**DIRECT TESTIMONY**

**EDWARD J. GRUBB**

**WITNESS INTRODUCTION**

1

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. My name is Edward J. Grubb, and my business address is 727 Craig Road,  
4 St. Louis, Missouri 63141.

5

6 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

7 A. I am employed by American Water as the Manager Rates and Regulations for  
8 the Central Region and I am also the Assistant Treasurer for Missouri-  
9 American Water Company ("Company" or "MAWC").

10

11 **Q. WOULD YOU PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND**  
12 **AND BUSINESS EXPERIENCE?**

13 A. My background and qualifications are summarized in Schedule EJG-1 of this  
14 testimony.

15

16 **Q. HAVE YOU PREVIOUSLY PARTICIPATED IN REGULATORY MATTERS?**

17 A. Yes, I have prepared rate cases and presented testimony before the  
18 Maryland Public Service Commission, West Virginia Public Service  
19 Commission, Tennessee Public Service Commission, Illinois Commerce  
20 Commission, Kentucky Public Service Commission, Iowa Utilities Board,  
21 Indiana Utility Regulatory Commission, and this Commission.

1

2

**PURPOSE OF TESTIMONY**

3 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

4 **A. The purpose of my testimony is to discuss on behalf of MAWC:**

5 1) The test year and the Company's request for a true-up;

6 2) Revenues;

7 3) Pensions;

8 4) OPEBs;

9 5) Regulatory Expense;

10 6) Insurance Other Than Group;

11 7) Service Company Support Services;

12 8) Main Break Expense;

13 9) STEP Project Costs;

14 10) Property Taxes;

15 11) Income Taxes;

16 12) Depreciation Rates;

17 13) Consolidated Bill Tariff;

18 14) Customer Class Definitions;

19 15) ISRS Information;

20 16) Minimum Filing Requirements (MFR).

21

22 **Q. MR. GRUBB, ARE YOU SPONSORING ANY SCHEDULES?**

23 **A. In addition to Schedule EJG-1, I am sponsoring Appendix A, which is the**  
24 **Company's Minimum Filing Requirements; Schedule EJG-2, which sets forth**

1 the Company's proposed depreciation rates; and, Schedule EJG-3, which  
2 contains a bill consolidation study.

3  
4 **Q. WILL YOU BE TESTIFYING TO ANY OTHER SCHEDULES?**

5 **A.** Yes. Don Petry is sponsoring all of the Company's Accounting Schedules  
6 (CAS). These schedules consist of a Rate Increase Summary, Rate Base,  
7 Income Statement, Summary of Adjustments, and a Bill Analysis at Present  
8 and Proposed Rates. I will be testifying in support of specific schedules  
9 within the CAS, which will be identified later in my testimony.

10  
11 **Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR**  
12 **SUPERVISION?**

13 **A.** Yes, they were.  
14

15 **Q. WHAT IS THE SOURCE OF THE INFORMATION FOUND ON THE**  
16 **SCHEDULES?**

17 **A.** The historical and pro forma information contained in these schedules is  
18 taken from MAWC's financial books and records at June 30, 2006, and other  
19 Company sources. The books and records are maintained in accordance  
20 with the Uniform System of Accounts for Class A water utilities prescribed by  
21 the National Association of Regulatory Utility Commissioners (NARUC), and  
22 are audited annually by an independent accounting firm which certifies that  
23 such books and records are maintained in accordance with generally  
24 accepted accounting principals.

1

2

**(1) TEST YEAR AND TRUE-UP REQUEST**

3

**Q. MR. GRUBB, WHAT TEST YEAR HAS MAWC USED IN THIS RATE CASE?**

4

5

**A. MAWC has used a historical test year ending June 30, 2006, adjusted for changes that are known and measurable at this time and will be effective by the time new rates are anticipated to go into effect.**

6

7

8

9

**Q. IS THE COMPANY PROPOSING A TRUE-UP IN THIS CASE?**

10

**A. Yes. If rates are to be set properly reflecting the cost of providing service, a true-up of rate base and related operating revenue and costs at a point in time as close as possible to the operation of law date should be permitted. Otherwise, the new rates will not be sufficient to cover all of MAWC's expenses and investments which have been incurred or made to provide safe and adequate service. In this case, the Company is proposing a true-up at May 31, 2007. The Company is proposing to true-up the following components of its revenue requirement: rate base, capital structure, revenues using customers at May 2007 and labor workforce level and wage rates. Other expenses MAWC proposes to true-up are fuel and power, chemical, purchased water, waste disposal, rate case expense, property taxes, depreciation expense, PSC Assessment Fees and income taxes.**

21

22

23

**(2) REVENUES**

1   **Q.   PLEASE EXPLAIN THE COMPANY'S ADJUSTMENT TO THE TEST YEAR**  
2       **LEVEL OF REVENUES.**

3   **A.   The adjustments to the test year level of revenues can be characterized as**  
4       **follows:**

- 5       1) Eliminate from or adjust the test year for items that will not recur or are  
6           reflected in other adjustments.
- 7       2) Annualize for the level of residential and commercial customers as of the  
8           end of the true-up period.
- 9       3) Normalize the sales level for the residential and commercial class for  
10           weather and to reflect in rates the sales trends for these classes in the St.  
11           Louis, St. Charles, St. Joseph, and Joplin districts.
- 12       4) Adjust for known and measurable changes for specific large customers  
13           whose sales need to be annualized, reduced, or eliminated.
- 14       5) Adjust for the level of current rates associated with the Infrastructure  
15           System Replacement Surcharge.

