

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the matter of the Petition of)
Missouri-American Water Company for) File No. WO-2020-0410
Approval to Change Its Infrastructure)
System Replacement Surcharge (ISRS).)

**MAWC'S PETITION TO CHANGE ITS
INFRASTRUCTURE SYSTEM REPLACEMENT SURCHARGE & MOTION FOR
APPROVAL OF CUSTOMER NOTICE**

COMES NOW Missouri-American Water Company (“MAWC”), pursuant to Sections 393.1000, 393.1003 and 393.1006 RSMo; and Rules 20 CSR 4240-2.060(1) and 20 CSR 4240-3.650, and, for its *Petition To Change Its Infrastructure System Replacement Surcharge and Motion For Approval of Customer Notice*, respectfully states as follows to the Missouri Public Service Commission (“Commission”):

BACKGROUND

1. Sections, 393.1000, 393.1003 and 393.1006 and Commission Rule 20 CSR 4240-3.650 provide eligible water corporations with the ability to recover certain infrastructure system replacement costs outside of a formal rate case filing via an Infrastructure System Replacement Surcharge (“ISRS”). A petition must be filed with the Commission for review and approval before an adjustment can be made to a water corporation’s rates and charges to provide for the recovery of the costs associated with eligible infrastructure system replacements.

THE APPLICANT

2. MAWC is a Missouri corporation with its principal office and place of business at 727 Craig Road, St. Louis, Missouri 63141. MAWC is a Missouri corporation in good standing. A certified copy of MAWC’s certificate of good standing is attached as Appendix A. MAWC

currently provides water service to the public in and around the cities of St. Joseph, Joplin, Brunswick, Mexico, Warrensburg, Parkville, Riverside, Jefferson City, Lawson, and parts of St. Charles, Platte, Warren, Lincoln, Cole, Callaway, Pettis, Taney, Stone, Barry, Christian, Benton, Greene and Newton Counties Missouri, and most all of St. Louis County, Missouri. MAWC currently provides water service to approximately 470,000 customers. MAWC provides sewer service to approximately 14,800 customers near the cities of Parkville, Cedar Hill, and Lawson, and parts of Warren, Morgan, Cole, Callaway, Pettis, Taney and Jefferson Counties, Missouri. MAWC is a "water corporation" and a "public utility" as those terms are defined in Section 386.020 and 393.1000 (7), RSMo. 2000, and is subject to the jurisdiction and supervision of the Commission as provided by law. Other than cases that have been docketed at the Commission, MAWC has no pending action or final unsatisfied judgments against it from any state or federal agency or court within the past three (3) years that involve customer service. MAWC has no annual report or assessment fees that are overdue.

3. Communications in regard to this Application should be addressed to the undersigned counsel and:

Brian W. LaGrand
Director of Rates & Regulatory Support
Missouri-American Water Company
727 Craig Road
St. Louis, MO 63141
314-996-2357
brian.lagrand@amwater.com

THE ISRS REQUEST

4. MAWC, per this Petition, seeks to change its ISRS rate to provide for the recovery of costs for infrastructure system replacements and relocations eligible for ISRS recognition. The proposed ISRS rate schedule should reflect the appropriate pre-tax ISRS revenues necessary to produce

net operating income equal to MAWC's weighted cost of capital multiplied by the net original cost of the requested infrastructure replacements that are eligible for the ISRS, including recognition of net accumulated deferred income taxes and accumulated depreciation associated with the aforesaid infrastructure system replacements. MAWC also seeks to recover all state, federal and local income or excise taxes applicable to such ISRS income and to recover all other ISRS costs such as depreciation expense and property taxes due within 12 months of this filing.

5. Attached hereto as **Appendix B** is the proposed rate schedule, and attached as **Appendices C - F** are the supporting documents, proposed by MAWC in order to establish the ISRS rates to reflect recovery of eligible infrastructure costs. This proposed rate schedule, on an annualized basis, will produce ISRS revenues of \$5,277,622 or an increase of 2.6% based on the base revenue level approved by the Commission in its most recently completed general rate proceeding. The ISRS proposal includes an adjustment of \$2,872,281 to reflect an under collection from previous ISRS surcharges. The reconciliation calculation is attached hereto as **Appendix H.**
6. The infrastructure system replacements for which MAWC seeks ISRS recognition are set forth on **Appendix D**, which is attached hereto and made a part hereof for all purposes. The infrastructure system replacements listed on Appendix D are either: a) mains and associated valves and hydrants installed as replacements for existing facilities that have worn out or were in a deteriorated condition; or, b) a main cleaning and/or relining project; or, c) infrastructure facility relocations due to the construction or improvement of a highway, road, street, public way or other public work required by or on behalf of the United States, the State of Missouri,

a political subdivision of the State of Missouri, or another entity having the power of eminent domain.

