### APPENDIX CUSTOMIZED ROUTING-RESALE

### 1.0 <u>Customized Routing of IP Communications Corporation Directory Assistance,</u> Operator Services, and/or local calls

- 1.1 Where IP Communications Corporation purchases Unbundled Local Switching or Resale and elects to provide Directory Assistance and Operator Services to its customers through its own Directory Assistance and Operator Services platforms, SWBT will provide the functionality and features required to route calls from IP Communications Corporation customers for Directory Assistance and Operator Services to IP Communications Corporation designated trunks for the provision of IP Communications Corporation Directory Assistance and Operator Services, in accordance with this Attachment.
- 1.2 SWBT intends to use AIN Customized Routing wherever it is available for use, if the customized routing so provided meets the requirements of the Act. Customized routing through AIN technology will be available by December 31, 1997, subject to the limitations described in 1.3 below. Unless the Parties agree to a different schedule, SWBT will fulfill orders for particular customized routing arrangements using AIN within 30 work days following receipt from IP Communications Corporation of a completed customized routing end office order and acceptance of SWBT's price proposal developed on an individual case basis (ICB), consistent with 1.2.1 of this attachment, but in no event prior to the first work day of 1998. The customized routing end office order will detail the identity of the end office(s), the class(es) of call to be customized routed (i.e. operator services and directory assistance) and the trunk group(s) to which each class of call will be connected. SWBT will provide a price proposal no later than 10 days after receipt of the customized routing end office order.
- 1.2.1 Pending Missouri Public Service Commission approval of the rates for customized routing, IP Communications Corporation will pay for customized routing on an interim basis at SWBT's proposed rates subject to true-up. When the Commission orders final cost based rates, should those rates differ from the interim rates, parties will remit the difference between the amount paid and the final rate within a reasonable period. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties.
- 1.3 Certain services (e.g. hotel/motel, coin services which require network provided coin signaling, ports using voice activated dialing in a 5ESS switch) cannot be customized routed through AIN technology and will require the use of line class codes for the provision of customized routing. Additionally, switches which are not SS7 compatible (i.e. DMS 10 switches) cannot customize route using AIN technology and will require the

000224

use of line class codes. SWBT will fulfill orders for particular customized routing arrangements using line class codes within 30 work days following receipt from IP Communications Corporation of a completed customized routing line class code order and acceptance of SWBT's price proposal developed on an individual case basis (ICB), consistent with Section 1.2.1 of this attachment. The customized routing line class code order will detail the identity of the end office, the class of call to be customized routed (i.e. operator services or directory assistance), the trunk group(s) to which each class of call will be connected and such other information as is reasonably required to complete the order. SWBT will provide the price proposal not longer than 10 days after receipt of the customized routing order.

- 1.4 SWBT will make available to IP Communications Corporation the ability to route all Directory Assistance and Operator Services calls (1+411, 0+411, 0-, and 0+ Local, 0+intraLATA toll, 0+HNPA-555-1212 (intraLATA), 1+HNPA-555-1212 (intraLATA)) dialed by IP Communications Corporation Customers directly to the IP Communications Corporation Directory Assistance and Operator Services platform. If the State Commission rules or the parties agree that IP Communications Corporation is entitled to intraLATA toll on resale services and unbundled switch elements, SWBT agrees to customized routing of the following types of calls: 0+IntraLATA toll, 0+HNPA-555-1212 (intraLATA), 1+HNPA-555-1212 (intraLATA).
- SWBT does not currently have the ability to translate 1+411 to another number or the 1.5 ability to change signaling associated with the custom routed call type. Communications Corporation's request, SWBT will attempt to develop a suitable method of providing the necessary digit translation and signaling protocol conversion to allow conversion of 1+411 directory assistance calls to a 1+900+XXX+XXXX format in order to provide customized routing of directory assistance calls to a destination selected by IP Communications Corporation. At the time of IP Communications Corporation's request, SWBT and IP Communications Corporation shall agree upon the technical description of the process to be designed, the necessary operational parameters, the necessary billing system parameters, an estimated time for the design of the process, and the estimated costs of designing the process. Upon the completion of the design phase of the project, an operational trial shall be conducted to determine the feasibility of implementation of the new system in the SWBT network. IP Communications Corporation's obligation to pay for the development of the system shall not be conditioned upon the success of the development of a workable system. By insertion of this clause, SWBT does not agree that it has an obligation under the FTA96 to provide this service.
- 1.6 At IP Communications Corporation's request, SWBT will provide functionality and features within its local switch to route IP Communications Corporation customer-dialed Directory Assistance local calls to the designated trunks via signaling as defined in the

Operator Services Systems Generic Requirements FR-NWT.00271 Signaling Module TRNWT-001.144.signaling from SWBT's switches for direct dialed Directory Assistance calls.

- 1.7 SWBT will provide the functionality and features within its local switch to route IP Communications Corporation dialed 0/0+ local and intraLATA calls prior to dual PIC to IP Communications Corporation. (Designated trunks via operator services modified Feature Group C signaling.)
- 1.8 After implementation of dual PIC, SWBT will route IntraLATA Toll calls (as defined by the exchange dialing plan (via the commission mandated dual PIC method (when implemented) when IP Communications Corporation uses Local Switching elements or resold services. SWBT will route InterLATA calls (as defined by the exchange dialing plan (via the existing PIC process when IP Communications Corporation uses Local Switching elements.
- 1.9 The Parties agree that, in the event of an emergency wherein an IP Communications Corporation customer must reach a non-IP Communications Corporation customer that has a non-published telephone number, the IP Communications Corporation operator will contact SWBT's operator and request the assistance of a supervisor to the extent done by SWBT's operators.
- 1.10 SWBT will forward with Directory Assistance and Operator Services calls from IP Communications Corporation customers the appropriate line data required by IP Communications Corporation to identify the type of line for the purposes of call handling and recording.
- 1.11 Customized routing capabilities described herein will permit IP Communications Corporation customers to dial the same telephone numbers for IP Communications Corporation Directory Assistance and Operator Services that similarly-situated SWBT customers dial for reaching equivalent SWBT services.
- 1.12 SWBT, no later than five (5) days after the date IP Communications Corporation requests the same, will provide on a one time basis to IP Communications Corporation the emergency public agency (e.g., police, fire, ambulance) telephone numbers used by SWBT in each NPA-NXX. Such data will be transmitted via paper copies of all SWBT emergency listings reference documents from all SWBT's Operator Services offices. IP Communications Corporation agrees to indemnify and hold SWBT harmless from all claims, demands, suits or actions by third parties against SWBT, or jointly against IP Communications Corporation and SWBT, arising out of its provision of such information to IP Communications Corporation.

Interrupt (BLV/EI). Such access will be performed by the SWBT operator upon receipt of a request from an IP Communications Corporation operator. SWBT will meet the same performance results for IP Communications Corporation customer requests as it does for SWBT customer requests and will size the trunk groups required to perform this function in accordance with the volume demands. SWBT will provide to IP Communications Corporation performance reports for the BLV/EI access and success rates on a quarterly basis for the next 12 months from the date of Agreement or as mutually agreed to between the Parties. IP Communications Corporation acknowledges that SWBT will not be able to separate IP Communications Corporation and SWBT results.

### 2.0 Blocking/Screening

- 2.1 SWBT will provide to IP Communications Corporation the functionality of blocking calls (e.g., 900, international calls (IDDD) and toll calls) by line or trunk to the extent that SWBT provides such blocking capabilities to its customers and to the extent required by law. In those end offices where AIN is deployed, there will be no additional charge for blocking/screening for the above listed standard blocking/screening capabilities.
- 2.2 When an AIN customized routing is not employed by IP Communications Corporation (e.g., DMS-10 switches, end user service with voice activated dial served out of a 5ESS switch, coin services where SWBT's network rather than the telephone provides the signaling, hotel/motel services, and certain CENTREX-like services with features that are incompatible with AIN), SWBT will provide blocking/screening via special line class codes on an ICB basis.

### 3.0 Related Services

3.1 SWBT will provide to IP Communications Corporation access to its node signaling network to accommodate queries for calling card validations in real time. Database queries will receive priority equal to that which SWBT provides to itself. Database queries will receive reliability, availability, and performance equal to that which SWBT provides to itself. SWBT's performance of the node signaling network and database responses must at a minimum meet industry standards. SWBT will support database access using TCAP messages routed via Signaling Transfer Points (STPs). SWBT will record usage information for LIDB queries. SWBT will use its Signaling Control Points (SCPs) as the source of usage data. SWBT will aggregate LIDB usage by query type and by originating point code.

### 4.0 Applicability of Other Rates, Terms and Conditions

4.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

### APPENDIX DA-RESALE

### SWBT-PROVIDED DIRECTORY ASSISTANCE SERVICE

This Appendix DA-Resale to Attachment 1: Resale sets forth the terms and conditions under which SWBT agrees to provide Directory Assistance Service (DA Service) for IP Communications Corporation, but only upon IP Communications Corporation's request therefor.

### 1.0 Service

- 1.1 DA Service consists of providing subscriber listing information (name, address, and published or Non-List telephone number or an indication of non-published status) to IP Communications Corporation's customers who call DA according to current SWBT methods and practices or as subsequently modified.
- 1.2 Directory Assistance Call Completion (DACC) service consists of SWBT completing a call to the requested number on behalf of IP Communications Corporation's end user, utilizing the Interactive Voice System (IVS) or having the operator complete the call. SWBT will provide DACC to IP Communications Corporation's customers for local and intrastate intraLATA calls. In the event and to the extent that SWBT provides DACC service to its own customers for interstate intraLATA calls, it will provide such service to IP Communications Corporation's customers.
- 1.3 SWBT agrees to provide DACC only in areas where SWBT can furnish Automatic Number Identification (ANI) from IP Communications Corporation's customers to SWBT's switch and where IP Communications Corporation obtains DA service from SWBT.
- **2.0 Definitions-** The following terms are defined as set forth below:
- 2.1 Non-List Number A Telephone number that, at the request of the telephone subscriber, is not published in a telephone directory, but is available by calling a SWBT DA Operator.
- 2.2 Non-Published Number A telephone number that, at the request of the telephone subscriber, is neither published in a telephone directory nor provided by a SWBT DA Operator.
- 2.3 Published Number A telephone number that is published in a telephone directory and is available upon request by calling a SWBT DA Operator.
- 2.4 IntraLATA Home NPA (HNPA) Where a LATA is comprised of one area code or Numbering Plan Area (NPA).

2.5 IntraLATA Foreign NPA (FNPA) - Where a single LATA includes two Numbering Plan Areas (NPAs). FNPA DA calls may be classified as interstate intraLATA or intrastate intraLATA DA calls.

### 3.0 Call Branding/Rate Reference

- 3.1 Call branding is the process by which an Operator, either live or recorded, will identify the operator service provider as being IP Communications Corporation. SWBT will offer Call Branding of Operator Services in the name of IP Communications Corporation. In the event that the phraseology for branding OS calls is the same phraseology for branding DA calls, only one charge will apply per initial loading or subsequent change. IP Communications Corporation will pay the charge as reflected in Appendix Pricing UNE-Schedule of Prices labeled Rate Per Initial Load or Rate Per Subsequent Changes to Brand and/or rate per call subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket number TO-97-40 or TO-98-115 (or a decision rendered the Missouri Commission by December 31, 1998 in a separate proceeding initiated by AT&T). In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties.
- Rate reference is the process by which an operator, either live or recorded, will quote IP 3.1.1 Communications Corporation's rates. When an IP Communications Corporation caller requests a quotation of rates, IP Communications Corporation will pay the applicable rates and charges provided for in the lowest existing SWBT intercompany agreement for operator services and Directory Assistance. There shall be no additional rate for this functionality until such time as the Commission determines, upon consideration of recommendation of arbitration advisory staff, that there must be a separate cost based rate for this functionality. The parties shall cooperate with arbitration advisory staff in developing such rates. In the event that an interim rate is established, the parties agree to true-up at such time as permanent rate is established. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties. No incremental rate quotation charge should be paid in addition to the per-call or per-minute rate that IP Communications Corporation pays for operator services and Directory Assistance calls.
- 3.2 IP Communications Corporation will provide SWBT with the specific branding phrase to be used to identify IP Communications Corporation. The standard phrase will be consistent with the general form and content currently used by the Parties in branding their respective services.

- 3.3 SWBT Directory Assistance operators will provide Directory Assistance Rate Information upon request to IP Communications Corporation's end users, as required by Section 226(b)(1)(C) of the Act. Rate information will be provided under the following terms and conditions:
- 3.3.1 IP Communications Corporation will furnish Rate and Reference information in a mutually agreed to format or media thirty (30) days in advance of the date when the are to be provided by SWBT.
- 3.3.2 IP Communications Corporation will inform SWBT, in writing, of any changes to be made to such Rate and Reference Information ten (10) working days prior to the effective rate change date. IP Communications Corporation acknowledges that it is responsible to provide SWBT updated Rate information in advance of when the Rates are to become effective.
- 3.3.3 In all cases when SWBT receives a rate request from an IP Communications Corporation end user, SWBT will quote the Directory Assistance rates provided by IP Communications Corporation.

### 4.0 Responsibilities of SWBT

- 4.1 SWBT will perform DA Service for IP Communications Corporation in those exchanges where IP Communications Corporation elects to purchase such services from SWBT.
- 4.2 SWBT will provide and maintain its own equipment to furnish DA Services, including equipment necessary for routing calls and signals to the SWBT serving office.
- 4.3 SWBT will provide DA Service to IP Communications Corporation customers using current and updated DA records and in accordance with SWBT's current methods, practices, and procedures or as subsequently modified.
- 4.4 SWBT will provide IntraLATA HNPA DA Service and intrastate IntraLATA FNPA DA Service to Customers who dial 1+411 or NPA+555-1212.
- 4.5 SWBT will include current IP Communications Corporation customer listing information in SWBT's DA database.

### 5.0 Pricing

5.1 Prices to be charged to IP Communications Corporation by SWBT for the DA Services provided pursuant to this Appendix are set forth in Appendix Services/Pricing to Attachment 1: Resale of this Agreement. In states where SWBT affords customers making calls to DA a monthly free call allowance, SWBT will afford IP Communications

000231

Corporation's customers making calls to DA the same monthly free call allowance, and will not charge IP Communications Corporation for such calls.

- 5.2 The following prices for branding of IP Communications Corporation DA calls are subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket number TO-97-40 or TO-98-115 or any other decision rendered the Missouri Commission by December 31, 1998 in a proceeding initiated by AT&T: In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties. Pricing for branding of IP Communications Corporation DA calls are as follows:
- 5.2.1 rate per branded call:

\$ 0.02

5.2.2 rate for initial loading (coding for mechanized branding): \$2,325 Per TOPS Switch

5.2.3 rate for subsequent change (phraseology):

\$ 2,325 Per TOPS Switch

- 5.2.4 In the event that the phraseology for branding DA calls is the same phraseology for branding OS calls, only one \$2,325 charge will apply per initial loading or subsequent change.
- 5.3 When an IP Communications Corporation caller requests a quotation of rates, IP Communications Corporation will pay the wholesale discounted charge applicable to operator services and Directory Assistance calls to compensate SWBT for the Operator Transfer Service. There shall be no additional rate for this functionality until such time as the Commission determines, upon consideration of recommendation of arbitration advisory staff, that there must be a separate cost based rate for this functionality. The parties shall cooperate with arbitration advisory staff in developing such rates. In the event that an interim rate is established, the parties agree to true-up at such time as permanent rate is established. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties.

### 6.0 Liability

6.1 Indemnification and limitation of liability provisions covering the matters addressed in this Appendix are contained in the General Terms and Conditions portion of the Agreement.

### 7.0 Applicability of Other Rates, Terms and Conditions

\*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

### APPENDIX OS-RESALE

## SWBT-PROVIDED LOCAL & INTRALATA OPERATOR ASSISTANCE SERVICES

This Appendix OS-Resale to Attachment 1: Resale sets forth the terms and conditions under which SWBT agrees to provide local and intraLATA operator services (Operator Services) for IP Communications Corporation, but only upon IP Communications Corporation's request therefor. This Appendix applies only to operator assistance services provided within a LATA.

### 1.0 SWBT will provide the following three tiers of Operator Services:

- 1.1 Fully-Automated Allows the caller to complete a call utilizing Automated Alternate Billing Service (AABS) equipment without the assistance of a SWBT Operator, hereafter called Operator. AABS allows the caller the option of completing calls through the AABS audio response system. AABS will be offered in areas where facilities exist and where SWBT has Automatic Number Identification (ANI) equipment and TOUCH-TONE service in place. AABS cannot be activated from a rotary telephone and failure or slow response by the caller to the audio prompts will bridge an Operator to the caller for further assistance. The called party must also have TOUCH-TONE service to accept calls that are billed collect or to a third number.
- 1.2 Semi-Automated Allows the caller to complete a call by receiving partial assistance from an Operator or when AABS cannot be activated due to equipment limitations.
- 1.3 Non-Automated Allows the caller to complete a call by receiving full assistance from an Operator.