16

17   **Q.   BEFORE YOU BEGIN EXPLAINING THE ADJUSTMENTS TO REVENUES,**  
18       **PLEASE BRIEFLY DESCRIBE SCHEDULE CAS-13 and CAS-14.**

19   **A.   Schedules CAS-13 and CAS-14 present to the Commission a summary and**  
20       **detail by district of the Company's pro forma test year revenues at both**  
21       **present and proposed rates. Since the Company's current tariffs are based**  
22       **on district-specific rates, included in the schedule reference is a three-digit**  
23       **alpha abbreviation that identifies the district. Attached to the testimony of Mr.**  
24       **Petry is a schedule that identifies and matches the district to the alpha**

1 abbreviation. Schedule CAS-13 for each district is a summary by revenue  
2 class with CAS-14 providing the detail by revenue class. The proposed rates  
3 are based on an across the board increase as discussed by Mr. Jenkins in his  
4 direct testimony.

5  
6 **Q. PLEASE CONTINUE WITH YOUR DISCUSSION OF THE REVENUE**  
7 **ADJUSTMENTS.**

8 **A.** As shown on Schedule CAS-9 for each of the districts, unbilled revenue is  
9 being eliminated to reflect the Company's adjustment for the annualizing and  
10 normalizing of customers and sales as of the true-up.

11 The next adjustment shown on the schedule is labeled Bill Analysis and Other  
12 Adjustments. These adjustments are related to the bill analysis and will  
13 adjust the per book revenues to the bill analysis. One example of an  
14 adjustment is to adjust and eliminate correcting journal entries made in the  
15 books.

16 The next level of adjustments shown and labeled Normalization and  
17 Customer Adjustments reflects the number of customers anticipated at the  
18 true-up date and the use of a normalized level of sales based on normal  
19 weather and the current trend of customer usage per day anticipated for 2007  
20 for the St. Louis, St. Charles, St. Joseph and Joplin Districts. For Jefferson  
21 City, Parkville Water, Brunswick, Mexico and Warrensburg, a simple four or  
22 five year average for residential and commercial usage per customer was  
23 used. For Warren County Water, actual test year sales were used. These  
24 smaller districts only represent 6% of the customer base of the Company and

1       thus calculating a full weather and utilization study would not have a material  
2       impact on the rate request.

3       The Company has contracted the services of Professor Edward Spitznagel  
4       from Washington University. Professor Spitznagel has performed a detailed  
5       statistical analysis of the residential and commercial class customers for St.  
6       Louis, St. Charles, St. Joseph, and Joplin districts. Based on his analysis,  
7       Professor Spitznagel has made recommendations to the Company regarding  
8       the appropriate level of usage per day, per customer for the revenue classes  
9       noted above. Professor Spitznagel has provided a detailed discussion in his  
10      direct testimony in this proceeding. As noted, the remaining districts' usage  
11      per day was based on an historical average or actual test year level.

12      The final level of adjustments shown on CAS-9 for each of the districts is  
13      labeled Other Adjustments. These adjustments reflect specific impacts on the  
14      Company's revenues based on known and measurable changes for specific  
15      customers, number of days in the test year and for the impact of  
16      implementing ISRS surcharges during 2006. Shown below is a discussion of  
17      the adjustments by District.

- 18      1) The Brunswick District has identified the loss of Chariton County Water  
19          District No. 2 as a Sale for Resale customer. This adjustment eliminates  
20          its revenues at present rates in the amount of \$54,853. The adjustment is  
21          incorporated in Schedule CAS-9-BRU. The Company anticipates losing  
22          this customer to another water supplier who can offer softened water.
- 23      2) The St. Louis District has identified the loss of Ford Motor Company as a  
24          customer due to its closing. The adjustment eliminates this customer from

1 revenues at present rates. Additionally, the City of Kirkwood (a Sale for  
2 Resale, Rate G customer) closed its water treatment plant in November  
3 2006 and now purchases all of its water needs from the Company. The  
4 total amount of these two adjustments increases present rate revenues by  
5 \$470,355. The Company also received Final Orders in two Infrastructure  
6 System Replacement Surcharge filings during 2006. The Company has  
7 annualized the impact of these surcharges which increases present rate  
8 revenues by \$5,970,491. These adjustments are incorporated into  
9 Schedule CAS-9-STL.

10 3) The St. Joseph District lost the City of Wathena as a Sale for Resale  
11 customer. The adjustment eliminates the revenues at present rates.  
12 Triumph Foods is being adjusted for a rate change in accordance with  
13 their contract. The total amount of these adjustments reduces revenues at  
14 present rates by \$58,002. These adjustments are incorporated in  
15 Schedule CAS-9-SJO and are detailed in the workpapers.

