same numbers in 222.
- 5 Q. Okay. The attachments that you did not
- 6 include in your testimony here that were in the
- 7 proprietary version of the 438 case were all of the
- 8 specific numerical adjustments that you were proposing
- 9 to the Commission to Southwestern Bell's cost studies
- 10 in that 438 case. Right?
- 11 A. No. I was precluded in 438 from putting in
- 12 the specific changes from a cost study standpoint.
- 13 But what I excluded is in Southwestern Bell's cost
- 14 studies there is a summary schedule that identifies
- 15 the costs that come out of your models. And so for
- 16 approximately 35 of the cost studies that you filed in
- 17 this case, you filed the same cost study, and I would
- 18 propose the same changes as are documented in my
- 19 testimony, but I did not insert those price schedules
- 20 here because they relied on information that was
- 21 confidential in Case No. 438.
- 22 Q. The specific adjustments that you were
- 23 proposing in 438 aren't attached to your testimony
- 24 here?
- 25 A. No, nor are they to Southwestern Bell's, but

- 1 that's -- we've discussed that at great length in 438.
- 2 The content of what I changed --
- 3 Q. I don't have a question.
- 4 A. -- is contained within my testimony.
- 5 Q. It's also true that your proposed
- 6 adjustments that are discussed in general terms in
- 7 your 438 testimony that you've attached in this case
- 8 rely upon testimony of other CLEC witnesses in that
- 9 438 case. Correct?
- 10 A. Could you ask the question again?
- 11 Q. Yes. It's also true that your proposed
- 12 adjustments in the 438 case that are -- the substance
- 13 of which are reflected in your Rebuttal Testimony in
- 14 that case rely upon testimony of other CLEC witnesses
- 15 from the 438 case. Right?
- 16 A. Yes, a small percentage of the adjustments
- 17 that I made in the 438 case relied on testimony from
- 18 two other witnesses in the -- that the CLECs put up in
- 19 438.
- Q. And, specifically, the other witnesses that
- 21 you relied upon were Mr. Hirshleifer with regard to
- 22 the proposed cost of capital. Correct? That's one of
- 23 them?
- 24 A. That's one of them.
- Q. And the other one was Mr. Rhinehart who

- 1 testified concerning various matters including support
- 2 asset factors, maintenance factors, building factors,
- 3 depreciation rates, labor rates, among other things.
- 4 Right?
- 5 A. That's correct.
- 6 Q. And neither you nor any other WorldCom
- 7 witness in this case have proposed either cost of
- 8 capital or the specific factors that Mr. Rhinehart
- 9 proposed in the 438 case. Correct?
- 10 A. I have incorporated those specific factors
- 11 into the proposed rates that are contained in
- 12 schedules for my Rebuttal Testimony.
- 13 Q. Neither you nor any other WorldCom witness
- 14 has presented evidence in this case to support the
- 15 cost of capital or to support the factors that
- 16 Mr. Hirshleifer and Mr. Rhinehart utilized in the 438
- 17 case. Correct?
- 18 A. That's correct.
- 19 Q. With regard to loops and switching, the --
- 20 you have reflected in your testimony rates from
- 21 Illinois and Michigan and New York. Correct?
- 22 A. I don't believe so.
- 23 Q. Your position that you put in your testimony
- 24 does not include any reference to rates for loops or
- 25 switching from --

- 1 A. Those three states?
- 2 Q. Yes.
- 3 A. No. My testimony makes comparison to
- 4 Illinois in my Rebuttal Testimony, to address some
- 5 statements made by Southwestern Bell witnesses, but in
- 6 my Direct Testimony, my arguments for reevaluating the
- 7 cost for the loops do not rely on the rates in those
- 8 other states, and my argument for reevaluating
- 9 switching does not rely on rates in those other
- 10 states.
- 11 And so it's only in my Rebuttal Testimony
- 12 that I draw a comparison, and it is to draw a
- 13 comparison between suburban rates in Illinois to urban
- 14 rates in Missouri to show how significantly higher
- 15 they are here. But it's because of Southwestern
- 16 Bell's witnesses saying that we were making an
- 17 inappropriate comparison of urban to urban, which I
- 18 actually agree. You can't do that with Illinois
- 19 because the nature of their urban zone is it's very
- 20 restrictive there, so I did a comparison to the
- 21 suburban zone.
- 22 Q. WorldCom's Petition in this case argued that
- 23 loop and switching rates should be adjusted because
- 24 similar rates were lower in Michigan, Illinois, and
- 25 New York. Right?

- 1 A. I believe that was a small portion of what
- 2 the Petition argued.
- 3 Q. And you would agree with me that rates from
- 4 other jurisdictions aren't the equivalent of costs in
- 5 the Missouri jurisdiction. Correct?
- 6 A. Well, that's kind of a two-fold question.
- 7 Cost and rates are distinct from one another in that
- 8 cost has a common cost factor that's multiplied on top
- 9 of the cost to develop a rate. So there is a
- 10 proportional relationship between cost and rates that
- 11 would be easy enough to adjust or compare between
- 12 various states.
- 13 The second aspect of your question is, can
- 14 you compare between states? And I believe that you
- 15 can in that many of the cost drivers that you would
- 16 identify, for instance, between a Missouri and an
- 17 Illinois, would be, in fact, very comparable, and,
- 18 therefore, it would be instructive, and I believe
- 19 that's probably why WorldCom incorporated that into
- 20 their Petition, but it would be instructive to see
- 21 what loop rates are in another state where many of the
- 22 inputs are the same in Illinois as for Missouri in
- 23 seeing how different those rates are that are being
- 24 developed by those commissions when you compare the
- 25 ultimate results.

- 1 Q. It's fair to say that it might be of
- 2 interest to compare rates but that the rates from
- 3 another jurisdiction do not determine what the costs
- 4 are for any particular UNE in Missouri. Correct?
- 5 A. Well, you're asking some very open
- 6 questions, and it would --
- 7 Q. Which is unusual.
- 8 A. -- depend on the element.
- 9 Well, I like those kind of questions.
- In my testimony in 438 I identified some
- 11 specific elements that I felt this Commission could
- 12 take directly from other states and use in Missouri.
- 13 And the reason for my testimony in that proceeding
- 14 being such was that there are certain elements that
- 15 when Southwestern Bell deploys them, they deploy them
- 16 regionally.
- 17 Examples of that that I used in my testimony
- 18 in 438 was the AIN query. It's a regional system.
- 19 The cost study that you filed wherever you filed it
- 20 always relies on the cost from a regional perspective
- 21 and that you identify all of the costs for the STPs
- 22 and databases that those STPs have to query.
- 23 So with the exception of common cost
- 24 differences, which -- my recollection was Commissioner
- 25 Gaw asked a series of questions trying to understand

- 1 this, but with the exception of common cost
- 2 differences between Texas and Missouri, you should
- 3 expect to see exactly the same results between a cost
- 4 study in Texas for that element and a cost study in
- 5 Missouri.
- 6 Q. All right. Let me be more precise with my
- 7 question then.
- 8 With regard to loops, first, would you agree
- 9 with me that there are factors that vary between
- 10 states that can result in different loop costs in
- 11 different states?
- 12 A. Yes.
- 13 Q. Some of those factors that can vary include
- 14 loop length, density of population, cost of labor, and
- 15 so forth? Those are examples. Correct?
- 16 A. Yes, they are.
- 17 Q. Okay. And there is also other factors that
- 18 may vary depending upon how the Commission in another
- 19 state treats a particular element of cost. Correct?
- 20 A. I'm not sure I follow that question.
- 21 Q. Okay. Would you agree with me that
- 22 Commissions can make different decisions with regard
- 23 to items such as cost of capital, depreciation rates,
- 24 and fill factors?
- 25 A. Okay. I just wasn't sure what you were

- 1 getting at.
- Yes, they can make different decisions.
- 3 Q. And there's potentially hundreds of items
- 4 that the commission can come to a conclusion in one
- 5 state and a commission in another state comes to a
- 6 different conclusion. Right?
- 7 A. Yes.
- 8 Q. Okay. Did you review Mr. Hampton's
- 9 testimony in this case from Southwestern Bell who
- 10 responded to your Direct Testimony?
- 11 A. Yes, I did.
- 12 Q. Okay. And did you review the survey of the
- 13 unbundled network element prices that were attached as
- 14 two different exhibits to Mr. Hampton's testimony?
- 15 A. I reviewed them briefly.
- 16 Q. I want to focus, first, on the schedule 2 to
- 17 Mr. Hampton's testimony that attaches a survey done by
- 18 Mr. Gregg at the Consumer Advocate Division of the
- 19 West Virginia Public Service Commission.
- 20 Did you review that study?
- 21 A. Only briefly. I mean, if you're going to
- 22 ask me questions about it, I'm probably going to need
- 23 to have a copy of it.
- 24 MR. LANE: May I approach the witness, your
- 25 Honor?

- 1 JUDGE RUTH: Yes.
- 2 Show the document to counsel first, please.
- 3 BY MR. LANE:
- 4 Q. I'm showing you schedule 2 to Mr. Hampton's
- 5 Direct Testimony, the survey of unbundled network
- 6 element prices in the United States, and I have a few
- 7 questions about that for you.
- 8 Would you agree with me that that survey, to
- 9 the extent it reflects Missouri prices, was done in
- 10 the spring of 2001 and doesn't reflect the additional
- 11 reductions in the unbundled network element platform
- 12 prices that Southwestern Bell offered in the M2A?
- 13 A. That, I can't confirm sitting here.
- 14 MR. LANE: May I approach, your Honor?
- JUDGE RUTH: Uh-huh.
- 16 BY MR. LANE:
- 17 Q. Referring you to Page 4 of 7 of schedule 2
- 18 from Mr. Hampton's Direct Testimony, would you agree
- 19 with me that that reflects the rates for the unbundled
- 20 network element platform elements in Missouri?
- 21 A. It appears to reflect the recurring
- 22 elements.
- Q. Okay. And with regard to the recurring
- 24 elements for the unbundle element platform, would you
- 25 agree that this reflects the rates that the Commission

- 1 had established in Case No. TO-97-40 and don't reflect
- 2 the additional reductions to those prices that
- 3 Southwestern Bell voluntarily made in connection with
- 4 the M2A?
- 5 A. It doesn't appear to me that that's the
- 6 case.
- 7 Q. Okay. What rate do you see that's
- 8 different?
- 9 A. Well, it's the rates that aren't different.
- 10 I mean, I pulled up the switching rates, but it's
- 11 possible -- well, two things: For the rates that I
- 12 remember reviewing in preparation for this testimony,
- 13 the rates here are the same, the urban rate, for
- 14 instance, for switching.
- 15 But it's possible that you guys -- you guys,
- 16 Southwestern Bell, let me be more precise, reduced
- 17 nonurban rates for switching that I just didn't do a
- 18 comparison for in preparation for my testimony. So
- 19 the only way that I could answer your question is if
- 20 you were to hand me the M2A price list. If you want
- 21 me to say on the record that they are, in fact,
- 22 different, you would have to hand me that.
- 23 Q. I'll do that.
- 24 First, let me ask you about the loop rates.
- 25 Would you agree with me that the loop rates

- 1 that are reflected on page 4 of 7 of schedule 2 of
- 2 Mr. Hampton's testimony are those that were ordered by
- 3 the Commission in Case No. TO-97-40 and they are
- 4 higher than those contained in the M2A for zones 2, 3,
- 5 and 4?
- 6 A. I can't answer that.
- 7 MR. LANE: Okay. May I approach the
- 8 witness, your Honor?
- 9 JUDGE RUTH: Yes.
- 10 BY MR. LANE:
- 11 Q. I'm going to show you the M2A appendix
- 12 pricing UNE schedule of prices and ask if you agree
- 13 that the costs -- excuse me -- that the rates for the
- 14 unbundled loop reflected in there are lower than those
- 15 that are reflected on page 4 of 7 of Mr. Hampton's
- 16 schedule 2 for the nonurban zones?
- 17 A. The rates in what you're representing as
- 18 being the M2A for the nonurban zones for the loop are
- 19 lower than what are in JLH 2-9.
- Q. And with regard to local switching, would
- 21 you agree with me that the rates that are reflected in
- 22 appendix pricing UNE of the M2A, page 2 of 9, are
- lower than the switching prices that are reflected on
- 24 page 4 of 7 of schedule 2 of Mr. Hampton's testimony?
- 25 A. Yes, I would agree with that.

- 1 Q. Okay. And so earlier when you indicated
- 2 that page 4 of 7 of Mr. Hampton's testimony reflected
- 3 switching rates that were the same as the M2A, that
- 4 really isn't correct, is it?
- 5 A. According to the documents that you've
- 6 placed in front of me today, that's true.
- 7 Q. And is it possible, Mr. Turner, that you did
- 8 not take into account the 18 1/2 percent reduction
- 9 that Southwestern Bell voluntarily offered in the M2A
- 10 when you were determining what you thought were
- 11 Southwestern Bell's switching rates in the M2A?
- 12 A. Well, that really wasn't the point of my
- 13 testimony. I was simply trying to calculate what a
- 14 per-port rate would be, and it's possible that I used
- 15 a number that's higher than -- so I should probably
- 16 revise my proposed interim rates downward. But I
- 17 wasn't doing that kind of comparison in my testimony.
- 18 Q. Okay. And it's also -- let me step back a
- 19 minute.
- 20 It's also fair to say that as reflected in
- 21 the -- Mr. Hampton's schedule 2 that he attached that
- 22 the loop rates that Southwestern Bell has and the
- 23 switching rates that Southwestern Bell has that are
- 24 reflected in there that are higher than the M2A
- 25 nevertheless are in the middle to lower middle of the

- 1 range of states that are depicted. Right?
- 2 A. That's what Mr. Hampton said, yes.
- 3 Q. You don't have any reason to disagree with
- 4 him, do you?
- 5 A. No, I do not.
- 6 Q. And, if you would, turn to schedule 3 of
- 7 Mr. Hampton's testimony.
- 8 I'll ask you, first, if you reviewed that
- 9 schedule which is Commerce Capital Markets' analysis
- 10 of UNE platform rates in regional Bell territories?
- 11 A. No, I did not.
- 12 Q. Okay. You did think it was important to
- 13 take a look at that?
- 14 A. Not for what I think is important in this
- 15 case.
- 16 Q. Okay.
- 17 A. I don't believe that comparisons to other
- 18 states, particularly other states that are outside SBC
- 19 jurisdictions, are particularly meaningful for whether
- 20 or not this Commission does a reevaluation of your
- 21 loop rates and switching rates. I think what's more
- 22 important is to look at what your statement as a
- 23 company have been in terms of what the forward-looking
- 24 costs for loops and switching would be given the
- 25 deployment of Project Pronto and given the two mergers

- 1 that have taken place since the cost studies were done
- 2 here in 1997.
- Q. Okay. And just so it's clear, you're not
- 4 attempting to convey to the Commission in any fashion
- 5 that the rates that Southwestern Bell has in the M2A
- 6 are out of line with rates in other states as has been
- 7 depicted in Mr. Hampton's schedules 2 and 3?
- 8 A. The only thing that I did in my testimony
- 9 was to at least point out to the Commission that they
- 10 should be concerned about the significant difference
- 11 between suburban rates in Illinois compared to urban
- 12 rates in Missouri, that urban rates in Missouri are
- 13 81 percent higher than suburban rates in Illinois.
- I felt that was instructive, but the basis
- 15 for what I've suggested to the Commission be a need to
- 16 reevaluate loop prices is what I've already said, the
- 17 passing of time, mergers, significant process changes,
- 18 the deployment of Project Pronto, and there was
- 19 switching, some of the same factors, but also that
- 20 your costs are really port derived, but not usage
- 21 derived.
- Q. Would it also be instructive for the
- 23 Commission to consider schedules 2 and 3 of
- 24 Mr. Hampton's testimony which demonstrate that the M2A
- 25 rates are in the middle to lower middle of the UNE

- 1 platform rates across the country? Would that be
- 2 instructive to the Commission?
- 3 A. Actually, I don't believe so.
- 4 Q. Okay. And would you have an objection in
- 5 this case if the Commission reaches out and takes
- 6 higher UNE platform rates from another state and says
- 7 we ought to use that in the Southwestern Bell/WorldCom
- 8 interconnection agreement?
- 9 A. I would, of course, but the basis would be
- 10 the same as if they reached out and took a lower rate.
- 11 The Commission has an obligation to set cost-based
- 12 rates, and I believe there is ample evidence in my
- 13 testimony that the rates for loops in this state at
- 14 present aren't cost-based.
- The odd thing about it is that your
- 16 witnesses --
- 17 Q. You've answered my question
- 18 A. -- also say that they are not cost-based.
- 19 Q. Thanks.
- 20 A. Thank you.
- 21 Q. You also mention in your testimony that
- 22 WorldCom is interested in a generic proceeding.
- 23 If the Commission were to conduct a generic
- 24 proceeding on rates, is it your belief that if the
- 25 Commission finds that rates are higher, that the M2A

- 1 rates would nevertheless be available to WorldCom and
- 2 other CLECs?
- 3 A. If seems to me that that's a legal question
- 4 that I've really not spent any time thinking about.
- 5 Q. Okay. I'm not asking in the legal sense.
- 6 From a policy perspective, is it your view
- 7 that if the Commission holds a generic proceeding and
- 8 finds that prices for unbundled network elements
- 9 should be higher than those reflected in the M2A, do
- 10 you believe that CLECs should or should not still have
- 11 the ability to utilize the rates from the M2A instead
- 12 of the higher rates the Commission finds?
- 13 A. In my opinion, if the Commission were to do
- 14 a generic proceeding for rates, and "generic" meaning
- 15 other CLECs would be able to participate as well, they
- 16 would effectively be redoing rates that are currently
- 17 in the M2A, and those would -- the redone rates would
- 18 become the new rates.
- 19 And so to be precise, I don't believe that
- 20 you could continue to pick and choose between the old
- 21 M2A rates and those that were done in the generic
- 22 proceeding, in my opinion.
- Q. Okay. And would you agree that if the
- 24 Commission were to conduct a generic proceeding, that
- 25 it would also be inappropriate from a policy

- 1 perspective to allow CLECs thereafter to attempt to
- 2 arbitration different rates than those set by the
- 3 Commission in that generic proceeding?
- 4 A. I believe my understanding of the Federal
- 5 Act is CLECs have to be afforded that right, but --
- 6 well, that's what my testimony says.
- 7 Practically speaking, the intervals for
- 8 arbitrations and the complexity of the cases do not
- 9 allow rate setting or cost evaluation to take place in
- 10 that forum. So you have to take cost studies in a
- 11 rate setting outside of one-on-one company
- 12 arbitrations, in my opinion, to do them effectively.
- Q. Okay. And your answer wasn't -- I'm not
- 14 sure was clear on the question I asked.
- 15 Is it your view that other CLECs should be
- or should not be permitted to arbitrate rates for UNEs
- 17 in the future shortly after the Commission renders any
- 18 decision in that generic proceeding that you're
- 19 proposing?
- 20 A. Again, I'm not an attorney, and that seems
- 21 like a legal question, but my understanding of the law
- 22 is that CLECs would still be allowed to participate in
- 23 the process that we're in right now, which is not
- 24 particularly effective. But they would be allowed by
- 25 law to do that.

- 1 Q. Okay. Switch over and talk about unbundled
- 2 local switching for a minute, which I think is DPL 11
- 3 in this case?
- 4 A. Yes, sir.
- 5 Q. WorldCom proposes here a single flat rate
- 6 port charge rather than a separate charge for the port
- 7 and for usage. Right?
- 8 A. That is correct.
- 9 Q. Okay. And in your testimony, you cite one
- 10 particular quote from an FCC decision concerning
- 11 reciprocal compensation. Do you recall that?
- 12 A. Yes, I do.
- 13 Q. Okay. Would it be fair to say that you
- 14 didn't cite any other FCC decisions that specifically
- 15 pertained to local switching rates and how they were
- 16 to be set under the Act?
- 17 A. It would be fair to say that's the only one
- 18 that I cited.
- 19 Q. Okay. It's also fair to say, isn't it, that
- 20 WorldCom made the same argument to the FCC back in
- 21 1996 when the FCC was setting its TELRIC rules that
- 22 it's making here today. Right?
- 23 A. That, I do not know.
- Q. You didn't go back and take a look at the
- 25 First Report and Order in the local competition case?