## 2.0 SWBT will provide to IP Communications Corporation the call types in Sections 3.0 through 8.0 below:

- 3.0 Fully Automated Station-to-Station This service is limited to those calls placed collect or billed to a third number. The caller dials 0 plus the telephone number desired, the service selection codes and/or billing information as instructed by the AABS equipment. The call is completed without the assistance of an Operator. This service may also include the following situations:
- 3.1 The caller identifies himself or herself as disabled and gives the Operator the number to which the call is to be billed (either collect or third number).
- 3.2 When due to trouble on the network or lack of service components, the automated call cannot be completed without assistance from an Operator.

- 3.3 When an Operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 4.0 <u>Semi-Automated Station-to-Station</u> This service is limited to those calls placed sent paid, collect or billed to a third number. The caller dials 0 plus the telephone number desired and the call is completed with the assistance of an Operator. This service may also include the following situations:
- 4.1 Where the caller does not dial 0 prior to calling the number desired from a public or semipublic telephone, or from a telephone where the call is routed directly to an Operator (excluding calling card calls).
- 4.2 When an Operator re-establishes an interrupted call that meets any of the situations described in this Section.
- 5.0 <u>Semi-Automated Person-to Person</u> A service in which the caller dials 0 plus the telephone number desired and specifies to the Operator the particular person to be reached or a particular PBX station, department or office to be reached through a PBX attendant. This service applies even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. This service may also include:
- 5.1 Where the caller does not dial a 0 prior to dialing the number from a public or semipublic telephone, or where the call is routed directly to an Operator.
- 5.2 When an operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 6.0 Operator Handled Station-To-Station A service provided when the caller dials 0 to reach an Operator, and the Operator dials a sent paid, collect or third number station-to-station call. These calls may originate from a private, public or semi-public telephone. The service may also include when an Operator reestablishes an interrupted call as described in this Section.
- 7.0 Operator Handled Person-To-Person A service in which the caller dials 0 and requests the Operator to dial the number desired and the person, station, department or office to be reached. The call remains a person-to-person call even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. The service may also include when an Operator reestablishes an interrupted call as described in this Section.
- 8.0 Operator Transfer Service A service in which the caller dials 0 and requests to be connected to an interexchange carrier using an Operator's assistance. At the caller's

request, the Operator transfers the call to an interexchange carrier participating in SWBT's Operator Transfer service offering. IP Communications Corporation agrees to obtain all necessary compensation arrangements between IP Communications Corporation and participating carriers.

### 9.0 Call Branding/Rate Reference

- 9.1 Call branding is the process by which an Operator, either live or recorded, will identify the operator service provider as being IP Communications Corporation. SWBT will offer Call Branding of Operator Services in the name of IP Communications Corporation. In the event that the phraseology for branding OS calls is the same phraseology for branding DA calls, only one charge will apply per initial loading or subsequent change. IP Communications Corporation will pay the charge as reflected in Appendix Pricing UNE-Schedule of Prices labeled Rate Per Initial Load or Rate Per Subsequent Changes to Brand and/or rate per call subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket number TO-97-40 or TO-98-115 (or a decision rendered the Missouri Commission by December 31, 1998 in a separate proceeding initiated by AT&T). In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties.
- 9.1.1 Rate reference is the process by which an operator, either live or recorded, will quote IP Communications Corporation's rates. When an IP Communications Corporation caller requests a quotation of rates, IP Communications Corporation will pay the applicable rates and charges provided for in the lowest existing SWBT intercompany agreement for operator services and Directory Assistance. There shall be no additional rate for this functionality until such time as the Commission determines, upon consideration of recommendation of arbitration advisory staff, that there must be a separate cost based rate for this functionality. The parties shall cooperate with arbitration advisory staff in developing such rates. In the event that an interim rate is established, the parties agree to true-up at such time as permanent rate is established. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties. No incremental rate quotation charge should be paid in addition to the per-call or per-minute rate that IP Communications Corporation pays for operator services and Directory Assistance calls.
- 9.2 IP Communications Corporation will provide SWBT with the specific branding phrase to be used to identify IP Communications Corporation. The standard phrase will be consistent with the general form and content currently used by the Parties in branding their respective services.

- 9.3 SWBT Operator Services operators will provide Operator Services Rate Information upon request to IP Communications Corporation's end users, as required by Section 226(b)(1)(C) of the Act. Rate information will be provided under the following terms and conditions:
- 9.3.1 IP Communications Corporation will furnish Rate and Reference information in a mutually agreed to format or media thirty (30) days in advance of the date when the are to be provided by SWBT.
- 9.3.2 IP Communications Corporation will inform SWBT, in writing, of any changes to be made to such Rate and Reference Information ten (10) working days prior to the effective rate change date. IP Communications Corporation acknowledges that it is responsible to provide SWBT updated Rate information in advance of when the Rates are to become effective.
- 9.3.3 In all cases when SWBT receives a rate request from an IP Communications Corporation end user, SWBT will quote the Operator Services rates provided by IP Communications Corporation.

### 10.0 Other Operator Assistance Services

- 10.1 Line Status Verification A service in which the caller asks the Operator to determine the busy status of an access line.
- 10.2 Busy Line Interrupt A service in which the caller asks the Operator to interrupt a conversation in progress, to determine if one of the parties is willing to speak to the caller requesting the interrupt. A Busy Line Interrupt charge will apply even if no conversation is in progress at the time of interrupt or the parties interrupted refuse to terminate the conversation in progress.
- 10.3 Handling of Emergency Calls to Operator SWBT agrees to process emergency calls from IP Communications Corporation Resale customers to an Operator in the same manner that SWBT processes the same type of call for a SWBT end user customer.
- 10.4 Calling Card Calls billed to an IP Communications Corporation proprietary calling card (0+ or 0- access) will be routed via transfer to the IP Communications Corporation operator.

### 11.0 Responsibilities of the Parties

11.1 SWBT will provide and maintain such equipment as is required to furnish the Operator Services as described in this Appendix.

- 11.2 Facilities necessary for SWBT to provide Operator Services to IP Communications Corporation will be provided by SWBT using standard trunk traffic engineering procedures to ensure that the objective grade of service is met.
- 11.3 IP Communications Corporation will furnish all records required by SWBT to provide the Operator Services. Such records, or information, will include IP Communications Corporation's rate quotation tables and any other information required by SWBT. IP Communications Corporation will provide the initial data by a date mutually agreed to between IP Communications Corporation and SWBT. IP Communications Corporation will keep this data current using procedures mutually agreed to by IP Communications Corporation and SWBT. IP Communications Corporation will provide all data and changes to SWBT in the mutually agreed to format(s).
- 11.4 SWBT will accumulate and provide to IP Communications Corporation data as specified in Attachments 4: Connectivity Billing-Resale and Attachment 5: Customer Usage Data-Resale to this Agreement. necessary for IP Communications Corporation to verify traffic volumes and bill its end users.

#### 12.0 Methods and Practices

12.1 SWBT will provide Operator Services in accordance with the operator methods and practices in effect for SWBT at the time the call is made, unless otherwise agreed in writing by both Parties.

#### 13.0 Pricing

- 13.1 Prices to be charged to IP Communications Corporation by SWBT for the Operator Services provided pursuant to this Appendix are set forth in Appendix Services/Pricing of Attachment 1: Resale.
- 13.2 The following prices for branding of IP Communications Corporation OS calls are subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket number TO-97-40 or TO-98-115 or any other decision rendered the Missouri Commission by December 31, 1998 in a proceeding initiated by AT&T. An initial non-recurring charge applies per trunk group for the establishment of Call Branding. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties.
- 13.2.1 rate per branded call:

\$ 0.02

13.2.2 rate for initial loading (coding for mechanized branding): \$2,325 Per TOPS Switch

13.2.3 rate for subsequent change (phraseology):

- \$ 2,325 Per TOPS Switch
- 13.2.4 In the event that the phraseology for branding OS calls is the same phraseology for branding DA calls, only one \$2,325 charge will apply per initial loading or subsequent change.
- 13.3 When an IP Communications Corporation caller requests a quotation of rates, IP Communications Corporation will pay the wholesale discounted charge applicable to operator services and Directory Assistance calls to compensate SWBT for the Operator Transfer Service. There shall be no additional rate for this functionality until such time as the Commission determines, upon consideration of recommendation of arbitration advisory staff, that there must be a separate cost based rate for this functionality. The parties shall cooperate with arbitration advisory staff in developing such rates. In the event that an interim rate is established, the parties agree to true-up at such time as permanent rate is established. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties.

### 14.0 Liability

14.1 Indemnification and limitation of liability provisions covering the matters addressed in this Appendix are contained in the General Terms and Conditions portion of the Agreement.

# 15.0 Applicability of Other Rates, Terms and Conditions

15.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

## APPENDIX WHITE PAGES (WP)-RESALE

This Appendix White Pages - Resale (WP-Resale) to Attachment 1: Resale, sets forth SWBT's and IP Communications Corporation's agreement to the following terms and conditions for the inclusion of IP Communications Corporation Customer information associated with Resale services in the White Pages directories:

#### 1.0 Introduction

- 1.1 SWBT publishes White Pages directories for geographic areas in which IP Communications Corporation also provides local exchange telephone service, and IP Communications Corporation wishes to include listings information for its customers in the appropriate SWBT White Pages directories.
- 1.2 IP Communications Corporation also desires distribution to IP Communications Corporation's customers of the White Pages directories that include listings of such customers.
- 1.3 SWBT will make available to IP Communications Corporation, for these IP Communications Corporation customers, non-discriminatory access to White Pages directory listings (Directory Listings), under the following terms and conditions in Section 2.0 of this Appendix.

#### 2.0 Service Provided

- 2.1 SWBT will use the practices and procedures applicable to its provision of White Pages directories on a nondiscriminatory basis. SWBT will include in appropriate White Pages directories the primary alphabetical listings of all IP Communications Corporation customers (other than non-published or non-list Customers) located within the local directory area. SWBT will include IP Communications Corporation local customers' primary listings in the White Pages (residence, business, or government listings, where applicable) directories without additional charge.
- 2.2 IP Communications Corporation will furnish to SWBT subscriber listing information pertaining to IP Communications Corporation customers located within the SWBT local directory area, along with such additional information as SWBT may require to prepare and print the alphabetical listings of said directory.
- 2.3 SWBT will include the listing information for IP Communications Corporation's customers for Resale services in SWBT's White Pages directory data base in the same manner as it includes listing information for SWBT's end user customers.

- 2.4 SWBT will provide the following directory listing criteria to IP Communications Corporation for White Pages listings and will provide changes to such criteria not later than sixty (60) days in advance of such changes becoming effective:
- 2.4.1 business rules for standard White Pages listings (e.g., space restrictions, non-listed and non-published listings, abbreviated listings, secondary, additional and foreign listings);
- 2.4.2 business rules for residential Enhanced White Pages (e.g., bold, indent, italics) listings available;
- 2.4.3 White Pages directory delivery schedules;
- 2.4.4 restrictions, if any, on number of White Pages directories provided at no charge to a customer; and,
- 2.4.5 geographic coverage areas of each White Pages directory published by SWBT (by exchange community and/or NPA/NXX).
- 2.5 IP Communications Corporation may purchase Enhanced White Pages listings for residential customers on a per listing basis and will pay SWBT amounts attributable to such Enhanced Listings used by its customers in accordance with the terms of Appendix Services/Prices to Attachment 1: Resale to the Agreement.
- 2.6 Publication schedules for White Pages: SWBT will provide to IP Communications Corporation the initial directory schedule for a calendar year within three (3) to six (6) months of the publication year for those areas where IP Communications Corporation provides local service. Updates to the schedule will be provided in a timely manner as they occur.
- 2.7 IP Communications Corporation's subscriber listings are to be interfiled (interspersed) with SWBT's and other LSPs' subscriber listings in the White Pages directory with no discernible differentiation in the listings to indicate to the reader that the listings are served by another LSP.
- 2.8 SWBT will deliver Directory Listings in book form (White Pages directories) to IP Communications Corporation Customers. The timing of such delivery and the determination of which White Pages directories will be delivered (by customer address, NPA/NXX or other criteria), and the number of White Pages directories to be provided per customer, will be provided under the same terms that SWBT delivers White Pages directories to its own end users.

- 2.9 SWBT will distribute the White Pages directory and will make any subsequent distribution in accordance with the same practices and procedures used by SWBT to distribute directories to its end users.
- 2.10 At its option, IP Communications Corporation may purchase up to eight single-sided customer information pages (Customer Guide Pages) in the informational section of the SWBT White Pages directory covering the geographic area(s) it is serving. These pages will be in alphabetical order with other local service providers and will be no different in style, size, color and format than SWBT information pages. IP Communications Corporation will provide to SWBT, sixty (60) days prior to the directory close date, the information page(s) in camera ready format. SWBT will have the right to approve, and, with IP Communications Corporation's agreement, SWBT may, but is not required to, revise the format and content of such information page(s).
- 2.11 SWBT will include IP Communications Corporation specific information (i.e., business office, residence office, repair bureau, etc.) in the White Pages directory on an "indextype" information page, in alphabetical order along with other local service providers, at no charge. The space available to IP Communications Corporation on such page will be 1/8th page in size. In order to have such information published, IP Communications Corporation will provide SWBT with its logo and information in the form of a camera ready copy, sized at 1/8th of a page (IP Communications Corporation will be limited to a maximum of 1/8th of a page in any single edition of a SWBT White Pages directory, under either this Subsection or Attachment 19: White Pages-Other to this Agreement).

#### 3.0 Use of Subscriber Listing Information

3.1 SWBT will provide subscriber list information that includes IP Communications Corporation customers to third parties on the same terms and conditions and at the same rates that SWBT provides its own subscriber list information to third parties. IP Communications Corporation will receive its pro-rata share of any amounts paid by third parties to SWBT for such subscriber list information. IP Communications Corporation's pro-rata share will be calculated based on the proportionate share of IP Communications Corporation customers to the total number of customers included in the subscriber list information. Provision of subscriber list information to third parties will be solely at SWBT's discretion.

#### 4.0 Pricing

- 4.1 The methodology SWBT will use to develop the informational pages cost is as follows:
- 4.1.1 To develop the per printed page per year cost for informational pages, SWBT will use the most recent annual third party contract costs associated with the printing of White Pages

- informational pages. The number of such pages printed per year will be divided into said costs. The result will be a printed page per year cost.
- 4.2 Pending approval by the State Commission of the rates developed for informational pages included in White Pages directories as set forth in Section 4.1.1, the interim rate for informational pages that IP Communications Corporation requests to purchase in such directories will be as follows:
- 4.2.1 Informational Pages:

Any one book covering a geographic area per page per year \$3,191.73

4.2.2 The price contained in Section 4.2.1 is interim in nature and is subject to true-up from the effective date of this agreement to the State Commission's determination of permanent prices.

#### 5.0 Liability

5.1 Indemnification and limitation of liability provisions covering the matters addressed in this Appendix are contained in the General Terms and Conditions portion of the Agreement.

### 6.0 Applicability of Other Rates, Terms and Conditions

6.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

## **ATTACHMENT 2: ORDERING AND PROVISIONING-RESALE**

### 1.0 General Requirements

SWBT will provide pre-order, ordering and provisioning services to IP Communications Corporation associated with SWBT's Resale services under the Agreement pursuant to the requirements set forth in this Attachment.

- 1.1 Throughout the term of the Agreement, the quality of the technology, equipment, facilities, processes, and techniques (including, without limitation, such new architecture, equipment, facilities, and interfaces as SWBT may deploy) that SWBT uses to provide pre-order, ordering and provisioning services to IP Communications Corporation under this Agreement will be at least equal in quality to that provided by SWBT to its end users.
- 1.2 For all Resale services ordered under the Agreement, SWBT will provide pre-order, ordering and provisioning services equal in quality and speed (speed to be measured from the time SWBT receives the service order from IP Communications Corporation) to the services SWBT provides to its end users.
- 1.3 SWBT and IP Communications Corporation agree to work together in the Order and Billing Forum (OBF) and the Telecommunications Industry Forum (TCIF) to establish and conform to uniform industry standards for electronic interfaces for pre-order, ordering and provisioning. Neither Party waives any of its rights as participants in such forums in the implementation of the standards.
- 1.4 SWBT and IP Communications Corporation agree to work together to implement an Electronic Gateway Interface (EGI) that provides nondiscriminatory access to SWBT's pre-order process equivalent to that which is available to SWBT for use with its end users.

IP Communications Corporation and SWBT agree to implement the electronic interface, which will be transaction based, to provide the pre-service ordering information (i.e., address verification, service and feature availability, telephone number assignment, dispatch requirements, due date, and Customer Service Record information (CSR) in English subject to the conditions as set forth in Attachment Resale) not later than July 1, 1997. SWBT and IP Communications Corporation also agree to work together to implement an Electronic Data Interface (EDI) for ordering and provisioning specified in the Local Service Ordering Electronic Data Interchange (EDI) Support Implementation Guide (SIG) dated May 20, 1996, or as otherwise agreed to in writing by the Parties. Both EGI for pre-order and EDI for ordering and provisioning will be available not later than July 1, 1997, for all pre-order and ordering and provisioning order types and functions as outlined in AT&T Exhibit No. 84 filed in Case Nos. TO-97-40; TO-97-67.

