SECTION 3 - DESCRIPTION OF SERVICES

3.1 General

Services offerings that include unlimited Usage are limited to use for standard business voice applications. This includes service offerings providing for unlimited local Usage, unlimited intraLATA Usage and/or unlimited interLATA Usage. No non-standard business use of any form is permitted for such unlimited service offerings. Incidental calling for dial-up internet access, for data and fax type applications and for other similar restricted uses reflected in this tariff is permitted up to a maximum of 1200 minutes within any thirty-day period; any such Usage beyond this threshold shall be presumed to be non-standard business in nature. If, at any time, the Company determines that the Customer's Usage is non-standard business or is not consistent with use for business voice applications, the Company may immediately take actions to enforce adherence to this tariff and to the Company's Statement of Terms and Conditions of Service that are applicable to interLATA and international long distance. Such actions may include the transition to a higher tier within the customer's existing service plan.

The Company will notify the Customer in writing when the previous month's Usage exceeds that normally associated with standard business voice applications. Such written notice will inform the Customer that a higher tier rate will apply if, after two additional months, the Usage remains above Usage thresholds established in the existing service plan. Customers whose excessive Usage levels resulted in a higher rate will, upon request, qualify for the lower-tier rate(s) after three consecutive months of Usage below Usage thresholds established in the existing service plan.