- 1 A. I did not go back and read what MCI's
- 2 comments were in that, no.
- 3 Q. Did you read the order? Have you ever read
- 4 the order?
- 5 A. Yes, I have.
- 6 MR. LANE: Your Honor, may I approach the
- 7 witness?
- 8 JUDGE RUTH: Yes.
- 9 BY MR. LANE:
- 10 Q. Mr. Turner, I'm going to show you the First
- 11 Report and Order in the local competition case, as
- 12 it's frequently called, in front of the FCC, which is
- 13 Docket No. 96-98, and it's the August 8 of '96 order.
- 14 And referring specifically to paragraph 799,
- 15 would you agree with me that it reflects in there
- 16 that, "MCI states that switching costs are a function
- 17 of line connections, trunk connections, and busy hour
- 18 demand on the switch matrix and processor; hence, the
- 19 rate for the switching element should have a
- 20 subelement price relating to each subelement set to
- 21 recover the associated TSLRIC"?
- 22 A. Yes, that's what the statement says there.
- Q. Okay. And referring above, would you
- 24 agree -- and I may have misstated when I said
- 25 WorldCom, but LDDS in that case argued that unbundled

- 1 local switching should be priced on a flat rate per-
- 2 line charge rather than any usage-based rate?
- 3 A. What it says is, LDDS argues that the price
- 4 of unbundled switching elements should reflect as
- 5 closely as possible the manner in which switching
- 6 costs are incurred. It believes that line-related
- 7 costs should be recovered through a flat per-line
- 8 capacity charge based on a contracted for number of
- 9 lines with an additional usage base trunking port
- 10 charge and a combination of per-line and usage-based
- 11 charges to recover busy-hour related costs.
- 12 Q. And then referring over to paragraph 810,
- 13 would you agree with me that the FCC's order
- 14 determined that it would utilize -- that states were
- 15 permitted to adopt unbundled local switching prices
- 16 that consist of both a flat-rated charge for line
- 17 ports and a per-minute usage charge?
- 18 A. That is -- you're asking me if that's what
- 19 the FCC concluded?
- Q. Right.
- 21 A. Yes. In paragraph 18 -- 810, that is what
- 22 the FCC concluded.
- Q. And that's what's reflected in
- 24 section 51.501 -- excuse me -- section 51.509(B) of
- 25 the FCC's rules. Correct?

- 1 A. That is correct.
- Q. Okay. And it's also fair to say, isn't it,
- 3 Mr. Turner, that the vast majority of states that have
- 4 considered unbundled local switching have done what
- 5 Missouri has done and had a flat per-line port charge
- 6 plus a per-minute-of-use charge?
- 7 A. That is correct.
- 8 Q. Do you know, does WorldCom utilize -- any of
- 9 the WorldCom companies utilize their own switch here
- 10 in Missouri?
- 11 A. I do not know.
- 12 Q. Did you undertake any kind of investigation
- 13 to find out how WorldCom operates in Missouri today?
- 14 A. No, I did not.
- 15 Q. Do you know whether WorldCom utilizes any
- 16 unbundled local loops from Southwestern Bell?
- 17 A. I do not know.
- 18 Q. Or whether they utilize any of their own
- 19 loops?
- 20 A. I don't know.
- 21 Q. Okay. Would you agree with me that under
- 22 the existing FCC TELRIC rules that costs are to be
- 23 based on a forward-looking network as opposed to the
- 24 existing network?
- 25 A. Yes.

- 1 Q. It's fair to say that comparing embedded
- 2 costs to forward-looking costs can be an apples to
- 3 oranges comparison?
- 4 A. It's going to depend on what you're looking
- 5 at.
- 6 Q. With regard to unbundled network elements in
- 7 particular, wouldn't you agree with me that Bell
- 8 operating companies and other ILECs around the country
- 9 have protested the TELRIC standard because it utilizes
- 10 forward-looking costs that don't reflect the higher
- 11 level of embedded costs in their network?
- 12 A. That has been their argument.
- 13 Q. And if you're taking a look at the impact of
- 14 a Project Pronto or of mergers -- of the merger
- 15 between SBC and Ameritech, that statements which
- 16 Southwestern Bell made with regard to cost savings
- 17 reflect those from its existing network rather than
- 18 the network that is hypothesized in the TELRIC
- 19 standard?
- 20 A. That, I would not agree with.
- 21 Q. Is that because you believe that
- 22 Southwestern Bell's existing network is the same as
- 23 the hypothetical TELRIC network?
- A. No, not necessarily. But some of the
- 25 assumptions that -- the reason I said it depends on

- 1 cost elements is that some of the elements that are
- 2 used to develop things such as the maintenance factors
- 3 and expense factors that are applied to investments
- 4 largely depend on your current operations to develop
- 5 those factors.
- 6 When you then make statements that Project
- 7 Pronto is going to fundamentally alter the way that
- 8 you do dispatches, fundamentally alter your ability to
- 9 do maintenance on the loop plant, and then you start
- 10 to identify cost savings out into forward-looking
- 11 years, I believe that those types of things have to be
- 12 reflected in your maintenance factors to develop
- 13 appropriate costs.
- 14 And so you're not comparing apples and
- 15 oranges when you deal with the maintenance costs and
- 16 maintenance factors that are used in the studies today
- 17 versus what you've said are going to happen and are
- 18 already happening with the deployment of Project
- 19 Pronto.
- Q. And you're aware, are you not, that
- 21 Mr. Smallwood in this case has testified that
- 22 Southwestern Bell's forward-looking cost studies do
- 23 take into account the proposed Pronto network, are you
- 24 not?
- 25 A. He says that in the new studies, but he's

- 1 not saying that about the old studies. And there
- 2 simply was not sufficient time for me to evaluate
- 3 whether or not Mr. Smallwood's assertions are
- 4 accurate, but on its face, it appears that what
- 5 Mr. Smallwood said is not accurate in that SBC has
- 6 publicly said that you're significantly reducing the
- 7 cost of your loop plant and, yet, what you have
- 8 proposed in this proceeding is an increase in the cost
- 9 of the loops by approximately 250 percent.
- 10 So it seems contrary to what your public
- 11 statements as a company are what you filed in the cost
- 12 study in this proceeding.
- 13 Q. And Mr. Smallwood pointed out that the
- 14 statements you are referring to were based on
- 15 Southwestern Bell's existing network rather than on
- 16 the network that was contemplated by the TELRIC
- 17 standard. Correct?
- 18 A. He does say that. I believe Mr. Smallwood,
- 19 though, needs to probably be more precise in his
- 20 answer, because a lot of what I'm relying on as the
- 21 significant cost savings are -- I'm not saying they
- 22 are embedded -- related exclusively on embedded costs,
- 23 but they start with actual costs, particularly related
- 24 to things such as maintenance factors and other items
- 25 related to that for which Southwestern Bell has

- 1 identified specific cost savings that you expect to
- 2 achieve with the deployment of Project Pronto.
- 3 Q. The dispatch rate affects nonrecurring costs
- 4 as opposed to recurring costs for the loop. Correct?
- 5 A. I believe it affects both. Depend -- based
- 6 on what you've said that I was able to rely on in this
- 7 state, it affects both.
- 8 Q. And you're aware that Mr. Smallwood says it
- 9 affects only the nonrecurring costs. Right?
- 10 A. I believe Mr. Smallwood is, once again,
- 11 incorrect, because what you're dealing with when you
- 12 maintain an existing loop is Southwestern Bell's
- 13 statements that you're going to be able to do that
- 14 maintenance and reduce the number of dispatches for
- 15 that maintenance. That affects maintenance factors
- 16 which when applied to the investment per loop are
- 17 going to result in lower costs. That's not a
- 18 nonrecurring activity.
- 19 Q. Could you turn to page 14 of your Rebuttal
- 20 Testimony?
- 21 And on page 14 of your Rebuttal, you make
- 22 the assertion that you sought information concerning
- 23 cost studies in Illinois and Michigan. Do you see
- 24 that?
- 25 A. Yes, sir.

- 1 Q. And you criticize Southwestern Bell for not
- 2 providing that information to you. Correct?
- 3 A. That's correct.
- 4 Q. And would you -- were you made aware that
- 5 WorldCom had withdrawn its request for discovery of
- 6 those items prior to the time that you filed your
- 7 Rebuttal Testimony?
- 8 A. I was made aware of that fact after my
- 9 testimony was filed.
- 10 Q. Okay. So when you filed it, you believed
- 11 that Southwestern Bell should have provided you the
- 12 study, but you later learned that WorldCom had, in
- 13 fact, withdrawn the request. Right?
- 14 A. Yes. But I still believe since your own
- 15 witnesses relied on information from those studies
- 16 that you should have provided it.
- 17 Q. And do you think it's reasonable to continue
- 18 your testimony here today and reflect criticisms of
- 19 Southwestern Bell for failing to provide information
- 20 that WorldCom agreed to withdraw?
- 21 A. They agreed to withdraw that particular
- 22 question, but there is a standing discovery request,
- 23 at least my recollection is, that to the extent that
- 24 your witnesses relied on the review of any material in
- 25 preparing their cost study, they are supposed to

- 1 provide that. I believe it's the first discovery
- 2 request.
- 3 Q. Okay.
- 4 A. And Mr. Smallwood makes specific reference
- 5 to cost information out of Illinois and Michigan that
- 6 only he would have access to and that he did not
- 7 provide in this proceeding.
- 8 Q. Okay. And you were asked the same question,
- 9 were you not, Mr. Turner?
- 10 A. Yes, I was.
- 11 Q. And you gave nothing in return, did you not?
- 12 A. For this proceeding, I only relied on what I
- 13 have cited to or provided in my testimony.
- 14 Q. Okay. And you have some discussion in your
- 15 testimony in this case about a generic cost proceeding
- 16 and the inability to conduct a good cost analysis in
- 17 the time that you have available. Do you recall that
- 18 subject generally?
- 19 A. Yes, I do.
- 20 Q. And would you agree with me that WorldCom
- 21 itself could have assisted itself in this case by
- 22 filing its Petition for Arbitration at the earliest
- 23 date rather than at the very tail end of the time that
- 24 is available to it under the Act?
- 25 A. Theoretically, they could, but it is -- I'm

- 1 not the best witness to ask that question of, but it's
- 2 likely that there was a desire to continue negotiating
- 3 that precluded them from filing it earlier.
- 4 Q. You're aware under the Act that a party can
- 5 file for arbitration that -- I believe it's between
- 6 the 135th day after negotiations start and the 160th
- 7 day after negotiations start. Correct?
- 8 A. I am familiar with that.
- 9 Q. And in this case the negotiations began on
- 10 June 1 according to WorldCom. Right?
- 11 A. I'm not familiar with the exact date.
- 12 Q. Okay. Assuming that it was June 1 as
- 13 reflected in WorldCom's Petition for Arbitration in
- 14 this case, would you agree that the filing was on
- 15 approximately the 158th or 159th day after
- 16 negotiations began?
- 17 A. I don't know.
- 18 Q. Did you participate in the negotiations?
- 19 A. No, I did not.
- 20 MR. LANE: Judge, I have more, but my
- 21 45 minutes are up, and I don't -- I'm trying to play
- 22 by the rules, so -- I have more. I want you to know
- 23 that, but I do believe my time is up.
- 24 JUDGE RUTH: Okay. We are going to take a
- 25 break for lunch. When we come back on the record we

- 1 will discuss whether or not you are making a formal
- 2 request for more time, and, if so, an estimate of how
- 3 much time you will need. I'm not saying whether that
- 4 will be granted or not, but if you're not finished and
- 5 you're going to request more time, we'll do that when
- 6 we come back after lunch.
- 7 It is almost 20 after 12:00. We will break
- 8 until 1:30. We'll go back on the record at 1:30.
- 9 Thank you.
- 10 (A recess was taken.)
- 11 JUDGE RUTH: When we took a break for lunch,
- 12 Mr. Lane was asking cross-examination questions.
- Mr. Lane, are you finished?
- 14 MR. LANE: I did have some more, your Honor,
- 15 but I'm okay with where we are right now.
- 16 JUDGE RUTH: Okay. Then we'll move to
- 17 Staff.
- 18 MR. BATES: Thank you, your Honor.
- 19 CROSS-EXAMINATION BY MR. BATES:
- Q. Good afternoon, Mr. Turner.
- 21 A. Good afternoon.
- 22 Q. I just have a few questions for you.
- 23 Would you please turn to your Direct
- 24 Testimony, please, page 4.
- 25 A. Yes, sir.

141

- 1 Q. And I would like you specifically to look at
- 2 lines 1 through 9. And would you agree with me that
- 3 there you discuss the cost structure associated with
- 4 switching investment?
- 5 A. That's correct.
- 6 Q. Let me ask you this question: Is
- 7 Southwestern Bell's proposed rate structure for local
- 8 switching consistent with your understanding of
- 9 TELRIC?
- 10 A. No, it is not.
- 11 Q. And how is it different?
- 12 A. The difference is that from a cost
- 13 standpoint, the way that Southwestern Bell incurs the
- 14 cost for switching is on a per-port basis, and,
- 15 therefore, the rate structure for the recovery of that
- 16 cost should also match the way they incur it, and it
- 17 should, therefore, also be on a per-port basis.
- 18 Q. Okay. Would you please turn now to your
- 19 Rebuttal Testimony, specifically page 12.
- 20 A. I'm there.
- Q. On lines 6 through 18 I believe you make a
- 22 suggestion that a generic proceeding be opened.
- 23 A. That's correct.
- Q. Are you proposing that this Commission
- 25 incorporate the results of such a generic proceeding

- 1 into this arbitration?
- 2 A. I think technically that this Commission
- 3 believes that it has to wrap up this arbitration by
- 4 some date which would be prior to when a generic
- 5 proceeding could be conducted, and so the generic
- 6 proceeding, in my opinion, would have rates that would
- 7 be developed that could be -- the Commission could
- 8 write an order that says, For these rates, we're going
- 9 to have those rates be established in a generic
- 10 proceeding, and, therefore, by inference, you would
- 11 take them into what we complete here in 222, but it
- 12 doesn't exclusively have to be that way.
- 13 A generic proceeding could apply generally
- 14 to the M2A rates. It could apply to this arbitration
- 15 to the extent that this arbitration cannot determine
- 16 final rates for elements. So I think it's somewhat
- 17 open-ended how that -- I wouldn't say open-ended.
- 18 It's more that the Commission can define, I believe,
- 19 how the generic proceeding would be used.
- 20 Q. If the Commission were to open a generic
- 21 proceeding, would WorldCom be able to opt into those
- 22 rates for this agreement?
- 23 A. I believe that it would be appropriate to
- 24 allow that, but, again, the Commission would have to
- 25 define what the rules would be for taking this

- 1 arbitration, which in my opinion will not be able to
- 2 fairly evaluate rates, taking the results of this and
- 3 allowing a generic proceeding to have rates be
- 4 developed that would then apply to this arbitration.
- 5 Q. And could you please tell me why you think
- 6 that this -- the Commission could not fairly arbitrate
- 7 the rates in this proceeding?
- 8 A. Well, in my experience, and we have recent
- 9 experience here in 438, it takes a good bit of time to
- 10 take Southwestern Bell's cost studies, to do adequate
- 11 discovery on those cost studies, and then prepare
- 12 alternative cost studies, and then carefully document
- 13 the changes. And this Commission knows that in 438
- 14 that's what I did for about 35 cost studies, but to do
- 15 that took a fairly intensive effort over the course of
- 16 about three months.
- 17 In this proceeding, there was 20 days
- 18 between when Southwestern Bell filed its cost studies
- 19 and when I had to file Rebuttal. There were two
- 20 holidays in those 20 days, and I actually did not
- 21 receive the cost studies themselves until the day
- 22 before my Rebuttal was due. And it was five boxes of
- 23 cost study material from Southwestern Bell.
- 24 And, you know, what I mean by fair is that I
- 25 would think the Commission would want the level of

- 1 analysis that I did in 438, they would want that type
- 2 of analysis to be done so that you don't just have one
- 3 side of the story. Right now in this arbitration, for
- 4 most of the elements, you only have one side of the
- 5 story. I've attached my 438 testimony so that at
- 6 least for 35 of those cost studies the Commission has
- 7 an alternative view. But I would think to be fair to
- 8 both sides the Commission would want to do a
- 9 comprehensive cost proceeding such as what we did in
- 10 438, and that can't be done in the time frame allotted
- 11 for an arbitration.
- 12 MR. BATES: Thank you, Mr. Turner.
- JUDGE RUTH: Thank you.
- 14 THE WITNESS: Thank you.
- JUDGE RUTH: Okay. We will move to
- 16 questions from the Bench.
- 17 Commissioner Murray, do you have any
- 18 questions?
- 19 COMMISSIONER MURRAY: I have a few. Thank
- 20 you, your Honor.
- 21 QUESTIONS BY COMMISSIONER MURRAY:
- Q. Good afternoon, Mr. Turner.
- 23 A. Good afternoon.
- Q. Is WorldCom attempting to MFN any portions
- of any interconnection agreements other than the M2A?

- 1 A. I do not know the answer to that question.
- 2 Q. Your counsel in opening statements indicated
- 3 that WorldCom would like the opportunity to opt into
- 4 the 438 UNE rates after the 438 decision. Is that
- 5 your understanding?
- 6 A. That's what I heard him say, yes, ma'am.
- 7 Q. Now, that is not an interconnection
- 8 agreement case; is that correct?
- 9 A. It seems -- you know, I've tried, as you
- 10 know, to study the history of where you got to that
- 11 case, and it appears to me that it does trace its
- 12 history back to an interconnection case out of 97-40
- 13 in that there were a number of elements that were not
- 14 determined in 97-40, where reviewed in 98-115 but not
- 15 ordered.
- In the 97-40 case, my understanding is that
- 17 it does trace back to an interconnection issue between
- 18 AT&T and Southwestern Bell, so I think that it -- I
- 19 think that it is related to an interconnection issue
- 20 in 2001-438.
- 21 Q. 97-40 was an arbitration case; is that
- 22 right?
- 23 A. I believe it was.
- Q. So, basically, is it your understanding that
- 25 what WorldCom is asking for in relation to 438 is that

- 1 it at least be treated like an interconnection
- 2 agreement for the purposes of being able to adopt
- 3 portions of it?
- 4 A. I bel-- there may be some legal aspect to
- 5 what it means to have an interconnection arbitration
- 6 that I'm not knowledgeable of the implications of
- 7 that, but I believe what -- if I could put it in my
- 8 own lay terms, because I know costing well. I don't
- 9 know maybe the legal side of that real well.
- 10 But from a costing standpoint, I think it is
- 11 an acknowledgment that there were a lot of rate
- 12 elements in 438 that are necessary to have a
- 13 comprehensive set of rates. And what WorldCom's
- 14 counsel was recommending was that since this
- 15 Commission has already undertaken a comprehensive
- 16 review of those, that when you complete that process,
- 17 that you would allow the WorldCom/Southwestern Bell
- 18 interconnection agreement to reflect that decision as
- 19 well rather than having the potential that the same
- 20 evidence that Southwestern Bell presented in 438 and
- 21 now here again in 222 might lead to two different
- 22 conclusions.
- 23 So I thought what was being suggested by
- 24 WorldCom's counsel was more a way to be expedient in
- 25 terms of taking advantage of work that this Commission

- 1 has already done for rate elements that are necessary
- 2 for an interconnection agreement.
- 3 Q. Do you think that would -- that rationale
- 4 would apply if the rates established in 438 were
- 5 higher than the rates that came out of this
- 6 proceeding?
- 7 A. Those questions are always interesting.
- 8 My view would be that what WorldCom and
- 9 Southwestern Bell and this Commission would all want
- 10 are cost-based rates, and I believe the best
- 11 opportunity for that given the state of this
- 12 proceeding as compared to the state of 438, your best
- 13 chance of making an informed decision on that is in
- 14 438. So whether you would choose higher rates or
- 15 lower rates here isn't the basis of my thinking. It's
- 16 more that you've had an opportunity in 438 to make a
- 17 more informed decision about what rates to select --
- 18 Q. Okay.
- 19 A. -- or what inputs to use.
- 20 Q. And on page 31 of your Rebuttal Testimony,
- 21 you reference TO-97-40 and state at line 7 and
- 22 following that your recommendation is that the
- 23 Commission simply use the rates that are already
- 24 approved for these elements and dismiss SWBT's cost
- 25 study filings for these 41 rate elements.