- 1.4.1 SWBT also will make available to IP Communications Corporation Residence EASE, to be used by IP Communications Corporation on an interim basis prior to the deployment of EDI as required above in Section 1.4, for the processing of residence Resale service orders. The following service order types may be processed via Residence EASE: Conversion (as is or with changes); Change (Features, Listings, InterLATA and IntraLATA [when available] Long Distance PICs); New Connect; Disconnect; From and To (change of premises with same service).
- 1.4.2 SWBT also will make Business EASE available to IP Communications Corporation within a reasonable period of time agreed to by the Parties, upon receipt of a written request from IP Communications Corporation.
- 1.4.3 IP Communications Corporation and SWBT will work together to establish mutual requirements and specific interface agreements through the implementation process.
- In areas where service order transactions cannot be provided via an electronic interface for the pre-order, ordering and provisioning processes, SWBT and IP Communications Corporation will develop manual work around processes until such time as the transactions can be electronically transmitted. If Resale services are provided by SWBT to IP Communications Corporation before electronic interfaces are established between IP Communications Corporation and SWBT, IP Communications Corporation will transmit pre-order, ordering and provisioning requests to the SWBT Local Service Center (LSC) via facsimile and/or telephone or other mutually agreed upon means to SWBT. The SWBT LSC will respond to IP Communications Corporation calls with the same level of service that SWBT provides in serving SWBT's end user customers.
- 1.6 SWBT and IP Communications Corporation agree to work together to develop and implement an electronic communication interface that will replace the initial pre-order electronic interface and the ordering and provisioning EDI gateway and provide for Real Time data transfer, consistent with industry standards developed by the OBF and the TCIF. The Parties agree to implement this replacement interface as soon as practical, but no later than 180 days after the Electronic Communication Implementation Committee (ECIC) of TCIF standard reaches the status of "Final Closure", unless a later date is mutually agreed upon.
- 1.7 SWBT will provide a Single Point of Contact (SPOC) for all of IP Communications Corporation's ordering and provisioning contacts and order flow involved in the ordering and provisioning of the Resale services provided by SWBT to IP Communications Corporation. SWBT will provide ordering and provisioning services to IP Communications Corporation for Resale service orders Monday through Friday from 8 a.m. to 5:30 p.m. through the Local Service Center (LSC). SWBT will provide the same out of hours provisioning coverage for IP Communications Corporation end user

customers as SWBT provides to its end user customers. SWBT also agrees to extend hours of coverage of the LSC based on order volumes. IP Communications Corporation may request SWBT to provide Sunday, holiday, and/or additional out of hours provisioning services within two business days. If IP Communications Corporation requests that SWBT perform provisioning services other than Monday through Friday from 8:00 a.m. to 5:30 p.m., SWBT will quote, within one (1) business day of the request, a cost-based rate for such services. If IP Communications Corporation accepts SWBT's quote, SWBT will provide such provisioning services to IP Communications Corporation in the same manner it does for itself.

- 1.8 SWBT will provide electronic system interfaces Monday through Saturday from 7 a.m. to 11 p.m.; and, Sunday from 11:00 a.m. to 11:00 p.m. for all pre-order, ordering and provisioning order flows. These electronic system interfaces will conform to the terms of paragraphs 1.4 and 1.6 above and Section 2 below. SWBT will also provide to IP Communications Corporation a toll-free nationwide telephone number to the LSC for issues connected to the electronic system interfaces (operational from 8 a.m. to 5 p.m., Monday through Friday), which will be answered by capable staff trained to answer questions and resolve problems in connection with the provisioning of Resale services. SWBT will also provide a help desk function for electronic system interfaces with out-of-hours coverage from 5 p.m. to 8 p.m., Monday through Friday, and from 8 a.m. through 8 p.m. on Saturday.
- 1.9 SWBT will provide IP Communications Corporation with the same provisioning intervals and procedures for design and complex services that it provides to SWBT customers.
- 1.10 SWBT and IP Communications Corporation will jointly establish interface contingency and disaster recovery plans for the pre-order, ordering and provisioning of SWBT's Resale services. On or before the Effective Date of this Agreement, SWBT will provide a disaster recovery plan associated with the recovery of any systems and/or functions connected with the pre-order, ordering and provisioning processes.
- 1.11 SWBT will recognize IP Communications Corporation as the customer of record for all Resale services ordered by IP Communications Corporation and will send all notices, invoices and pertinent information directly to IP Communications Corporation.
- 1.12 SWBT will provide the following to IP Communications Corporation upon request:
- 1.12.1 a list of all services and features available for resale from each switch that SWBT may use to provide such services and features, by switch CLLI and NPA NXX. Within ten (10) business days after the Effective Date of the Agreement, SWBT will provide IP Communications Corporation an initial electronic copy of this information. SWBT will provide a complete update of the information to IP Communications Corporation electronically on a quarterly basis, or as IP Communications Corporation may otherwise

request. If IP Communications Corporation requests more than one update in any quarter, a charge may apply for each such additional request. The Parties agree to negotiate in good faith whether and to what extent such a charge should apply.

- 1.12.2 Designed Layout Record Cards for designed Resale services;
- 1.12.3 advanced information on the details and requirements for planning and implementation of NPA splits via Accessible Letters, or, where SWBT is not the Central Office Code Administrator, to the extent the information is not available to IP Communications Corporation in the same manner it is available to SWBT, SWBT will provide copies of notices containing such information received by SWBT to IP Communications Corporation;
- 1.12.4 a subset of the Street Address Guide (SAG), transmitted electronically, which includes street addresses and the associated serving switches, enabling IP Communications Corporation to map a customer address to a specific serving switch. SWBT will provide this information to IP Communications Corporation within ten (10) business days after the Effective Date of this Agreement and quarterly thereafter except as IP Communications Corporation may otherwise request. If IP Communications Corporation requests more than one update in any quarter, a charge may apply for each such additional request. The Parties agree to negotiate in good faith whether and to what extent such a charge should apply.
- 1.13 SWBT will train those SWBT employees who have contact with IP Communications Corporation or any other LSP not to discriminate against any LSP, including IP Communications Corporation, and not to disparage any LSP, including IP Communications Corporation, to any LSP's customers.
- 1.14 SWBT and IP Communications Corporation will work together to develop methods and procedures between SWBT's LSC and IP Communications Corporation's Work Centers regarding systems, work center interfaces, and to establish a change control process for those methods and procedures.
- 1.15 SWBT and IP Communications Corporation will work cooperatively in establishing and implementing practices and procedures regarding fraud and service annoyance handling.
- 1.16 SWBT and IP Communications Corporation will establish mutually acceptable methods and procedures for handling all misdirected calls from IP Communications Corporation customers requesting pre-order, ordering or provisioning services. All misdirected calls to SWBT from IP Communications Corporation customers will be given a recording (or a live statement) directing them to call their local provider. To the extent SWBT procedures change such that IP Communications Corporation customers become identifiable, such customers will be directed to call IP Communications Corporation at a

designated 800 number. IP Communications Corporation on a reciprocal basis will refer to a SWBT designated number all misdirected calls that IP Communications Corporation receives from SWBT customers. IP Communications Corporation and SWBT will agree on the scripts to be used for this purpose.

1.17 SWBT's LSC will provide design and coordination support for all Resale services provided to IP Communications Corporation. Services for which such support is to be provided include, without limitation, Data Services, Voice Grade Private Line, and ISDN PRI and BRI, Broadband and packet services.

## 2.0 Pre-Order and Ordering Interface Requirements

- 2.1 SWBT will provide to IP Communications Corporation an EDI electronic interface for transferring and receiving orders, Firm Order Confirmation (FOC), service completion, and other provisioning data and information. The EDI interfaces shall be administered through a gateway that will serve as a single point of contact for the transmission of such data from IP Communications Corporation to SWBT, and from SWBT to IP Communications Corporation. The requirements and implementation of such a data transfer system are subject to future agreement by IP Communications Corporation and SWBT, but will conform to the terms of Section 1 of this Attachment.
- 2.2 When ordering Resale services, IP Communications Corporation's representatives will have access to a pre-order electronic gateway provided by SWBT for both consumer and business customers that provides real-time access to SWBT's information systems. This gateway shall be a Telecommunications Protocol/Internet Protocol (TCP/IP) gateway and will allow the IP Communications Corporation representatives to perform the following tasks:
- 2.2.1 obtain customer information, including customer name, billing address and residence or business address, billed telephone numbers and features and services available in the end office where the customer is provisioned;
- 2.2.2 identify features and services to which the customer subscribes (IP Communications Corporation agrees that IP Communications Corporation's representatives will not access the information specified in this Subsection until after the customer requests that the customer's local exchange service provider be changed to IP Communications Corporation);
- 2.2.3 electronically assign a telephone number (if the customer does not have one assigned) with the customer on-line. Reservation and aging of these numbers remain SWBT's responsibility. For "vanity" numbers, SWBT will provide a manual process until an

- electronic capability becomes available. All these processes will permit reservation of a number, including, without limitation, a vanity number, for thirty days for consumer and business services;
- 2.2.3.1 When SWBT has initiated a suspension on a SWBT end user's account or disconnects an end user for nonpay, SWBT will not release the telephone number being used by the end user until such time as the end user's account has been paid in full. Conversely, SWBT agrees that when IP Communications Corporation initiates a suspension on one of their resold end user's accounts or disconnects their end user for nonpay, SWBT will abide by the same provisions regarding telephone number release.
- 2.2.4 determine if a service call is needed to install the line or service;
- 2.2.5 provide service availability dates to the customer;
- 2.2.6 provide information regarding the dispatch/installation schedule, if applicable;
- 2.2.7 provide PIC options for intraLATA toll (when available) and interLATA toll;
- 2.2.8 perform address verification.
- 2.3 All CSR data exchanged must be in English, not USOC or FID format. All other data will be in a mutually agreed upon nomenclature.

#### 3.0 Ordering Requirements

- 3.1 Upon IP Communications Corporation's request through a Suspend/Restore order, SWBT will suspend or restore the functionality of any Resale service for any IP Communications Corporation local service customer. SWBT will implement any restoration priority on a per Resale service basis in a manner that conforms with IP Communications Corporation requested priorities and any applicable regulatory policy or procedures.
- 3.2 SWBT will provide to IP Communications Corporation the functionality of blocking calls (e.g., 900, international calls, and third party or collect calls) by line or trunk on an individual switching element basis, to the extent that SWBT provides such blocking capabilities to its customers and to the extent required by law.
- 3.3 When ordering a Resale service via a service order, IP Communications Corporation may order from SWBT separate interLATA and intraLATA service providers (i.e., two PICs, when available) on a line or trunk basis. SWBT will accept PIC change orders for intraLATA toll and long distance services through the service provisioning process.

- 3.4 Unless otherwise directed by IP Communications Corporation when IP Communications Corporation orders a Resale service, all pre- assigned trunk or telephone numbers currently associated with that service will be retained without loss of feature capability and without loss of associated Ancillary Functions, including, but not limited to, Directory Assistance and E911 capability. To the extent such losses occur, SWBT will work cooperatively with IP Communications Corporation to remedy such occurrences over time.
- 3.5 SWBT will provide order format specifications to IP Communications Corporation for all services, features, and functions available and for ancillary data required by SWBT to provision these services.
- 3.6 SWBT will provide IP Communications Corporation with standard provisioning intervals for all designed and complex services.
- 3.7 SWBT will update the E911 service provider information and establish directory listings, including all information appropriate for residential or business listings and foreign listings, from IP Communications Corporation's service order.
- 3.8 SWBT will use its service order process to update and maintain, on the same schedule that it uses for its end users, the IP Communications Corporation customer service information for Resale services in the Line Information Database (LIDB).

#### 4.0 Provisioning Requirements

- 4.1 Except in the event an IP Communications Corporation local service customer changes their local service provider to another LSP or SWBT, SWBT may not initiate any IP Communications Corporation end user requested disconnection or rearrangement of Resale services unless directed by IP Communications Corporation. Any IP Communications Corporation customer who contacts SWBT regarding a change in IP Communications Corporation service will be advised to contact IP Communications Corporation. In those instances when any IP Communications Corporation local service customer changes their local service provider to another LSP or SWBT, IP Communications Corporation will be notified as described in the LSP change notification process, contained in Local Account Maintenance Methods and Procedures dated July 29, 1996, or as otherwise may be agreed to by the Parties.
- 4.2 Upon request from IP Communications Corporation, SWBT will provide an intercept referral message that includes any new telephone number of an IP Communications Corporation end user for the same period of time that SWBT provides such messages for its own end users. IP Communications Corporation and SWBT will agree on the message to be used, which will be similar in format to the intercept referral message currently provided by SWBT for its own end users.

000251

- 4.3 SWBT will provide IP Communications Corporation with a Firm Order Confirmation (FOC) for each order (multiple WTNs may be included on one order) within twenty-four (24) hours of SWBT's receipt of that order. The FOC will contain but is not necessarily limited to: purchase order number, telephone number, Local Service Request number, due date, Service Order number, and completion date.
- 4.4 Upon work completion, SWBT will provide IP Communications Corporation with an 855 EDI transaction based Order Completion that states when that order was completed. When available, SWBT will provide IP Communications Corporation an 865 EDI transaction based Order Completion. This capability will be available when standards are completed by OBF and TCIF/EDI Committees or as agreed to by the Parties.
- 4.5 SWBT will perform pre-service testing, if any, in the same manner that it would provide for itself.
- 4.6 As soon as identified, SWBT will provide IP Communications Corporation a 997 EDI transaction based Rejections/Errors notification occurring in any of the EDI data element(s) fields contained on any IP Communications Corporation order. IP Communications Corporation will provide the 997s for the 855 and 865 EDI Transactions originating from SWBT.
- when SWBT's committed Due Date (DD) is in jeopardy of not being met by SWBT on any Resale service. SWBT and IP Communications Corporation agree to identify a mutually acceptable date for implementation of the 855 EDI transaction-based reply no later than 120 days from the finalization of the OBF guidelines for this transaction or date otherwise mutually agreed to by the parties. SWBT may satisfy its obligations under this paragraph by providing IP Communications Corporation access through the electronic interface to a database which identifies due dates in jeopardy as soon as they have been determined by SWBT. On an interim manual basis, until the 855 transaction is available, SWBT and IP Communications Corporation will establish mutually acceptable methods and procedures for handling the processes for a jeopardy notification and missed appointments when SWBT becomes aware of the jeopardy or missed appointment. Alternatively, IP Communications Corporation may access provisioning status information via the SWBT Order Status Application on the SWBT Toolbar.
- 4.8 When a SWBT employee visits the premises of an IP Communications Corporation customer in respect to installation, maintenance and repair services, the SWBT employee must inform the customer that he or she is there acting on behalf of IP Communications Corporation. Materials left at the customer premises (e.g., a door hanger notifying the customer of the service visit) must also inform the customer that SWBT was on their premises acting on behalf of IP Communications Corporation. "IP Communications Corporation branded" materials, to be utilized by SWBT installation, maintenance and/or

000252

- repair technicians when dealing with IP Communications Corporation's customers, will be furnished to SWBT by and at the sole expense of IP Communications Corporation. SWBT will not rebrand its vehicles and personnel.
- 4.9 SWBT technicians will direct IP Communications Corporation customers to contact IP Communications Corporation if an IP Communications Corporation customer requests a change in service at the time of installation.
- 4.10 SWBT will provide telephone and/or facsimile notification of any charges associated with required construction for a given service, and obtain IP Communications Corporation's approval prior to commencing construction under an IP Communications Corporation order for such service.
- 4.11 When industry standards are established, and SWBT and IP Communications Corporation mutually agree to an implementation schedule, SWBT will provide provisioning status notification for all provisioning orders issued to SWBT by IP Communications Corporation.

### 5.0 Order Format and Data Elements for Resale Service

- 5.1 In ordering Resale services, IP Communications Corporation and SWBT will utilize mutually agreeable standard industry order formats and data elements developed by the OBF. Industry standards do not currently exist for the ordering of Resale services. Therefore, until such standard industry order formats and data elements are developed by the OBF, IP Communications Corporation will utilize the format described in this Section to address the specific data requirements necessary for the ordering of Resale services.
- 5.2 On or before the Effective Date of the Agreement, SWBT will provide order format specifications for all Resale services available to be ordered and all customer data required by SWBT from IP Communications Corporation to provision these services.
- 5.3 IP Communications Corporation and SWBT will agree upon the appropriate ordering and provisioning codes to be used for each Resale service. The Local Service Provider Electronic Ordering Form, as currently defined by the OBF, will be utilized by SWBT for the ordering of services via electronic interface. The Manual Ordering Form, when defined by the OBF, will be implemented by SWBT for manual service orders.
- 5.4 Each order for a Resale service will contain the following order-level sections as currently defined by the OBF: Administration, Bill, Contact, and End User information.
- 5.5 In addition to the above OBF sections, IP Communications Corporation will provide provisioning data in the format defined below when ordering Resale services. IP

Communications Corporation will provide data in the following provisioning categories, such data to be provided on the OBF ordering form as completed data fields:

Activity. The activity field will include one of the following entries:

- (A) Add. This will apply when a new service is being ordered;
- (C) Change. This will apply when an IP Communications Corporation customer's existing service is being altered in some way, e.g., "moved as specified" (migrate with change), "move as is" (conversion);
- (D) Disconnect. This will apply when an existing service is being completely disconnected;
- (R) Record Only. This will apply when there is no physical or logical work required and all that is necessary is the update of SWBT's internal records.