16 4) In 2003, Missouri American Water changed from a monthly calendar  
17 accounting period closing schedule to a 4-4-5 accounting period closing  
18 schedule. In a 4-4-5 accounting period closing schedule,  
19 accounting cycles for a three month quarter are set up to cover four  
20 weeks, four weeks, and five weeks. As a result, the closing day for the  
21 accounting period may not correspond to the last day of the calendar  
22 month. In 2006, Missouri American Water reverted to the calendar month  
23 end close but still used the 4-4-5 concept by accruing revenues and  
24 expenses to the end of the month. The test period for this rate case is for

1 the twelve months ending June 30, 2006; however, because of the 4-4-5  
2 accounting period that was in effect prior to June, 2006, the test year  
3 actually covers the period of June 25, 2005, through June 30, 2006 for  
4 billed revenues, or a total of 371 days. Since the test period includes an  
5 extra six days of billed revenue that would not normally be a part of a  
6 twelve month test period, the Company has calculated a pro forma  
7 adjustment to eliminate the six extra days. An Orcom billing data report  
8 was downloaded and generated to determine the actual billing  
9 determinants for the period of June 24, 2005 through June 30, 2005, and  
10 those billing determinants were removed from the test year. The  
11 adjustment for those six extra days of billed revenue reduces the test year  
12 revenue by \$2,347,075. Consistent with this adjustment is the elimination  
13 of unbilled revenues in the amount of \$1,984,498, which increased  
14 revenues at present rate revenues.

15  
16 **(3) PENSION**

17 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
18 **RELATED TO PENSION.**

19 **A.** Missouri American has included in its pro forma pension expense the actual  
20 cost related to the FAS 87 accrual which is supported by American Water's  
21 latest actuarial report. Starting in 2006, nonunion employees hired before  
22 January 1, 2006, and union employees hired before January 1, 2001, are  
23 included as participants in the Company's defined benefit pension plan. The  
24 FAS 87 Pension cost is based on actuarial studies conducted annually by

1 Towers Perrin for the defined benefit participants. For employees in the  
2 defined contribution plan, a rate of 5.25% of base salary is used to calculate  
3 the expense. The total costs for pension were reduced by the amounts  
4 anticipated to be capitalized based on the payroll adjustment supported by  
5 Mr. Petry. A copy of the pension actuarial study is included in the  
6 workpapers. The pro forma expense is \$2,533,747. Additional details and  
7 comments are found on Schedule CAS-15, page 3.

8  
9 **(4) OPEBs**

10 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
11 **RELATED TO OPEBs.**

12 **A.** The Company used the most recent actuarial report prepared for  
13 American Water by Towers Perrin to calculate the pro forma cost and like  
14 pension, the percent to be capitalized from the labor adjustment was applied  
15 to arrive at the pro forma expense. As a result of the recent union  
16 negotiations, union employees who are not eligible for post-retirement  
17 benefits were provided an annual \$500 contribution that is to be paid into a  
18 VEBA account for the employee to pay for medical costs after retirement.  
19 The proforma OPEB expense is \$969,689 and is included on Schedule CAS-  
20 15, page 2 as a part of the Group Insurance expense adjustment.

21  
22 **(5) REGULATORY EXPENSE**

23 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
24 **RELATED TO REGULATORY EXPENSE.**

1 A. The purpose of this adjustment is to annualize rate case expense for the  
2 costs related to this rate filing. Estimated costs related to the rate filing  
3 include legal fees, consultant's cost, travel expenses, and other expenses.  
4 It is being proposed that these costs be amortized over a three-year  
5 period. Should the actual time period between the current case and the  
6 next case be less than three years, the Company will propose and  
7 adjusted recovery period in the next rate case. The pro forma expense is  
8 \$267,747. The details of this adjustment can be found at Schedule CAS-  
9 15, page 10.

10

11

**(6) INSURANCE OTHER THAN GROUP**

12 Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES  
13 RELATED TO INSURANCE OTHER THAN GROUP.

14 A. The purpose of this adjustment is to annualize the Insurance Other than  
15 Group to the latest annual insurance premium levels received by the  
16 Company. The pro forma expense is \$4,874,160. The details of this  
17 adjustment can be found at Schedule CAS-15, page 11.

18

19

**(7) SERVICE COMPANY SUPPORT SERVICES**

20 Q. WHAT ADJUSTMENT WAS MADE TO THE COMPANY'S TEST YEAR  
21 LEVEL OF SUPPORT SERVICES?

22 A. Test year Support Services from American Water Works Service  
23 Company were adjusted to eliminate specific one-time costs and other  
24 costs related to donations, memberships and lobbying expenses. Also

1 eliminated were the costs of two External Affairs employees who are  
2 included in the calculation of the Company's labor adjustment. It has been  
3 determined that these employees dedicate 100% of their time to the  
4 Company. Additional adjustments were performed to annualize employee  
5 wage costs and to include the costs associated with vacancies and new  
6 positions in the ITS and Shared Services functions, costs associated with  
7 the purchase of assets at the Service Company and the additional auditing  
8 costs by the independent auditors as a result of Sarbanes-Oxley. The  
9 total pro forma expense is \$26,097,225. The details of this adjustment  
10 can be found at Schedule CAS-15, page 12  
11