- 1 You're referencing 41 rate elements that
- 2 were set in TO-97-40; is that right?
- 3 A. Okay. I'm sorry. You're talking about my
- 4 Rebuttal Testimony in 438. Correct?
- 5 Q. I'm talking about your Rebuttal Testimony in
- 6 this case on page 31.
- 7 A. I apologize, because I'm looking at it and I
- 8 don't see -- okay. Here it is, perhaps.
- 9 Q. It's under the question posed at line 4,
- 10 summarizing your testimony.
- 11 MR. LUMLEY: Your Honor, if I could, that is
- 12 the 438 attachment as --
- 13 COMMISSIONER MURRAY: Oh, I'm sorry. You're
- 14 right.
- 15 THE WITNESS: And what page again was that
- 16 on?
- 17 BY COMMISSIONER MURRAY:
- 18 Q. That is page 31.
- 19 A. Right.
- 20 Q. Let me rethink my question in light of --
- 21 A. Okay. Because we had a long discussion
- 22 about -- this was, again, an historical development of
- 23 these rates in that some had already been determined
- 24 by this Commission, some of which Mr. Hughes
- 25 subsequently agreed with me had already been

- 1 determined.
- 2 And so I was saying for these 41, since the
- 3 Commission had already decided them in 97-40, that I
- 4 didn't think it was appropriate to be reevaluating
- 5 them in 438, given the nature of what that proceeding
- 6 was doing.
- 7 Q. So you think that they were -- there were
- 8 cost studies and they were determined to be TELRIC
- 9 compliant and were set appropriately in 97-40?
- 10 A. The appropriateness of them and the TELRIC
- 11 compliance of them was -- I testify in 438 that in
- 12 some cases I would agree with them and some cases I
- 13 would not agree. But what I tried to lay out in 438
- 14 was the principle that said if the Commission had
- 15 already determined rates, whether I felt they cut for
- or against the CLECs that we were only supposed to be
- 17 doing in 438 rate elements that had not already been
- 18 decided.
- Now, to the extent that Southwestern Bell
- 20 may want to reopen these, or CLECs may want to reopen
- 21 some of them, that could be done in a generic
- 22 proceeding, but in 438, my understanding was we were
- 23 trying to bring some closure to rates that had started
- 24 in 97-40, then reviewed in 98-115 but not ordered. We
- 25 were trying to bring closure so you had a

- 1 comprehensive set of rates coming out of 2001-438.
- 2 And for those 41 rate elements, I thought that the
- 3 Commission had already done their work.
- 4 COMMISSIONER MURRAY: Thank you.
- 5 I think that's all I have. Thank you.
- 6 JUDGE RUTH: Commissioner Gaw?
- 7 COMMISSIONER GAW: Thank you, Judge.
- 8 QUESTIONS BY COMMISSIONER GAW:
- 9 Q. Good afternoon, Mr. Turner.
- 10 A. Good afternoon.
- 11 Q. In a general sense, help me to understand
- 12 WorldCom's position to the extent you're aware of it
- 13 as their expert witness.
- 14 In regard to what appropriately we will have
- 15 evidence of in -- so that we can make determinations
- in this case and what we should defer, and explain to
- 17 me -- and I know this is in the testimony, but I want
- 18 you to explain to me why that is that you -- that
- 19 WorldCom believes that some things should be deferred,
- 20 and then I want to follow up.
- 21 A. Let me take just two examples, DPL 10 and
- 22 DPL 11.
- DPL 10, what I think the Commission could
- 24 decide now is whether or not there is sufficient
- 25 information to know that the rates that you have for

- 1 unbundled loops today are no longer appropriate from a
- 2 TELRIC standpoint.
- 3 And so I basically lay out in my Direct
- 4 Testimony and then respond to some of Bell's testimony
- 5 in my Rebuttal saying that -- you know, that
- 6 fundamentally that significant amount of time has
- 7 passed, that the purchasing power of Southwestern Bell
- 8 has been greatly increased through two mergers, that
- 9 they have significant process improvements that they
- 10 have documented publicly that will affect the cost of
- 11 their loops, and that they have deployed \$6 billion in
- 12 new technology to fundamentally alter the cost
- 13 structure of their loops, and that because of that --
- 14 and then I quote many places where they say that in
- 15 merger -- merger discussions, that I believe the
- 16 Commission could rationally conclude that there is a
- 17 need to reevaluate the forward-looking cost of loops.
- 18 I think you have enough information in this
- 19 proceeding to make that decision.
- 20 On the same hand, switching. I quote
- 21 Southwestern Bell testimony to the effect that they
- 22 now purchase switching on a flat-rate basis, per-port
- 23 basis, identify that with very limited exceptions.
- 24 Usage does not factor into the cost variables for the
- 25 switch, identify that -- that they incorporate those

- 1 usage characteristics in determining the configuration
- 2 of the switch, but they then purchase that on a
- 3 per-port basis.
- 4 And so what the Commission could make a
- 5 decision today on is structurally should there be a
- 6 reevaluation of the cost recovery for switching. What
- 7 I don't believe the Commission has enough information
- 8 to do today is to address the actual costs for those
- 9 items.
- 10 Southwestern Bell has introduced, I believe,
- 11 in Mr. Smallwood's testimony a new loop study, and
- 12 loop studies are a fairly complex undertaking. And
- 13 right now what the Commission has is Mr. Smallwood's
- 14 testimony as to what they've done and a response to me
- 15 that says that my criticisms that the loop rates
- 16 should be different don't have merit, and he gives his
- 17 reasons why.
- 18 But what you don't have is me having an
- 19 opportunity to go into that loop study and giving a
- 20 comprehensive response to the study as to different
- 21 inputs that I would recommend based on discovery that
- 22 we could do, errors in the loop studies which my
- 23 experience would show that it's very likely that there
- 24 would be significant errors in the study. You only
- 25 have one side of the story right now, and you have no

- 1 opportunity to have anything other than one side of
- 2 the story on the loop because of the time
- 3 considerations.
- With switching, Southwestern Bell's
- 5 testimony actually says they didn't even have enough
- 6 time to redo the switching study. They were able to
- 7 redo the loop study for the proceeding today, but they
- 8 were not able to do the switching study.
- 9 I'm not sure that they would want to or not,
- 10 but I think in a generic proceeding you would have the
- 11 opportunity to allow them to put forward their version
- 12 and view of how the switching should cost and allow
- 13 the CLECs to do the same.
- 14 So I think you can make policy decisions
- 15 with the information that's been presented to the
- 16 Commission in written and hopefully some oral
- 17 testimony. I don't believe you can make cost
- 18 decisions today. And that's just two examples, but if
- 19 you go through each of them, and I think you would
- 20 find a similar pattern.
- 21 Q. Are there any of them where that -- that
- 22 analysis that you have just made would not apply?
- 23 A. Well, on DPL item No. 12, that's the DUF,
- 24 daily usage file, I recommend that from a policy
- 25 standpoint, that you would conclude that the DUF

- 1 should stay as it currently is in Missouri, stay at
- 2 zero. And because this issue has not had much
- 3 evaluation in Missouri and, really, what we're doing
- 4 is we're basically bootstrapping work done in Texas,
- 5 I've quoted extensively from the Texas arbitrations
- 6 that related to DUF.
- 7 I think from a policy standpoint you could
- 8 conclude that there is no incremental cost over the
- 9 AIN query, which, by the way, is an element we're
- 10 evaluating in 438, and over the cost for local
- 11 switching, which is an item that was set in 97-40 but
- 12 for which WorldCom would like to reevaluate in a
- 13 generic proceeding.
- 14 But I think you could make a policy decision
- 15 that says that there is no incremental cost above
- 16 that. Therefore, Bell, you do not need to file a cost
- 17 study in a generic proceeding on DUF, which is what
- 18 they're effectively asking you in their testimony.
- 19 Let us set an interim rate based on Texas, for which I
- 20 think there is a tremendous amount of testimony that
- 21 says there is no basis for that interim rate, but then
- 22 they want you to allow them to file a cost study for
- 23 that in a generic or some other proceeding. It's
- 24 really kind of vague when they really want that to be
- 25 done.

- 1 Q. What would be the impact on the relationship
- 2 that's -- let me start over.
- 3 What would be the impact of the proposed
- 4 method of dealing with this case in the interim up
- 5 until 438 were concluded as far as the prices were
- 6 concerned between the -- between WorldCom and
- 7 Southwestern Bell? How would that be handled?
- 8 A. Well, it's possible -- I think there could
- 9 be a couple of stages. Between now and when you rule
- 10 on 222, it would operate off of their existing
- 11 interconnection agreements. In 222, you could render
- 12 a decision that says -- I'm going to just propose
- 13 something, but I think you'll get the gist of what I'm
- 14 thinking.
- 15 In 222 you could say something to the effect
- 16 that we believe that there is merit to reevaluating
- 17 the cost for unbundled loops in a generic proceeding,
- 18 and pending that generic proceeding taking place, we
- 19 order that the price for loops in the interim should
- 20 be X. I would probably propose that in the interim
- 21 you use the M2A rates.
- 22 Let's take another example just so I can be
- 23 more comprehensive.
- 24 DUF -- and I'll turn one against me. I hope
- 25 you won't do this, but let's say on DUF that you

- 1 decide that it's possible that there should be a rate
- 2 for DUF but that you don't believe that Southwestern
- 3 Bell has presented any evidence in this case as to
- 4 what that rate should be since by their own admission
- 5 they don't have a cost study. So on an interim basis
- 6 you are going to order what's in the M2A which is zero
- 7 but you are going to permit Southwestern Bell to file
- 8 a cost study in the generic proceeding.
- 9 That, kind of, is the framework that I would
- 10 do. And let me just add the third example, which
- 11 would be the 438 rate.
- 12 AIN triggers, AIN queries, right now, to my
- 13 knowledge, there is no rate for that element in the
- 14 M2A, but I could be wrong. If there was, though, in
- 15 the interim, when you ruled on 222, you would be
- 16 effectively saying there should be a rate for this
- 17 element because Southwestern Bell has asked for it.
- 18 We're not opposing, by the way, that there should be a
- 19 rate.
- 20 But in the interim, prior to your decision
- 21 in 438, you could either order what's already in the
- 22 M2A, or, if my recollection is correct and there is no
- 23 rate, you would continue to have no rate until which
- 24 time one is set in 438.
- 25 And I think that captures kind of the three

- 1 scenarios, but all of them -- in those that I just
- 2 laid out, all of them ultimately need for this
- 3 Commission to determine that a generic proceeding is
- 4 appropriate. And I actually think that it would not
- 5 only be in the CLECs' best interest for that, but I
- 6 also believe there are elements that Southwestern Bell
- 7 wants to have considered such as the DUF rate if a
- 8 generic proceeding was undertaken, that they would
- 9 most likely file that cost study in.
- 10 Q. Earlier in opening statements -- were you
- 11 here during opening statements?
- 12 A. Yes, sir.
- 13 Q. There was some discussion by WorldCom
- 14 counsel regarding the -- the -- well, let me back up.
- 15 You suggested earlier -- and I think you
- 16 have probably said this in different ways at different
- 17 times that you were unable to calculate certain
- 18 numbers, unable to assess the costs of certain things
- 19 in this case. Did I understand that correctly?
- 20 A. That is correct.
- 21 Q. And is that purely related to the time
- 22 constraints of this case?
- 23 A. Yes, sir.
- Q. I heard WorldCom counsel, I think, mention
- 25 that he believed that this Commission was taking a

- 1 different position on the time frame within which
- 2 these arbitrations had to be resolved under the
- 3 Federal Act. Am I correct in that?
- 4 A. I believe that was -- excuse me. I believe
- 5 that was WorldCom's counsel's position.
- 6 Q. Without asking you to tell me what he meant
- 7 by that, have you been -- you've been involved in
- 8 these arbitration cases in other states, haven't you?
- 9 A. Yes, sir.
- 10 Q. Do you know about how many other states?
- 11 A. Probably -- oh, you mean how many different
- 12 states I've been in?
- 13 Q. Yes.
- 14 A. I've probably been in 25 different states.
- 15 Q. More than once in most of those states?
- 16 A. Yes, sir.
- 17 Q. Are you familiar with the time frames that
- 18 you have generally encountered in those other states?
- 19 A. Yes, sir. In general, what I've observed is
- 20 when Commissions take on terms and conditions only,
- 21 they tend to clos-- pretty closely follow the
- 22 arbitration time line found in the Federal Act. When
- 23 they involve cost, my experience has been that the
- 24 Commissions generally do not follow the time lines
- 25 found in the Act.

- 1 Q. Okay. And are you -- are you aware of the
- 2 rationale utilized to -- to escape those time limits?
- 3 A. That -- I think the rationale is realism,
- 4 that you just realistically cannot do an effective job
- 5 on a cost proceeding in the intervals permitted in the
- 6 Federal Act.
- 7 I mean, the FCC right now is doing an
- 8 arbitration that I was a witness in in Virginia. You
- 9 would be -- you would be interested to see how long
- 10 they've taken to do a cost proceeding, and it's -- you
- 11 know, it's just -- I think they ended up taking
- 12 testimony for probably four weeks on just cost issues.
- 13 And there were four rounds of testimony and, good
- 14 night, probably 300 or 400 discovery requests per
- 15 party, and that was just on cost. Then they had a
- 16 separate arbitration on terms and conditions.
- So, I mean, even the FCC -- I'm not saying
- 18 that they are the ultimate arbiter of time lines,
- 19 because it's a Federal Act issue, has taken some
- 20 latitude in what the timing -- the time line is.
- 21 So my experience has been that when it's a
- 22 terms and conditions issue, like, you know, the
- 23 alternatively billed traffic, which is not one of my
- 24 issues, but that's a terms and conditions question, I
- 25 believe, that you would generally find the Commissions

- 1 pretty closely follow the time line in the Federal
- 2 Act.
- 3 But as soon as you get into cost
- 4 proceedings, to give the parties a realistic chance to
- 5 exchange discovery, to perform depositions in your
- 6 state that allows it, to do restatements of cost
- 7 studies, to write testimony that would explain what
- 8 you've done, Commissions allow themselves more freedom
- 9 than this Commission allows itself.
- 10 Q. Based upon -- and you have -- have you
- 11 reviewed the testimony that's been prefiled in this
- 12 case?
- 13 A. I've reviewed it for all of the issues that
- 14 I'm responding to.
- 15 Q. Let's stick with those.
- 16 A. Okay.
- 17 Q. In that regard, is it true that the only
- 18 information that we have in that prefiled testimony in
- 19 regard to costs comes from Southwestern Bell other
- 20 than the testimony regarding other states' rates that
- 21 have been -- that have been interjected into some of
- 22 the testimony? Can you answer that question?
- 23 A. I believe you could -- you can break their
- 24 cost studies into two camps. There's 35 cost studies
- 25 that were in 438. I have attached a nonproprietary

- 1 version of my 438 testimony to at least get some
- 2 information in the record here about the problems in
- 3 it. Because of my trying to be responsive to
- 4 protective agreements, I didn't file the cost studies
- 5 or anything like that, so you have a limited response
- 6 to 35 cost studies.
- 7 There's 27 cost -- or 28 -- excuse me --
- 8 28 cost studies that Southwestern Bell has filed that
- 9 they only provide cost information for and that I did
- 10 not -- as I've said before, did not have an
- 11 opportunity to respond to.
- 12 Q. All right. Well, let me ask you this way
- 13 then: Do you believe that this Commission has -- will
- 14 have a sufficient record if we -- if we assume that
- 15 the subject matter of that record is basically what's
- 16 contained in the prefiled testimony on the issues that
- 17 you are doing to render a fair judgment on the costs
- 18 of those elements?
- 19 A. No. And I include all 63 cost studies in my
- 20 "no" for that answer.
- 21 Q. All right. And that, again, is based upon
- 22 what?
- 23 A. There is simply not the information
- 24 necessary from both sides. Southwestern Bell has got
- 25 their side in, but the information is not in the

- 1 record for CLECs to give you a balanced perspective on
- 2 what the forward-looking costs should be for those
- 3 63 cost studies.
- Q. So this may be a bit of a jump, but could I
- 5 conclude from that unless a generic docket is opened
- 6 on those costs that the only numbers that I would have
- 7 in the record regarding costs would agree with
- 8 Southwestern Bell if I were to make a judgment on this
- 9 case based upon the record that has been determined up
- 10 to this point?
- 11 A. That's correct regarding costs. You're
- 12 absolutely right.
- 13 COMMISSIONER GAW: That's all I have. Thank
- 14 you.
- 15 Thank you, Mr. Turner.
- 16 THE WITNESS: Thank you.
- 17 QUESTIONS BY JUDGE RUTH:
- 18 Q. I wanted to follow up on some of the
- 19 questions from the Bench to make sure I understand.
- 20 And you may have already answered them, but be patient
- 21 with me.
- 22 There was some discussion earlier where you
- 23 said, to paraphrase, And so what the Commission could
- 24 make a decision on today would be a reevaluation of
- 25 the cost recovery for switching. What I don't believe

- 1 the Commission has enough information to do today is
- 2 address the actual costs for those items.
- 3 Do you remember that discussion?
- 4 A. Yes, ma'am.
- 5 Q. Would your answer have been any different to
- 6 that question if WorldCom had been allowed to pull in
- 7 the record from 438, or are those two different things
- 8 here?
- 9 A. The cost studies for switching are in those
- 10 28 cost studies that were not evaluated in 438 --
- 11 Q. Okay.
- 12 A. -- that Bell did file in this proceeding.
- 13 That involved things like switching, loops, forms of
- 14 transport that were not in 438 but for which they
- 15 wanted to reevaluate here. And I could give you
- 16 others if you need me to.
- 17 Q. So there's 63 cost studies filed by Bell?
- 18 A. Yes, according to my count, there are 63.
- 19 Q. And 28 of them were not evaluated in 438?
- 20 A. That's correct.
- Q. All of the others were evaluated in 438?
- 22 A. Yes.
- 23 Q. Is there any document anywhere -- this is a
- 24 question for any of the parties -- that lays out in
- 25 what place which ones -- which issues pertaining to

- 1 which cost studies were laid out where -- did that
- 2 question make sense -- in other words, where I could
- 3 find a list in one place without going through the
- 4 entire record of the 28 that were not evaluated in 438
- 5 then versus the remainder, which would be 45 or
- 6 something, that were.
- 7 A. I have prepared a spreadsheet for my own
- 8 preparation of my testimony that identifies the 63
- 9 cost studies and I identified in that spreadsheet
- 10 which ones I felt were undertaken in 438 and which
- 11 ones were not. So I have such a document, but I don't
- 12 believe it -- but I have that for my own preparation.
- 13 I didn't attach it to my testimony.
- 14 What I was also starting to do, but it's a
- 15 fairly lengthy process, is that Mr. Hughes has an
- 16 exhibit to his testimony where he identified the rate
- 17 elements that he had cost support for, and what I was
- 18 starting to do, but simply ran out of time, because
- 19 there really was a very limited time with the
- 20 holidays, was trying to line that up against
- 21 Mr. Hughes's -- well, it wasn't his. It was
- 22 Ms. Fuentes' exhibit in 438, so that you could see the
- 23 rate element overview exchange. I did not complete
- 24 that task.
- 25 But in terms of a document that's in this