### 6.0 Order Activity Description

6.1 For each activity, a further description of the Order Activity may be required. The following Order Activity Descriptions may be applied to any Add, Change, Disconnect or Record Only order. In some cases, more than one of these may apply to a particular order:

Modify: This will apply when the order has been modified in some way;

<u>Cancel</u>: This will apply when the order has been canceled, and no provisioning activity related to that order is to be completed;

Expedite: This will apply when the provisioning activity is required to be completed prior to the committed Due Date. The customer requested Due Date category will reflect the date the activity needs to be completed;

Sequence: This will apply when components of the order must be worked in the proper sequence, or when components of the order are sequentially related to components of another order;

<u>Coordinated</u>: This will apply when components of the order must be worked simultaneously, or when components of the order must be coordinated with components of another order;

Suspend: This will apply when a functionality is to be suspended until further notice. The exact nature of the suspension will be reflected within the body of the order. This field will be used with a C (Change) Order Activity;

<u>Restore:</u> This will apply when a previously suspended functionality is to be restored. This field will be used with a C (Change) Order Activity.

### 7.0 Performance Metrics

- 7.1 When IP Communications Corporation places an order, SWBT will specify a DD based on force availability. In the event a DD other than that specified is requested by the IP Communications Corporation customer, IP Communications Corporation will contact SWBT and the Parties will negotiate a DD based on that request. SWBT will not complete the order prior to the DD or later than the DD unless authorized by IP Communications Corporation.
- 7.2 Within two (2) business hours after a request from IP Communications Corporation for an expedited order, SWBT will notify IP Communications Corporation of the status of the order within the expedited interval. A business hour is any hour occurring on a business day between 8 a.m. and 5 p.m.
- 7.3 Once an order has been issued by IP Communications Corporation and IP Communications Corporation subsequently requires a new DD that is sooner than the committed DD, IP Communications Corporation will issue an expedited modify order. SWBT will notify IP Communications Corporation within two (2) business hours of the status of the order requesting the new DD.
- 7.4 IP Communications Corporation and SWBT will agree to escalation procedures and contacts for resolving questions and disputes related to ordering and provisioning procedures or to the processing of individual orders, subject ultimately to the dispute resolution provisions of this Agreement. SWBT will notify IP Communications Corporation of any modifications to these contacts within one (1) week of such modifications.
- 7.5 SWBT will provide: (a) percent missed DD; (b) percent right the first time (non-designed 10 days; designed 30 days); (c) percent no access (non-designed) (a, b, and c will be measured and reported on a monthly basis by SWBT for both IP Communications Corporation customers and SWBT customers); and (d) LSC response time. SWBT will provide the same level of service to IP Communications Corporation customers as it provides to its own customers.
- 7.6 When new processes and electronic interfaces are implemented between IP Communications Corporation and SWBT, SWBT and IP Communications Corporation

will develop process metrics requirements. Implementation of such measurements are subject to future agreements by SWBT and IP Communications Corporation. All such process metrics will be subject to review quarterly and subject to modification or discontinuance.

# 8.0 Operational Readiness Test (ORT) for Pre-Ordering, Ordering/Provisioning

8.1 SWBT will participate with IP Communications Corporation in Operational Readiness Testing (ORT), which will allow for the testing of the systems, interfaces, and processes for the pre-ordering, ordering and provisioning of Resale services. ORT will be completed in conformance with agreed upon implementation dates. Such ORT will begin not later than April, 1997.

### 9.0 Pricing

9.1 Prices for access to OSS covered by this Attachment are contained in Section 15 of Appendix Services/Pricing to Attachment 1: Resale.

## 10.0 Applicability of Other Rates, Terms and Conditions

10.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

### **ATTACHMENT 3: MAINTENANCE - RESALE**

#### 1.0 General Requirements

1.1 SWBT will provide repair, maintenance, testing, and surveillance for all Resale services in accordance with the terms and conditions of this Attachment.

## 2.0 Maintenance Requirements

2.1 SWBT will provide maintenance for all Resale services ordered under this Agreement at levels equal to the maintenance provided by SWBT in serving its end user customers, and will meet the requirements set forth in this Attachment. Such maintenance requirements will include, without limitation, those applicable to testing and network management.

### 3.0 Electronic Bonding

- 3.1 SWBT and IP Communications Corporation agree to work together in the Electronic Communications Implementation Committee (ECIC) or other appropriate organizations to establish uniform industry standards for Electronic Bonding Interfaces (EBI), in accordance with the ANSI T1.227 and T1.228 to support repair and maintenance of Resale services.
- 3.2 IP Communications Corporation and SWBT agree to work together to implement Phase I of EBI as set forth in Fault Management Electronic Bonding Interface for Local Service-Version 3, Draft 1, dated January 13, 1997, or as subsequently modified and provided to SWBT by January 15, 1997. Phase 1 is scheduled to be completely operational by August, 1997, with testing beginning April, 1997. If IP Communications Corporation fails to begin testing by April, 1997, SWBT will require IP Communications Corporation to negotiate new testing and completely operational dates. Phase 1 of EBI will provide the following functions:
  - a) the ability to enter a new trouble ticket electronically;
  - b) the ability to receive the Estimated Time To Repair ("ETTR") electronically with the successful creation of the trouble ticket;
  - c) the ability to retrieve and track the current status on all electronically bonded trouble tickets;
  - d) the ability to get applicable charges at ticket closure. For non-designed services this will include the maintenance of service charge indicator. For special services, this will include the number of hours per technician and the bill activity type.

000257

- 3.3 SWBT and IP Communications Corporation agree to work together to develop new or modify existing standards for Phase II of EBI (specific date by which said development is to be completed to be jointly agreed upon) which will provide IP Communications Corporation the following capabilities, including, but not limited to:
  - a) performing feature and line option verification and requesting corrections;
  - b) performing network surveillance (e.g., performance monitoring);
  - c) initiating and receiving test results;
  - d) receiving immediate notification of missed appointments;
  - e) identifying cable failures by cable and pair numbering.

SWBT agrees to notify IP Communications Corporation of upgrades to existing test systems and the deployment of new test systems within SWBT and to negotiate with IP Communications Corporation to allow IP Communications Corporation to use such systems through a controlled interface.

3.4 SWBT and IP Communications Corporation will modify the EDI to incorporate updates to the applicable ANSI and ECIC standards referenced above unless the Parties agree to defer or forego a particular modification.

### 4.0 Repair Service Response

4.1 SWBT technicians will provide repair service that is at least equal in quality to that provided to SWBT customers; trouble calls from IP Communications Corporation will receive response time and priorities that are at least equal to that of SWBT customers. IP Communications Corporation and SWBT agree to use the severity and priority restoration guidelines set forth in SWBT MMP 94-08-001 dated April 1996, and as subsequently modified.

### 5.0 Intercompany Communications

5.1 The SWBT Network Management Service Center ("NMSC") will utilize the IP Communications Corporation Network Management Center ("NMC") as the Single Point of Contact to notify IP Communications Corporation of the existence, location, and source of all emergency network outages affecting an IP Communications Corporation customer. The IP Communications Corporation Customer Network Service Center ("CNSC") or the IP Communications Corporation NMC may call the SWBT NMSC in order to discuss scheduled activities that may impact IP Communications Corporation

Customers. For purposes of this subsection, an emergency network outage is defined as 5,000 or more blocked call attempts in a ten (10) minute period, in a single exchange.

### 6.0 Emergency Restoration Plan

- 6.1 SWBT will provide IP Communications Corporation with mutually agreed upon emergency restoration and disaster recovery plans. Such plans will include, at a minimum, the following:
  - a) disaster recovery notification will be made in accordance with SWBT Central Office Disaster Recovery Plan MMP 94-12-001 dated April 19, 1996, and Local Operations Center (LOC) Disaster Recovery Plan Summary dated April 22, 1996, and as subsequently modified;
  - b) establishment of a SWBT Single Point Of Contact (SPOC) responsible for initiating and coordinating the restoration of all Resale services. The SWBT NMSC will notify IP Communications Corporation's Denver NMC of activities involving the central office and interoffice network and the SWBT LOC will notify the IP Communications Corporation CNSC of any local loop facility when the LOC becomes aware of the local loop facility failure;
  - c) establishment of the SWBT LOC as the single point of contact to provide IP Communications Corporation with information relating to the status of restoration efforts and problem resolution during the Resale services restoration process;
  - d) methods and procedures for mobile restoration equipment, SWBT MMP 94-06-001 dated May 21, 1996, and MMP 94-12-001 dated April 19, 1996, and as subsequently modified;
  - e) methods and procedures for reprovisioning of all Resale services after initial restoration. SWBT agrees that Telecommunications Service Priority ("TSP") services for IP Communications Corporation carry equal priority with SWBT TSP services for restoration. SWBT will follow the guidelines established under the National Security Emergency Procedures (NSEP) plan and will follow TSP guidelines for restoration of emergency services first in accordance with SWBT Emergency Operations Plan Overview and General Description MMP 94-08-001 Section 12, dated April 1996, and as subsequently modified;
  - f) site specific disaster recovery plans for LOC and LSPSC provisioning work centers in accordance with LOC Disaster Recovery Plan Summary dated April 22, 1996, and SWBT LSPSC Plan dated June 4, 1996, and as subsequently modified;

- g) site specific disaster recovery plan for operational systems and databases in accordance with SWBT Computer Facility Disaster recovery plan dated May 13, 1996, and as subsequently modified;
- h) generic disaster recovery plan for central offices, commercial power and facility outages and in accordance with SWBT Generic Disaster Recovery Plans for Central Offices, Commercial Power, Facility Outages dated May 13, 1996, and as subsequently modified. Copper cable restoration shall be in accordance with SWBT Copper Cable Restoration Methods document dated May 13, 1996, and as subsequently modified. Fiber cable restoration will be in accordance with SWBT Emergency Management Process document dated April 23, 1996, and as subsequently modified.

## 7.0 Misdirected Repair Calls

All misdirected repair calls to SWBT from IP Communications Corporation customers will be given a recording (or live statement) directing them to call the number designated by IP Communications Corporation. Scripts used by SWBT will refer IP Communications Corporation customers (in both English and Spanish when available) to the IP Communications Corporation 800 number in the IP Communications Corporation CNSC. All calls to 611 in SWBT's territory will continue to receive a standardized vacant code announcement (i.e., a recording specifying the number dialed is not valid) for all customers. IP Communications Corporation on a reciprocal basis will refer all misdirected repair calls that IP Communications Corporation receives for SWBT customers to a SWBT designated number. For purposes of permanent Number Portability, the Parties agree to work together to determine whether and to what extent a mutually agreeable method of handling misdirected repair calls may be implemented.

### 8.0 Repair Procedures

- 8.1 SWBT agrees to the following:
- 8.1.1 Prior to Electronic Bonding Interface (EBI), IP Communications Corporation will refer repair calls to the SWBT LOC by telephone or via the Toolbar Trouble Administration Interface (Toolbar). After implementation of EBI, IP Communications Corporation may from time to time call the SWBT LOC. In either event, the following will apply: The SWBT LOC will answer its telephone and begin taking information from IP Communications Corporation at the same level of service as provided to SWBT's customers when calling the Customer Service Bureau ("CSB"). The Speed of Answer performance will be provided monthly once the LOC has the equipment to measure calls and the data provided will be for all calls for all LSPs answered by the LOC.

- 8.1.2 The SWBT LOC will be on-line and operational twenty-four (24) hours per day, seven (7) days per week. IP Communications Corporation will provide a single point of contact (SPOC) for all of IP Communications Corporation's maintenance applicable to this Agreement (via an 800 number to the CNSC) 24 hours per day, seven (7) days a week.
- 8.1.3 The EBI to be established pursuant to Section 3 preceding shall be on-line and operational twenty-four (24) hours per day, seven (7) days per week except for the scheduled maintenance downtime as documented in Section 6.2 of the SWBT & IP Communications Corporation Joint Implementation Agreement for the Electronic Bonding Project, Version 1, dated November 2, 1994 and as subsequently modified or as otherwise agreed upon.
- 8.1.4 IP Communications Corporation will utilize the Toolbar interface or the EBI to obtain the status of open and closed trouble reports.
- 8.1.5 While in manual mode operation, SWBT will provide IP Communications Corporation "estimated time to restore." The SWBT LSPC will notify the IP Communications Corporation CNSC of each missed repair commitment through a status call. When the trouble ticket commitment time occurs and the trouble ticket has not been closed, an additional status call will provide the CNSC the current status (e.g., trouble was dispatched at 8:00 a.m.). The original trouble commitment will not be changed due to possible loss of priority for that customer. All missed appointments (e.g., vendor meets) will be handled in the same way. This jeopardy status information (on missed commitments/appointments), while in a manual mode, will be provided by SWBT for a maximum of four months after IP Communications Corporation's market entry date in SWBT states, or until this capability is available through EBI, or until IP Communications Corporation elects to utilize the Toolbar program to obtain this status. The status of all other tickets will be given to the IP Communications Corporation CNSC through the fax of a daily log (faxed the next morning to the IP Communications Corporation CNSC by 8 a.m. Central Time Zone) and will include all "closed tickets" from the previous day (including No Access and closed troubles).
- 8.1.6 Notice of emergency network outages, as defined in this Attachment, will be provided to the IP Communications Corporation NMC within one (1) hour.
- 8.1.7 For network outages other than emergency outages, the following performance measurements will be taken with respect to restoration of Resale service:
  - a) speed of answer in the LOC Note: Comparison will be made against the results for speed of answer in SWBT's CSBs (where SWBT's customers call in to refer troubles directly);
  - b) percent missed commitments for nondesigned services;

- c) average outage duration time: nondesigned receipt to clear; designed mean time to repair;
- d) percent right the first time (repeat reports): nondesigned 10 days; designed 30 days;
- e) percent report rate nondesigned Note: Comparison will be applicable only after IP Communications Corporation s customer base equals or exceeds 300,000 lines;
- f) percent no access nondesigned.

The above performance measurements will be measured and reported to IP Communications Corporation on a monthly basis by SWBT for both IP Communications Corporation customers and SWBT customers. If the quality of service provided to IP Communications Corporation customers based on these measurements is less than that provided to SWBT customers for three consecutive months, or if the average quality of service for a six month period is less than that provided to SWBT customers, IP Communications Corporation may request a service improvement meeting with SWBT.

8.1.8 For purposes of this Section, a Resale service is considered restored or a trouble resolved when the quality of a Resale service is equal to that provided before the outage or the trouble occurred.

## 9.0 Escalation Procedures

9.1 SWBT will provide IP Communications Corporation with written escalation procedures for maintenance resolution to be followed if, in IP Communications Corporation's judgment, any individual trouble ticket or tickets are not resolved in a timely manner. The escalation procedures to be provided hereunder shall include names and telephone numbers of SWBT management personnel who are responsible for maintenance issues. IP Communications Corporation acknowledges that the procedures set forth in SWBT's LOC POTS Escalation/Expedite Maintenance Procedures dated May 6, 1996, and LOC escalation contact list meet the requirements of this Section.

### 10.0 Premises Visit Procedures

10.1 SWBT Maintenance of Service Charges, when applicable, will be billed by SWBT to IP Communications Corporation, and not to IP Communications Corporation's end-user customers.

- 10.1.1 Dispatching of SWBT technicians to IP Communications Corporation Customer premises shall be accomplished by SWBT pursuant to a request received from IP Communications Corporation.
- 10.1.2 When a SWBT employee visits the premises of an IP Communications Corporation local customer in respect to installation, maintenance and repair services, the SWBT employee must inform the customer that he or she is there acting on behalf of IP Communications Corporation. Materials left at the customer premises (e.g., a door hanger notifying the customer of the service visit) must also inform the customer that SWBT was on their premises acting on behalf of IP Communications Corporation. "IP Communications Corporation branded" materials, to be utilized by SWBT installation, maintenance and/or repair technicians when dealing with IP Communications Corporation's customers, will be furnished to SWBT by and at the sole expense of IP Communications Corporation. SWBT will not rebrand its vehicles and personnel.
- 10.1.3 If a trouble cannot be cleared without access to IP Communications Corporation's local customer's premises and the customer is not at home, the SWBT technician will leave at the customer's premises an IP Communications Corporation-branded "no access" card requesting the customer to call IP Communications Corporation for rescheduling of repair.

