PSC Staff Shawn Lange
PSC Staff John Robinett
PSC Staff Arthur Rice

Adam Heflin welcomed everyone and explained the importance Callaway Energy Center places on nuclear, industrial and radiological safety. He told the group they would tour 3 areas: the reactor building, the fuel building and the turbine building.

Rick Eastman gave an overview and history of the Callaway Plant. Cleve Reasoner gave the safety briefing and Stan Crawford gave the radiological briefing.

Each person changed into protective clothing for the tour. Safety was again stressed to all touring. After the tour Cleave Reasoner and Warner Baxter answered questions.
