RE: Tariff No. 00000510
Case No. TA-2000-141
JATO Operating Corp.

Dear Mr. Roberts:

Pursuant to discussions with Staff to correct wording to its proposed local exchange tariff, JATO Operating Corp. hereby submits an original and four (4) copies of revised Page 42 to its proposed tariff.

Please indicate receipt of this filing by returning a date-stamped copy of this letter in the pre-stamped and addressed envelope that has been provided.

Further questions or comments regarding this submission should be directed to my attention at the address or telephone number herein.

Respectfully submitted

A handwritten signature in cursive script, reading "David A. Bryson".

David A. Bryson

SECTION 2 - DEFINITIONS

DSL - Digital Subscriber Line

DSLAM - Digital Subscriber Line Access Multiplexers

ICB - Individual Case Basis

IDSL - Integrated Digital Subscriber Line

ISDN - Integrated Services Digital Network

Kbps - Kilobits per second

LEC - Local Exchange Carrier

LIS - Local Interconnection Service

Mbps - Megabits per second

OC - Optical Carrier

POI - Point of Interface

SDSL - Symmetrical Digital Subscriber Line

SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 General

JATO DSL services are non-switched, local exchange technologies that allow multiple forms of data and video to be carried over standard twisted pair coppers, or UNEs, on the local loop between the central office and the end user site.

JATO DSL services do not include access to/from the Public Switched Network (PSN). JATO DSL services provide data connections only and does not assign or otherwise route traffic by use of the telephone numbers, i.e. NPA-NXX-XXXX.

In the event that JATO begins to provide service to/from the PSN, JATO will file tariffs reflecting the rates, terms and conditions for such services.

JATO DSL (Digital Subscriber Line) services utilize technology over metallic local loop facilities to provide Customers with high-speed data services which utilize the twisted pair copper lines procured from the LEC in the form of unbundled network elements.