7. The Company utilized both internal and external resources to install the mains. In instances where external resources were utilized, a request for proposal (RFP) process was used. The American Water Procurement Department worked with MAWC Engineering personnel to identify contractors that were capable of installing water main across the state and provided a questionnaire regarding qualifications, safety, financial, equipment and manpower abilities to meet the anticipated workload. The Company requested bids based on its standard bid process to some of the identified contractors along with utilizing the unitization process with contractors currently under contract to replace and or relocate water mains. The unitization process consists of procurement providing a bid document with nearly 600 line items for the contractors to provide unit costs associated with each line item provided and then the pricing provided was evaluated against past projects to see if a cost advantage was recognized in order to validate the hiring of the contractor using this process. Once the evaluation was confirmed, Engineering and Supply Chain entered into a contract with the Contractor(s) to replace/relocate water mains utilizing this unitization pricing method. The other contractors not currently under contract using the unitization pricing method were sent RFPs for multiple projects and once bids were received back they were evaluated against similar projects using the unitization pricing method for cost comparisons. The projects were then awarded based on costs and contractor availability to complete the projects in the time frame provided.
8. **Appendix D** also provides the ISRS information by Task Order (work order) and identifies and sub-totals facility relocations on behalf of the State of Missouri, on behalf of a political

subdivision of the State of Missouri, on behalf of the United States and on behalf of an entity other than the United States, State of Missouri or a political subdivision of the State of Missouri. Customers affected by the proposed ISRS benefit from the ISRS projects because: 1) the program accelerates the replacement of aging water mains; 2) reduces the frequency of water service interruptions; and, 3) improves service reliability. Additionally, there were no financing arrangements directed specifically to the ISRS projects.

9. The infrastructure system replacements listed on Appendix D are eligible for ISRS treatment as they are water utility plant projects that: a) replace and/or extend the useful life of existing infrastructure; b) currently are in service and used and useful (in service date is provided); c) did not increase revenues by directly connecting to new customers since all ISRS projects represented replacements of existing facilities or relocations of existing facilities; d) were not included in MAWC's rate base in its most recently completed general rate case; e) the costs related to such projects have not been reimbursed to the utility; and f) were not included in any other MAWC ISRS filing.
10. The Company sometimes receives reimbursement from either private developers or governmental agencies. In the case of a private developer, the Company will enter into an agreement that requires the developer to advance to the Company the money based on an estimated cost to relocate facilities. Once the project is complete, the Company prepares a reconciliation of the actual cost to the estimated cost. If the actual cost exceeds the estimate, the developer is required to reimburse the Company. If the actual cost is less than the estimate, then the Company will refund the difference to the developer.

In the case where a governmental agency requires a relocation of Company facilities, no advance funding is received. Once the project is complete, the Company will bill the governmental agency for the amount of the cost of the relocated facilities that were located in easements.

In all cases, reimbursements are based on actual construction costs.

11. The infrastructure system replacements listed on Appendix D for which ISRS recognition is requested, were performed within the boundaries of St. Louis County, Missouri. St. Louis County, Missouri has a charter form of government and was inhabited by more than one million people in 2003, when the General Assembly enacted sections 393.1000-393.1006, RSMo.
12. MAWC had its last general rate proceeding decided by Commission Order issued on May 2, 2018, effective May 28, 2018, in Case No. WR-2017-0285.
13. This Petition is MAWC's request to change its ISRS rate.
14. Attached hereto as Appendix E is the list of infrastructure retirements and related annual depreciation expense associated with the retirements. Appendix E provides the original cost of the retired asset, depreciation rate, and the date the asset was removed from service.
15. Attached hereto as Appendix F is the list of infrastructure contributions in aid of construction and related annual amortization expense associated with the contributions in aid of construction. Appendix F provides the original cost of the contributed asset, amortization rate, and the date the asset was placed in service.

16. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes current state and federal income tax rates of 3.5951% and 20.2450%, respectively. These rates represent the current statutory rates.
17. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes the overall pre-tax weighted average cost of capital of 9.29% (tax grossed-up rate of return), as agreed to in the Non-Unanimous Revenue Requirement Stipulation and Agreement (filed March 1, 2018), and approved by the Commission in Case No. WR-2017-0285¹, modified for the reduction in the Missouri corporate tax rate from 6.25% to 4.00%. Please refer to **Appendix G.**
18. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes a weighted cost rate for debt of 2.49%, as calculated in the capital structure referenced in paragraph 17 above.
19. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule does not include property taxes, as no property taxes on the ISRS investments will be due within 12 months of the filing of this Petition.
20. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes depreciation rates currently applicable to the aforelisted eligible infrastructure system replacements in St. Louis County, Missouri as determined by the Commission.

¹ Approved by the Commission's *Order Approving Stipulations and Agreements*, issued May 2, 2018.

21. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes customer class billing determinants as utilized in designing the rates for the St. Louis County district during MAWC's most recently completed rate proceeding.
22. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule identifies the classes of customers benefited by the aforesaid eligible water utility plant projects.
23. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes Staff's customer class cost-of-service study filed with the Commission for the St. Louis County district during Case No. WR-2017-0285. Therefore, the class cost-of-service study from Case No. WR-2017-0285 was used in this ISRS case to determine the recovery by customer class of the appropriate pre-tax ISRS revenues. The proposed ISRS is being prorated between affected customer classes based on the class cost-of service study as indicated above.
24. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes the rate design methodology recognized by the Commission for the St. Louis County district during Case No. WR-2017-0285.
25. The ISRS on an annualized basis produces revenues of at least one (1) million dollars but not in excess of 10 percent (10%) of the base revenue approved by the Commission in Case No. WR-2017-0285.
26. Pursuant to Section 393.1006.5(2), RSMo, the Company is including a reconciliation amount to recover the difference between revenues resulting from the ISRS and the appropriate pretax revenues as found by the Commission. The ISRS rates authorized in this case are expected to be in effect until new rates are established in the Company's current general rate case, Case

No. WR-2020-0344, expected at the end of May 2021. To ensure the Company does not collect more than the 10% base revenue cap (\$31,825,616) during a 12 month period, the Company will file monthly reports in this case which show the trailing 12 months of ISRS revenues. These reports will be filed within 30 days of the end of each calendar month after the effective date of new ISRS rates in this case, and will cease to be filed once ISRS rates are reset to zero in the Company's pending rate case. If it appears MAWC may reach the revenue cap, MAWC will file a new tariff sheet designed to discontinue ISRS charges authorized in this case.

ADDITIONAL INFORMATION

27. MAWC will post information on its website to inform customers of the ISRS. The ISRS information will be posted to the Company's website upon the revised ISRS charge appearing on customer's bills. Refer to **Appendix I** for an example of the information to be included on the website.
28. Instructions and talking points regarding the ISRS that will be provided to personnel at MAWC's call center will be based upon the information provided on the website referenced in Paragraph 25 of this Petition. Refer to **Appendix J** for the instructions to be provided to personnel at MAWC's Call Center.
29. MAWC will provide an initial, one-time notice to affected customers no later than when customers will receive their first bill that includes the ISRS rate approved in this proceeding. This notice explains the ISRS program, explains how it is applied to different customer classes and identifies the statutory authority under which ISRS is implemented. See **Appendix K** for an example of this notice.

30. MAWC will provide annual notice to affected customers each year ISRS is in effect, explaining the continuation of the program and the resulting ISRS. See **Appendix L** for an example of this notice.

31. The ISRS charge will be clearly identified on the customer's billing statement. It will appear as a separate charge under ISRS. See **Appendix M** for an example of a customer bill showing how the ISRS will be described on customers' bills.

MOTION FOR APPROVAL OF CUSTOMER NOTICE

32. In accordance with Commission Rule 20 CSR 4240-3.650(9), MAWC moves the Commission to approve the customer notices provided in Appendix J, Appendix K and Appendix L.