12 **Q. MR. GRUBB, DO YOU HAVE ANY OTHER COMMENTS REGARDING THE**  
13 **SUPPORT SERVICES RECEIVED FROM AMERICAN WATER WORKS**  
14 **SERVICE COMPANY?**

15 **A.** Yes. American Water initiated a reorganization in late 2003 that was  
16 completed at the end of 2004. As result of the reorganization, the Central  
17 Region of American Water was formed. The Central Region includes not only  
18 Missouri American, but also Illinois American, Iowa American, Indiana  
19 American, Ohio American and Michigan American. The reorganization  
20 reduced direct costs at the operating company level by eliminating  
21 management positions. It also shifted employees who previously worked for  
22 Missouri American Water to American Water Works Service Company.  
23 These employees now provide the same or similar services to the Company,  
24 but are employees of the Service Company. For example, I was the Director

1 of Rates and Planning for Missouri American Water prior to the  
2 reorganization. After the reorganization, I assumed the duties as Manager  
3 Rates and Regulation for the Central Region Service Company. As a Service  
4 Company employee, I perform many of the same functions as I did when I  
5 was an employee of the Company. However, I also provide those same  
6 services to the other companies in the Central Region. My time is billed to  
7 Missouri American based on the Service Agreement between the Company  
8 and American Water Works Service Company.  
9

10 **(8) MAIN BREAK EXPENSE**

11 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
12 **RELATED TO MAIN BREAK EXPENSE.**

13 **A.** The purpose of this adjustment is to annualize main break expense to an  
14 estimated/normal pro forma expense based on a two-year average. The  
15 periods averaged are for the twelve months ended June 30, 2005 and  
16 December 31, 2006. The details of this adjustment can be found at  
17 Schedule CAS-15, page 14.  
18

19 **(9) STEP COSTS**

20 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
21 **RELATED TO STEP.**

22 **A.** The Company is eliminating the expense associated with the write-off of  
23 the Standardized Technology Enabled Processes ("STEP") costs because  
24 they are deemed to be a nonrecurring expense.

1

2

**(10) PROPERTY TAX EXPENSE**

3 Q.

**PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES  
RELATED TO PROPERTY TAX EXPENSE.**

4

5 A.

The purpose of this adjustment is to annualize property tax expense to a  
pro forma expense based on the level of Utility Plant in Service included in  
the Companies' pro forma rate base. The pro forma expense is  
\$10,294,594. The details of this adjustment can be found at Schedule  
CAS-15, page 17.

9

10

11

**(11) INCOME TAXES**

12 Q.

**PLEASE EXPLAIN THE COMPANY'S CALCULATION OF ITS PRO  
FORMA LEVEL OF INCOME TAXES.**

13

14 A.

The Company's pro forma level of current income taxes at present rates is  
based on deducting from revenues all operating expenses and interest  
expense. Additional add-backs and deducts are reflected for tax over book  
depreciation, non-deductible meals and preferred stock expense. The  
resulting taxable income is then multiplied by the state and federal statutory  
rates of 5.21% and 35%, respectively

19

20

Deferred income taxes for the temporary timing difference related to tax over  
book depreciation was calculated at the statutory rates. The per books level  
of the amortization of the Deferred ITC and the Deferred Taxes associated  
with the amortization of the regulatory assets and liabilities was also included  
in the calculation of income taxes.

24

1 Income taxes at proposed rates reflect the impact of the Company's request  
2 for additional revenues.  
3

4 **(12) DEPRECIATION RATES**

5 **Q. DO YOU HAVE ANY COMMENTS REGARDING THE PROPOSED**  
6 **DEPRECIATION RATES?**

7 **A.** Yes. John Spanos of Gannett Fleming has performed a depreciation study  
8 using plant data as of December 31, 2005. The current depreciation rates  
9 were approved by the Commission in Case No. WR-2003-0500. Those  
10 depreciation rates reflected adjustments to the service lives and the  
11 elimination of a component related to net negative salvage. As a result of  
12 recent Commission decisions, the Company's Depreciation Study is  
13 proposing to update the service lives and to include a component for net  
14 negative salvage.  
15

16 **Q. IS THE COMPANY PROPOSING TO IMPLEMENT THE DEPRECIATION**  
17 **RATES AS RECOMMENDED BY MR. SPANOS?**

18 **A.** No. The Company is proposing to implement water depreciation rates that  
19 reflect a transition towards Mr. Spanos' recommended water depreciation  
20 rates. If Mr. Spanos' recommended rates were fully implemented, then the  
21 Company's revenue increase request would have been increased by  
22 approximately an additional \$4.5 million. The Company is proposing to  
23 transition to the recommended depreciation rates over this rate case and the  
24 next general rate case.