- 1 proceeding right now, no, there is nothing that -- to
- 2 my knowledge that does that. But I have it on a cost
- 3 study basis already, and it would be a reasonable task
- 4 to give it to you on a rate element basis.
- 5 Q. Can you tell me, should I be able to easily
- 6 determine that based on my own reading of the record?
- 7 A. If you look at -- I have a schedule 36.
- 8 Q. To your Direct?
- 9 A. To my Rebuttal; to -- it's actually, like,
- 10 schedule 2 of my Rebuttal. It's where I add the
- 11 Rebuttal that I wrote in 438 but put it in here.
- 12 Q. Okay.
- 13 A. It identifies the rate elements that were
- 14 evaluated in 438.
- 15 You could then lay this next to Mr. Hughes's
- 16 exhibit to his Direct Testimony where he identifies
- 17 the rate elements that he wanted considered in this
- 18 proceeding and that would give you -- as one of the
- 19 attorneys spoke about the Vin diagram, that would give
- 20 you the circle that fits within what Southwestern Bell
- 21 filed in 222. This list -- my schedule 36 would give
- 22 you the 438 elements, and then that fits within what
- 23 Southwestern Bell has filed here in 222.
- 24 But -- so the answer to, Could you do this
- 25 yourself? The answer is yes, but you would have to

- 1 take those two exhibits, and if you flip through here,
- 2 what you'll notice is -- and I'm not trying to
- 3 overwhelm you, but there's 424 lines in the
- 4 spreadsheet, and Mr. Hughes's testimony, this is from
- 5 memory, I believe he had about 670 or 680 lines, and
- 6 they are not organized exactly the same way. So
- 7 you're going to have to line up 424 lines to about 650
- 8 lines, say, and then you could see which ones are
- 9 overlapped with 438 on a rate element basis.
- 11 question from your facial response, so am I not
- 12 hitting what you're asking, or --
- 13 Q. No. I think you are. I want to follow up
- 14 on that a little bit more, and I had one other
- 15 question. But stay at the witness stand. I want to
- 16 take just a minute to ask a question.
- 17 Still on the same bit where I paraphrase
- 18 some of your testimony and you said, What the
- 19 Commission could make a decision on today is that
- 20 there be a reevaluation of the cost recovery for
- 21 switches, or switching. What I don't believe the
- 22 Commission has enough information to do today is
- 23 address the actual cost for those items.
- 24 So clarify for me what it is, exactly
- 25 WorldCom's position, that the result be if the

- 1 Commission were to find what WorldCom wants on this.
- 2 A. What you would find is that switching should
- 3 be priced on a per-port basis. If you wanted to take
- 4 it the full extent of what I believe WorldCom's
- 5 position is, you would also order interim port-only
- 6 rates which I attached in my Direct Testimony as
- 7 schedule -- I'm not finding it right now, but I know
- 8 it's here.
- 9 Q. Well, let me ask you: You say WorldCom
- 10 would request interim rates then pending the results
- 11 of a generic case. Is that what you were about to
- 12 say?
- 13 A. Yes. It's Exhibit SET 2, so you could order
- 14 these interim rates, but that you would then order a
- 15 permanent or a generic rate proceeding -- or generic
- 16 cost proceeding, excuse me, where the cost for
- 17 switching on a port only basis would be evaluated.
- 18 Q. Okay. And, hypothetically, if the
- 19 Commission is unwilling to order interim rates which
- 20 is something that was addressed somewhat at the
- 21 beginning of this case, if the Commission says, No, we
- 22 need to decide permanent rates for this case, what
- 23 would the result be? Is there a way to find for
- 24 WorldCom on this issue? Because you said that the
- 25 Commission could make a policy decision that it needs

- 1 to be on a per-port, you said, but there's no numbers,
- 2 then, associated with that.
- 3 A. Well, there are in Exhibit SET 2.
- 4 Q. Okay.
- 5 A. But the way that I derived these was using
- 6 existing cost recovery through a recurring rate
- 7 structure where about two-thirds of the cost is placed
- 8 on usage, which is not cost-based.
- 9 So what I've -- you know, this is the thing
- 10 we keep dancing around. If you feel like you have to
- 11 make the cost decisions in this time line, the best
- 12 you could do for switching if you wanted to find for
- 13 WorldCom would be to take the rates I've proposed in
- 14 exhibit SET 2.
- 15 Q. Which are the nonTELRIC?
- 16 A. I don't believe they are TELRIC. They are
- 17 just the best that I can do given the limited
- 18 information and time that I had available to me.
- 19 But I believe you're really in trouble on
- 20 the loop, because you've got both Southwestern Bell
- 21 saying the loop should be redone in their testimony;
- 22 you've got WorldCom saying it needs to be redone in my
- 23 testimony, so we're in agreement there, but you only
- 24 have one side's view of what that cost should be.
- 25 So if you decide to find in favor of both of

- 1 us that the loop should be repriced, you,
- 2 unfortunately, only have one party's view of what that
- 3 cost should be and you have a procedural schedule that
- 4 effectively precluded WorldCom from putting up an
- 5 alternative price.
- 6 Q. And is that alternative price contained in
- 7 438?
- 8 A. No.
- 9 Q. Not at all. So that would have to come --
- 10 A. The first time Southwestern Bell put forward
- 11 that new cost study, to my knowledge, was in this
- 12 proceeding, 222, and filed it on December 18th. And I
- 13 got it on January 4th just through the vagaries of
- 14 getting five boxes from Southwestern Bell to me.
- 15 Q. Okay. You've answered my question.
- 16 Back to where we were discussing comparing
- 17 the two documents, at this point I'm not going to ask
- 18 you to prepare a late-filed exhibit.
- 19 What I would like you to do is keep in mind
- 20 what we were discussing, and if later this afternoon
- 21 or tomorrow the Commission decides that they do want
- 22 that comparison, you'll remember what we were talking
- 23 about without having to go back through the court
- 24 reporter.
- 25 A. That would be no problem. I would only need

- 1 you to specify whether you want it on a cost-study
- 2 basis or a rate-element basis. Just so that we're --
- 3 a cost study may generate ten or fifteen rate
- 4 elements, so if you want it on a cost-study basis,
- 5 it's done. I could give you my interpretation of
- 6 their filing. If you want it on a rate-element basis,
- 7 it would just take me some time to prepare that.
- But I can remember our conversation. I
- 9 would just need you to be --
- 10 Q. Clarify.
- 11 A. -- clear on which one you want or if you
- 12 want both.
- Q. At this point, then, we'll leave it at that,
- 14 and I'm not asking you to file anything.
- 15 A. Okay.
- 16 JUDGE RUTH: Commissioner Murray, did you
- 17 have any additional questions?
- 18 COMMISSIONER MURRAY: No.
- 19 JUDGE RUTH: Commissioner Gaw?
- 20 COMMISSIONER GAW: Maybe just a couple.
- 21 FURTHER QUESTIONS BY COMMISSIONER GAW:
- Q. Is it your belief, Mr. Turner, that the
- 23 costs of some of the elements that were set in the
- 24 97-40 case could have changed since that case was
- 25 decided?

- 1 A. Yes, sir.
- Q. And forgive me for being overly simplified
- 3 with this, but if -- if that is the case, can you
- 4 contrast and explain how that fits in with the setting
- 5 of rates on a forward-looking basis under TELRIC to
- 6 begin with? Why should they change if they were set
- 7 at the -- set under TELRIC principles to begin with?
- 8 Again, I'm being overly simple here on
- 9 purpose.
- 10 A. In some cases the item that we costed out in
- 11 '97, "we," meaning, Southwestern Bell and the
- 12 CLECs, now believe that we were costing the wrong
- 13 thing, and I'll just give you an example of that.
- 14 The cross-connect for a two-wire loop to a
- 15 switch port, this is from memory, but in 97-40, it has
- 16 a recurring rate of some -- it's a modest amount. In
- 17 Southwestern Bell's filing in 438, they actually
- 18 proposed a recurring rate of zero.
- 19 From a cost standpoint, I said it should
- 20 also be zero, but on the principle that things have
- 21 already been decided by this Commission in 97-40
- 22 should stick for the purposes of 438, which, in my
- 23 view, was to wrap up getting one complete set of rates
- 24 done for once, I suggested we keep the recurring rate
- 25 as it was.

		_		_	_	_		
1	20	that 'c	on a	example	that	thara	222	thinge
L	$_{\rm O}$	ciiac b	OIIC	CAGIIIPIC	LIIAL		$a_{\perp}c$	CITTINGS

- 2 that what best-intentioned parties in 97-40 did, they
- 3 did not cost out what we now know gets deployed.
- 4 Second is you have significant change in the
- 5 network, and that's effectively what I'm asking for
- 6 you to consider with the loop where Southwestern Bell
- 7 in their own engineering documents and in their own
- 8 assertions before Commissions for the merger
- 9 agreements and in their own -- their own briefings of
- 10 financial analysts on Wall Street have said that the
- 11 loop plant that they are putting in place today
- 12 fundamentally alters their cost structure from what it
- 13 was when we did these cost proceedings in '97, and in
- 14 '97 they were based on architectures that were, like,
- 15 from '94 to '96. I mean, there's a window in time
- 16 they were done under. If you were to do that today in
- 17 2002, you would have a completely different forward-
- 18 looking architecture you would evaluate the cost
- 19 under.
- 20 I think that CLECs should have an
- 21 opportunity to benefit and have their customers $\operatorname{\mathsf{--}}$ and
- 22 have customers in the state of Missouri benefit from
- 23 that lower cost structure.
- 24 In '97, Southwestern Bell had the purchasing
- 25 power that was reflected in the cost studies across

- 1 five states, Texas, Missouri, Oklahoma, Kansas, and
- 2 Arkansas. Since that time they've added the
- 3 purchasing power of eight states additional. They
- 4 have -- and I've got the quotes here. They've
- 5 regularly asserted that the ability to purchase across
- 6 all thirteen states allows them to significantly lower
- 7 procurement costs for transmission equipment, for
- 8 switching equipment, for loop plant. CLECs -- TELRIC
- 9 requires that those significantly different cost
- 10 structures be reflected in forward-looking loop prices
- 11 for CLECs.
- 12 In '96-97 time frame there was a paradigm
- 13 that had been incorporated in a model called SCIS,
- 14 switching cost information system, that showed the
- 15 recovery of costs for switching to be predominantly
- 16 usage-based.
- 17 When you look at Mr. Lane asking me to read
- 18 stuff that was done by the FCC in '96 and '97, it was
- 19 still based on this historical mindset that was
- 20 ingrained in SCIS that you recover cost through usage-
- 21 based elements. But what we know now, having done
- 22 cost proceedings between '96 and 2001, is that
- 23 Southwestern Bell, SBC, does not purchase switching in
- 24 that way. They purchase it on a per-port basis.
- 25 So the information that we knew when we did

- 1 this cost in 97-40 and the information that we know
- 2 today in 2002-222 is fundamentally different in the
- 3 way you should recover the costs for switching. And
- 4 so I'm giving you a kind of an array of answers, an
- 5 array of examples, but the learning curve that the
- 6 industry has gone through over the last six years of
- 7 understanding incumbent cost and understanding the
- 8 cost structure of -- as to how they incur costs has
- 9 advanced sufficiently since '96, which was the
- 10 snapshot for which 97-40 rates were done, that I would
- 11 feel that you would feel compelled to want to relook
- 12 at those.
- Q. Mr. Turner, at the time it was -- when 97-40
- 14 was being examined, it was true, was it not, that
- 15 TELRIC principles were at least stated to be
- 16 applied -- to be applied in that case by the
- 17 Commission?
- 18 A. Yes.
- 19 Q. And --
- 20 A. That's correct.
- 21 Q. It's also true, I assume, that at the time
- 22 if you used the TELRIC principles and applied
- 23 forward-looking costs that there would be some
- 24 anticipation of technological changes, advances that
- 25 might have an impact on costs and efficiencies in a

- l positive way for CLECs.
- 2 A. Actually, that's not the case. The first
- 3 part is true. The second part is not --
- 4 Q. All right.
- 5 A. -- in my opinion.
- 6 Q. Tell me why not.
- 7 A. The form of TELRIC that got deployed or
- 8 implemented was that you had to use currently
- 9 available technology. And, you know, there was a
- 10 whole debate back in the '96-97 time frames as to what
- 11 really was TELRIC. But the form that got deployed is
- 12 you had to use what was actually available at the
- 13 time. That was the definition of "technical
- 14 feasibility," and I'm simplifying it for this.
- 15 Q. That's what I would like you to do.
- 16 A. So NGDLC, the arguments went back in the '97
- 17 time frame, because I was -- I participated in some of
- 18 them, was, does it exist? Well, yes, but it was only
- 19 at that time on spec sheets. We knew the technology
- 20 was coming, but we did not have a good grasp of what
- 21 it cost or what its benefits would be or how
- 22 ubiquitous it would be deployed in the incumbent
- 23 network.
- 24 So the technology that was used in '97, or
- 25 '96 and prior, was a combination of IDLC, integrated

- 1 digital loop carrier, and UDLC, universal digital loop
- 2 carrier. But the technology state of the art that
- 3 Southwestern Bell is deploying today -- and not just
- 4 deploying on a trial basis, they invested \$6 billion
- 5 in it, and of that \$6 billion, 4 1/2 billion went into
- 6 loop plant -- is to use NGDLC. That technology was
- 7 not incorporated in any forward-looking, hypothetical
- 8 way in '97 because the technology wasn't being
- 9 deployed in their network.
- 10 Q. So would it be fair to say that at the time
- 11 that that case was decided that some of the
- 12 presumptions of the forward-looking technology would
- 13 not be true today?
- 14 A. That's correct.
- 15 Q. And would it also be fair to say that
- 16 that -- that that's one of the arguments to re-examine
- 17 these costs to bring them up to date?
- 18 A. Yes, sir.
- 19 Q. Are you aware of other states that have
- 20 re-examined costs that they have previously set?
- 21 A. Yes.
- 22 Q. Is that something that you have been
- 23 involved with?
- 24 A. Yes, sir.
- 25 Q. Is that ongoing in one or two states or many

- 1 states --
- 2 A. It depends -- I mean --
- 3 Q. -- that you're familiar with?
- 4 A. New York is a state that I have participated
- 5 in where this has been done, and Illinois.
- 6 Massachusetts, Georgia, these are states where I've
- 7 been asked to do either the first and then subsequent
- 8 proceedings or I'm doing the subsequent proceedings.
- 9 Some states have legislative mandates that
- 10 rates be reevaluated on either an every-two-year or
- 11 every-three-year basis, but -- so in some cases it's a
- 12 legislative requirement that the commissions undertake
- 13 the work. In other cases, it's a situation where the
- 14 Commission has recognized that the state of our -- or
- 15 understanding of TELRIC cost is more advanced today
- 16 than it was previously.
- 17 So there's many states that I would consider
- 18 to be among the leaders from a regulatory standpoint
- 19 that are, in fact, doing this type of reevaluation
- 20 work.
- 21 COMMISSIONER GAW: All right. I believe I'm
- 22 going to stop. I think I've going to eat into too
- 23 much time, but I appreciate the time I got.
- 24 Thank you.
- 25 THE WITNESS: Thank you.

ASSOCIATED COURT REPORTERS, INC. (573)S636-7551 JEFFERSONOCITY,,MON65101

- 1 JUDGE RUTH: Any further questions?
- 2 (No response.)
- 3 JUDGE RUTH: Recross based on questions from
- 4 the Bench. Mr. Lane?
- 5 Pursuant to the procedural schedule, you
- 6 have five minutes.
- 7 RECROSS-EXAMINATION BY MR. LANE:
- 8 Q. You were asked some questions from
- 9 Commissioner Murray concerning the 438 case. Let me
- 10 start with -- you recognize, do you not, that the 438
- 11 case was established as a spinoff from the
- 12 Southwestern Bell's 271 proceeding in Missouri?
- 13 A. Yes, I recognize that the proceeding was a
- 14 spinoff from that, yes.
- 15 Q. And it was designed to set rates for the M2A
- 16 that were interim in the M2A. Correct?
- 17 A. No. I believe it had a different purpose
- 18 than that in mind.
- 19 Q. The purpose that the Commission established
- 20 in its order establishing the case was that it was to
- 21 make permanent rates that were interim -- some of the
- 22 rates that were interim in the M2A. Right?
- 23 A. There is a "yes, but" to that. I'll make my
- 24 "but" quick.
- The "but" to that was that Southwestern Bell

- 1 identified on its own what was interim and not
- 2 interim, and so there was an extensive discussion in
- 3 the 438 hearing that we could redo today, but there
- 4 was an extensive discussion that the purpose for the
- 5 proceeding was not just to decide what Southwestern
- 6 Bell decided was interim but to fill out the set of
- 7 rates that were not done in 97-40 and were done in
- 8 98-115 but not ordered. So the universe of rates that
- 9 needed to be studied was broader than what
- 10 Southwestern Bell defined as being interim in the M2A.
- 11 Q. That's the short "but"?
- 12 A. That's the short "but".
- Q. And there were other dockets that were also
- 14 established as spinoffs to make rates or terms and
- 15 conditions permanent under the M2A?
- 16 A. Yes, 2001-440, I believe, and perhaps 439
- 17 also.
- 18 Q. And if WorldCom wants to take advantage of
- 19 those rates that the Commission ultimately sets, it
- 20 had and has the option to opt into the M2A all of
- 21 attachments 6 through 10, including the prices, and
- 22 then it would receive those rates when the Commission
- 23 makes its ultimate determination. Correct?
- 24 A. I know that that is one option. I don't
- 25 know if this Commission is considering other options

- 1 such as allowing WorldCom to opt into it out of its
- 2 own interconnection agreement.
- 3 Q. They can opt into that under the M2A, right,
- 4 and they could get the benefits of 438. Right?
- 5 A. That is an option. I don't know if the
- 6 Commission allows other options.
- 7 Q. And you indicated at a couple of times where
- 8 you were implying, I think, that Southwestern Bell
- 9 wanted another cost proceeding to be conducted. Would
- 10 you agree with me that Southwestern Bell has taken the
- 11 position pretty clearly without question in this case
- 12 that it doesn't think that a generic or subsequent
- 13 cost proceeding is appropriate?
- 14 A. I don't -- you have said that in testimony,
- 15 but you've also indicated that there are elements for
- 16 which you need to file studies that you have not done
- 17 so.
- 18 Q. And with regard to loops, in particular,
- 19 Southwestern Bell has filed cost studies that
- 20 demonstrate that the cost of the loop is significantly
- 21 higher than what's in the M2A, but Southwestern Bell
- 22 has said they were willing to live with the rates that
- 23 were proposed in the M2A for purposes of that for
- 24 those CLECs that want to opt into it. Correct?
- 25 A. Yes. But you do not believe that they are

- 1 cost-based.
- Q. All right. We believe they are lower than
- 3 TELRIC requires. Correct?
- 4 A. That's your position.
- 5 Q. Okay. And with regard to your questions
- 6 from Commissioner Gaw and, I think, from Commissioner
- 7 Murray as well concerning what's changed since '97,
- 8 would you agree with me that AT&T raised the same
- 9 claim in front of the FCC that the TELRIC rates this
- 10 Commission had set that formed the basis of the M2A
- 11 shouldn't be accepted because technology had changed
- 12 and the FCC clearly and unequivocally rejected that
- 13 claim?
- 14 A. I do not know that.
- 15 MR. LANE: Okay. Your Honor, may I approach
- 16 the witness?
- JUDGE RUTH: Yes.
- 18 BY MR. LANE:
- 19 Q. Let me show you, Mr. Turner, the FCC's
- 20 decision in CC Docket No. 01-194, dated November 16th
- 21 of 2001, Southwestern Bell's 271 case, and ask you to
- 22 look at paragraph 61 of that order, and ask if you'll
- 23 agree that it provides that AT&T claimed that TELRIC
- 24 rates had not been met in that case because of changes
- 25 in technology, and the FCC rejected that contention?

