RE: Quail Valley Wastewater Treatment Plant

Dear Ms. Rush:

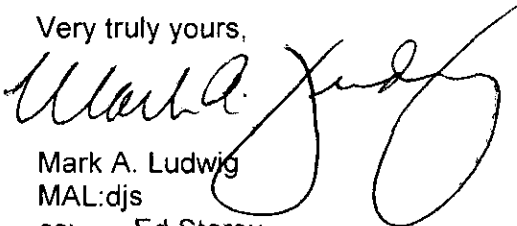

You should now have had plenty of opportunity to have reviewed the status of the Quail Valley Wastewater Treatment Plant, as well as the request made by Greg Haug on behalf of Mr. Storey to hook up up to 90 homes to the existing plant. You have had many months since we first brought this to your attention to do whatever data collection and analysis necessary for consideration and approval of our request. As Mr. Haug's letter and the attached tables show, the plant is operating at less than 2/3 its capacity. The BOD and TSS readings are down significantly since the septic tank was cleaned and are well under capacity. Scientifically, there is no reason not to approve the request to hook up to 90 homes to the system.

There is also no business reason not to approve the additional hookups. Adding additional homes will not increase the costs of Aqua Missouri, Inc., but will bring in additional income.

We have several builders who are ready to buy lots and start building. We anticipate houses being added one or two at a time to allow adequate monitoring of loads as we approach the requested 90 hookups. Based on all the analysis I have seen, the system will not have any difficulty handling that. Because we have buyers ready to purchase and build, we would like a response to our request within the next ten days.

Thank you for your attention to this.

Very truly yours,

Mark A. Ludwig