1

2 **Q. DO YOU HAVE A SCHEDULE SHOWING WHAT THE COMPANY'S**  
3 **PROPOSED DEPRECIATION RATES ARE IN THIS CASE?**

4 **A.** Attached to my direct testimony is Schedule EJG-2. It provides a list of the  
5 proposed depreciation rates by Company plant account. As noted earlier,  
6 these depreciation rates reflect a move of one-half of the difference  
7 between the current water depreciation rates and the recommended water  
8 depreciation rates of Mr. Spanos.

9

10 **(13) CONSOLIDATED BILL TARIFF**

11 **Q. HAS THE COMPANY PROPOSED A CONSOLIDATED BILL TARIFF FOR**  
12 **THE ST. LOUIS DISTRICT?**

13 **A.** Yes. As a result of Stipulations in the last MAWC rate case (Case WR-2003-  
14 0500), the Company agreed to prepare a study to determine the feasibility of  
15 consolidating customer's bills for contiguous, owner-occupied properties to  
16 allow for an aggregation of usage to take advantage of lower rates. MAWC  
17 also agreed to propose such a tariff for the St. Louis district. I have attached  
18 to my direct testimony as Schedule EJG-3, a copy of the study. The  
19 Company has also included a tariff that proposes bill consolidation for the St.  
20 Louis District.

21

22 **Q. ARE THERE ANY SPECIFIC POINTS THAT YOU WOULD LIKE TO**  
23 **DISCUSS REGARDING THE TARIFF.**

1 A. I believe it is important to note that for a customer to have multiple account  
2 usages aggregated, the accounts must have contiguous, owner occupied  
3 properties. Under the current cost structure and operations, consolidation  
4 would not be appropriate in circumstances other than contiguous, owner  
5 occupied properties.

6

7

**(14) CUSTOMER CLASS DEFINITION**

8 Q. HAS THE COMPANY COLLECTED ANY INFORMATION REGARDING  
9 THE DEFINITION OF CUSTOMER CLASSES FOR A WATER UTILITY?

10

11 A. Per the Rate Design Stipulation in Case No. WR-2003-0500, the Company  
12 agreed to collect data sufficient to allow a study to evaluate current customer  
13 class definitions and to share the data with the parties for their review. The  
14 Company provided the data that is found in the American Water Works  
15 Association Manual of Water Supply Practices, pages 63-65. Based on a  
16 review of this information, the Company believes that its current customer  
17 classifications are appropriate at this time based on the current cost  
18 structures and rates of Missouri-American.

19

20

**(15) ISRS INFORMATION**

21 Q. MR. GRUBB, YOU DISCUSSED EARLIER IN YOUR TESTIMONY THAT  
22 THE COMPANY IMPLEMENTED TWO CHANGES TO ITS ISRS TARIFF  
23 DURING 2006. IS THE COMPANY REQUIRED TO PROVIDE TO THE  
24 COMMISSION INFORMATION REGARDING THE ISRS FILINGS?

1 A. Yes. Commission Rule 4 CSR 240-3.650(20) requires the Company to  
2 provide to the Commission specific information if it is not provided at the time  
3 of the ISRS filing.  
4

5 **Q. WHAT INFORMATION IS THE COMPANY PROVIDING AT THIS TIME TO**  
6 **MEET THE ISRS REQUIREMENTS?**

7 A. First, the Company is required to explain the efforts to quantify and seek  
8 reimbursements for any costs associated with facility relocations. Second, to  
9 identify any financing arrangements directed specifically to the projects. And  
10 third, an explanation of the request for proposal (RFP) process used, or the  
11 reasons that an RFP process was not used, to select the entity that  
12 performed the infrastructure replacement projects associated with the ISRS.  
13

14 **Q. PLEASE EXPLAIN THE EFFORTS TO QUANTIFY AND SEEK**  
15 **REIMBURSEMENTS FOR ANY COSTS ASSOCIATED WITH FACILITY**  
16 **RELOCATIONS.**

17 A. The Company sometimes receives reimbursement from either private  
18 developers or governmental agencies. In the case of a private developer, the  
19 Company will enter into an agreement that requires the developer to advance  
20 to the Company the money based on an estimated cost to relocate facilities.  
21 Once the project is complete, the Company prepares a reconciliation of the  
22 actual cost to the estimated cost. If the actual cost exceeds the estimate, the  
23 developer is required to reimburse the Company. If the actual cost is less

1       than the estimate, then the Company will refund the difference to the  
2       developer.

3       In the case where a governmental agency requires a relocation of Company  
4       facilities, no advance funding is received. Once the project is complete, the  
5       Company will bill the governmental agency for the amount of the cost of the  
6       relocated facilities that were located in easements.