WHEREFORE, pursuant to 393.1006.2(3) Applicant respectfully requests the Commission provide notice of this filing in accordance with Commission Rule 20 CSR 4240-3.650(7) and, thereafter, issue an Order - and approve any implementing tariff sheets - bearing an effective date of no later than December 22, 2020, authorizing:

- a. Approving the customer notices provided in Appendices J, K and L;
- b. Authorizing the Applicant to recover the cost of eligible infrastructure system replacement (as listed on Appendix D) per a change to MAWC's ISRS (Refer to Appendices B and C). This ISRS recognition to be accomplished via an adjustment to MAWC's rates and charges by reflecting the appropriate pre-tax ISRS revenues necessary to produce net operating income equal to MAWC's weighted cost of capital multiplied by the net original cost of the requested infrastructure replacements which are eligible for the ISRS, including recognition of net accumulated deferred income

- taxes and accumulated depreciation associated with the aforesaid infrastructure system replacements; and,
- c. Granting such other relief as may be necessary and appropriate to accomplish the purposes of Sections 393.1000 through 393.1006, RSMo.

Rate I Infrastructure System Replacement Surcharge (ISRS)
--

DESCRIPTION - Rate I is designed to recover the costs associated with the Company's eligible main, valve, and hydrant replacements, main relocations, and main cleaning and relining projects. This ISRS rate is calculated and implemented in accordance with the provisions of sections 393.1000 to 393.1006 RSMO. Any future changes to this rate will also be made in accordance with those provisions.

APPLICABILITY - This rate is applicable to any customer class who benefits from the subject utility plant projects eligible for ISRS recovery. The surcharge is calculated consistent with the customer class cost-of-service study recognized by the Missouri Commission in a Company's recent applicable general rate proceeding.

RATE COMPONENTS - In addition to the other charges provided for in the Company's tariffs, a separate charge for the ISRS will apply for service rendered on and after the effective date.

Customer Rate Class	Rate per 100 Gallons	Rate per 1,000 Gallons	
Rate A	\$0.11265	\$1.12649	+
Rate B	\$0.00160	\$0.01599	+
Rate J	\$0.00153	\$0.01534	+

RULES AND REGULATIONS – The General Rules and Regulations set forth in this tariff shall govern the supply of service under this rate.

PAYMENT TERMS - All bills for service under this schedule will be rendered in arrears on a monthly or quarterly basis. The due date on the tariff shall be ten (10) days after the "date of rendition" of the bill to the customer. The customer's bill will be due and payable after this due date. The delinquent date printed on the bill will not be less than twenty-one (21) days after the date of the postmark of the bill. Any accounts remaining unpaid at the expiration of twenty-one (21) days shall be considered delinquent and the Company may take such action as specified in its filed rules and regulations.

TAXES - These rates do not include any municipal, state or federal taxes computed on either billing or consumption basis. Any such taxes applicable shall be added as separate items in rendering each bill.

INFRASTRUCTURE SYSTEM REPLACEMENT SURCHARGE (ISRS)

The Infrastructure System Replacement Surcharge (“ISRS”) is an important program that benefits customers by funding the efficient replacement of aging water pipes.

What is ISRS?

ISRS is a program that enhances Missouri American Water’s ability to perform water main replacement & relocation projects in St. Louis County. Customers in St. Louis County will see a small surcharge, based on water usage, included on their regular periodic bill.

Why is ISRS needed?

In the late 1990s, Missouri American Water was replacing an average of about 11 miles of aging water mains in St. Louis County each year. After ISRS became law in 2003, the rate of replacement accelerated to an average of about 30 miles of water mains per year.

The industry’s suggested replacement rate for water mains is 1 percent (based on a 100-year lifespan), which means that every 100 years, all mains would be replaced. Most water systems in the country are averaging a replacement rate of 225 years, which is insufficient to cover the expected lifespan of the typical water main. In St. Louis County, the ISRS program has allowed Missouri American Water to accelerate its replacement rate among the county’s 4,500 miles of water main to 125 years. This is still short of our 100-year goal, but is a step in the right direction.

How is the ISRS calculated?

The ISRS is calculated based on the level of eligible capital investment made Missouri American Water and expenses such as depreciation and property taxes. These costs are divided among St. Louis County customers based on the amount water each customer uses.

How much does ISRS add to my bill?

With the implementation of a new ISRS on June 30, 2020, a residential customer in St. Louis County using 6,000 gallons of water per month would pay an additional \$5.78 per month.

What are the ISRS rates?