- 1 I'm sorry. I should have said paragraph 61
- 2 and 62, but 61 is the relevant one here.
- 3 A. Well, I wish I could read this whole
- 4 paragraph into the record because it's pretty
- 5 enlightening, but I know you're running out of time.
- 6 JUDGE RUTH: I will allow time to read it
- 7 into the record, if necessary.
- 8 THE WITNESS: It does say what Mr. Lane is
- 9 saying, but it's because they put faith in this
- 10 Commission.
- "We disagree with AT&T's assertion that
- 12 SWBT's rights in Missouri were set several years ago
- 13 and the declining cost over the years causes SWBT's
- 14 existing rates to be out of date and not TELRIC
- 15 compliant. We approve SWBT's rates based on our
- 16 determination that its voluntarily discounted rates
- 17 fall within a range of what TELRIC would produce.
- 18 "As noted above, the Missouri Commission has
- 19 demonstrated its commitment to TELRIC, is in the
- 20 process of re-examining a number of rates on ongoing
- 21 rate cases. Ratemaking is a complex endeavor and it
- 22 is common for state rate cases to last many months.
- 23 We are confident that the Missouri Commission will
- 24 make any future rate modifications in compliance with
- 25 our TELRIC standard. The DC court of Appeals stated,

- 1 'State agency approved rates are always subject to
- 2 refinement,' and 'Rates may often need adjustment to
- 3 reflect newly discovered information...'
- 4 "If new information automatically required
- 5 rejection of section 271 applications, we cannot
- 6 imagine how such applications could ever be approved
- 7 in this context of rapid regulatory and technological
- 8 change."
- 9 So I think the full answer is, you're right,
- 10 that from a 271 review process you have to take a
- 11 snapshot in time and evaluate whether this Commission
- 12 followed its standard. But the FCC also noted that
- 13 additional information can come to light, and they
- 14 trusted this Commission with a responsibility of
- 15 evaluating that information and making appropriate
- 16 adjustments in the future.
- 17 BY MR. LANE:
- 18 Q. And the "permanent" rates that were
- 19 established by the Commission that found their way
- 20 into the M2A were all of the UNE-P rates, loop,
- 21 switching --
- 22 A. Yes.
- 23 Q. -- correct?
- A. Based out of cost studies done in '97 on
- 25 information in '96 and before.

- 1 Q. And AT&T's contention in the 271 case that
- 2 those were no longer TELRIC compliant because
- 3 technology had changed was rejected for purposes of
- 4 that case, was it not?
- 5 A. For the purposes of evaluating their
- 6 compliance with the 271 standard, I agree. But I
- 7 think this Commission can still evaluate new
- 8 information and is encouraged to do so on a
- 9 going-forward basis.
- 10 Q. And you had indicated that there was a
- 11 spreadsheet that you had prepared in your preparation
- 12 of this case, and was that something that you had
- 13 supplied in the context of discovery in this case?
- 14 A. No. I prepared that the day before Rebuttal
- 15 was due, and it's where I calculated the number 35
- 16 that I cited to in my testimony and the number 28 that
- 17 I cited to in my testimony.
- 18 Q. WorldCom has proposed cost studies of its
- 19 own in other states, has it not?
- 20 A. Yes.
- 21 Q. And in Missouri they've proposed cost
- 22 studies of their own, have they not?
- 23 A. I do not know.
- 24 Q. Okay.
- 25 A. When you say "of their own," do you mean of

- 1 their own creation or meaning restatements of
- 2 Southwestern Bell's studies?
- 3 Q. I'm talking about of their own creations.
- 4 A. Yes, they have in Missouri. The collocation
- 5 cost model is an example.
- 6 Q. And with regard to loops and switching,
- 7 would you agree with me that WorldCom and other
- 8 CLECs in other states have presented their own cost
- 9 studies often based on the Hatfield model or HAI
- 10 model?
- 11 A. Yes, they have done that in other states.
- 12 Q. And have you yourself participated in
- 13 proceedings where results of the HAI model were
- 14 presented as the CLECs' position for what rates should
- 15 be based on in that particular state?
- 16 A. Yes, I have.
- 17 Q. And that was available to WorldCom in this
- 18 case from the very beginning, was it not?
- 19 A. That is -- if the question is, was the model
- 20 available to WorldCom, I would suppose that it's
- 21 available to them. This Commission, though, has
- 22 already evaluated the HAI model, and there is a
- 23 history here of not using it. So that would have been
- 24 an unfruitful exercise, I believe, to have filed that
- 25 here.

- 1 Q. Nevertheless, if WorldCom had chosen to
- 2 present its own version of costs in the case, there is
- 3 material out there that would have permitted it to do
- 4 so in this case had it chosen to. Right?
- 5 A. I believe that it is possible that they
- 6 could have done that.
- 7 Q. And the fact that the Commission has
- 8 rejected something in the past, there's a number of
- 9 issues in this case where the Commission has decided
- 10 it directly contrary to WorldCom, but that hasn't
- 11 stopped you from making the same proposals again, has
- 12 it?
- 13 A. Well, in cost cases, at least in my
- 14 experience in this state, we have tended to follow the
- 15 pattern of using the Southwestern Bell models.
- 16 Q. But my question to you was, there's a number
- 17 of other instances of issues in this case where the
- 18 Commission has already ruled and ruled against
- 19 WorldCom, but that hasn't stopped WorldCom from
- 20 presenting its own position again. Right?
- 21 A. I'm not -- I'm not saying that wouldn't
- 22 happen, but, according to my knowledge, that's not the
- 23 case.
- Q. That hasn't happened?
- 25 A. Not for the issues that I'm testifying to.

- 1 Q. And you had indicated intraLATA toll on a
- 2 response to one of the questions here today. Did you
- 3 make any reference to that, or am I mistaken?
- 4 A. You're mistaken.
- 5 MR. LANE: That's all I have.
- 6 Thank you, your Honor.
- 7 JUDGE RUTH: Thank you. Staff, are you
- 8 ready?
- 9 MR. BATES: We have no questions. Thank
- 10 you, your Honor.
- 11 JUDGE RUTH: We'll move along to the
- 12 redirect.
- 13 I gave Mr. Lane a little bit of leeway in
- 14 his time limitations, so I will give you a little bit
- 15 of leeway on yours also.
- MR. LUMLEY: Thank you, your Honor.
- 17 REDIRECT EXAMINATION BY MR. LUMLEY:
- 18 Q. Mr. Turner, throughout the questioning today
- 19 there has been some references to the 140 pages of
- 20 your testimony from the 2001-438 case. Do you recall
- 21 that?
- 22 A. Yes, sir.
- Q. And just for clarity, that's referring to
- 24 the 35 studies that were submitted in that case that
- 25 Southwestern Bell has submitted again in this case.

- 1 Correct?
- 2 A. Yes, sir, that's correct.
- Q. And at pages 4 through 20 of that testimony,
- 4 you list a sampling of about 20 errors that you've
- 5 observed in those studies. Correct?
- 6 A. That's correct.
- 7 Q. And included in that testimony are the rates
- 8 that you propose in that case. Correct?
- 9 A. That's correct.
- 10 Q. And as Mr. Lane was asking you, in
- 11 calculating those rates, you worked from your
- 12 corrections to Southwestern Bell's 35 studies and the
- 9.38 cost of capital from Mr. Hirshleifer and the
- 14 various factors that Mr. Rhinehart identified?
- 15 A. That's correct.
- 16 Q. And you believe in that case and in this
- 17 case as well that those rates are reasonable and
- 18 TELRIC compliant; is that correct?
- 19 A. Yes, with the explanation that schedule 36
- 20 reflects the use of 97-40 rates to be consistent
- 21 with the principle I laid out in the testimony.
- 22 Schedule 37 is, if the Commission decides to reopen
- 23 rates, then I did my TELRIC compliant cost for those.
- Q. And you weren't able to undergo a similar
- 25 140-some-odd page analysis of the other 28 studies?

- 1 A. No, I was not.
- Q. Would your ability to have reviewed those
- 3 studies with equal detail have been enhanced had
- 4 Southwestern Bell provided them promptly upon the
- 5 request for negotiations on June 1st as opposed to on
- 6 December 18th?
- 7 A. Yes, that would have been very helpful.
- 8 Q. Would it have made much difference if -- in
- 9 being able to conduct that kind of analysis if
- 10 WorldCom had filed the Petition on day 135 after
- 11 June 1st as opposed to 160?
- 12 A. No. The extra 25 days would not have made a
- 13 material difference.
- 14 Q. You had some questions both from Mr. Lane
- 15 and from Commissioner Gaw with regard to the
- 16 forward-looking network in the older studies, the
- 17 forward-looking network and Mr. Smallwood's new
- 18 studies regarding loops, and, in particular, you were
- 19 discussing with Commissioner Gaw IDLC versus NGDLC.
- 20 Do you recall that?
- 21 A. Yes.
- 22 Q. First, can you explain what those two types
- 23 of digital loop carriers are, just what the acronyms
- 24 stand for?
- 25 A. IDLC stands for integrated digital loop

- 1 carrier. NGDLC stands for next generation digital
- 2 loop carrier.
- 3 Functionally, IDLC, the capabilities of that
- 4 are subsumed within what NGDLC can do. But the NGDLC
- 5 is capable of doing far more in that you can change
- 6 out cards at the remote terminal and are able to
- 7 provide voice-only service or voice and DSL or DSL
- 8 only and has other capabilities as well.
- 9 Q. And is Southwestern Bell deploying NGDLC in
- 10 connection with Project Pronto?
- 11 A. Yes, it is.
- 12 Q. And are they -- according to Mr. Smallwood,
- 13 are they assuming the use of NGDLC in their new loop
- 14 studies?
- 15 A. According to his written testimony, the
- 16 representation there, he is saying they are using
- 17 that.
- 18 Q. In the study?
- 19 A. Yes. That was the way I understood it. I
- 20 believe he's also using a mix of other technologies as
- 21 well, but it appeared to me that he was saying that he
- 22 was also using the new technology.
- 23 Q. Is there a distinction between how you would
- 24 approach a new study on that point and what you
- 25 understand they are doing?

- 1 A. The significant distinction would be that we
- 2 would want to review their engineering guidelines for
- 3 how they deploy NGDLC, which those exist, and confirm
- 4 that they were incorporating their best practices into
- 5 the cost study consistent with what they have
- 6 documented as being their procedures and their loop
- 7 deployment guidelines. And that review is something
- 8 that I could not undertake in the time allotted in
- 9 this proceeding, nor did we have the material to be
- 10 able to do that.
- 11 Q. And with regard to switching costs, you had
- 12 several questions.
- 13 Can you explain why it is that switching
- 14 costs should now be on a flat rate basis?
- 15 A. Principally, it is because Southwestern Bell
- 16 purchases switching on a flat rate basis from their
- 17 venders.
- 18 Q. And what do you mean by that?
- 19 A. They negotiate per-port investment cost
- 20 for the purchase of switching from their venders,
- 21 Lucent and Nortel. And that is the cost driver for
- 22 them is how much do they invest per port. This cost
- 23 should then be recovered through a comparable rate
- 24 structure which would be also a port-only recovery
- 25 mechanism.

- 1 Q. And how does that approach to purchasing
- 2 switching relate to the busy hour capacity that you
- 3 discussed?
- 4 A. Well, busy hour capacity will be factored
- 5 into what equipment the profile of your switch has to
- 6 be spread across the number of ports. So there is
- 7 certainly going to be an exchange between Southwestern
- 8 Bell and their venders over what the profile of the
- 9 switch will be from a usage standpoint, but once the
- 10 decision is made to purchase those switches, those
- 11 decisions and that purchase is done on a per-port
- 12 basis with those venders.
- 13 Q. In a forward-looking study, that should --
- 14 should that anticipate, you know, future demand at the
- 15 busy hour?
- 16 A. Yes, it would.
- 17 Q. Mr. Lane discussed with you some old orders
- 18 about switching rate structures.
- 19 Are you aware of any prohibition of using a
- 20 flat rate structure?
- 21 A. No, I'm not.
- 22 Q. Should the Commission have any concern that
- 23 a flat rate structure would somehow allow CLECs a free
- 24 ride on switching?
- 25 A. No, they should not be concerned with that.

- 1 That is the structure that is already being used today
- 2 between Southwestern Bell and its users. When they
- 3 move over to a CLEC that's using unbundled switching,
- 4 they would simply be migrating that usage to the CLEC.
- 5 So from, you know, one customer subsidizing another,
- 6 that would not be an issue at all.
- 7 Q. And you got into discussions about the DUF
- 8 rate, I believe, with Commissioner Gaw. And now
- 9 having had a chance to review Southwestern Bell's
- 10 Rebuttal Testimony, do you still stand by your
- 11 position in the case with regard to that rate?
- 12 A. Absolutely, yeah.
- 13 MR. LUMLEY: I believe that's all of my
- 14 questions, your Honor.
- JUDGE RUTH: We're going to take a break
- 16 then and resume at ten after three.
- Go off the record.
- 18 (A recess was taken.)
- 19 JUDGE RUTH: Before the break we had
- 20 finished with the cross-examination of Mr. Turner. We
- 21 are now ready to move on to Southwestern Bell's first
- 22 witness on this issue. Is that Mr. Avera?
- MR. LANE: Dr. Avera.
- JUDGE RUTH: Dr. Avera.
- 25 (Witness sworn.)

- 1 JUDGE RUTH: Thank you.
- 2 Please be seated.
- 3 WILLIAM E. AVERA, Ph.D., CFA, testified as follows:
- 4 DIRECT EXAMINATION BY MR. LANE:
- 5 Q. Good afternoon.
- 6 A. Good afternoon, Mr. Lane.
- 7 Q. Would you state your name for the record,
- 8 please?
- 9 A. William E. Avera.
- 10 Q. Dr. Avera, by whom are you employed?
- 11 A. FINCAP, Incorporated in Austin, Texas.
- 12 Q. And, Dr. Avera, did you prepare Direct
- 13 Testimony in this case that has been premarked as
- 14 Exhibit 3?
- 15 A. Yes, sir, I did.
- Q. Do you have any changes to that testimony?
- 17 A. No, Mr. Lane.
- 18 Q. If I were to ask you the questions that are
- 19 contained in your prefiled Direct Testimony today,
- 20 would your answers be the same?
- 21 A. Yes, sir, they would be.
- Q. And are those answers true and correct to
- 23 the best of your knowledge and belief?
- 24 A. They are.
- 25 MR. LANE: Your Honor, at this time we would

- 1 offer Exhibit 3, and tender Dr. Avera for cross.
- JUDGE RUTH: Okay. Exhibit 3 has been
- 3 offered into the record, Dr. Avera's Direct Testimony.
- 4 Are there any objections to it being
- 5 received into the record?
- 6 MR. BATES: No, your Honor.
- 7 JUDGE RUTH: Okay. Seeing no objections, it
- 8 is received.
- 9 (EXHIBIT NO. 3 WAS RECEIVED INTO EVIDENCE.)
- 10 JUDGE RUTH: Okay. Mr. Lumley, we are ready
- 11 for cross-examination from WorldCom, and it is my
- 12 understanding you are electing to take 15 minutes
- 13 approximately for this witness.
- MR. LUMLEY: Yes, your Honor.
- Thank you.
- 16 CROSS-EXAMINATION BY MR. LUMLEY:
- 17 Q. Good afternoon, sir.
- 18 A. Good afternoon, Mr. Lumley.
- 19 Q. The 12.19 percent cost of capital that
- 20 you're recommending in this case, that's the same
- 21 position you took in the 438 case; is that correct?
- 22 A. Yes, sir.
- Q. And it's also the same position you took in
- 24 the AT&T/Southwestern Bell arbitration which was
- 25 called the 455 case?

- 1 A. Yes, sir.
- 2 Q. And it's the same figure that you proposed
- 3 in May of 1999 in the Nevada proceeding; is that
- 4 correct?
- 5 A. Yes, sir.
- 6 Q. And that was the first time that you used
- 7 the study that generated that figure?
- 8 A. Yes, sir.
- 9 Q. And you've attached that Nevada testimony to
- 10 your testimony in this case; is that correct?
- 11 A. Yes, sir, I have.
- 12 Q. And that's -- you're relying on that 1999
- 13 analysis?
- 14 A. I am, in addition to the reviewing, as I
- 15 express in my Direct Testimony, to assure myself it
- 16 remains conservative and applicable here in Missouri.
- 17 Q. You've indicated in your testimony that this
- 18 cost of capital study was conducted for the use of all
- of SBC's LEC subsidiaries; is that correct?
- 20 A. Yes, sir.
- 21 Q. And so the result that you obtain would be
- 22 uniform across all of the states in which SBC
- 23 operates?
- 24 A. That is correct.
- 25 Q. And you start your analysis by considering

- 1 the company as a whole; is that correct?
- 2 A. That's correct.
- 3 Q. And then you injected your judgment as to
- 4 the relative risk of providing unbundled network
- 5 elements and interconnection. Correct?
- 6 A. Well, my judgment as informed by a review of
- 7 investors' opinions and other materials to convince
- 8 myself that no adjustment was necessary for any
- 9 difference in risk.
- 10 Q. And so you agree with the proposition that
- 11 the Commission should be looking at and determining in
- 12 conjunction with these cost studies a cost of capital
- 13 for a LEC in Southwestern Bell's position in Missouri
- 14 that is offering a line of business of leasing UNEs to
- 15 CLECs?
- 16 A. That is correct. The cost of capital should
- 17 be one that is applicable to that circumstance and
- 18 would reflect investor requirements of investing in
- 19 that type of enterprise.
- 20 Q. Your analysis includes a conclusion about
- 21 capital structure. Correct?
- 22 A. Yes, sir.
- 23 Q. And you indicate in your testimony that the
- 24 capital structures of LECs are in a state of change.
- 25 Correct?

- 1 A. That is correct.
- Q. And that was a statement you made in 1999?
- 3 A. Yes, it is.
- 4 Q. You include in your Nevada testimony a
- 5 reference to the Wall Street Journal speaking about
- 6 Bell companies being banned from the long distance
- 7 market. Do you recall that?
- 8 A. Yes, sir.
- 9 Q. And that would be incorrect for Missouri at
- 10 this point; is that correct?
- 11 A. That is correct. As things have developed,
- 12 the FCC has approved the 271 filing.
- 13 Q. At page 14 -- let me ask you this: The
- 14 Nevada testimony, the pagination is the same as in the
- 15 438 case? It's the same document, or do you know?
- 16 A. I'm not sure if the pagination is the same.
- 17 As I discuss in my Direct Testimony, the 438
- 18 attachment was sent electronically, and in sending it
- 19 electronically, we were apparently behind one draft
- 20 and also it didn't print out exactly as it had been
- 21 created because of the transformation between Word
- 22 Perfect and Word. So what I've done for this filing
- 23 is to go back and get the file-stamped copy of what
- 24 was actually filed in Nevada, and that's what's been
- 25 attached to this testimony.