7       In all cases, reimbursements are based on actual construction costs.

8

9       **Q.   WERE ANY FINANCING ARRANGEMENTS DIRECTED SPECIFICALLY**  
10       **TO THE ISRS PROJECTS?**

11      **A.   No.**

12

13      **Q.   PLEASE EXPLAIN THE RFP PROCESS OR, IF ONE WAS NOT USED,**  
14      **WHY IT WAS NOT USED.**

15      **A.   Generally, the Company does not issue a request for proposal (RFP) for the**  
16      **construction projects related to ISRS. The Company uses its own union**  
17      **workforce to complete ISRS eligible projects. However, there were two ISRS**  
18      **eligible projects that required specialized construction skills which the**  
19      **Company does not possess. In those two instances, an outside contractor**  
20      **was used. One project required the installation of a main using a slip lining**  
21      **method of main installation. The second project required a method known as**  
22      **Horizontal Directional Drilling. In each case, there only existed one contractor**  
23      **in the St. Louis metropolitan area who had the expertise, manpower and the**  
24      **tools and equipment to perform these specialized main replacements.**

1

2

**(16) MINIMUM FILING REQUIREMENTS (MFRs)**

3

**Q. HAS THE COMPANY INCLUDED IN ITS FILING THE REQUIRED MFRs?**

4

A. Yes. Attached to my testimony is Appendix A, which contains the required information for filing a request to change rates and charges before this Commission.

7

8

**Q. HAS THE COMPANY INCLUDED A COPY OF THE PROPOSED TARIFFS IN THE MINIMUM FILING REQUIREMENTS WHICH IS ATTACHED TO YOUR TESTIMONY AS APPENDIX A?**

10

11

A. Yes. All tariffs that the Company is proposing to change have been included in the Minimum Filing Requirements. The Company has not included a revised tariff for the Infrastructure System Replacement Surcharge (ISRS). Per 4 CSR 240-3-650(17), the Company will file a revised ISRS tariff schedule which will reset the ISRS rates to zero when new base rates and charges become effective following a Commission order establishing customer rates in a general rate proceeding that incorporates eligible costs previously reflected in an ISRS into the Company's base rates.

12

13

14

15

16

17

18

19

20

**Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

21

A. Yes, it does.

**EDWARD J. GRUBB**

Edward J. Grubb is the Rates and Regulation Manager for the Central Region of American Water. Mr. Grubb is also the Assistant Treasurer for Missouri American Water Company.

As Rates and Regulation Manager, his main responsibilities are to:

- 1) Plan and oversee the preparation and presentation of all rate increase applications and supporting documents and exhibits as prescribed by management policies, guidelines and regulatory commission requirements;
- 2) Oversee rate analyses and studies to evaluate the effect of proposed rates on the revenues, rate of return and tariff structure of the company;
- 3) Oversee the implementation of rate orders, including development of the revised tariff pricing necessary to produce the proposed revenue level;
- 4) Oversee the preparation of Company budgets and analyses;
- 5) Oversee the review of Company financial statements;
- 6) Oversee employee relations in the Regional Finance Department, including the recommendation regarding personnel changes and the training and evaluation of assigned personnel;
- 7) Provide support for financial analysis of proposed acquisitions and expansion of service territory, including preparation of applicable Commission filings;
- 8) Assure that policies, procedures, programs, standards of performance, and approved objectives are adhered to and/or achieved including those involving safety, affirmative action, community relations, and labor relations.

Mr. Grubb has prepared rate cases and presented testimony before the Maryland Public Service Commission, West Virginia Public Service Commission, Tennessee Public Service Commission, Illinois Commerce Commission, Kentucky Public Service Commission, Iowa Utilities Board, Public Utility Commission of Ohio, Missouri Public Service Commission, Indiana Utility Regulatory Commission and the Virginia State Corporation Commission.

In June 1978, Mr. Grubb was awarded a Bachelor of Science Degree in Business Administration from Drexel University with a major in accounting. In May 1989, he was awarded a Masters of Business Administration from the University of West Virginia College of Graduate Studies. In September 1993, Mr. Grubb successfully completed the Certified Management Accounting program and received his certificate as a Certified Management Accountant (CMA). And, in January 1998, he successfully completed the Certified in Financial Management (CFM) program and received his certificate as a CFM from the Institute of Management Accountants.

Mr. Grubb began his career in 1978 with American Water Works Service Co., Inc. as an Internal Auditor. As an Internal Auditor, he conducted financial and procedural audits of American System operating companies. In 1983, Mr. Grubb was promoted to Rate Analyst. In 1984, he was promoted to Revenue Requirement Specialist and in 1988, Mr. Grubb was promoted to Assistant Director - Rates and Revenue. In these three positions, he has assisted, prepared and presented testimony and accounting exhibits before regulatory bodies concerning rate increase applications and other matters.

In January 1998, Mr. Grubb was promoted to the position of Comptroller of Kentucky-American Water Company. In his capacity as Comptroller, Mr. Grubb was responsible for all aspects of the accounting and regulation for the Company, including the preparation of financial statements, tax returns, and regulatory filings. In October 2000, Mr. Grubb was promoted to the Director, Rates and Revenue with Missouri-American Water. In August 2004, Mr. Grubb was appointed to his current position.

**Missouri American Water Company  
St. Louis District  
Feasibility of Consolidated Customer Billing**

**Introduction**

Pursuant to the Stipulation and Agreement as to Rate Design (Stipulation) reached in Missouri American Water Company's (Company) last rate case at Case No. WR-2003-0500, paragraph No. 6 of the Stipulation required the Company to perform a study to determine the reasonableness of bill consolidation for contiguous, owner occupied properties in the St. Louis District, and will share the results with the Parties for their review and comment. Such customers could benefit from consolidated billing which would price more of their usage at a different rate schedule with a lower rate.