## 11.0 New Circuit Testing

- 11.1 SWBT will perform testing (including trouble shooting to isolate any problems) of Resale services purchased by IP Communications Corporation in order to identify any new circuit failure performance problems. IP Communications Corporation will utilize routine maintenance procedures for reporting troubles.
- 11.2 Toolbar will be utilized by IP Communications Corporation on an interim basis until the full implementation of EBI in order to initiate and receive test results on POTS resale services.

## 12.0 Pricing

12.1 Prices for access to OSS covered by this Attachment are contained in Section 15 of Appendix Services/Pricing to Attachment 1: Resale.

# 13.0 Applicability of Other Rates, Terms and Conditions

13.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms

and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

## **ATTACHMENT 4: CONNECTIVITY BILLING -RESALE**

#### 1.0 General

This Attachment 4: Connectivity Billing-Resale describes the requirements for SWBT to bill all charges IP Communications Corporation incurs for purchasing Resale services.

## 2.0 Billable Information And Charges

- 2.1 In accordance with this Agreement, SWBT will bill those charges IP Communications Corporation incurs as a result of IP Communications Corporation purchasing Resale services from SWBT (hereinafter "Connectivity Charges"). Each bill for Connectivity Charges (hereinafter "Connectivity Bill") will be formatted in accordance with EDI for Resale services. IP Communications Corporation will translate the EDI formatted bills to meet CABS/BOS specifications. SWBT will assist IP Communications Corporation with EDI mapping. Each Billing Account Number (BAN) will be sufficient to enable IP Communications Corporation to identify the Resale services ordered by IP Communications Corporation to which Connectivity Charges apply. Each Connectivity Bill, including Auxiliary Service Information, will set forth the quantity and description of Resale services provided and billed to IP Communications Corporation.
- 2.2 SWBT will provide IP Communications Corporation a monthly Connectivity Bill that includes all Connectivity Charges incurred by and credits and/or adjustments due to IP Communications Corporation for those Resale services ordered, established, utilized, discontinued or performed pursuant to this Agreement. Each Connectivity Bill, including Auxiliary Service Information, provided by SWBT to IP Communications Corporation will include: (1) all non-usage sensitive charges incurred for the period beginning with the day after the current bill date and extending to, and including, the next bill date; (2) any known unbilled non-usage sensitive charges for prior periods; (3) unbilled usage sensitive charges for the period beginning with the last bill date and extending up to, but not including, the current bill date; (4) any known unbilled usage sensitive charges for prior periods; (5) any known unbilled adjustments; and (6) any Customer Service Record (CSR) for all flat-rated charges.
- 2.3 The Bill Date, as defined herein, must be present on each bill transmitted by SWBT to IP Communications Corporation. Connectivity Bills will not be rendered for any Connectivity Charges which are incurred under this Agreement on or before one (1) year preceding the Bill Date.
- 2.4 Each Party will provide the other Party at no charge a contact person for the handling of any Connectivity Billing questions or problems that may arise during the implementation

and performance of the terms and conditions of this Attachment 4: Connectivity Billing - Resale.

2.5 SWBT and IP Communications Corporation have mutually agreed that SWBT will provide a BAN for each billing period for Residence end-users within a RAO and a BAN for each billing period for Business within the RAO.

### 3.0 Issuance of Connectivity Bills - General

- SWBT will issue all Connectivity Bills in accordance with the terms and conditions set 3.1 forth in this Section. SWBT will establish monthly billing dates (Bill Date) for each BAN, as further defined in the EDI/BOS document, which Bill Date will be the same date month to month. Each BAN will be provided in 13 alpha/numeric characters and will remain constant from month to month, unless changed as agreed to by the Parties. Each Party will provide the other Party at least thirty (30) calendar days written notice prior to changing, adding or deleting a BAN. The Parties will provide one Connectivity Billing invoice associated with each BAN. Multiple BANs for each Regional Accounting Office (RAO) will be provided as part of a single EDI transmission. All Connectivity Bills must be received by IP Communications Corporation no later than ten (10) calendar days from Bill Date and at least twenty (20) calendar days prior to the payment due date (as described in this Attachment 4: Connectivity Billing - Resale), whichever is earlier. Any Connectivity Bill received on a Saturday, Sunday or a day designated as a holiday by the Chase Manhattan Bank of New York (or such other bank as the Parties agree) will be deemed received the next business day. If IP Communications Corporation fails to receive Connectivity Billing data and information within the time period specified above, the payment due date will be extended by the number of days the Connectivity Bill is late.
- 3.2 If IP Communications Corporation requests an additional copy(ies) of a bill, IP Communications Corporation will pay SWBT a reasonable fee per additional bill copy, unless such copy(ies) was requested due to errors, omissions, or corrections, or the failure of the original transmission to comply with te specifications set forth in this Agreement.
- 3.3 To avoid transmission failures or the receipt of Connectivity Billing information that cannot be processed, the Parties will provide each other with their respective process specifications and edit requirements. IP Communications Corporation will provide SWBT reasonable (within 24 hours) notice if a Connectivity Billing transmission is received that does not meet the specifications in this Attachment. Such transmission will be corrected and resubmitted to IP Communications Corporation at SWBT's sole expense, in a form that can be processed. The payment due date for such resubmitted transmissions will be twenty (20) days from the date that the transmission is received in a form that can be processed and that meets the specifications set forth in this Attachment 4: Connectivity Billing Resale.

### 4.0 Electronic Transmissions

4.1 SWBT will electronically transmit Connectivity Billing information and data for Resale services in the appropriate EDI format via Connect: Direct as outlined in SWBT's Electronic Commerce Customer Guide dated May 1995, or as the Parties may otherwise agree. The Parties agree that a T1.5 or 56kb circuit to the gateway for Connect: Direct is required. If SWBT has an established Connect: Direct link with IP Communications Corporation, that link can be used for data transmission if the location and applications are the same for the existing link. Otherwise, a new link for data transmission must be established. SWBT and IP Communications Corporation will provide each other appropriate Connect: Direct Node IDs. Any change to either Party's Connect: Direct Node IDs must be sent to the other Party no later than twenty-one (21) calendar days before the change takes effect.

# 5.0 Tape or Paper Transmissions

In the event either Party does not have Connect: Direct capabilities upon the Effective Date of this Agreement, such Party agrees to establish Connect: Direct transmission capabilities with the other Party within the time period mutually agreed and at the establishing Party's expense. Until such time, the Parties will transmit billing information to each other via magnetic tape or paper (as agreed to by IP Communications Corporation and SWBT). Connectivity billing information and data for payment contained on magnetic tapes or paper will be sent to the Parties at the following locations. The Parties acknowledge that all tapes transmitted to the other Party via U.S. Mail or Overnight Delivery and which contain Connectivity Billing data will not be returned to the sending Party.

#### **TO IP Communications Corporation:**

| Tape Transmissions via U.S. Mail:             | IP Communications Corporation Sean Minter/President & Chief Operating Officer 17300 Preston Road, Suite 300 Dallas, TX 75252 |
|---|--|
| Tape Transmissions via<br>Overnight Delivery: | IP Communications Corporation Sean Minter/President & Chief Operating Officer 17300 Preston Road, Suite 300 Dallas, TX 75252 |

| Paper Transmissions via U.S. Mail:            | IP Communications Corporation Sean Minter/President & Chief Operating Officer 17300 Preston Road, Suite 300 Dallas, TX 75252 |
|---|--|
| Paper Transmissions via<br>Overnight Delivery | IP Communications Corporation Sean Minter/President & Chief Operating Officer 17300 Preston Road, Suite 300 Dallas, TX 75252 |

The Parties will develop the format for paper or tape transmission as part of the implementation process.

## 6.0 Testing Requirements

6.1 At least ninety (90) days prior to SWBT sending IP Communications Corporation a mechanized Connectivity Bill for the first time via electronic transmission, or tape, or at least 30 days prior to changing mechanized formats, SWBT will send to IP Communications Corporation Connectivity Bill data in the appropriate mechanized format for testing to ensure that the bills can be processed and that the bills comply with the requirements of this Attachment 4: Connectivity Billing - Resale. The Parties will mutually agree to develop a testing process to ensure the accurate transmission of the Connectivity Bill. When SWBT meets mutually agreed testing specifications, SWBT may begin sending IP Communications Corporation mechanized Connectivity Bills on the next Bill Date, or within ten (10) days, whichever is later.

# 7.0 Additional Requirements

SWBT agrees that if it transmits data to IP Communications Corporation in a mechanized format, SWBT will also comply with the following specifications which are not contained in EDI/BOS guidelines but which are necessary for IP Communications Corporation to process Connectivity Billing information and data:

- a) the BAN shall not contain embedded spaces or low values;
- b) the Bill Date shall not contain spaces or non-numeric values;
- c) each Connectivity Bill must contain at least one detail record;
- d) any "From" Date should be less than the associated "Thru" Date and neither date can contain spaces.

### 8.0 Bill Accuracy Certification

The Parties agree that in order to ensure the proper performance and integrity of the entire Connectivity Billing process, SWBT will be responsible for transmitting to IP Communications Corporation an accurate and current bill. For the purposes of this Agreement, IP Communications Corporation and SWBT will develop the processes and methodologies required for Resale services bill certification.

## 9.0 Payment Of Charges

- 9.1 Subject to the terms of this Agreement, IP Communications Corporation and SWBT will remit the billed amount within thirty (30) calendar days from the Bill Date, or twenty (20) calendar days from the receipt of the bill, whichever is later. If the payment due date is a Sunday or is a Monday that has been designated a bank holiday by the Chase Manhattan Bank of New York (or such other bank as the Parties agree), payment will be made the next business day. If the payment due date is a Saturday or is on a Tuesday, Wednesday, Thursday or Friday that has been designated a bank holiday by the Chase Manhattan Bank of New York (or such other bank as the Parties agree), payment will be made on the preceding business day.
- Payments will be made in U.S. Dollars via electronic funds transfer (EFT) to the other Party's bank account. At least thirty (30) days prior to the first transmission of Connectivity Billing data and information for payment, SWBT and IP Communications Corporation will provide each other the name and address of their respective banks, their respective accounts and routing numbers and to whom Connectivity Billing payments should be made payable. If such banking information changes, each Party will provide the other Party at least sixty (60) days written notice of the change and such notice will include the new banking information. The Parties will electronically transfer funds and remittances via automated clearinghouse (ACH) standard EDI transaction sets. In the event IP Communications Corporation receives multiple Connectivity Bills from SWBT which are payable on the same date, IP Communications Corporation may remit one payment for the sum of all Connectivity Bills payable to SWBT's bank account specified in this subsection. Each party will provide the other party with a contact person for the handling of Connectivity Billing payment questions or problems.

#### 10.0 Examination Of Records

Without waiver of and in addition to the Audit rights in the General part of this Agreement, upon reasonable notice and at reasonable times, IP Communications Corporation or its authorized representatives may examine SWBT s documents, systems, records and procedures which relate to the billing of the Connectivity Charges to IP Communications Corporation under this Attachment 4: Connectivity Billing - Resale.

### 11.0 Pricing

11.1 Prices for access to OSS covered by this Attachment are contained in Section 15 of Appendix Services/Pricing to Attachment 1: Resale.

### 12.0 Applicability of Other Rates, Terms and Conditions

\*Every interconnection, service and network element provided hereunder, shall be subject 12.1 to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

### ATTACHMENT 5: PROVISION OF CUSTOMER USAGE DATA-RESALE

#### 1.0 Introduction

1.1 This Attachment sets forth the terms and conditions for SWBT's provision of Usage Data (as defined in this Attachment) to IP Communications Corporation. Usage Data will be provided by SWBT to IP Communications Corporation when IP Communications Corporation purchases Resale services from SWBT.

# 2.0 General Requirements for Usage Data

- 2.1 SWBT's provision of Usage Data to IP Communications Corporation will be in accordance with performance metrics to be developed by IP Communications Corporation and SWBT during and as part of the implementation and testing process. SWBT's performance based on such performance metrics will be measured and reported at the time IP Communications Corporation begins providing local service to customers, but SWBT's provision of Usage Data will not be required to meet such performance metrics until six months after IP Communications Corporation begins providing local services to customers.
- 2.2 SWBT will retain Usage Data in accordance with AT&T Customer Usage Data Transfer Requirements, March 1996 (Data Requirements), subject to applicable laws and regulations.

# 3.0 Usage Data Specifications

- 3.1 SWBT will provide usage data for IP Communications Corporation Customers using SWBT-provided Resale services. Usage Data includes, but is not limited to, the following categories of information:
  - a) completed calls;
  - b) use of CLASS/LASS/Custom Features;
  - c) calls to Directory Assistance where SWBT provides such service to an IP Communications Corporation customer;
  - d) calls completed via SWBT provided Operator Services where SWBT provides such service to IP Communications Corporation's Local Service customer;
  - e) station level detail for SWBT provided CENTREX and PLEXAR families of services:

- f) complete call detail and complete timing information for Resale services.
- SWBT will provide Usage Data for completed calls only for service offerings that SWBT records for itself (e.g., Local Measured Services).
- 3.2 SWBT will provide Usage Data to IP Communications Corporation only for IP Communications Corporation Customers. SWBT will not submit other carriers' local usage data as part of the IP Communications Corporation Usage Data.

## 4.0 Usage Data Format

- 4.1 SWBT will provide Usage Data in the EMR format and by category, group and record type, as specified in the AT&T Customer Usage Data Transfer Requirements, March 1996 (Data Requirements), or as otherwise agreed to by the Parties.
- 4.2 SWBT will include the Working Telephone Number (WTN) of the call originator on each EMR call record.
- 4.3 End user customer usage records and station level detail records will be in packs in accordance with EMR standards.

### 5.0 Usage Data Reporting Requirements

- 5.1 SWBT will segregate and organize the Usage Data in a manner agreeable to both Parties.
- 5.2 SWBT will provide Usage Data for Resale services to IP Communications Corporation locations as agreed to by the Parties.
- 5.3 SWBT will transmit formatted Usage Data to IP Communications Corporation via CONNECT: Direct or as otherwise agreed to by the Parties.
- 5.4 IP Communications Corporation and SWBT will test and certify the CONNECT: Direct interface to ensure the accurate transmission of Usage Data. IP Communications Corporation will pay to SWBT a per message charge of three tenths of one cent (\$.003) for SWBT's transmission of usage data to IP Communications Corporation.
- 5.5 SWBT will provide Usage Data to IP Communications Corporation daily (Monday through Friday) on a daily time schedule to be determined by the Parties.
- 5.6 SWBT will establish a single point of contact to respond to IP Communications Corporation call usage, data error, and record transmission inquiries.
- 5.7 The Usage Data EMR format, content, and transmission process will be tested by April 1997 or as otherwise mutually agreed to by both Parties.

#### 6.0 Pricing

6.1 SWBT will bill and IP Communications Corporation will pay the applicable charges for Usage Data set forth in this Agreement. Billing and payment will be in accordance with the applicable terms and conditions set forth in this Agreement.

### 7.0 Alternatively Billed Calls

- 7.1 Calls that are placed using the services of SWBT or another LEC or LSP and billed to a Resale service line of IP Communications Corporation are called "Incollects." Calls that are placed using IP Communications Corporation Resale service and billed to a SWBT line or other LEC or LSP are called "Outcollects."
- 7.2 Outcollects: SWBT will provide to IP Communications Corporation the unrated message detail that originates from an IP Communications Corporation subscriber line but which is billed to a telephone number other than the originating number (e.g., calling card, bill-SWBT will transmit such data to IP to-third number, etc.) (Outcollects). Communications Corporation on a daily basis. IP Communications Corporation as the LSP will be deemed the earning company and will be responsible for rating the message at IP Communications Corporation tariffed rates and IP Communications Corporation will be responsible for providing the billing message detail to the billing company for end-user billing. IP Communications Corporation will pay to SWBT a per message charge of three tenths of one cent (\$.003) for SWBT's transmission of outcollect messages to IP Communications Corporation. IP Communications Corporation will be compensated by the billing company for the revenue it is due. In addition, IP Communications Corporation will compensate SWBT for the receipt of the intraLATA toll message in accordance with Attachment 1: Resale of this Agreement.
- 7.3 Incollects: SWBT will provide the rated messages it receives from the CMDS1 network to IP Communications Corporation for billing to IP Communications Corporation's endusers associated with messages that originate from a number other than the billing number and that are billable to IP Communications Corporation customers ("Incollects"). SWBT will transmit such data to IP Communications Corporation on a daily basis. SWBT will credit IP Communications Corporation the Billing and Collection (B&C) fee for billing the Incollects. The B&C credit will be provided in accordance with the procedures set forth in Attachment 4:Connectivity Billing-Resale of this Agreement and the credit will be \$.05 per billed message. IP Communications Corporation will pay to SWBT a per message charge of three tenths of one cent (\$.003) for SWBT's transmission of incollect messages to IP Communications Corporation.