- 1 Q. But in your testimony you contrast what you
- 2 call the critical network elements that incumbents
- 3 provide CLECs as opposed to competitive
- 4 telecommunications services; is that correct?
- 5 A. I remember a discussion of that sort.
- 6 Where are you looking in the testimony for
- 7 that -- those words?
- 8 Q. I believe it was page 14, but I didn't
- 9 realize that your page numbers had changed.
- 10 But if I show you that question and answer
- 11 from the 438 case, would that refresh your
- 12 recollection?
- 13 A. Yes, sir.
- MR. LUMLEY: May I approach, your Honor?
- JUDGE RUTH: Yes.
- 16 THE WITNESS: I recall the discussion of the
- 17 438 case.
- 18 BY MR. LUMLEY:
- 19 Q. All right. And you're using the constant
- 20 growth formula of the DCF model in calculating cost of
- 21 equity; is that correct?
- 22 A. Well, I have three or four different
- 23 approaches to estimating the cost of equity. Two of
- 24 them involve the constant growth DCF model.
- Q. And you indicate in your testimony that the

- 1 assumptions underlying the constant growth formula of
- 2 the DCF model are not met in the real word. Correct?
- 3 A. That's correct. Like many economic models,
- 4 it is based on abstract assumptions that you have to
- 5 test the results against what happens in the real
- 6 world, and it turns out that the constant growth DCF
- 7 is consistent with what we observe in the real world,
- 8 notwithstanding the assumptions are not always met.
- 9 Q. But you would agree it's a simplification of
- 10 the real world?
- 11 A. Yes. It is a simplification of the real
- 12 world but one that is workable.
- 13 Q. And I think you touched on it -- on this,
- 14 but just to clarify, it's your opinion that while
- 15 you're looking at the UNE line of business that the
- 16 diversified portfolio of SBC is likely to be of equal
- 17 risk?
- 18 A. I believe it is of equal or lesser risk than
- 19 the UNE business, so I see no reason to adjust the
- 20 results of my cost of capital study to reflect a
- 21 difference in risk between the holding company and the
- 22 UNE business.
- Q. And you explain in your testimony that book
- 24 value dividends, earnings, and price are all assumed
- 25 to move in lockstep in the constant growth DCF model.

- 1 Correct?
- 2 A. Yes. That's one of the assumptions.
- 3 Q. And price, we're talking about stock price?
- 4 A. Yes, sir.
- 5 Q. And you used a recent price, and that was a
- 6 recent price as of 1999. Correct?
- 7 A. That is correct. I used the same price that
- 8 lined up with my other inputs which was the price that
- 9 appears on the top of the Value Line sheets on the
- 10 date that I did my analysis.
- 11 Q. And in your testimony you refer to a current
- 12 equity risk premium from the Harris & Marston
- 13 viewpoint, and that was current as of 1999. Correct?
- 14 A. That was based on the '99 estimate.
- 15 Q. And when you refer to a current long term
- 16 U.S. treasury bond yield, again, that's current as of
- 17 1999?
- 18 A. That's correct. 5.8 percent then prevailing
- 19 in 1999.
- 20 Q. And when you -- when you discuss the risks
- 21 of the UNE line of business, I think we distilled this
- 22 down in the 438 case, that it's not really the risk of
- 23 a particular loop, for example, that a CLEC is using
- 24 and the customer switches back to Southwestern Bell or
- 25 switches to another CLEC and continues to use the

- 1 loop, but, actually, you're talking about a risk that
- 2 plant would actually become stranded or idle; is that
- 3 correct?
- 4 A. I think that is one of the risks. We had
- 5 extensive discussion, you and I, Mr. Lumley, about the
- 6 fact that we want to look at the risk from the
- 7 perspective of the investors who are putting up the
- 8 money because the question is, what return do
- 9 investors require. So we tried to look at the kind of
- 10 risk that investors would perceive in putting their
- 11 money into assets that are being made available for
- 12 UNEs. And we talked about a bunch of those.
- One of those is that the investment might be
- 14 made in the assets, the CLEC lease the assets, the
- 15 customer leave the CLEC or the CLEC provide the
- 16 service to the customer through another means, and
- 17 Southwestern Bell never be able to fully utilize those
- 18 assets again.
- 19 Q. And you also agree with me in that case that
- 20 Southwestern Bell's use of bridge tap would ameliorate
- 21 that risk by facilitating the use of plant for
- 22 different customers; is that correct?
- 23 A. I think we agreed that there could be some
- 24 mitigation of the risk, but still the investor looks
- 25 at the chance of getting all of their money back, a

- 1 return on and a return of all of their money, and
- 2 there is a significant probability that that would not
- 3 happen with at least some of these assets dedicated to
- 4 the UNE business.
- 5 MR. LUMLEY: That's all of my questions,
- 6 your Honor.
- 7 JUDGE RUTH: Mr. Bates?
- 8 MR. BATES: No. Thank you, your Honor.
- 9 JUDGE RUTH: Commissioner Murray?
- 10 COMMISSIONER MURRAY: No questions. Thank
- 11 you.
- 12 JUDGE RUTH: Commissioner Gaw?
- 13 COMMISSIONER GAW: No questions. Thank you.
- 14 JUDGE RUTH: Okay. Since there are no
- 15 questions from the Bench, we will not need to have
- 16 recross based on the questions from the Bench. We'll
- 17 move right on to redirect.
- MR. LANE: Just a few, your Honor.
- 19 REDIRECT EXAMINATION BY MR. LANE:
- 20 Q. Dr. Avera, you were asked some questions by
- 21 Mr. Lumley concerning the 1999 study that is
- 22 incorporated as an attachment to your testimony in
- 23 this case.
- 24 Has the cost of capital that is reflected in
- 25 that 1999 study been accepted in any other states for

- 1 use in setting UNE rates?
- 2 A. It was accepted in Nevada. It was
- 3 subsequently presented and accepted in Connecticut.
- 4 It has been presented in Wisconsin. We're still
- 5 awaiting the decision of the Wisconsin commission.
- 6 Q. And is it your view that the 12.19 percent
- 7 cost of capital that you present in your Direct
- 8 Testimony remains at least as high today as it was
- 9 back in 1999?
- 10 A. Yes. If you look at the elements of it,
- 11 interest rates are demonstrably higher for corporate
- 12 securities than they were in 1999, so that element
- 13 would go up. I think the methods that I used to
- 14 estimate the cost of equity today would result in a
- 15 higher cost of equity than what I used in 1999. I
- 16 think it is probably true that the market value
- 17 capital structure has shifted slightly toward more
- 18 debt and less equity, but if you look at the magnitude
- 19 of that shift, it's more than overwhelmed by the two
- 20 elements that increase, so I think if it were done
- 21 today, we would get a higher result than the 12.19.
- Q. And you were asked some questions about
- 23 whether it was appropriate to set a cost of capital
- 24 based on a company that's engaged in the business of
- 25 providing UNEs. Do you recall those questions?

- 1 A. Yes, sir.
- Q. And is there any company that exists today
- 3 that does nothing but provide unbundled network
- 4 elements to CLECs?
- 5 A. No, sir, Mr. Lane. There is no place we can
- 6 look out in the market to see what investors are
- 7 actually requiring. So we have to look to the market
- 8 information that we have for local exchange companies,
- 9 the holding companies like the Standard & Poors sample
- 10 that I used which included SBC, and then based on the
- 11 cost of equity and cost of debt and the capital
- 12 structure we observe for those companies, adjust that
- 13 if necessary to bring it to UNEs.
- 14 I looked very carefully at the adjustment
- 15 and made the conclusion that investors would see the
- 16 business of investing in UNEs as at least equivalent
- 17 risk of the general business of investing in a
- 18 diversified holding company.
- 19 Q. And what are some of the reasons in your
- 20 analysis that the cost of capital required by
- 21 investors for a company engaging solely in the
- 22 provision of UNEs would be at least equal to that of
- 23 the proxies that you've utilized?
- 24 A. One of the reasons is the unique
- 25 circumstance of leasing UNEs in that you have many of

- 1 the disadvantage of any leasing operation, which is
- 2 your asset base -- if your asset is overcome by
- 3 technology, if your asset is no longer useful, you
- 4 can't get any income out of that asset. You can't
- 5 continue to lease it.
- 6 On the other hand, you have the
- 7 disadvantages also of a regulated business which means
- 8 you are not free to set the price of the leases, you
- 9 are not free to withdraw from the business in those
- 10 areas that you find it unattractive.
- 11 So the UNE business as it's been set up by
- 12 the Telecommunications Act of '96 requires that these
- 13 assets be made available, that the services that go
- 14 with the assets be made available, where necessary
- 15 expansions be made where requested by the CLECs, but
- 16 there is no guarantee as there normally is in the
- 17 regulatory arena that the investment made in those
- 18 assets will be recovered over time or even that you
- 19 will get the return you expect on those assets over
- 20 time.
- 21 So it's a problem of having assets which are
- 22 in large part geographically stuck, committed to a
- 23 certain community or area. You can do some things to
- 24 mitigate maybe some of those assets or use them in the
- 25 same general area, but you're still tied to an

- 1 investment that may not result in the returns that are
- 2 necessary to justify the money you put into the
- 3 investment.
- 4 So that's the kind of risk that is unique to
- 5 the UNE business, which really has no counterpart
- 6 either in kind of competitive leasing of oil tankers
- 7 or real estate or cars or construction, and it really
- 8 has no counterpart in the normal regulated world that
- 9 we observe of electric, gas, water and waste water
- 10 utilities.
- 11 Q. Is the business of leasing UNEs subject both
- 12 to competitive risk and to regulatory risk?
- 13 A. Yes, sir. You in some ways have the worst
- 14 of both worlds. You have the competitive risk, but
- 15 you have no guaranteed market. You have no guaranteed
- 16 ability to gain income, but you have the regulatory
- 17 risk that your ability to price and your obligations
- 18 associated with these assets are not in the control of
- 19 your management. They are under the control or at
- 20 least the oversight of regulatory bodies.
- 21 MR. LANE: Thank you. That's all I have.
- 22 Your Honor, if there are no questions, could
- 23 I ask that Dr. Avera be excused from the case?
- 24 JUDGE RUTH: Not all of the Commissioners
- 25 are here right now for me to be able to excuse the

- 1 witness. I will pose the question to the other
- 2 Commissioners, and we will discuss it again at the end
- 3 of the day.
- 4 MR. LANE: Thank you, your Honor.
- 5 JUDGE RUTH: So I'll ask you to remain at
- 6 least through today.
- 7 THE WITNESS: Yes, judge.
- 8 JUDGE RUTH: Southwestern Bell, it's my
- 9 understanding your witness is next; is that correct?
- 10 MR. KRIDNER: Yes, sir.
- 11 JUDGE RUTH: Is this Mr. Naughton?
- 12 THE WITNESS: Yes, it is.
- 13 (Witness sworn.)
- 14 JUDGE RUTH: Thank you.
- 15 Please be seated.
- 16 Proceed.
- MR. KRIDNER: With your permission, your
- 18 Honor.
- 19 PHILIP G. NAUGHTON testified as follows:
- 20 DIRECT EXAMINATION BY MR. KRIDNER:
- Q. Would you please state your name?
- 22 A. My name is Philip Naughton.
- Q. And by whom are you employed?
- A. I'm employed by SBC-Ameritech Services.
- Q. Are you the same Philip Naughton who has

- 1 caused to be filed in this proceeding Exhibit 4NP, for
- 2 the public version and Exhibit 4HC for your direct
- 3 (sic) version of your testimony?
- 4 A. Yes, I am, sir.
- 5 Q. I'm sorry. HC being the highly confidential
- 6 version?
- 7 A. Yes, sir.
- 8 Q. Okay. Do you have any changes to this
- 9 testimony at this time?
- 10 A. No, sir.
- 11 Q. If I were to ask you the same questions
- 12 today, would your answers be the same?
- 13 A. Yes, sir.
- 14 Q. And are the answers true and correct to the
- 15 best of your knowledge, information, and belief?
- 16 A. Absolutely.
- 17 MR. KRIDNER: Your Honor, at this time, we
- 18 would move for the admission of Exhibit 4NP and
- 19 Exhibit 4HC.
- JUDGE RUTH: Exhibit 4NP and 4HC,
- 21 Mr. Naughton's Direct Testimony, have been offered
- 22 into the record. Any objections?
- MR. BATES: None.
- 24 JUDGE RUTH: Okay. Seeing no objections,
- 25 both 4NP and 4HC are received.

- 1 (EXHIBIT NOS. 4NP AND 4HC WERE RECEIVED INTO
- 2 EVIDENCE.)
- 3 MR. KRIDNER: And, your Honor, we would
- 4 offer Mr. Naughton for cross-examination at this time.
- 5 JUDGE RUTH: Okay. It's my understanding,
- 6 Mr. Lumley, that you are electing zero minutes to
- 7 allocate towards this witness.
- 8 MR. LUMLEY: Your Honor, if you wouldn't
- 9 mind me asking one question of the witness.
- 10 JUDGE RUTH: I'll give you that leeway.
- 11 MR. LUMLEY: Thank you, your Honor.
- 12 CROSS-EXAMINATION BY MR. LUMLEY:
- 13 Q. Mr. Naughton, the 2000 cost study economic
- 14 lives that are attached to your testimony --
- 15 A. Yes.
- 16 Q. -- is that the same information you
- 17 submitted in the 438 case?
- 18 A. Yes, sir.
- 19 MR. LUMLEY: Thank you.
- JUDGE RUTH: Mr. Bates?
- 21 MR. BATES: No questions. Thank you.
- JUDGE RUTH: We'll move to questions from
- 23 the Bench.
- 24 Commissioner Murray, do you have any
- 25 questions?

1	COMMISSIONER MURRAY: No questions. Thank
2	you.
3	JUDGE RUTH: Commissioner Gaw?
4	COMMISSIONER GAW: No questions. Thanks.
5	JUDGE RUTH: Then on to redirect.
6	MR. KRIDNER: Your Honor, we would have no
7	redirect for the witness.
8	And also subject to the comments you made
9	with respect to Mr. Turner and Dr. Avera with respect
10	to releasing the witness, we would also request that
11	this witness be released at the earliest possible
12	time.
13	JUDGE RUTH: Okay. So I will at this point
14	not excuse the witness. I will take that under
15	advisement. We will address it again at the end of
16	today.
17	MR. KRIDNER: I understand.
18	Thank you, your Honor.
19	JUDGE RUTH: And you may step down.
20	THE WITNESS: Thank you.
21	JUDGE RUTH: The next witness, is that
22	Mr. Cass?
23	MR. KRIDNER: Mr. Cass.
24	(Witness sworn.)

ASSOCIATED COURT REPORTERS, INC. (573)S636-7551 JEFFERSONOCITY,,MON65101

212

JUDGE RUTH: Thank you.

- 1 Please be seated.
- 2 Proceed.
- 3 MR. KRIDNER: With your permission, your
- 4 Honor.
- 5 CHRIS F. CASS testified as follows:
- 6 DIRECT EXAMINATION BY MR. KRIDNER:
- 7 Q. Would you please state your name?
- 8 A. Chris F. Cass.
- 9 Q. And by whom are you employed?
- 10 A. SBC Telecommunications, Incorporated.
- 11 Q. And are you the same Chris F. Cass who has
- 12 caused to be filed in this proceeding what has been
- 13 marked as Exhibit 5NP for the public version and
- 14 Exhibit 5HC for the highly confidential version, your
- 15 Direct Testimony?
- 16 A. Yes, I am.
- 17 Q. Do you have any changes to this testimony at
- 18 this time?
- 19 A. No, I do not.
- 20 Q. If I were to ask you the same questions
- 21 today, would your answers be the same?
- 22 A. Yes, they would.
- Q. And are the answers true and correct to the
- 24 best of your knowledge, information, and belief?
- 25 A. Yes, they are.

- 1 MR. KRIDNER: Okay. Your Honor, at this
- 2 time Southwestern Bell offers Exhibit 5NP and
- 3 Exhibit 5HC, being the public and highly confidential
- 4 versions of the direct testimony of Mr. Chris F. Cass.
- 5 JUDGE RUTH: Okay. Exhibits 5NP and 5HC,
- 6 are there any objections to these two documents being
- 7 admitted?
- 8 MR. BATES: No.
- 9 JUDGE RUTH: Seeing no objections,
- 10 Exhibits 5NP and 5HC are received into the record.
- 11 (EXHIBIT NOS. 5NP AND 5HC WERE RECEIVED INTO
- 12 EVIDENCE.)
- MR. KRIDNER: Okay. Your Honor, at this
- 14 time we offer Mr. Cass for cross-examination.
- 15 THE WITNESS: Your Honor, if I may. I
- 16 didn't grab my cost studies the first time over.
- 17 JUDGE RUTH: Go ahead and get them. Thanks.
- 18 MR. LUMLEY: Thank you, your Honor.
- 19 CROSS-EXAMINATION BY MR. LUMLEY:
- Q. Mr. Cass, are any of the -- any of the cost
- 21 studies that you're addressing in your testimony the
- 22 same studies that were submitted in the 455 case?
- 23 A. Yes, some of them are.
- Q. Can you identify those for us?
- 25 A. I believe so.

- 1 Q. And if you could, work from pages 1 and 2 of
- 2 your -- 1, 2, and 3 of your Direct Testimony and go in
- 3 that order.
- 4 A. Sure.
- 5 Q. Thank you.
- 6 A. The first cost study mentioned at the bottom
- 7 of page 1 two-wire analog loop and so on was not in
- 8 case 438.
- 9 Q. I'm sorry. I asked you about Case 455?
- 10 A. Oh, 455.
- 11 JUDGE RUTH: Could you use the microphone,
- 12 too. You might make sure it's --
- 13 THE WITNESS: Okay. The first cost study,
- 14 the loop cost study for two-wire analog, four-wire
- 15 analog, and two-wire digital, a similar cost study was
- 16 filed in 455, but not exactly the same.
- 17 BY MR. LUMLEY:
- 18 Q. And how is it different?
- 19 A. We updated some of the time estimates from
- 20 the installation maintenance work group.
- 21 Q. Would that be a cost factor adjustment or in
- 22 the study itself?
- 23 A. Within the study itself, the times are
- 24 updated.
- I believe the same case for the first study

- 1 listed on page 2, the two-wire digital loop, and also
- 2 the same case for the subloops, which is schedule 4.
- 3 Maybe I should give these by schedule number.
- 4 Do you only want me to do 455, or do you
- 5 want me to do 438 along with it?
- 6 Q. If you can do them both at the same time,
- 7 that's fine. That would be my next question.
- 8 A. Okay. Cross-connects to collocation cage,
- 9 it tests my memory a little, but I believe that was
- 10 the same as the 455 case.
- 11 The recurring study I believe was in there
- 12 also. I can't remember offhand if they were the exact
- 13 same or not, but relatively close, I'm sure.
- 14 O. That's schedule 6?
- 15 A. That was schedule 6.
- Schedule 7, dark fiber, to the best of my
- 17 knowledge, that was also in the 455 case. The
- 18 elements were in dispute, I believe. So was
- 19 schedule 8, the recurring dark fiber.
- 20 Schedule 9, the dB loss was in dispute in
- 21 455, as well as schedule 10, dB loss was in dispute in
- 22 455.
- The schedule 11, network interface device,
- 24 was at issue in 455.
- 25 The unbundled dedicated transport

- 1 interoffice facilities, DS1 through OC12, I don't
- 2 recall whether or not those were in 455. I believe at
- 3 least a portion of them were in 438. I'd have to
- 4 check whether or not the whole thing was. I think
- 5 only a portion of those were in dispute though.
- The same with schedules 12 and 13 and 14,
- 7 are all of the interoffice facilities. If I remember
- 8 correctly, 13 and 14 were in 438.
- 9 Schedule 15, unbundled dedicated transport
- 10 entrance facilities, and schedule 16 is the recurring
- 11 unbundled dedicated transport interoffice
- 12 facilities -- or entrance facilities, I believe a
- 13 portion of those were in 438. I don't have my 438 or
- 14 455 testimony with me, so I'm not exactly sure. They
- 15 are kind of boring together a little bit.
- 16 There is also another entrance facility
- 17 study that would go along with schedule 17.
- 18 Schedules 18 and 19, with regard to the
- 19 dedicated transport cross-connects, digital
- 20 cross-connect system and multiplexings, those were in
- 21 438.
- Schedules 20 and 21, LSP to SS7 links
- 23 cross-connects and interoffice for voice grade and
- DS1, recurring and nonrecurring, were in 438.
- The unbundled network element loop

- 1 cross-connects, schedules 23 -- or 22 and 23, the
- 2 recurring and nonrecurring versions, I believe were in
- 3 438.
- 4 Q. And have you attached the complete studies
- 5 to your testimony or just portions?
- 6 A. To my testimony itself, I believe the
- 7 methodology and the results were attached, and the
- 8 complete cost studies were sent separately to reply to
- 9 a data request, 1-1, I believe.
- 10 Q. Page 4 of your testimony, line 8, you
- 11 indicate that it would be in keeping with forward-
- 12 looking cost principles to reflect only new technology
- 13 that would be used; is that correct?
- 14 A. To be specific, I said, "In keeping with
- 15 forward-looking cost principles, investments reflect
- 16 only new technology that would be used if the existing
- 17 equipment were to be replaced today."
- 18 Q. Page 10, you indicate that the recurring dB
- 19 loss conditioning cost study is still in its original
- 20 form from 1996 to '98; is that correct?
- 21 A. That is correct.
- Q. And dB, that stands for decibel; is that
- 23 correct?
- 24 A. Yes, I believe so.
- 25 Q. And you indicate further on that page that

- 1 your cost group basically didn't have time to update
- 2 that one?
- 3 A. That is correct.
- 4 MR. LUMLEY: That's all of my questions,
- 5 your Honor.
- JUDGE RUTH: Staff?
- 7 MR. BATES: No questions. Thank you, your
- 8 Honor.
- 9 JUDGE RUTH: Commissioner Murray?
- 10 COMMISSIONER MURRAY: I don't have any
- 11 questions. Thank you.
- 12 JUDGE RUTH: Commissioner Gaw?
- 13 COMMISSIONER GAW: No. Thank you.
- 14 JUDGE RUTH: Okay. Mr. Cass, you -- whoops.
- 15 Sorry. I almost forgot to redirect.
- MR. KRIDNER: Your Honor, we have no
- 17 redirect for this witness.
- 18 However, we also would ask that he be
- 19 excused at the earliest possible time.
- 20 JUDGE RUTH: What I'll do is, at this point,
- 21 you're not excused. You'll need to remain available,
- 22 but we'll address this again at the end of the day,
- 23 whether or not that can be changed.
- MR. KRIDNER: Thank you, your Honor.
- 25 THE WITNESS: Thank you.