**Cost of Service Considerations.**

The feasibility of billing customers on a consolidated basis is supported on cost of service principles. The company uses the base extra capacity method of cost allocation as explained in AWWA Water Rates Manual M1. Based on this methodology, a customer with contiguous properties does not require additional distribution mains or other distribution facilities to provide service to two or more accounts at the same location. The only additional cost to serve a customer with multiple connections at the same location (contiguous properties) is the cost of the additional service line(s), meter(s) and meter reading(s). Such additional cost would be recovered by charging a minimum or customer charge for each

connection based on the size meter serving the connection. Therefore, the Company would recover the total cost to serve such customers by charging a customer charge for each connection and applying the consumption rates to the total aggregated usage through the rate blocks to arrive at the total bill for service.

An additional consideration in support of consolidated billing is the fact that the use of multiple connections serving a customer can be at the convenience of the Company. Depending on the way contiguous properties are situated and the demands of the customer, the use of multiple connections may be the most efficient way to serve such customers. In these cases, the customer should not have their usage priced at a higher rate just so the service can be provided in the most efficient manner.

In contrast to customers with contiguous properties described above, customers who may have multiple water accounts that are not located on contiguous properties should not benefit from consolidated billing. Such customers would require additional distribution mains, and possibly other distribution facilities in order to serve the multiple locations. Therefore, the additional costs required to serve accounts at non-contiguous locations would have to be recovered through the application of the rate structure for each separate location.

#### **Rate and Implementation Impacts and Considerations**

The implementation of bill consolidation billing will result in less revenue generated for the Company, since the usage for each customer will be priced at

a lower rate. The Company will require existing customers in its St. Louis District to apply for this service and if eligible, the service will start at the conclusion of the next general rate case. For new customers in the St. Louis District who are not replacing an existing customer, this service can be initiated immediately upon requesting service from the Company as long as they are eligible.

NAME OF ISSUING CORPORATION

COMMUNITY, TOWN, OR CITY

RATE E  
RATE FOR PUBLIC WATER SUPPLY DISTRICT 2

**APPLICATION** – This rate is applicable to water service provided to Public Water Supply District No. 2 ("District") in order to comply with the agreement dated August 23, 1997, between United Water Missouri ("Company") and the District, as well as subsequent amendments to that agreement. It is recognized that in accordance with said agreement and amendments, the Company has obtained the use of storage and well facilities owned by the District in exchange for certain operational responsibilities and charges. It is also recognized that the sources of water used by the District's customers are from its own wells and, in the course of operating the interconnected systems, also from the Company's treatment plant.

(A) Pursuant to Paragraph 7 of the August 23, 1977 Agreement, the rate in this tariff shall be charged by the Company to the District for the quantity of water used by the District in any month in which the quantity of water used exceeds the maximum monthly quantity used in the previous calendar year, adjusted for growth in that calendar year, as determined by the formula set forth in Paragraph 7 of the Agreement.

(B) To the extent that charges for water service have not been made under paragraph (A) above, this tariff rate shall apply to the net flow of "treatment plant" water from the Company to the District, as measured at the interconnections between the Company's and the District's systems, provided that there has been a net flow of "treatment plant" water into the District during the last 12-month period.

MISSOURI-AMERICAN WATER COMPANY  
NAME OF ISSUING CORPORATION

FOR CITY OF JEFFERSON CITY, MO AND COLE COUNTY,  
MO ADJACENT TO JEFFERSON CITY  
COMMUNITY, TOWN, OR CITY

RATE F		
RATE FOR MANUFACTURERS AND LARGE QUANTITY USERS OF WATER		
<p><b>APPLICATION</b> - This rate is applicable to Manufacturers and Large Quantity Users of Water whose use is fairly constant throughout the year and is not less than 60,000 cubic feet per month.</p> <p>This rate is not available to users of water in residences, apartment dwellings, hotels, hospitals, educational institutions, or for irrigation or construction purposes.</p> <p><b>* RATE TABLE</b> - For all water used as registered by meter:</p>		
For all cubic feet per month	\$1.4054	+
<p><b>SERVICE CHARGE</b> - The following monthly service charges must be paid regardless of the quantity of water used.</p>		
METER SIZE	MONTHLY SERVICE CHARGE	
2" Water Meter	985.64	+
3" Water Meter	998.52	+
4" Water Meter	1,016.89	+
6" Water Meter	1,062.81	+
<p><b>MINIMUM CHARGE</b> - The minimum charge in any month shall be 60% of the maximum charge that occurred for any of the months of June, July, August, or September in the twelve (12) months period preceding the month for which the bill is rendered, except that the minimum shall not be less than the service charges stated above.</p> <p>If the customer is forced to close the operations of its plant for a period of 10 days or more because of accidents, fires, damage to plant, strikes of its own employees, acts of God, Governmental regulations or other cause not reasonably within its control, and the customer gives Water Company written notice not later than thirty days after such occurrence, the customer will be entitled to a pro-rated reduction in the monthly minimum charge for the period the customer is unable to use full water service for such cause.</p> <p>* Indicates new rate or text + Indicates change</p>

**Billing**

Bills for water service will be distributed on a monthly basis. The due date on the tariff shall be ten (10) days after the "date of rendition" of the bill to the customer. The customer's bill will be due and payable after this due date. The delinquent date printed on the bill will not be less than twenty-one (21) days after the date of the postmark of the bill. Any accounts remaining unpaid at the expiration of twenty-one (21) days shall be considered delinquent and the Company may take such action as specified in its filed rules and regulations.