#### 8.0 Local Account Maintenance

- 8.1 When IP Communications Corporation purchases Resale services from SWBT, SWBT will provide IP Communications Corporation with local account maintenance as described in Local Account Maintenance Methods and Procedures dated July 29, 1996, or as otherwise may be agreed to by the Parties. These procedures are in addition to the service order procedures set forth in Attachment 2: Ordering and Provisioning-Resale to the Agreement. SWBT's provision of local account maintenance data will be in accordance with Performance Metrics to be developed by IP Communications Corporation and SWBT during and as part of the implementation and testing process. Such Performance Metrics will address issues of timeliness, accuracy and completeness. SWBT's performance based on such Performance Metrics will be measured and reported at the time IP Communications Corporation begins providing local service to customers, but SWBT's provision of local account maintenance data will not be required to meet such Performance Metrics until six months after IP Communications Corporation begins providing Resale services to customers.
- 8.2 When any IP Communications Corporation local service customer changes their local service provider to another LSP or SWBT, IP Communications Corporation will be notified as described in the LSP notification change process, contained in Local Account Maintenance Methods and Procedures, dated July 29, 1996, or as otherwise agreed to by the parties. IP Communications Corporation will pay to SWBT a per transaction charge of eight cents (\$0.08) for each WTN transmitted for SWBT's transmission of the change notification.

## 9.0 Pricing

9.1 Prices for access to OSS covered by this Attachment are contained in Section 15 of Appendix Services/Pricing to Attachment 1: Resale.

## 10.0 Applicability of Other Rates, Terms and Conditions

10.1 \*Every interconnection, service and network element provided hereunder, shall be subject to all rates, terms and conditions contained in this Agreement which are legitimately related to such interconnection, service or network element. Without limiting the general applicability of the foregoing, the following terms and conditions of the General Terms and Conditions are specifically agreed by the Parties to be legitimately related to, and to be applicable to, each interconnection, service and network element provided hereunder: definitions; interpretation, construction and severability; notice of changes; general responsibilities of the Parties; effective date, term and termination; fraud; deposits; billing and payment of charges; non-payment and procedures for disconnection; dispute resolution; audits; disclaimer of representations and warranties; limitation of liability; indemnification; remedies; intellectual property; publicity and use of trademarks or service marks; no license; confidentiality; intervening law; governing law; regulatory

approval; changes in End User local exchange service provider selection; compliance and certification; law enforcement; no third party beneficiaries; disclaimer of agency; relationship of the Parties/independent contractor; subcontracting; assignment; responsibility for environmental contamination; force majeure; taxes; non-waiver; network maintenance and management; signaling; transmission of traffic to third parties; customer inquiries; expenses; conflicts of interest; survival; scope of agreement; amendments and modifications; and entire agreement.

#### ATTACHMENT 6: UNBUNDLED NETWORK ELEMENTS

#### 1.0 Introduction

This Attachment 6: Unbundled Network Elements to the Agreement sets forth the unbundled Network Elements that SWBT agrees to offer to IP Communications Corporation. The specific terms and conditions that apply to the unbundled Network Elements are described below. The price for each Network Element is set forth in Appendix Pricing -UNE - Schedule of Prices, attached hereto, and elsewhere in this Agreement.

#### 2.0 General Terms and Conditions

- 2.1 SWBT will permit IP Communications Corporation to designate any point at which it wishes to connect IP Communications Corporation's facilities or facilities provided by a third party on behalf of IP Communications Corporation with SWBT's network for access to unbundled Network Elements for the provision by IP Communications Corporation of a Telecommunications Service. If the point designated by IP Communications Corporation is technically feasible, SWBT will make the requested connection.
- When IP Communications Corporation orders UNEs that it intends to use in combination and, in addition to specifying the elements being ordered, identifies to SWBT the type of telecommunications service it intends to deliver to its enduser customer through that combination (e.g., POTS, ISDN), SWBT will provide the requested elements with all the functionality, and with at least the same quality of performance and operations systems support (ordering, provisioning, maintenance, billing and recording), that SWBT provides through its own network to its local exchange service customers receiving equivalent service, unless IP Communications Corporation requests a lesser quality of performance through the special request process. This section does not impose any performance measurements and/or standards requirement beyond those provided for in Attachment 17.
- 2.3 IP Communications Corporation may use one or more Network Elements to provide any technically feasible feature, function, or capability that such Network Element(s) may provide.
- 2.4 SWBT will provide IP Communications Corporation access to the unbundled Network Elements provided for in this Attachment, including combinations of Network Elements, without restriction. IP Communications Corporation is not required to own or control any of its own local exchange facilities before it can

000276

purchase or use unbundled Network Elements to provide a Telecommunications Service under this Agreement. SWBT will allow IP Communications Corporation to order each Network Element individually or in combination with any other Network Elements, pursuant to Attachment 7, in order to permit IP Communications Corporation to combine such Network Elements with other Network Elements obtained from SWBT or with network components provided by itself or by third parties to provide Telecommunications Services to its customers, provided that such combination is technically feasible and would not impair the ability of other carriers to obtain access to other unbundled network elements or to interconnect with SWBT's network. Any request by IP Communications Corporation for SWBT to provide a type of connection between Network Elements that is not currently being utilized in the SWBT network and is not otherwise provided for under this Agreement will be made in accordance with the Special Request process described in Section 2.21.

- 2.5 For each Network Element, to the extent appropriate, SWBT will provide a demarcation point (e.g., an interconnection point at a Digital Signal Cross Connect or Light Guide Cross Connect panels or a Main Distribution Frame) and, if necessary, access to such demarcation point, as the Parties agree is suitable. However, where SWBT provides contiguous Network Elements to IP Communications Corporation, SWBT may provide the existing interconnections.
- Various subsections below list the Network Elements that IP Communications Corporation and SWBT have identified as of the Effective Date of this Agreement. SWBT will upon request of IP Communications Corporation and to the extent technically feasible provide IP Communications Corporation additional Network Elements or modifications to previously identified Network Elements for the provision by IP Communications Corporation of a Telecommunications Service. Such requests will be processed in accordance with the Special Request process.
- 2.7 Subject to the terms herein, SWBT is responsible only for the installation, operation and maintenance of the Network Elements it provides. SWBT is not otherwise responsible for the Telecommunications Services provided by IP Communications Corporation through the use of those elements.
- 2.8 Except upon request, SWBT will not separate requested network elements that SWBT currently combines.
- 2.9 Where unbundled elements provided to IP Communications Corporation are dedicated to a single end user, if such elements are for any reason disconnected

they will be made available to SWBT for future provisioning needs, unless such element is disconnected in error.

- 2.10 The Parties acknowledge that the State Commission may decline to require unbundling of Network Elements beyond those identified in 47 CFR Section 51.319 only if the Commission concludes that: (1) such Network Element is proprietary or contains proprietary information that will be revealed if such Network Element is provided to IP Communications Corporation on an unbundled basis, and IP Communications Corporation could offer the same proposed Telecommunications Service through the use of other, nonproprietary Network Elements within SWBT's network; or (2) the Commission concludes that the failure of SWBT to provide access to such Network Element would not decrease the quality of, and would not increase the financial or administrative cost of, the Telecommunications Service IP Communications Corporation seeks to offer, compared with providing that service over other unbundled Network Elements in SWBT's network.
- 2.11 Each Party is solely responsible for the services it provides to its end users and to other Telecommunications Carriers.
- SWBT will provide IP Communications Corporation reasonable notification of service-affecting activities that may occur in normal operation of SWBT's business. Such activities may include, but are not limited to, equipment or facilities additions, removals or rearrangements, routine preventative maintenance and major switching machine change-out. Generally, such activities are not individual service specific, but affect many services. No specific advance notification period is applicable to all such service activities. Reasonable notification procedures will be negotiated by SWBT and IP Communications Corporation.
- 2.13 The use of the term "purchase" herein notwithstanding, network elements provided to IP Communications Corporation under the provisions of this Attachment will remain the property of SWBT.
- 2.14 The elements provided pursuant to this Agreement will be available to SWBT at times mutually agreed upon in order to permit SWBT to make tests and adjustments appropriate for maintaining the services in satisfactory operating condition. No credit will be allowed for any interruptions involved during such tests and adjustments.
- 2.15 IP Communications Corporation's use of any SWBT network element, or of its own equipment or facilities in conjunction with any SWBT network element, will not materially interfere with or impair service over any facilities of SWBT, its 000278

affiliated companies or its connecting and concurring carriers involved in its services, cause damage to their plant, impair the privacy of any communications carried over their facilities or create hazards to the employees of any of them or the public. Upon reasonable written notice and opportunity to cure, SWBT may discontinue or refuse service if IP Communications Corporation violates this provision, provided that such termination of service will be limited to IP Communications Corporation's use of the element(s) causing the violation.

2.16 SWBT and IP Communications Corporation will negotiate to develop network contingency plans in order to maintain maximum network capability following natural or man-made disasters and catastrophic network failures (e.g., interoffice cable cuts and central office power failure) which affect their telecommunications services. These plans will provide for restoration and disaster recovery for IP Communications Corporation customers at least equal to what SWBT provides for its customers and will allow IP Communications Corporation to establish restoration priority among IP Communications Corporation customers consistent with applicable law.

#### 2.17 Performance of Network Elements

- 2.17.1 Each Network Element provided by SWBT to IP Communications Corporation will meet applicable regulatory performance standards and be at least equal in quality and performance as that which SWBT provides to itself. Each Network Element will be provided in accordance with SWBT Technical Publications or other written descriptions, as changed from time to time by SWBT at its sole discretion, to the extent consistent with the Act and subject to Sections 2.17.2 2.17.6. Such publications will be shared with IP Communications Corporation and SWBT will provide IP Communications Corporation with the opportunity to comment. IP Communications Corporation may request, and SWBT will provide, to the extent technically feasible, Network Elements that are lesser in quality than SWBT provides to itself and such service will be requested pursuant to the Special Request process.
- 2.17.2 SWBT will provide a SWBT Technical Publication or other written description for each Network Element offered under this Agreement. The Technical Publication or other description for an Element will describe the features, functions, and capabilities provided by the Element as of the time the document is provided to IP Communications Corporation. No specific form for the Technical Publication or description is required, so long as it contains a reasonably complete and specific description of the Element's capabilities. The Technical Publication or other description may be accompanied by reference to vendor equipment and software specifications applicable to the Element.

- 2.17.3 Nothing in this Agreement will limit either Party's ability to modify its network through the incorporation of new equipment, new software or otherwise. Each Party will provide the other Party written notice of any such upgrades in its network which will materially impact the other Party's service consistent with the timelines established by the FCC in the Second Report and Order, CC Docket 96-98. IP Communications Corporation will be solely responsible, at its own expense, for the overall design of its telecommunications services and for any redesigning or rearrangement of its telecommunications services which may be required because of changes in facilities, operations or procedure of SWBT, minimum network protection criteria, or operating or maintenance characteristics of the facilities.
- 2.17.4 Where SWBT is required to provide six or twelve month notice to IP Communications Corporation pursuant to Section 2.17.3, IP Communications Corporation may submit a request within thirty (30) days of IP Communications Corporation's receipt of a notice of planned network modification, to maintain characteristics of affected elements. Where SWBT is permitted to provide less than six months notice, IP Communications Corporation may submit such request within ten days of IP Communications Corporation's receipt of SWBT's notice. To the extent the requested characteristics are specifically provided for in this Attachment, Technical Publication or other written description, SWBT, at its own expense, will be responsible for maintaining the functionality and required characteristics of the elements purchased by IP Communications Corporation, including any expenses associated with changes in facilities, operations or procedure of SWBT, network protection criteria, or operating or maintenance characteristics of the facilities. To the extent requested characteristics are not specifically provided for therein, IP Communications Corporation's request will be considered under the Special Request Process and the process will be completed prior to modifying IP Communications Corporation's affected element.
- 2.17.5 For elements purchased through the Special Request Process, SWBT, in its discretion, will determine whether it can offer the applicability of the preceding paragraph on a case by case basis.
- 2.17.6 For each Network Element provided for in this Attachment, SWBT Technical Publications or other written descriptions meeting the requirements of this section will be made available to IP Communications Corporation as of the Effective Date of this Agreement.
- 2.17.7 SWBT will provide Performance Measurements as outlined in Attachment 17 under this Agreement.

- 2.18 If one or more of the requirements set forth in this Attachment are in conflict, the Parties will jointly elect which requirement will apply.
- 2.19 SWBT will not collect intrastate or interstate access charges from IP Communications Corporation when it purchases unbundled network elements.
- When IP Communications Corporation purchases unbundled network elements to provide interexchange services or exchange access services, SWBT will not collect access charges from IP Communications Corporation or other interexchange carriers (IXC's) (except for charges for exchange access transport services that an IXC elects to purchase from SWBT).
- 2.21 IP Communications Corporation will connect equipment and facilities that are compatible with the SWBT Network Elements and will use Network Elements in accordance with the applicable regulatory standards and requirements referenced in Section 2.17.

## 2.22 Special Request

The Sections below identify unbundled Network Elements and provide terms and conditions on which SWBT will offer them to IP Communications Corporation: Network Interface device; local loop; local switching; tandem switching; operator services and directory assistance; interoffice transport, including common transport and dedicated transport; signaling and call-related databases; operations support systems functions; cross connects (including loop cross-connects with and distribution: without testing equipment): loop loop feeder: concentrator/multiplexer. Any request by IP Communications Corporation for an additional unbundled Network Element will be considered under the procedures set forth below. Where facilities and equipment are not available, IP Communications Corporation may request and, to the extent required by law and as SWBT may otherwise agree, SWBT will provide Network Elements through the Special Request process.

- 2.22.1 Each Party will promptly consider and analyze access to a new unbundled Network Element with the submission of a Network Element Special Request hereunder. The Network Element Special Request process set forth herein does not apply to those services requested pursuant to Report & Order and Notice of Proposed Rulemaking 91-141 (rel. Oct. 19, 1992) paragraph 259 and n. 603 and subsequent rulings.
- 2.22.2 A Network Element Special Request will be submitted in writing and will include a technical description of each requested Network Element, the date when

interconnection is requested and the projected quantity of interconnection points ordered with a demand forecast.

- 2.22.3 IP Communications Corporation may cancel a Network Element Special Request in a commercially reasonable manner.
- 2.22.4 Within ten (10) business days of its receipt, SWBT will acknowledge receipt of the Network Element Special Request.
- 2.22.5 Within thirty (30) days of its receipt of a Network Element Special Request, SWBT will provide to IP Communications Corporation a preliminary analysis of such Network Element Special Request. The preliminary analysis either will confirm that SWBT will accept the request and offer access to the Network Element, or the preliminary analysis will confirm that SWBT will not accept the request and will provide a detailed explanation that access to the Network Element is not technically feasible and/or that the request does not qualify as a Network Element that is required to be provided under the Act.
- 2.22.5.1 If SWBT does not accept the request within thirty (30) days, the issue may be presented to the Commission in accordance with the Arbitration Order dated December 11, 1996, in Case No. TO-97-40, as follows: IP Communications Corporation has twenty (20) days in which to file a petition with the Commission, seeking a determination that SWBT be required to provide the unbundled element. SWBT must respond within 20 days of the filing of the petition and demonstrate why it is technically infeasible to provide the UNE or why such provision violates network integrity.
- 2.22.6 If SWBT determines that the Network Element Special Request is technically feasible and otherwise qualifies under the Act, it will promptly proceed with developing the Network Element Special Request upon receipt of written authorization from IP Communications Corporation. When it receives such authorization, SWBT will promptly develop the requested services, determine their availability, calculate the applicable prices and establish installation intervals.
- 2.22.7 Unless the Parties otherwise agree, the Network Element Special Request must be priced in accordance with Section 252(d)(1) of the Act.
- 2.22.8 For a Network Element Special Request that has been accepted, then, as soon as feasible, but not more than sixty (60) days after receipt of the request, SWBT will provide to IP Communications Corporation a Network Element Special Request quote which will include, at a minimum, a description of each Network Element, the availability, the applicable rates and the installation intervals.

000282

- 2.22.9 Within thirty (30) days of its receipt of the Network Element Special Request quote, IP Communications Corporation must either confirm its order for the Network Element Special Request pursuant to the Network Element Special Request quote or seek arbitration by the Commission pursuant to Section 252 of the Act.
- 2.22.10 If a Party to a Network Element Special Request believes that the other Party is not requesting, negotiating or processing the Network Element Special Request in good faith, or disputes a determination, or price or cost quote, such Party may seek mediation or arbitration by the Commission pursuant to Section 252 of the Act.
- Whenever IP Communications Corporation submits the Special Request for any of the following elements: Local Loop, Local Switching; Tandem Switching; Operator Services and Directory Assistance; Interoffice Transport, including Common Transport and Dedicated Transport; Signaling and Call Related Databases; Operations Support Systems; and Cross Connects and the particular unbundled Network Elements requested is operational at the time of the request, but is not priced under this Agreement, SWBT will provide a price quote to IP Communications Corporation for that element within twenty days following receipt of IP Communications Corporation's request. If IP Communications Corporation does not agree to the price, IP Communications Corporation may submit the matter within ten days for determination by the Commission in accordance with Section 2.22.5.1 of this Attachment.
- 2.22.12 Pursuant to the Arbitration Order dated December 11, 1996, in Case No. TO-97-40, both Parties will report to the Commission six months prior to the expiration of this Agreement on the effectiveness and efficiency of the Special Request process.
- 2.23 The provisions of this agreement that require SWBT not to separate unbundled network elements that are already combined when ordered (e.g., Attachment 6, Section 2.8), will remain in effect, independent of the decisions of the United States Court of Appeals for the 8<sup>th</sup> Circuit in Iowa Utilities Board v. FCC.
- The provisions of this agreement that require SWBT to combine unbundled network elements for IP Communications Corporation (e.g., Attachment 6, Section 11.2, Attachment 7, Section 1.5.1) will remain in effect, independent of the decisions of the United States Court of Appeals for the 8th Circuit in Iowa Utilities Board v. FCC.

