SECTION 3. DESCRIPTION OF SERVICES

3.1 Access Services for Intrastate Communication Services

The Company provides data transport between End Users and its Customers using a variety of digital transmission technologies, over the Company's own facilities and/or facilities of other carriers. Depending on distance from the Company's facilities, Services may not be available to all customers. Special construction charges may apply in each case. Company's Services are data services only and will not be accompanied by 411, 911, or other voice services. In addition to the charges specified for each Service, additional charges may apply for transfers of data per month, at certain times in excess of certain thresholds, or for certain billing, monitoring or other services. Other services may be provided by the Company on an Individual Case Basis, depending on such factors as length of loops involved, quality of loops and other factors.

Private line service will be made available to customers in a non-discriminatory manner. Rates for interexchange dedicated access, private line, non-switched services will be determined on an Individual Case Basis (ICB). ICB rates will be structured to recover the Company's cost of providing the services and will be made available to the Missouri Public Service Commission Staff upon request on a proprietary basis. ICB rates will not be used for switched services.