Customer Rate Class	per 100 gallons	per 1,000 gallons
Residential & Commercial (Rate A)	\$0.09629	\$0.9629
Sale for Resale (Rate B)	\$0.00146	\$0.0146
Large Industrial (Rate J)	\$0.00140	\$0.0140

Do other states use ISRS?

At least 10 other states use a program such as ISRS. Most of these states are in the Midwest and Northeast, where systems are older and in greater need of replacement. Other states often refer to the mechanism as DSIC, or Distribution System Investment Charge.

Can Missouri American Water pay for main replacement without a separate fee?

American Water, the parent company of Missouri American Water, provides capital to each of its state subsidiaries for infrastructure projects. One of the factors that is considered when distributing capital is the ability to earn a timely return on investment. The ISRS program allows Missouri American Water to begin recovering main replacement costs in St. Louis County sooner which makes the projects more attractive than those that can only be recovered after a rate case, which could be several years after a project is complete.

Without ISRS, Missouri American Water would still replace the oldest and most troublesome mains in our system, but the work would be done at a much lower frequency because it would be more difficult for Missouri to attract capital. What this means is that many mains that are due for replacement may not be replaced in a timely fashion, and as a result, main breaks could increase in frequency.

Missouri American Water has invested more than \$750 million to replace 8.8 percent of its water main system in St. Louis County since ISRS began in 2003.

Prior to ISRS, the company's annual investment in main replacement was less than \$10 million. Since ISRS became law, Missouri American Water has been investing between \$50 million and \$80 million to replace water mains.

How old are our water pipes and why do they need to be replaced?

Some of the pipes in Missouri American Water's distribution system are more than 120 years old! These pipes wear over time based on the pipe material, soil characteristics and temperatures, becoming susceptible to corrosion, leaks, and breaks. It is estimated that 2 trillion gallons of water is lost each year in the U.S. due mostly to aging, leaky pipes and water main breaks.

Replacing old pipe before it breaks again is important for several reasons:

- Leaks and breaks are a potential source of water contamination, so we need to maintain our system to keep our customers safe.
- It is 10 times more expensive to fix an emergency water main break than to perform ongoing upgrades.
- Leaks waste a lot of water.
- Unlike main breaks, replacements can be scheduled to minimize disruption to schools, businesses and residents.

**Missouri American Water Company
2020 ISRS Filing
Instructions for Call Center Personnel**

- 1) Each Call Center personnel will be required to read and be familiar with the ISRS Filing and Reporting Requirements.
- 2) Call Center personnel will be required to respond to customer inquiries regarding the following:
 - a. Benefits of ISRS Program
 - b. Proposed and authorized ISRS rates
 - c. Calculation of ISRS
 - d. Effective date of ISRS
 - e. How long the rate will be in effect
- 3) Call Center personnel will understand the general nature of the ISRS projects which will complement questions regarding the benefits of the program.

Missouri-American Water Company

Initial ISRS Customer Notice

ISRS BILL MESSAGE

Effective 6/30/20, the Infrastructure System Replacement Surcharge (ISRS) per 1,000 gallons is \$0.9629 for Rate A (residential & commercial), \$0.0146 for Rate B (sale for resale), and \$0.0140 for Rate J (large industrial). The ISRS funds completed water main replacements and related improvements for customers served by our St. Louis County operations. ISRS is implemented pursuant to Sections 393.1000, 393.1003, 393.1006, RSMo; 20 CSR 4240-2.060(1); and 20 CSR 4240-3.650. Additional information is available on our website at www.missouriamwater.com

INVESTING IN WATER SYSTEMS

The Infrastructure System Replacement Surcharge has funded more than \$700 million in water system improvements from 2003 through 2019.

INFRASTRUCTURE INVESTMENT

The ISRS charge on your water bill helps fund completed improvements to the vast network of pipelines, fire hydrants and other critical components of St. Louis County's water system. These ongoing improvements are designed to reduce the number of water main breaks, improve service reliability and fire protection and enhance the integrity of our water system.

The typical residential customer pays an average of \$7.22 per month for ISRS. It's an important investment in our community's water service and fire protection.