2.25

IP Communications Corporation and SWBT will engage in good faith negotiations to establish terms and conditions under which SWBT will provide IP Communications Corporation with nondiscriminatory access to its network facilities to enable IP Communications Corporation to combine unbundled network elements purchased from SWBT. The terms and conditions to be discussed in these negotiations will include, without limitation, the following: nondiscriminatory direct access to SWBT network facilities for effecting physical connections between elements; nondiscriminatory access to OSS Systems to effect electronic combining of elements, including any required systems development; terms for coordinating IP Communications Corporation and SWBT activities related to combining elements to minimize service interruptions to end user customers; capability to enable IP Communications Corporation and other LSPs to provision combinations to effect customer conversions and new service turn-ups in commercial quantities; and performance measures relevant to the terms and conditions of combining. The parties will report progress on these negotiations to the MPSC on May 1, 1998 and October 1, 1998. Following the October 1, 1998 progress filing, either party may request the MPSC to resolve any disputes regarding the terms and conditions of network access to be provided to IP Communications Corporation for combining elements and to resolve any dispute whether the terms of this agreement that require SWBT to connect elements for IP Communications Corporation (e.g. Attachment 6, Section 11.2) or that prohibits SWBT from separating elements that are currently combined (e.g. Attachment 6, Section 2.8) should be modified.

## 3.0 Network Interface Device

3.1 The Network Interface Device (NID) is a cross-connect used to connect loop facilities to inside wiring. The fundamental function of the NID is to establish the official network demarcation point between a carrier and its end-user customer. The NID contains the appropriate and accessible connection points or posts to which the service provider and the end-user customer each make its connections.

3.2 IP Communications Corporation personnel may connect to the customer's inside wire at the SWBT NID, as is, at no charge. Should IP Communications Corporation request SWBT to disconnect its loop from the customer's inside wire, SWBT will charge IP Communications Corporation a non recurring charge as reflected on Appendix Pricing UNE - Schedule of Prices labeled as "Disconnect Loop from Inside Wiring per NID". Any repairs, upgrades and rearrangements (other than loop disconnection addressed in the preceding sentence) required by IP Communications Corporation will be performed by SWBT based on Time and Materials charges as reflected on Appendix Pricing UNE - Scheduled Prices labeled "Time and Materials Charges".

- 3.3 To the extent a SWBT NID exists, it will be the interface to customers' premises wiring unless IP Communications Corporation and the customer agree to an interface that bypasses the SWBT NID.
- For single-unit and small business locations, IP Communications Corporation will be allowed direct connections to SWBT's NID where spare slots are available. Otherwise, IP Communications Corporation will provide its own NID and will interface to the customer's premises wiring through connections in the customer chamber, if available, of the SWBT NID, unless IP Communications Corporation and the customer agree to an alternate interface as provided for in Section 3.3.
- 3.5 With respect to multiple dwelling units or multiple-unit business premises where the NID is easily accessible, IP Communications Corporation will provide its own NID, will connect directly with the customer's inside wire and will not require any connection to the SWBT NID, unless such premises are served by "single subscriber" type NIDs. For businesses and apartment locations where the customer's wiring is not accessible outside of the SWBT NID, SWBT should rearrange its NID to allow IP Communications Corporation access to the inside wiring.
- 3.6 The SWBT NIDs that IP Communications Corporation uses under this Attachment will be those installed by SWBT to serve its customers.
- 3.7 IP Communications Corporation will not attach to or disconnect SWBT's ground. IP Communications Corporation will not cut or disconnect SWBT's loop from its protector. IP Communications Corporation will not cut any other leads in the NID. IP Communications Corporation will protect all disconnected leads with plastic sleeves and will store them within the NID enclosure. IP Communications Corporation will tighten all screws or lugs loosened by IP Communications Corporation in the NID's enclosure and replace all protective covers.

# 4.0 <u>Local Loop</u>

- 4.1 Definition: A "loop" is a dedicated transmission facility between a distribution frame (or its equivalent) in a SWBT central office and an end user customer premises.
- 4.2 SWBT will provide at the rates, terms, and conditions set out in Appendix Pricing-Unbundled Network Elements Schedule of Prices the types of unbundled loops in sections 4.2.1 through 4.2.4. When IP Communications Corporation orders an unbundled loop, IP Communications Corporation will be

provided a termination on whatever NID, if any, connects the loop to the customer premises, without additional charge.

- 4.2.1 The 2-Wire analog loop supports analog voice frequency, voice band services with loop start signaling within the frequency spectrum of approximately 300 Hz and 3000 Hz.
- 4.2.1.1 SWBT will offer 5 dB conditioning on a 2-wire analog loop as the standard conditioning option available.
- 4.2.2 The 4-Wire analog loop provides a non-signaling voice band frequency spectrum of approximately 300 Hz to 3000 Hz. The 4-Wire analog loop provides separate transmit and receive paths.
- 4.2.3 The 2-Wire digital loop 160 Kbps supports Basic Rate ISDN (BRI) digital exchange services. The 2-Wire digital loop 160 Kbps supports usable bandwidth up to 160 Kbps.
- 4.2.4 The 4-Wire digital loop 1.544 Mbps loop will support DS1 service including Primary Rate ISDN (PRI). The 4-wire digital loop 1.544 Mbps supports usable bandwidth up to 1.544 Mbps.
- 4.3 IP Communications Corporation may request and, to the extent technically feasible, SWBT will provide additional loop types and conditioning, including, without limitation, loops capable of carrying DS3 signals, pursuant to the Special Request process.
- When IP Communications Corporation owns or manages its own switch and requests an unbundled Loop to be terminated on IP Communications Corporation's switch and the requested loop is currently serviced by SWBT's Integrated Digital Loop Carrier (IDLC) or Remote Switching technology, SWBT will, where available, move the requested unbundled Loop(s) to a spare, existing physical or a universal digital loop carrier unbundled Loop at no additional charge to IP Communications Corporation. If, however, no spare unbundled Loop is available, SWBT will within forty-eight (48) hours, excluding weekends and holidays, of IP Communications Corporation's request notify IP Communications Corporation of the lack of available facilities. IP Communications Corporation may request alternative arrangements through the Special Request process. This requirement for moving the loop off of the IDLC does not apply when IP Communications Corporation orders a Loop/Switch port for use in combination from SWBT.

4.5 In addition to any liability provisions in this agreement, SWBT does not guarantee or make any warranty with respect to unbundled loops or entrance facilities when used in an explosive atmosphere. IP Communications Corporation will indemnify, defend and hold SWBT harmless from any and all claims by any person relating to IP Communications Corporation's or IP Communications Corporation end user's use of unbundled loops in an explosive atmosphere, excluding claims of gross negligence or willful or intentional conduct by SWBT.

### 4.6 Subloop Elements

4.6.1 SWBT will provide unbundled access to each of the following subloop elements: loop distribution; loop concentrator/multiplexer; and the loop feeder facilities. SWBT will provide IP Communications Corporation with unbundled access to any unused subloop element at all technically feasible locations. Also, if an end user requests that a SWBT service be replaced by an IP Communications Corporation service and IP Communications Corporation requests a subloop element that is then being used by SWBT to serve that end user, SWBT will make that subloop element available to IP Communications Corporation. These locations will generally be those where space is available, where SWBT currently has such elements terminated and from which terminations the subloop element would be cross-connected by SWBT in the course of providing or maintaining service.

## 4.6.2 Points of sub-loop unbundling

- 4.6.2.1 Typically, the local loop will be unbundled at the Feeder Distribution Interface (FDI). The local loop may also be unbundled at Remote Terminal (RT) appearances. That is, upon IP Communications Corporation's request and where technically feasible (e.g. space available), SWBT will terminate IP Communications Corporation's cable in SWBT's FDI/RT and perform subsequent cross connects in SWBT's FDI/RT to IP Communications Corporation's facilities. All work done within SWBT's FDI/RT will be done by SWBT personnel. IP Communications Corporation will pay for these terminations and cross connects at the rates reflected in Appendix Pricing UNE Schedule of Prices labeled "Time and Materials.
- 4.6.2.2 When IP Communications Corporation orders the distribution portion of the local loop or the feeder portion of the local loop and no FDI exists along the existing loop, the feeder element will be unbundled from the distribution element at the feeder/distribution splice (or point of transition where the cable facilities change from underground cable counts to aerial counts). In this situation and the situation where the existing FDI has insufficient capacity, a technically

appropriate device for interconnection (e.g., FDI or cable stubs) will be established at SWBT's option if SWBT reasonably determines that a technically appropriate device does not already exist. IP Communications Corporation will reimburse SWBT for the portion of the installation expenses reasonably required to provide interconnection to the sub-loop element ordered by IP Communications Corporation.

- When the loop is unbundled at the FDI there are only two subloop elements (not including the Network Interface Device NID), Loop Feeder and Loop Distribution. These elements will be available with the same electrical interfaces described in sections 4.2.1, 4.2.3, and 4.2.4 above.
- 4.6.4 Loop Feeder is defined as the portion of the loop from the Main Distribution Frame (MDF) in SWBT's Central Office (CO) to the FDI or from the MDF to the RT when IP Communications Corporation requests unbundling at the RT.
- 4.6.5 Loop Distribution is defined as the portion of the loop from the FDI to the Network Interface Device (NID) or from the RT to the NID when IP Communications Corporation requests unbundling of the loop at the RT.
- 4.6.6 When IP Communications Corporation purchases Loop Feeder and Loop Distribution, IP Communications Corporation will pay the appropriate prices in Appendix Pricing -UNE, Schedule of Prices under "Subloop Unbundling" labeled "Loop Feeder" and "Loop Distribution".
- 4.6.7 Whenever IP Communications Corporation requests subloop unbundling at a RT and wants to order only the Concentrator /Multiplexer to be separated from the Loop Feeder and Loop Distribution, such order will be handled through the Special Request Process.
- 4.6.8 IP Communications Corporation will be responsible for service surveillance and monitoring the loop with respect to those sub loop elements which IP Communications Corporation purchases.

## 5.0 Local Switching

Definition: The local switching element encompasses line-side and trunk side facilities plus the features, functions and capabilities of the switch. The line side facilities include the connection between a loop termination at, for example, a main distribution frame (MDF), and a switch line card. Trunk-side facilities include the connection between, for example, trunk termination at a trunk-side cross-connect panel and a trunk card. The local switching element includes all

features, functions, and capabilities of the local switch, including but not limited to the basic switching function of connecting lines to lines, lines to trunks, trunks to lines and trunks to trunks. It also includes the same basic capabilities that are available to SWBT customers, such as a telephone number, dial tone, signaling and access to 911, operator services, directory assistance, and features and functions necessary to provide services required by law. In addition, the local switching element includes all vertical features that the switch is capable of providing, including custom calling, CLASS features, and centrex-like capabilities, as well as any technically feasible customized routing, blocking/screening, and recording functions.

5.1.1 The local switching element also includes access to all call origination and completion capabilities (including intraLATA and interLATA calls), and IP Communications Corporation is entitled to all revenues associated with its use of those capabilities, including access and toll revenues.

### 5.2 Technical Requirements

- 5.2.1 SWBT will provide the local switching element so that the dialing plan associated with the port will be equal to the dialing plan established in the office for SWBT's own customers. When the established dialing plan calls for 10 digit dialing, it will apply equally to Unbundled Local Switching purchased by IP Communications Corporation.
- 5.2.2 Except as required to fulfill IP Communications Corporation requests for customized routing, SWBT's Local Switching element will route calls on SWBT's common network (i.e., Common Transport) to the appropriate trunk or lines for call origination or termination according to the same criteria that SWBT applies to its own calls.
- When IP Communications Corporation requests Customized Routing, either through Unbundled Local Switching or Resale, SWBT will route local operator and directory assistance calls to IP Communications Corporation's Operator Services and Directory Assistance platforms. In addition, at IP Communications Corporation's request, for the Unbundled Local Switching element, SWBT will route local calls to IP Communications Corporation designated facilities rather than to SWBT's common network.
- 5.2.3.1 Subject to the above, SWBT will provide Customized Routing with Unbundled Local Switching or Resale only according to the following conditions: Customized Routing will only be permitted on a class of call basis (i.e., all Directory Assistance Calls and/or all Operator Services calls (or all local calls for

Unbundled Local Switching only) must be routed to the same dedicated facility or facilities.) Provided that, for local calls over unbundled switching, IP Communications Corporation may establish dedicated transport facilities (either unbundled or through an alternate vendor) between SWBT end offices to route local traffic to those end offices. For each end office, ("terminating end office") to which IP Communications Corporation establishes such dedicated transport from a SWBT end office ("originating end office"), SWBT will selectively route local calls for the NXX code served by the terminating end office onto IP Communications Corporation's dedicated transport to that end office. Local calls for all NXX codes other than those served by terminating end offices to which selective routing has been established will be transported and terminated over SWBT's common transport network. IP Communications Corporation may request additional types of Customized Routing for local calls through the Special Request Process.

- 5.2.3.2 The establishment of customized routing in a SWBT end office will be subject to the rates and conditions specified on an individual case basis as reflected in Appendix Pricing UNE Schedule of Prices labeled as "Customized Routing".
- Pending Missouri Public Service Commission approval of the rates for customized routing, IP Communications Corporation will pay for customized routing on an interim basis at SWBT's proposed rates subject to true-up. When the Commission orders final cost based rates, should those rates differ from the interim rates, parties will remit the difference between the amount paid and the final rate within a reasonable period. In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms and conditions included in the Interconnection Agreement between the parties.
- 5.2.4 <u>Customized Routing of IP Communications Corporation Directory</u>
  Assistance and Operator Services
- Where IP Communications Corporation purchases Unbundled Local Switching or Resale and elects to provide Directory Assistance and Operator Services to its customers through its own Directory Assistance and Operator Services platforms, SWBT will provided the functionality and features required to route calls from IP Communications Corporation customers for Directory Assistance and Operator Services to IP Communications Corporation designated trunks for the provision of IP Communications Corporation Directory Assistance and Operator Services, in accordance with this Attachment.
- 5.2.4.2 SWBT intends to use AIN Customized Routing wherever it is available for use, if the customized routing so provided meets the requirements of the Act.

Customized routing through AIN technology will be available by December 31, 1997, subject to the limitations described in 5.2.4.2.1 below. Unless the Parties agree to a different schedule, SWBT will fulfill orders for particular customized routing arrangements using AIN within 30 work days following receipt from IP Communications Corporation of a completed customized routing end office order and acceptance of SWBT's price proposal developed on an individual case basis (ICB), consistent with Section 5.2.3.3 of this attachment, but in no event prior to the first work day of 1998. The customized routing end office order will detail the identity of the end office(s), the class(es) of call to be customized routed (i.e. operator services and directory assistance) and the trunk group(s) to which each class of call will be connected. SWBT will provide a price proposal no later than 10 days after receipt of the customized routing end office order.

- 5.2.4.2.1 Certain services (e.g. hotel/motel, coin services which require network provided coin signaling, ports using voice activated dialing in a 5ESS switch) cannot be customized routed through AIN technology and will require the use of line class codes for the provision of customized routing. Additionally, switches which are not SS7 compatible (i.e. DMS 10 switches) cannot customize route using AIN technology and will require the use of line class codes. SWBT will fulfill orders for particular customized routing arrangements using line class codes within 30 work days following receipt from IP Communications Corporation of a completed customized routing line class code order and acceptance of SWBT's price proposal developed on an individual case basis (ICB) consistent with Section 5.2.3.3 of this attachment. The customized routing line class code order will detail the identity of the end office, the class of call to be customized routed (i.e. operator services or directory assistance), the trunk group(s) to which each class of call will be connected and such other information as is reasonably required to complete the order. SWBT will provide the price proposal not longer than 10 days after receipt of the customized routing order.
- 5.2.4.3 SWBT will make available to IP Communications Corporation the ability to route all Directory Assistance and Operator Services calls (1+411, 0+411, 0-, and 0+ Local, 0+ IntraLATA toll (prior to dual PIC), 0+HNPA-555-1212 (IntraLATA) (prior to dual PIC) dialed by IP Communications Corporation Customers directly to the IP Communications Corporation Directory Assistance and Operator Services platform. Customized routing will not be used in a manner to circumvent the inter or IntraLATA PIC process directed by the FCC.
- 5.2.4.4 SWBT does not currently have the ability to translate 1+411 to another number or the ability to change signaling associated with the custom routed call type. At IP Communications Corporation's request, SWBT will attempt to develop a suitable method of providing the necessary digit translation and signaling protocol

conversion to allow conversion of 1+411 directory assistance calls to a 1+900+XXX+XXXX format in order to provide customized routing of directory assistance calls to a destination selected by IP Communications Corporation. At the time of IP Communications Corporation's request, SWBT and IP Communications Corporation shall agree upon the technical description of the process to be designed, the necessary operational parameters, the necessary billing system parameters, an estimated time for the design of the process, and the estimated costs of designing the process. Upon the completion of the design phase of the project, an operational trial shall be conducted to determine the feasibility of implementation of the new system in the SWBT network. IP Communications Corporation's obligation to pay for the development of the system shall not be conditioned upon the success of the development of a workable system. By insertion of this clause, SWBT does not agree that it has an obligation under the FTA96 to provide this service.