ASSOCIATED COURT REPORTERS, INC. (573)S636-7551 JEFFERSONOCITY,,MON65101

- 1 JUDGE RUTH: Southwestern Bell, you may call
- 2 your next witness.
- 3 MR. KRIDNER: Your Honor, Southwestern Bell
- 4 calls Mr. Makarewicz at this time.
- 5 (Witness sworn.)
- 6 JUDGE RUTH: Thank you.
- 7 Please be seated.
- 8 And you may proceed.
- 9 MR. KRIDNER: Thank you, your Honor.
- 10 With your permission.
- 11 THOMAS J. MAKAREWICZ testified as follows:
- 12 DIRECT EXAMINATION BY MR. KRIDNER:
- Q. Would you please state your name.
- 14 A. My name is Thomas J Makarewicz. It's
- 15 spelled M-a-k-a-r-e-w-i-c-z.
- 16 Q. And by whom are you employed,
- 17 Mr. Makarewicz?
- 18 A. SBC Telecommunications, Incorporated.
- 19 Q. Now, are you the same Thomas J. Makarewicz
- 20 who has caused to be filed in this proceeding exhibits
- 21 6NP, being the public version, and Exhibit 6HC, being
- 22 the highly confidential version of your Direct
- 23 Testimony?
- 24 A. Yes.
- Q. And are you also the same -- or did you also

- 1 cause to be filed as Exhibit 7NP for the public
- 2 version and Exhibit 7HC for the highly confidential
- 3 version of your Rebuttal Testimony?
- 4 A. Yes, I did.
- 5 Q. Now, do you have any changes to any of this
- 6 testimony at this time?
- 7 A. Yes, I have one slight change to the
- 8 Rebuttal Testimony -- I'm sorry -- to the Direct
- 9 Testimony.
- 10 Q. Okay. Exhibit 6. Would you please identify
- 11 the page?
- 12 A. It appears on page 22.
- Q. And what is that change?
- 14 A. It's at line 21.
- 15 At the end of the line it reads -- I want to
- 16 change the word "increasing" and substitute
- 17 "decreasing."
- 18 Q. And would that be on both the public version
- 19 and the confidential versions?
- 20 A. Yes.
- 21 MR. KRIDNER: Your Honor, with your
- 22 permission, if the witness may make that change to the
- 23 record copies of the testimony?
- JUDGE RUTH: Yes. That's fine.
- 25 Can you clarify for me again what page that

- 1 was on?
- 2 THE WITNESS: It's page 22 of the Direct
- 3 Testimony, line 21.
- 4 JUDGE RUTH: Thank you.
- 5 BY MR. KRIDNER:
- 6 Q. Do you have the record copy in front of you?
- 7 A. Yes, I do.
- 8 Q. Would you make that change, please?
- 9 A. Yes.
- 10 Q. Okay. Now, then, if I were to ask you the
- 11 same questions today, would your answers be the same?
- 12 A. Yes, they would.
- 13 Q. And are the answers contained in your Direct
- 14 and your Rebuttal Testimony true and correct to the
- 15 best of your knowledge, information, and belief?
- 16 A. Yes, they are.
- 17 MR. KRIDNER: Your Honor, at this time
- 18 Southwestern Bell offers Exhibit 6NP and Exhibit 6HC
- 19 being the public and confidential versions of
- 20 Mr. Makarewicz' Direct Testimony, and Exhibit 7NP and
- 21 Exhibit 7HC, being the public and highly confidential
- 22 versions of Mr. Makarewicz' Rebuttal Testimony.
- JUDGE RUTH: First let's address the Direct
- 24 Testimony, 6NP and 6HC. Are there any objections?
- MR. BATES: No objection.

- 1 JUDGE RUTH: Seeing no objection, 6NP and
- 2 6HC are received into the record.
- 3 (EXHIBIT NOS. 6NP AND 6HC WERE RECEIVED INTO
- 4 EVIDENCE.)
- 5 JUDGE RUTH: 7NP and 7HC are the Rebuttal
- 6 Testimony of the witness. Any objection to those
- 7 being received?
- 8 (No response.)
- 9 JUDGE RUTH: Seeing no objections, 7NP and
- 10 7HC are also received into the record.
- 11 (EXHIBIT NOS. 7NP AND 7HC WERE RECEIVED INTO
- 12 EVIDENCE.)
- MR. KRIDNER: Your Honor, at this time we
- 14 pass Mr. Makarewicz for cross-examination.
- 15 CROSS-EXAMINATION BY MR. LUMLEY:
- 16 Q. Are the cost factors that you're sponsoring
- 17 the same as your company sponsored in the 438 case?
- 18 A. Yes, they are.
- 19 Q. Were they also the same in the 455 case, the
- 20 AT&T arbitration?
- 21 A. Yes, they were. There actually -- for the
- 22 455 case, there were two versions of cost factors,
- 23 some of which applied to the 1997 studies, the others
- 24 of which applied to the 2000 studies.
- Q. And these would be the 2000 studies?

- 1 A. Actually, both.
- 2 Q. It would be both. Okay.
- 3 And in the 438 case, these were presented by
- 4 Mr. Ries, is that correct --
- 5 A. Yes.
- 6 Q. -- for your company?
- 7 And a witness for AT&T, Mr. Rhinehart,
- 8 presented some critiques of the factors; is that
- 9 correct?
- 10 A. Yes, he did.
- 11 Q. And did you make any adjustments from the
- 12 factors that were presented in the 438 case to get to
- 13 these factors based on that critique by AT&T?
- 14 A. No, we did not adjust the factors based on
- 15 AT&T's criticism.
- 16 Q. On page 3, line 7, you indicate that for
- 17 certain types of equipment a current vender price is
- 18 the starting point; is that correct?
- 19 A. This is Direct Testimony?
- 20 Q. Yes.
- 21 A. Sorry. At what line?
- 22 Q. Page 3, line 7.
- 23 A. Yes.
- Q. Page 9, at the bottom, still in your Direct
- 25 Testimony, you indicate that -- you have the

- 1 statement, "The percentage does not apply to
- 2 right-to-use fees included in central office expense
- 3 accounts." Do you see that?
- 4 A. Yes, I see it.
- 5 Q. And just for the record, what percentage are
- 6 we talking about, or are you talking about?
- 7 A. This is -- this answer deals with the
- 8 adjustment we made to remove nonrecurring costs from
- 9 the -- from the factor development, and it's that
- 10 adjustment for nonrecurring that doesn't apply to the
- 11 right-to-use fees.
- 12 Q. And why doesn't it apply?
- 13 A. It's limited -- let's see. I can't -- I
- 14 can't speak precisely to that.
- 15 Q. On page 10, line 7, you indicate that you
- 16 discovered an error that results in a slight
- 17 overstatement of maintenance costs; is that correct?
- 18 A. Yes, that's correct.
- 19 Q. And you provide a schedule that breaks out
- 20 the specific impact of that error; is that right?
- 21 A. Yes, that's correct.
- Q. And is that just a matter of multiplying
- 23 those percentages to adjust for it, or is it more
- 24 complicated than that to eliminate that error?
- 25 A. Well, to eliminate the error -- well, to

- 1 eliminate the error would be to adjust the maintenance
- 2 factors and then -- and the maintenance factors are
- 3 applied in each and every cost study that's at issue.
- 4 So I'm simply identifying the magnitude of this error
- 5 on the overall annual charge factor and showing that
- 6 it's fairly small.
- 7 Q. But can you just adjust the annual charge
- 8 factor by those percentages to effectively eliminate
- 9 the error, or do you have to do something different?
- 10 A. You would adjust the annual charge factor
- 11 and then have to run those through -- all of the cost
- 12 studies through the models to have that correction
- 13 apply to the end resulting costs.
- 14 Q. Are you able to estimate today the actual
- 15 impact on the final resulting costs of this on average
- 16 1.68 percent error?
- 17 A. It would be the resulting -- I believe the
- 18 result on the cost would parallel the change to the
- 19 factor.
- 20 Q. So then you could just multiply that
- 21 percentage?
- 22 A. That -- we would have to get -- you might
- 23 get a slightly different variation of that, but I
- 24 think it would be something very close to
- 25 1.68 percent.

- 1 Q. In your Rebuttal Testimony, page 4, I
- 2 recognize the number is highly confidential, but
- 3 you're discussing your current shared and common cost
- 4 factor; is that right?
- 5 A. Yes, that's correct.
- 6 Q. And is this the same figure that you've
- 7 proposed in both the 438 and the 455 cases?
- 8 A. It's -- well, there are two factors listed
- 9 there.
- 10 Q. I'm talking about the current one as opposed
- 11 to what you're labeling the previous one.
- 12 A. The current one is what Southwestern Bell
- 13 proposed in the 438 docket. It is not the one that
- 14 Southwestern Bell proposed in 455.
- 15 Q. That was the first time that that was put
- 16 forth; is that correct?
- 17 A. The 438 docket was the first time
- 18 Southwestern Bell advanced this number, yes.
- 19 MR. LUMLEY: All right. That's all of my
- 20 questions, your Honor.
- JUDGE RUTH: Staff?
- MR. BATES: Thank you, your Honor.
- 23 CROSS-EXAMINATION BY MR. BATES:
- Q. Good afternoon, Mr. Makarewicz.
- 25 A. Good afternoon, Mr. Bates.

- 1 Q. I just have a few questions.
- 2 Referring to your Direct Testimony,
- 3 particularly that which is contained between pages 7
- 4 and 10, could you please identify for the record the
- 5 data year for Southwestern Bell's proposed maintenance
- 6 factors?
- 7 A. It would be 2000, year 2000.
- 8 Q. Year 2000. Would you agree that all of
- 9 these -- that although these factors are based on
- 10 actual 2000 -- year 2000 data, they reflect a
- 11 forward-looking network because they are applied to a
- 12 forward-looking investment?
- 13 A. That's true. In the actual studies
- 14 themselves, they are applied to the investments
- 15 derived from the cost models, the switching model or
- 16 the loop model. Those are all forward-looking
- 17 investments.
- 18 Q. Is it possible that savings associated with
- 19 the Project Pronto upgrade could begin to reduce
- 20 Southwestern Bell's maintenance expenses over the next
- 21 several years?
- 22 A. Yes. And we do, in fact, take that into
- 23 account in the loop study. And this goes back to a
- 24 discussion that Mr. Turner was making earlier, and I
- 25 think it was a misunderstanding.

- 1 For -- we developed a number of maintenance
- 2 factors, but there are two at issue that might help if
- 3 I clarified more. There is a maintenance factor for
- 4 cable facilities, loop facilities, for copper and a
- 5 separate maintenance factor for fiber. For Missouri,
- 6 the maintenance factor on fiber is significantly
- 7 lower than that of the maintenance factor for
- 8 copper.
- 9 Now, the loop cost study projects a forward-
- 10 looking loop network which models out a much higher
- 11 incidents of fiber in the -- in the feeder than
- 12 currently exists in the embedded network. And
- 13 wherever there is fiber in the loop study, what's
- 14 applied to that to capture the maintenance cost is the
- 15 fiber maintenance factor, which is, again, lower than
- 16 that of copper.
- 17 So to the extent that Pronto is about
- 18 pushing the use of fiber much deeper into
- 19 Southwestern Bell's loop network, we would capture
- 20 the lower maintenance cost associated with that by
- 21 applying the fiber maintenance factor which is
- 22 lower than that of copper. So I believe that we
- 23 do -- the loop cost study does reflect many of the
- 24 maintenance cost savings that are associated with
- 25 Project Pronto.

- 1 MR. BATES: Thank you very much.
 2 JUDGE RUTH: Questions from the Bench.
- 3 Commissioner Murray, do you have any?
- 4 COMMISSIONER MURRAY: I have none. Thank
- 5 you.
- 6 JUDGE RUTH: Commissioner Gaw?
- 7 COMMISSIONER GAW: None. Thank you.
- JUDGE RUTH: Redirect?
- 9 MR. KRIDNER: Your Honor, I would have no
- 10 redirect for this witness, and I would ask, as the
- 11 previous witnesses, that he be excused at the earliest
- 12 possible time.
- 13 JUDGE RUTH: My answer will be the same
- 14 then. We'll continue to address that.
- Thank you. You may step down.
- 16 THE WITNESS: Thank you.
- JUDGE RUTH: We will move along to
- 18 Southwestern Bell's next witness.
- 19 MR. KRIDNER: Yes, your Honor. We would
- 20 call Mr. Barch.
- 21 (Witness sworn.)
- JUDGE RUTH: Thank you.
- 23 Please be seated.
- You may proceed.
- MR. KRIDNER: With your permission.

ASSOCIATED COURT REPORTERS, INC. (573)S636-7551 JEFFERSONOCITY,,MON65101

- 1 DAVID J. BARCH testified as follows:
- 2 DIRECT EXAMINATION BY MR. KRIDNER:
- 3 Q. Would you please state your name?
- 4 A. My name is David J. Barch, B-a-r-c-h.
- 5 Q. And by whom are you employed, Mr. Barch?
- 6 A. I'm employed by SBC Telecommunications,
- 7 Incorporated.
- 8 Q. And are you the same David Barch who has
- 9 caused to be filed as Direct Testimony Exhibit 8NP for
- 10 the public version and Exhibit 8HC for the
- 11 confidential version?
- 12 A. Yes.
- 13 Q. And did you also cause to be filed
- 14 exhibits -- as your Rebuttal Testimony Exhibit 9NP for
- 15 the public version and Exhibit 9HC for the highly
- 16 confidential version?
- 17 A. Yes.
- 18 Q. Do you have any changes let me ask you first
- 19 to Exhibit 8 at this time, the Direct Testimony?
- 20 A. Yes, I do. I have three for my Direct, the
- 21 first of which begins on page 5. At line 7 the
- 22 section labeled "F, Service Orders," should be labeled
- 23 "F, Miscellaneous."
- Q. Now, that's the section title?
- 25 A. Yes, it is.

- 1 The second correction is schedule A-2 of my
- 2 direct. Under the overview of the two-wire analog
- 3 trunk port (DID) study, under the section "Service
- 4 Description," the second line, the word "hunk" should
- 5 be changed to "trunk," t-r-u-n-k.
- 6 Q. So it refers to trunk studies instead of
- 7 hunk studies?
- 8 A. That is correct.
- 9 Q. And the third correction?
- 10 A. The third and final change is schedule B1 of
- 11 my Direct. Under the overview for the STP port study,
- 12 under the nonrecurring elements section, under the
- 13 element STP port termination per port connect, the
- 14 second sentence "Included are A-link translations and
- 15 testing activities" should be the only sentence,
- 16 meaning that the words "as well as exchange carrier
- 17 relations (ECR) work activities" should be removed.
- 18 MR. KRIDNER: And, your Honor, may the
- 19 witness make these changes to the record copy?
- JUDGE RUTH: Yes.
- 21 BY MR. KRIDNER:
- 22 Q. If you would do so, Mr. Barch.
- 23 A. I have done so.
- Q. Thank you.
- 25 Do you have any changes to your Rebuttal

- 1 Testimony, Exhibit 9?
- 2 A. No, I do not.
- 3 Q. Now, if I asked you the same questions
- 4 today, would your answers be the same?
- 5 A. Yes, they would.
- 6 Q. And are the answers true and correct to the
- 7 best of your knowledge, information, and belief? And
- 8 both the previous question and this question are for
- 9 both Exhibits 8 and 9.
- 10 A. Yes, they are.
- 11 MR. KRIDNER: Your Honor, at this time,
- 12 Southwestern Bell offers Exhibits 8NP and 8HC as the
- 13 direct confidential -- I'm sorry -- first the public
- 14 and then the highly confidential versions of
- 15 Mr. Barch's Direct Testimony, and Exhibits 9NP and 9HC
- 16 as the public version and the highly confidential
- 17 version of Mr. Barch's Rebuttal Testimony.
- JUDGE RUTH: Okay. First, Mr. Barch's
- 19 Direct Testimony, 8NP and 8HC. Are there any
- 20 objections?
- 21 (No response.)
- 22 JUDGE RUTH: Okay. Those two documents are
- 23 received into the record.
- 24 (EXHIBIT NOS. 8NP AND 8HC WERE RECEIVED INTO
- 25 EVIDENCE.)