ISRS RATES

Customer	Rate per 1,000 gallons
Residential, Commercial or Other Public Authority (Rate A)	\$ 0.9629
Sale of Water for Resale (Rate B)	\$ 0.0146
Large Quantity Users (Rate J)	\$ 0.0140

ISRS is implemented pursuant to Sections 393.1000, 393.1003, 393.1006, RSMo; 20 CSR 4240-2.060 (1); and 20 CSR 4240-3.650

Missouri American Water maintains about 4,500 miles of water mains and 32,000 fire hydrants in St. Louis County. The Infrastructure System Replacement Surcharge (ISRS) helps us upgrade our aging infrastructure more quickly, improving water service reliability.

SERVICES

Go Paperless: Save time. Save money. Sign up for **Paperless Billing** and **Auto Pay** on My Account at amwater.com/myaccount. Not registered? Log in and be sure to have your account number handy.

Water Quality: We take water quality seriously. When it comes to complying with federal drinking water standards, we consistently score better than the industry average. For a copy of the annual water quality report for your area, visit missouriamwater.com. Under Water Quality, select Water Quality Reports.

H₂O Help To Others: H₂O Help to Others is an emergency assistance program created by Missouri American Water and Missouri's Community Action Agencies. The program helps provide supplemental funding to Missouri American Water customers who would otherwise have trouble paying their bills. H₂O Help to Others is supported by contributions from Missouri American Water and voluntary contributions from customers.

EXPLANATION OF OTHER TERMS

Payment by Check: Paying by check authorizes American Water to send the information from your check electronically to your bank for payment. The transaction will appear on your bank statement. The physical check will not be presented to your financial institution or returned to you.

Estimated Bill: This occurs when we are unable to read the water meter. Your usage from the same billing period the prior year is used to calculate the estimated bill. The next actual meter reading corrects any over or under estimates.

Disputes: If you have questions or complaints about your bill, please call us at 1-866-430-0820 before the due date. If your bill is unusually high, it may indicate that there is a leak in your plumbing. For tips on how to detect leaks and use water wisely, visit us online. You'll find helpful tools under the Water Information menu. Every drop counts!

Rates: A detailed listing of charges that make up your bill is available upon request by contacting Customer Service or visiting us online at missouriamwater.com. Under Customer Service & Billing, select Your Water and Sewer Rates.

Correspondence: Please send written correspondence to PO Box 578, Alton, IL 62002-0578. Be sure to include your name, account number, service address, mailing address and phone number including area code. Please do not send correspondence with your payment, as it may delay processing your payment and correspondence.

H₂O HELP TO OTHERS PROGRAM - lend a hand to customers in need

I'm adding a one time contribution of \$_____ with my payment.

I'd like to add a recurring contribution to each bill of \$_____. I understand this amount will be added to each bill.

Understanding Your Bill

The information below defines some of the new terms you may find on your bill:

- **Service Related Charges:** This section includes charges for services related to water, wastewater and fire protection. If applicable, credits and debits for correction to previously billed charges are itemized in this section.
- **Fees and Adjustments:** This section provides details related to additional charges or adjustments for the service period referenced. Fees, when applicable, would include items such as service activation and late payment charges.
- **Pass Through Charges:** Charges in this section, when applicable, are separated from other service related charges to provide visibility into what portion of your bill is being remitted to other entities. Payment received for these charges does not remain with American Water. While we may bill and collect for them, the payments received are passed along to other companies and agencies.
- **Billing Units:** One billing unit equals 100 gallons of water used. If the meter serving your property measures your water use in cubic feet or a different unit of measure, we convert the usage to gallons to make it easier to understand.
- **Average Daily Use:** The gallons shown in the water droplet above represent your average daily water use for the current billing period. Tracking the amount of water you use can help you manage your overall water use from month to month.
- **Still have questions?** We are here to help. Our customer service representatives are available M-F, 7 a.m. to 7 p.m. More information on understanding your bill and charges can also be found on our website. See the link below.

numbers and three email addresses.

- Effective 6/24/19, the Infrastructure System Replacement Surcharge (ISRS) per 1,000 gallons is \$0.4722 for Rate A (residential & commercial), \$0.0085 for Rate B (sale for resale), and \$0.0081 for Rate J (large industrial). The ISRS funds completed water main replacements and related improvements for customers served by our St. Louis County operations. ISRS is implemented pursuant to Sections 393.1000, 393.1003, 393.1006, RSMo; 4 CSR 240-2.060(1); and 4 CSR 240-3.650. Additional information is available on our website at www.missouriamwater.com
