TARIFF FORMAT SHEET

1. Page Numbering. Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. New pages may occasionally be added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34.1.
2. Page Revisions Numbers. Page Revision Numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page revision on file with the Missouri Public Service Commission. For example, the fourth revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods, etc., the most current page number on file with the Commission is not always the tariff page in effect. Business Customers should consult with check sheet for the page currently in effect.
3. Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
  - 1.