- JUDGE RUTH: 9NP and 9HC are Mr. Barch's
- 2 Rebuttal Testimony. Any objections?
- 3 (No response.)
- 4 JUDGE RUTH: Seeing no objections, these two
- 5 are also admitted into the record.
- 6 (EXHIBIT NOS. 9NP AND 9HC WERE RECEIVED INTO
- 7 EVIDENCE.)
- 8 MR. KRIDNER: Thank you, your Honor.
- 9 At this time we offer Mr. Barch for
- 10 cross-examination.
- 11 CROSS-EXAMINATION BY MR. LUMLEY:
- 12 Q. Okay. First to your Direct Testimony.
- 13 Starting at page 4 and carrying on to page 5, you list
- 14 the various studies that you're addressing; is that
- 15 correct?
- 16 A. That's correct.
- 17 Q. And does this list include studies that
- 18 Mr. Makarewicz originally sponsored in the 438 case
- 19 and you ultimately adopted his testimony in that
- 20 regard in that case?
- 21 A. Yes, it does. Of these 37 studies there are
- 22 20 such that would fit that description.
- Q. Could you identify those 20?
- 24 A. Yes.
- Q. If you use the schedule, that's probably the

- 1 easiest way.
- 2 A. Yes, I'll do that. A-3, A-5, A-10, A-11,
- 3 B-1 through B-7, C-1 through C-4, and E-1 through E-5.
- 4 Q. On page 6 you talk about on line 16
- 5 subsequent updates incorporated in 2001. Are those
- 6 updates that were already submitted in the 438 case or
- 7 is that a subsequent change?
- 8 A. I'm not sponsoring those -- those studies
- 9 specifically with regards to the loop and
- 10 cross-connect, so I do not know the specific updates
- 11 that were incorporated.
- 12 Q. What about farther down in line 20, the same
- 13 reference to updates in 2001. Are those updates that
- 14 are at issue in the 438 case?
- 15 A. They may or may not be, but I think that
- 16 would be a more appropriate question for the cost
- 17 witness sponsoring those.
- Q. On page 7 you indicate on line 5, "...due to
- 19 the strict time schedule and comprehensive nature of
- 20 the instant proceeding, SWBT did not have sufficient
- 21 time to update most of the remaining studies"; is that
- 22 correct?
- 23 A. That's what I state in my Direct for those
- 24 studies that were not updated.
- Q. And then you go on and talk about local and

- 1 tandem switching studies and indicate that these are
- 2 the same studies that were submitted in the TO-97-40
- 3 docket, the first interconnection arbitration in this
- 4 state; is that correct?
- 5 A. That's correct. The studies we are
- 6 sponsoring in this proceeding are those original 97-40
- 7 studies.
- 8 Q. And those are in the format as originally
- 9 filed by your company and they do not include
- 10 adjustments made by the Commission in that case?
- 11 A. That is correct.
- 12 Q. On page 13, line 11, you talk about a local
- 13 switching cost decrease of 14.5 percent?
- 14 A. Yes. I see where you're at.
- 15 Q. And then further down on line 17 you talk
- 16 about a tandem switching cost decrease of 3.6 percent?
- 17 A. Yes.
- 18 Q. And those decreases are not reflected in the
- 19 studies that you're submitting; is that correct?
- 20 A. The resulting calculations incorporating
- 21 such percentages are not reflected in the results of
- 22 the study, but what I'm trying to convey at least in
- 23 this portion of my testimony is saying that those
- 24 adjustments that the Commission ordered in 97-40 that
- 25 we believe are reasonable would result in such

- 1 amounts.
- 2 Q. And are those adjustments reflected in the
- 3 rates that Southwestern Bell has put forth for
- 4 switching in this case?
- 5 A. No, they are not.
- 6 Q. Similarly, on page 15, line 20, you discuss
- 7 a reduction in analog line side port cost (recurring
- 8 only) of 8.3 percent.
- 9 A. Yes.
- 10 Q. And is that reflected in the studies or in
- 11 the rates put forth by your company in this case?
- 12 A. No. This is similar to the local and tandem
- 13 switching.
- 14 MR. LUMLEY: That's all of my questions,
- 15 your Honor.
- 16 JUDGE RUTH: I'm sorry. You said that's all
- of your questions?
- MR. LUMLEY: Yes.
- 19 JUDGE RUTH: Staff?
- 20 MR. BATES: Thank you.
- 21 CROSS-EXAMINATION BY MR. BATES:
- Q. Good afternoon.
- 23 A. Good afternoon.
- Q. I'll try and be brief here.
- 25 Is -- in your opinion, is Southwestern

- 1 Bell's proposed rate structure for local switching
- 2 consistent with your understanding of TELRIC?
- 3 A. Yes, it is.
- 4 Q. And how is it consistent in your opinion?
- 5 A. It's consistent inasmuch as our
- 6 understanding of TELRIC includes not only a flat rate
- 7 port cost but also a minute of use cost. That is how
- 8 Southwestern Bell Telephone incurs switching costs.
- 9 Mr. Turner earlier on the stand a couple of
- 10 times and as well in his prefiled testimony mentions
- 11 that Southwestern Bell may be receiving pricing that
- is on a port-only basis, but it's a non sequitur to
- 13 say that Southwestern Bell does not incur any CCS or
- 14 usage-related switching costs in discussions between
- 15 our -- I'm sure our procurement group as well as our
- 16 switching venders. The engineering specifications of
- 17 CCS are very instrumental in those, and the bottom
- 18 line is if Southwestern Bell were to incur more usage,
- 19 our switching pricing from our venders would certainly
- 20 go up.
- 21 Q. You say it's a non sequitur. Do you have
- 22 anything else to add to explain that other than what
- 23 you just said?
- 24 A. Well, most of my Rebuttal Testimony at least
- 25 through page 10 provides justification as to why

- 1 Southwestern Bell incurs the cost of capacity in a
- 2 switch which is that portion of the switch beyond the
- 3 termination or the port.
- 4 Q. And why do you think it also includes minute
- 5 of use?
- 6 A. The capacity beyond the port is measured in
- 7 centum call seconds which is a time-based standard of
- 8 measurement. A minute of use is a fair bridge also
- 9 being a time of measurement to express that cost.
- 10 Q. Do I understand from what you're saying that
- 11 you think that WorldCom does not accept that, the
- 12 minute of use?
- 13 A. My understanding of WorldCom's position with
- 14 regards to DPL 11 with respect to the cost components
- of that is that Southwestern Bell incurs no
- 16 incremental cost for usage, or if it does, it's to no
- 17 effect and it ought to be costing it on a flat-rated
- 18 port basis.
- 19 Q. And you disagree with that position for the
- 20 reasons that you've already stated here?
- 21 A. Yes, I do.
- MR. BATES: Thank you very much.
- 23 JUDGE RUTH: Commissioner Murray, do you
- 24 have any questions?
- 25 COMMISSIONER MURRAY: No questions.

- 1 JUDGE RUTH: Commissioner Gaw?
- 2 COMMISSIONER GAW: No.
- JUDGE RUTH: Redirect?
- 4 MR. KRIDNER: Yes, your Honor. If I could
- 5 have one moment.
- 6 MR. KRIDNER: With your permission, your
- 7 Honor.
- JUDGE RUTH: Please proceed.
- 9 REDIRECT EXAMINATION BY MR. KRIDNER:
- 10 Q. Mr. Barch, you were asked by Mr. Bates
- 11 several questions concerning the switching costs. Do
- 12 you recall those questions?
- 13 A. Yes.
- Q. Could you please elaborate on how the -- the
- 15 usage on a switch affects the cost that Southwestern
- 16 Bell incurs with respect to the prices it pays for its
- 17 switches to the venders?
- 18 A. To the degree I can. It's my understanding
- 19 that Southwestern Bell receives vender pricing to some
- 20 extent on a flat rate port basis, if you will. That's
- 21 kind of the outward view, but it's certainly not based
- 22 solely on that. It's a very simplified form of
- 23 pricing that incorporates many things, one of which is
- 24 CCS.
- 25 It's my understanding there are a number of

- 1 engineering specifics, capacities, thresholds, in our
- 2 contracts with our venders that need to be met either
- 3 at the beginning or monitored throughout, which is an
- 4 indication of usage cost.
- 5 Q. And what does CCS refer to?
- 6 A. CCS, my understanding is that it's centum
- 7 call seconds, or 100 call seconds.
- 8 Q. And would you agree that -- well, what would
- 9 be the maximum call seconds that you could have? Do
- 10 you know?
- 11 A. In a busy hour, that would be 36 CCS, or
- 12 3,600 --
- 13 Q. And would -- I'm sorry.
- 14 A. -- or 3,600 seconds.
- 15 Q. Would that be the equivalent of a switch
- 16 being fully in use so that it's 100 percent full?
- 17 A. That's the theoretical hypothetical maximum.
- 18 The engineering maximum would probably be something
- 19 much less than that.
- 20 Q. Okay. Now, with respect to the usage placed
- 21 on a switch by the various callers, how does that
- 22 drive CCS?
- 23 A. Well, the more minutes of use sent to a
- 24 switch, the more capacity that is required.
- 25 Southwestern Bell has undertaken and it incurs jobs

- 1 above and beyond the basic deployment of a switch to
- 2 add capacity to a switch as that usage increases, and
- 3 not only that, but there are several instances of
- 4 switches that have declining port or line usage but
- 5 have increasing CCS usage.
- 6 Q. Okay. And is it your understanding that
- 7 CCS -- as CCS increases on a switch under the current
- 8 or forward-looking contracts that Southwestern Bell
- 9 could pay more to the switch venders?
- 10 A. Absolutely.
- 11 Q. Are you familiar with the Commission's First
- 12 Report and Order in 96-98?
- 13 A. From a reference standpoint, yes.
- Q. Okay. Do you happen to have a copy of that
- 15 order with you?
- 16 A. Not in its totality, but I have several
- 17 portions with me.
- 18 Q. Do you have the section in the -- that
- 19 includes paragraph 810?
- 20 A. Yes, I do.
- 21 Q. Okay. Would you review that paragraph to
- 22 yourself for just a moment?
- 23 A. All right.
- Q. Now, in that paragraph of the First Report
- 25 and Order, how does the FCC state that the switch

- 1 charges, the charge for the switching matrix and for
- 2 trunk ports, should be recovered?
- 3 A. Well, what they find -- and this is
- 4 something I do state in my Rebuttal -- is that there
- 5 is an insufficient basis to conclude a requirement for
- 6 two flat rates for unbundled local switching, and
- 7 those two flat rates would be for line ports as well
- 8 as for the matrix.
- 9 Q. Okay. Does the FCC recognize the use of
- 10 per-minute-of-use charges for the switch matrix?
- 11 A. Yes.
- 12 Q. Okay. Do you also happen to have a copy of
- the FCC rules, specifically 51.509(B)?
- 14 A. No, I do not.
- 15 MR. KRIDNER: Your Honor, may I approach the
- 16 witness?
- 17 JUDGE RUTH: Yes.
- 18 BY MR. KRIDNER:
- 19 Q. Mr. Barch, what does the rule I just cited,
- 20 51.509(B), provide with respect to recovery of the
- 21 cost associated with the switch matrix?
- 22 A. It states, Local switching -- local
- 23 switching costs shall be recovered through a
- 24 combination of a flat-rated charge for line ports and
- one or more flat-rated or per-minute usage charges for

- 1 the switching matrix and for trunk ports.
- Q. And is it a fair conclusion, then, that the
- 3 FCC rules permit recovery of switching on a
- 4 per-minute-of-use basis?
- 5 A. Yes, it is.
- 6 MR. KRIDNER: Your Honor, I have no further
- 7 questions for this witness.
- 8 And I would also ask that this witness be
- 9 excused at such time as is earliest available.
- 10 JUDGE RUTH: Okay. Thank you.
- I think what we're going to do, then, is
- 12 take a short ten-minute break so I can confer with the
- 13 Commissioners on a few elements. We will come back on
- 14 the record at 4:32.
- 15 (A recess was taken.)
- 16 JUDGE RUTH: Let's go back on the record,
- 17 please.
- 18 First, I want to address the requests that
- 19 the witnesses that have testified so far be excused.
- 20 That would be Turner, Avera, Naughton, Cass,
- 21 Makarewicz, and Barch.
- 22 At this point the Commission is unwilling to
- 23 excuse those witnesses, but they will take up that
- 24 question again tomorrow, probably not first thing, but
- 25 tomorrow. At this point, those witnesses need to come

- 1 back tomorrow.
- 2 MR. LANE: What time do you think tomorrow
- 3 you might be able to address that, your Honor?
- 4 JUDGE RUTH: It depends on when the
- 5 Commissioners in question have had a chance to decide
- 6 if they have any more questions, and then it also
- 7 could be dependent on whether or not there is a Motion
- 8 for Reconsideration filed, as we discussed earlier.
- 9 We're going -- which if there is a Motion for
- 10 Reconsideration filed, it would be done first thing,
- 11 and then hopefully by noon would be taken care of and
- 12 the Commissioners would know if they have any further
- 13 questions.
- MR. LANE: Okay.
- JUDGE RUTH: Then the Commissioners have
- 16 also discussed asking the counsel a few questions, and
- 17 what we're going to do is give the Commissioners an
- 18 opportunity to state what some of their questions are,
- 19 and counsel perhaps can leave here tonight, think
- 20 about them, and actually answer tomorrow first thing
- 21 on the record. And it's my understanding these
- 22 questions have to do with perhaps the big picture or
- 23 the scope of the case.
- 24 And I'll let Commissioner Murray start.
- 25 COMMISSIONER MURRAY: I'm going to attempt

- 1 to articulate a couple of things that I would like
- 2 counsel to be thinking about in terms of whether this
- 3 could be presented to us in a way that could help
- 4 clarify specifically how many issues could we
- 5 eliminate if we decided a couple of basic things.
- 6 First of all, of the unresolved issues, how
- 7 many of those issues would be resolved if we made the
- 8 determination that any provision of the M2A can only
- 9 be adopted in combination with what the M2A itself
- 10 called legitimately related provisions and whether
- 11 there are credible arguments that any or all of the
- 12 provisions that were termed in the M2A to be
- 13 legitimately related provisions are not so?
- 14 And if the answer to that question is yes,
- is that true for all or for only some of those
- 16 provisions that were termed legitimately related?
- 17 And if the -- if the Commission were to
- 18 decide in this case that WorldCom could opt into the
- 19 prices and/or terms and conditions that are set in
- 20 438, since 438 was a spinoff of the M2A, wouldn't that
- 21 result in WorldCom having to take all of the
- 22 legitimately related provisions to those UNEs set in
- 23 Case No. 438?
- 24 And this is -- I'm trying to articulate
- 25 these questions because it seems that we really need

- 1 to narrow the issues, and if the answer to those
- 2 questions results in a narrowing of the issues, I
- 3 would like to know it earlier rather than later in
- 4 this proceeding.
- 5 Thank you, Judge.
- 6 JUDGE RUTH: Commissioner Gaw?
- 7 COMMISSIONER GAW: If I could just follow up
- 8 with what Commissioner Murray was requesting, it would
- 9 be very helpful to have a better sense of the parties'
- 10 arguments on how the reasonably or legitimately
- 11 related provision applies to the issues in front of us
- 12 so that -- so that we have a sense -- and perhaps --
- 13 perhaps that can be drawn to -- our attention can be
- 14 drawn to the portion of the record that reflects that
- 15 if it's already contained in the prefiled testimony,
- 16 in particular, how that issue relates to the resetting
- 17 of cost for rate elements, excuse me, in any one
- 18 particular provision without changing other
- 19 provisions? And I'm not necessarily talking about in
- 20 different paragraphs but in some cases within the same
- 21 paragraph.
- 22 I'm also interested in knowing whether the
- 23 parties believe there is a distinction that is
- 24 substantive between deferring a decision on those
- 25 elements -- cost elements that are contained in 438

- 1 and setting rates that are based on costs that have
- 2 previously been set by this Commission in the M2A or
- 3 in other cases with a provision that at the conclusion
- 4 of 438 WorldCom could automatically opt into those new
- 5 rates and whether there is a distinction between those
- 6 two -- those two approaches. And that may not be
- 7 clear.
- 8 MR. LANE: Could you restate that? It
- 9 wasn't clear to me. Sorry.
- 10 COMMISSIONER GAW: What I'm getting at --
- 11 I'm not sure that there is a distinction, but what I'm
- 12 getting at is whether or not if this Commission were
- 13 to say we're deferring those cost elements, or
- 14 those -- to the 438 case, whether that's different
- 15 than saying we are going to go ahead and set rates
- 16 based upon determinations of this Commission in other
- 17 cases but allowing WorldCom to opt into new prices at
- 18 the conclusion of 438 in this arbitrated agreement. I
- 19 hate using the word "arbitrated agreement," but did
- 20 that help?
- MR. LANE: Yes. Thank you.
- 22 COMMISSIONER GAW: And, again, that --
- 23 that -- to make full circle, that again raises the
- 24 question of how the provisions in the M2A that refer
- 25 to, as Commissioner Murray said, legitimately related

- 1 matters would raise its head.
- 2 Again, if that latter -- that latter
- 3 statement that I made in regard to allowing the opt-in
- 4 into new prices would have an impact on -- on the just
- 5 carte blanche idea that there could be some capturing
- 6 of new costs of 438 without further exploration, if
- 7 I'm making -- if I'm making sense on that.
- 8 I'm looking for assistance from counsel in
- 9 discussing those issues and whether or not they are
- 10 even issues of concern. I hope that helps.
- 11 And I think that's all I have right now, but
- 12 maybe in the morning I may have a couple of other
- 13 questions.
- 14 JUDGE RUTH: And somewhat related to this,
- 15 the Commission had issued an order directing a filing
- on the 9th where Staff complied on January 11th, and
- 17 the Commission had directed that responses to that be
- 18 filed within two business days, which would be
- 19 tomorrow.
- 20 I'm going to request that they not only be
- 21 filed tomorrow, but first thing tomorrow by 8:30 so
- 22 that the Commissioners would have that available. I
- 23 would appreciate an electronic copy of any response.
- 24 And when you're reviewing Staff's response,
- 25 I'd like you to pay particular attention on page 3

- 1 there's a couple of paragraphs, one begins "Therefore,
- 2 according to attachment 26, WCOM must accept all
- 3 legitimately related provisions into which CLECs MFN
- 4 under section 252(I)," and that continues on down
- 5 through the page.
- 6 You know, address everything that you want
- 7 in your response, but be sure and address whether or
- 8 not you agree with Staff's statements in these two
- 9 paragraphs and perhaps clarify your understanding what
- 10 the correct answer is.
- 11 Any questions from the parties on what the
- 12 Commission expects in this area?
- 13 (No response.)
- 14 JUDGE RUTH: The responses to Staff's filing
- 15 were directed to be in writing. You can also mention
- 16 whatever you put in there in your oral discussion to
- 17 the Commissioners, but go ahead and file that in
- 18 writing, please.
- 19 COMMISSIONER GAW: I may have one more
- 20 thing.
- 21 I think it might be helpful to me, although
- 22 there was some discussion in testimony today, and I
- 23 realize that the parties have stated, and correctly
- 24 so, that there -- this issue has been visited in the
- 25 past, but the issue of the timing on this arbitration,

- 1 there evidently is a -- continues to be discussion
- 2 about whether or not this case in total has to be
- 3 concluded by a certain time, and I want to understand
- 4 from the attorneys their positions regarding how that
- 5 time frame that's set forth in the Federal Act impacts
- 6 our decision regarding the cost elements in this case
- 7 and the determination of rates from that.
- 8 That's it. Thanks.
- 9 JUDGE RUTH: I wanted to ask one more
- 10 question. It overlaps, but I just want to make sure
- 11 that you understand to address this too.
- 12 Some of the witnesses today said that the
- 13 Commission was not going to have enough information to
- 14 make a decision on certain elements when we came out
- 15 of here. I'd like to ask again to clarify which
- 16 issues would the Commission have enough information if
- 17 we were to allow all of the 438 information in? In
- 18 other words, which ones will we not have enough
- 19 information now but if the Commission had made a
- 20 different decision on the 438 issue, what then would
- 21 we have had enough on?
- Okay. Is that it, Commissioners?
- 23 COMMISSIONER MURRAY: I think so. Thank
- 24 you.
- 25 COMMISSIONER GAW: I think so.

- 1 JUDGE RUTH: We're off the record for today.
- 2 (A discussion was held off the record.)
- JUDGE RUTH: I need to clarify that the only
- 4 thing that has to be in writing was the prior
- 5 requirement that the parties -- if you have a response
- 6 to Staff's filing of January 11th, that needs to be in
- 7 writing. That was previously ordered by the
- 8 Commission last week. That still needs to be in
- 9 writing. That's not changed.
- 10 The only thing that's changed is the
- 11 Commissioners want to hear some oral argument on these
- 12 other issues. That stuff does not have to be prepared
- 13 in writing for tomorrow. And if for whatever reason
- 14 the parties have already prepared your response to
- 15 this document and you did not include what I asked you
- 16 to include, a specific response to those paragraphs on
- 17 page 3, I'll let you supplement that orally if you've
- 18 already taken care of that document and don't want to
- 19 change it. Okay?
- Thank you.
- 21 Back off the record.
- 22 (EXHIBIT NOS. 48 AND 49 WERE MARKED FOR
- 23 IDENTIFICATION.)
- 24 WHEREUPON, the hearing of this case was
- continued to 8:30 a.m., Tuesday, January 15, 2002.