- At IP Communications Corporation's request, SWBT will provide functionality and features within its local switch to route IP Communications Corporation customer-dialed Directory Assistance local and intraLATA calls to the designated trunks via Modified Feature Group C signaling from SWBT's 1AESS and other switch types or as the parties otherwise agree, for direct-dialed calls, (e.g., 1+411, 0, and 0+Local, 1+Home/Foreign NPA-555-1212 sent paid).
- 5.2.4.5 SWBT will provide the functionality and features within its local switch to route IP Communications Corporation dialed 0/0+ local and intraLATA calls (prior to dual PIC) to IP Communications Corporation. (Designated trunks via operator services Modified Feature Group C signaling.)
- After implementation of dual PIC, SWBT will route IntraLATA Toll calls (as defined by the exchange dialing plan (via the commission mandated dual PIC method (when implemented) when IP Communications Corporation uses Local Switching elements or resold services. SWBT will route InterLATA calls (as defined by the exchange dialing plan (via the existing PIC process when IP Communications Corporation uses Local Switching elements.
- 5.2.4.7 The Parties agree that, in the event of an emergency wherein an IP Communications Corporation customer must reach a non-IP Communications Corporation customer that has a non-published telephone number, the IP Communications Corporation operator will contact SWBT's operator and request the assistance of a supervisor to the extent done by SWBT's operators.
- 5.2.4.8 SWBT will forward with Directory Assistance and Operator Services calls from IP Communications Corporation customers the appropriate line data required by

IP Communications Corporation to identify the type of line for the purposes of call handling and recording.

- 5.2.4.9 Customized routing capabilities described herein will permit IP Communications Corporation customers to dial the same telephone numbers for IP Communications Corporation Directory Assistance and Operator Services that similarly-situated SWBT customers dial for reaching equivalent SWBT services.
- 5.2.4.10 SWBT, no later than five (5) days after the date IP Communications Corporation requests the same, will provide on a one time basis to IP Communications Corporation the emergency public agency (e.g., police, fire, ambulance) telephone numbers used by SWBT in each NPA-NXX. Such data will be transmitted via paper copies of all SWBT emergency listings reference documents from all SWBT's Operator Services offices. IP Communications Corporation agrees to indemnify and hold SWBT harmless from all claims, demands, suits or actions by third parties against SWBT, or jointly against IP Communications Corporation and SWBT, arising out of its provision of such information to IP Communications Corporation.
- SWBT will provide access to Operator Services Busy Line Verification/
  Emergency Interrupt (BLV/EI). Such access will be performed by the SWBT operator upon receipt of a request from an IP Communications Corporation operator. SWBT will meet the same performance results for IP Communications Corporation customer requests as it does for SWBT customer requests and will size the trunk groups required to perform this function in accordance with the volume demands. SWBT will provide to IP Communications Corporation performance reports for the BLV/EI access and success rates on a quarterly basis for the next 12 months from the date of Agreement or as mutually agreed to between the Parties. IP Communications Corporation acknowledges that SWBT will not be able to separate IP Communications Corporation and SWBT results.
- 5.2.5 SWBT will provide the Local Switching element only with standard central office treatments (e.g., busy tones, vacant codes, fast busy, etc.), supervision and announcements.
- 5.2.6 SWBT will perform testing through the Local Switching element for IP Communications Corporation customers in the same manner and frequency that it performs such testing for its own customers for an equivalent service.
- 5.2.7 SWBT will repair and restore any SWBT equipment or any other maintainable component that may adversely impact Local Switching.

- 5.2.8 SWBT will control congestion points such as those caused by radio station callins, and network routing abnormalities, using capabilities such as Automatic Call Gapping, Automatic Code Gapping, Automatic Congestion Control, and Network Routing Overflow. IP Communications Corporation agrees to respond to SWBT's notifications regarding network congestion.
- 5.2.9 SWBT will perform, according to its own procedures and applicable law, manual traps as requested by designated IP Communications Corporation personnel (Attachment 16: Network Security) and permit customer originated call trace (Attachment 1: Resale, Appendix Services/Pricing). IP Communications Corporation will obtain all necessary legal authorization for the call trace.
- 5.2.10 SWBT will record billable events, where technically feasible, and send the appropriate billing data to IP Communications Corporation as outlined in Attachments 9 and 10.
- 5.2.11 SWBT will provide switch interfaces to adjuncts in the same manner it provides them to itself. IP Communications Corporation requests for use of SWBT adjuncts will be handled through the Special Request process.
- 5.2.12 SWBT will provide Usage Data and trouble history regarding a customer line, upon IP Communications Corporation's request as provided in Attachment: 8 and Attachment: 10.
- 5.2.13 SWBT will allow IP Communications Corporation to designate the features and functions that are activated on a particular unbundled switch port to the extent such features and functions are available or as may be requested by the Special Request process. When IP Communications Corporation purchases Unbundled Local Switching (ULS), SWBT will provide IP Communications Corporation the vertical features that the switch is equipped to provide, as part of the usage charges associated with ULS.

# 5.2.14 Blocking/Screening

5.2.14.1 SWBT will provide to IP Communications Corporation the functionality of blocking calls (e.g., 900, international calls (IDDD) and toll calls) by line or trunk to the extent that SWBT provides such blocking capabilities to its customers and to the extent required by law. In those end offices where AIN is deployed, there will be no additional charge for blocking/screening for the above listed standard blocking/screening capabilities.

5.2.14.2 When AIN customized routing is not employed by IP Communications Corporation (e.g., DMS-10 switches, end user service with voice activated dial served out of a 5ESS switch, coin services where SWBT's network rather than the telephone provides the signaling, hotel/motel services, and certain CENTREX-like services with features that are incompatible with AIN), SWBT will provide blocking/screening via special line class codes on a ICB basis.

#### 5.2.15 Directory Assistance Listings

5.2.15.1 Where IP Communications Corporation orders a switch port, SWBT will include IP Communications Corporation's local end user customers' listings in SWBT's Directory Assistance database as part of the service order process. SWBT will also honor all such customers' preferences for listing status (e.g., non-published, unlisted), as noted on the service order request or similar process.

## 5.3 Switch Ports

- 5.3.1 Unbundled Local Switching (ULS) Port includes the central office switch hardware and software required to permit the transport or receipt of information over the SWBT local switching network or other interconnected networks. The ULS Port provides access to all features, functions and capabilities of the local switch. The ULS Port charge includes the charges for cross connect to the main distribution frame or DSX panel. SWBT will provide the following switch ports:
- Analog Line Port: A line side switch connection available in either a loop or ground start signaling configuration used primarily for Switched voice communications including centrex-like applications. When IP Communications Corporation orders a Loop/Switch for use in combination in which the loop is served by IDLC, IP Communications Corporation will pay the applicable loop charge and an Analog Line Port charge.
- 5.3.1.2 Analog (DID) Trunk Port: A trunk side switch connection used for voice communications via customer premises equipment primarily provided by a Private Branch Exchange (PBX) switch.
- 5.3.1.2.1 The Missouri Commission ordered unbundling of the local switching element, but the interim rates approved by the Missouri Commission did not identify a rate for an Analog (DID) trunk port.
- 5.3.1.3 DS1 Trunk Port: A digital trunk side switch connection that provides the equivalent of 24 paths used primarily for voice communications via customer premises equipment provided by a PBX switch (4 wire).

- 5.3.1.4 ISDN Basic Rate Interface (BRI) Port: A line side switch connection which provides ISDN Basic Rate Interface (BRI) based capabilities including centrex-like capabilities. When IP Communications Corporation orders a Loop/Switch for use in combination in which the loop is served by IDLC, IP Communications Corporation will pay the applicable loop charge and a BRI Port charge.
- 5.3.1.5 ISDN Primary Rate Interface (PRI) Trunk Side Port: trunk side switch connection which provides Primary Rate Interface (PRI) ISDN Exchange Service capabilities.
- 5.3.1.5.1 Input/Output (I/O) Port: A port arranged to provide signaling between a voice mail platform and the central office switch (i.e., SMDI Port or technically equivalent port which is equivalent to the switch port currently used to provide SWBT's tariffed NSII or SII service).
- 5.3.1.6 When IP Communications Corporation purchases switch ports, the applicable prices contained on Appendix Pricing UNE Schedule of Prices and labeled "Port Charge per month" will apply. In addition, applicable usage sensitive charges are found in Appendix Pricing UNE Schedule of Prices labeled "Local Switching".
- 5.3.1.7 IP Communications Corporation may request additional port types from SWBT through the Special Request process.

# 6.0 Tandem Switching

- Definition: Tandem Switching is defined as: (1) trunk-connect facilities, including but not limited to the connection between trunk termination at a cross-connect panel and a switch trunk card, (2) the basic switching function of connecting trunks to trunks; and (3) all technically feasible functions that are centralized in tandem switches (as distinguished from separate end-office switches), including but not limited to call recording, the routing of calls to operator services, and signaling conversion features.
- 6.1.1 When IP Communications Corporation uses Tandem Switching SWBT will charge the price shown on Appendix Pricing UNE Schedule of Prices labeled "Tandem Switching". No port charge applies with Tandem Switching.

## 6.2 Technical Requirements

6.2.1 Tandem Switching will provide trunk to trunk connections for local calls between two end offices including two offices belonging to different CLEC's (e.g.,

between an IP Communications Corporation end office and the end office of another CLEC).

- 6.2.2 To the extent all signaling is SS7, Tandem Switching will preserve CLASS/LASS features and Caller ID as traffic is processed. Additional signaling information and requirements are provided in Section 9.
- 6.2.3 SWBT will perform testing through the Tandem Switching element for IP Communications Corporation in the same manner and frequency that it performs such testing for itself.
- 6.2.4 To the extent that SWBT manages congestion from the Tandem Switching element for itself, it will control congestion points such as those caused by radio station call-ins, and network routing abnormalities, using capabilities such as Automatic Call Gapping, Automatic Code Gapping, Automatic Congestion Control, and Network Routing Overflow. IP Communications Corporation agrees to respond to SWBT's notifications regarding network congestion.
- Where SWBT provides the Local Switching Network element and the Tandem Switching Network element to IP Communications Corporation from a single switch, both Local Switching and Tandem Switching will provide all of the functionality required of each of these Network Elements in this Agreement.

## 7.0 Operator Services and Directory Assistance

Definition: Operator Services and Directory Assistance (OS/DA) is the Network Element that provides operator and automated call handling and billing, special services, customer telephone listings and optional call completion services. The OS/DA Network Element provides two types of functions: Operator Service functions and Directory Service functions, each of which is described in detail below.

## 7.2 Operator Service

This section sets forth the terms and conditions under which SWBT agrees to provide operator services (Operator Services) for IP Communications Corporation. When IP Communications Corporation uses Operator Services, IP Communications Corporation will pay the lowest existing intercompany compensation rate.

7.2.1 Services - SWBT will provide the following three tiers of Operator Services:

- 7.2.1.1 Fully-Automated Allows the caller to complete a call utilizing Automated Alternate Billing Service (AABS) equipment without the assistance of a SWBT Operator, hereafter called Operator. AABS allows the caller the option of using the AABS audio response system. AABS will be offered in areas where facilities exist and where IP Communications Corporation has Automatic Number Identification (ANI) equipment and TOUCH-TONE service in place. AABS cannot be activated from a rotary telephone and failure or slow response by the caller to the audio prompts will bridge an Operator to the caller for further assistance. The called party must also have TOUCH-TONE service to accept calls that are billed collect or to a third number.
- 7.2.1.2 **Semi-Automated** Allows the caller to complete a call by receiving partial assistance from an Operator or when AABS cannot be activated due to equipment limitations.
- 7.2.1.3 Non-Automated Allows the caller to complete a call by receiving full assistance from an Operator.
- 7.2.2 **Call Types** SWBT will provide to IP Communications Corporation the following call types:
- 7.2.2.1 Fully Automated Station-to-Station This service is limited to those calls placed collect or billed to a third number. The caller dials 0 plus the telephone number desired, the service selection codes and/or billing information as instructed by the AABS equipment. The call is completed without the assistance of an Operator. This service may also include the following situations:
- 7.2.2.1.1 The caller identifies himself or herself as disabled and gives the Operator the number to which the call is to be billed (either collect or third number).
- 7.2.2.1.2 When due to trouble on the network or lack of service components, the automated call cannot be completed without assistance from an Operator.
- 7.2.2.1.3 When an Operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 7.2.2.2 Semi-Automated Station-To-Station This service is limited to those calls placed sent paid, collect or billed to a third number. The caller dials 0 plus the telephone number desired and the call is completed with the assistance of an Operator. This service may also include the following situations:

- 7.2.2.2.1 Where the caller does not dial 0 prior to calling the number desired from a public or semi-public telephone, or from a telephone where the call is routed directly to an Operator (excluding calling card calls).
- 7.2.2.2.2 When an Operator re-establishes an interrupted call that meets any of the situations described in this Section.
- 7.2.2.3 Semi-Automated Person-To-Person A service in which the caller dials 0 plus the telephone number desired and specifies to the Operator the particular person to be reached or a particular PBX station, department or office to be reached through a PBX attendant. This service applies even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. This service may also include the following situations:
- 7.2.2.3.1 Where the caller does not dial a 0 prior to dialing the number from a public or semi-public telephone, or where the call is routed directly to an Operator.
- 7.2.2.3.2 When an Operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 7.2.2.4 Operator Handled Station-To-Station A service provided when the caller dials 0 to reach an Operator, and the Operator dials a sent paid, collect or third number station-to-station call. These calls may originate from a private, public or semi-public telephone. The service may also include when an Operator reestablishes an interrupted call as described in this Section.
- 7.2.2.5 Operator Handled Person-To-Person A service in which the caller dials 0 and requests the Operator to dial the number desired and the person, station, department or office to be reached. The call remains a person-to-person call even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. The service may also include when an Operator reestablishes an interrupted call as described in this Section.
- 7.2.2.6 Operator Transfer Service A service in which the caller dials 0 and requests to be connected to an interexchange carrier using an Operator's assistance. At the caller's request, the Operator transfers the call to an interexchange carrier participating in SWBT's Operator Transfer Service offering.

## 7.2.3 Call Branding/Rate Reference

7.2.3.0.1 Call branding is the process by which an Operator, either live or recorded, will identify the operator service provider as being IP Communications Corporation.

SWBT will offer Call Branding of Operator Services in the name of IP

000299

Communications Corporation. In the event that the phraseology for branding OS calls is the same phraseology for branding DA calls, only one charge will apply per initial loading or subsequent change. IP Communications Corporation will pay the charge as reflected in Appendix Pricing UNE--Schedule of Prices labeled Rate Per Initial Load or Rate Per Subsequent Changes to Brand and/or rate per call subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket number TO-97-40 or TO-98-115 (or a decision rendered by the Missouri Commission by December 31, 1998 in a separate proceeding initiated by AT&T). In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties.

- 7.2.3.0.2 Rate reference is the process by which an operator, either live or recorded, will quote IP Communications Corporation's rates. When an IP Communications Corporation caller requests a quotation of rates, IP Communications Corporation will pay the applicable rates and charges provided for in the lowest existing SWBT intercompany agreement for operator services and Directory Assistance. IP Communications Corporation will pay the charge as reflected in Appendix Pricing UNE - Schedule of Prices labeled Rate Per Initial Load or Rate per Subsequent Rate change and/or Subsequent reference change subject to true-up based on a ruling by the Missouri Commission in the Arbitration proceeding in Docket Number TO-97-40 or TO-98-115 (or a decision rendered the Missouri Commission by December 31, 1998 in a separate proceeding initiated by AT&T.) In accepting this procedure, the parties preserve all rights to appeal any Commission order, including the right to contest the process used in establishing the rates, terms, and conditions included in the Interconnection Agreement between the parties.
- 7.2.3.1 IP Communications Corporation will provide SWBT with the specific branding phrase to be used to identify IP Communications Corporation. The standard phrase will be consistent with the general form and content currently used by the Parties in branding their respective services (e.g., "bong" IP Communications Corporation).
- 7.2.3.2 SWBT Operator Services operators will provide Operator Services Rates/Reference Information upon request to IP Communications Corporation's end users. Rate/Reference information will be provided under the following terms and conditions:
- 7.2.3.2.1 IP Communications Corporation will furnish the initial Rate and Reference information in a mutually agreed to format or media thirty (30) days in advance of the date when they are to be provided by SWBT.