SHEET No. RT 1.0

SHEET No. RT 1.0

MISSOURI-AMERICAN WATER COMPANY

FOR

ST. LOUIS COUNTY, MISSOURI AND JEFFERSON COUNTY, MISSOURIRATE AMETER RATE - RESIDENTIAL AND COMMERCIAL

**AVAILABILITY** - This rate is available to all residential ("domestic") and commercial customers in cities, towns, and unincorporated territory served by the Company. This rate is required where premises have water closets, hose connections, or sewer connections.

A "residential" ("domestic") customer, under this residential rate classification, is a customer who purchases water for "Domestic use", under this residential rate classification, includes that portion of water which is ultimately delivered to a single or multiple family dwelling, and shall apply to all such purchases regardless of whether the customer is the ultimate consumer.

This tariff is intended to satisfy the provisions of section 144.030 (23), RSMo, by establishing and maintaining a system and rate classification of "residential" to cause the residential sales and purchases of water under this tariff to be considered as sales made for domestic use and thus exempt from sales tax.

**CONTRACT TERM AND BILLING** - Standard contracts are on a yearly basis, with monthly or quarterly billing for service, except as provided by Rule 4.0.

RATE COMPONENTS:

MINIMUM CUSTOMER CHARGE (2) - The minimum charge for water service available through the facilities of the Company for the billing period and for the meter size furnished the customer is:

Meter Size	(AM) Monthly Billing	(AQ) Quarterly Billing	Prorated Service Charge (3)	
5/8"	\$8.19 (1)	\$12.00 (1)	\$9.15	+
3/4"	\$9.15 (1)	\$14.88 (1)	\$10.58	+
1"	\$11.07 (1)	\$20.63 (1)	\$13.44	+
1-1/2"	\$15.86	\$34.98	\$20.63	+
2"	\$21.58	\$52.16	\$29.22	+
3"	\$36.88	\$98.08	\$52.19	+
4"	\$54.08	\$149.71	\$78.00	+
6"	\$101.90	\$293.14	\$149.71	+
8"	\$159.28	\$465.26	\$235.77	+
10"	\$235.78	\$694.74	\$350.51	+
12"	\$312.26	\$924.23	\$465.28	+

COMMODITY CHARGE (2) - In addition to the Minimum Customer Charge, for all water used as registered by the meter the Commodity Charge is \$2.0323 per 100 cubic feet or \$2.7097 per 1,000 + gallons.

**PAYMENT TERMS** - Bills are net, and are due and payable within ten (10) days after date of bill.

8"	\$159.28	+
10"	\$235.78	+
12"	\$312.26	+

COMMODITY RATE (A) - In addition to the Meter Charge, for all water used as registered by the meter the Commodity Charge is:

REGULAR RATE:	\$ 0.5198 per hundred cubic feet or \$0.6930 per thousand gallons	+
1st ALTERNATE RATE:	\$ 1.0770 per hundred cubic feet or \$1.4359 per thousand gallons	+
2nd ALTERNATE RATE	\$ 1.1539 per hundred cubic feet or \$1.5385 per thousand gallons	+

USAGE RATE LIMITATIONS:

1) Customers "base load" shall be calculated as the daily average of water purchased from St. Louis County Water Company during the previous 12 monthly billing periods. Each metering point will be calculated separately.

MISSOURI-AMERICAN WATER COMPANY +  
FOR  
ST. LOUIS COUNTY, MISSOURI AND JEFFERSON COUNTY, MISSOURI

RATE E-1  
PUBLIC FIRE HYDRANT SERVICE - CITIES, TOWNS, VILLAGES

**APPLICABILITY** - This Public Fire Protection Service Charge shall apply to all active Rate A and J water customers located in incorporated cities, towns and villages.

**MONTHLY CHARGE** - A monthly public fire hydrant service charge shall be determined for each incorporated city, town or village and shall be computed in accordance with the following formula:

$$\text{Monthly Charge (1)} = \frac{(N \times R) + U}{A \times 12}$$

Where within city, town or village:

N = Number of Public Fire Hydrants at date of determination.

R = Annual Service Charge of \$262.38 per fire hydrant. +

U = Unamortized investment in fire hydrants ordered removed, relocated, or discontinued plus cost of removal less salvage in the most recent 12 - month period ending December 31.

A = Number of Active Rate A and J customers at date of determination.

**BILLING** - Billing will be rendered either quarterly or monthly in advance, consistent with the billing period for regular water service. Billing for this service shall be in addition to charges for regular water service. For each new active customer billing shall start with the first billing period. Customers terminating service within a billing period shall not be entitled to a refund of any part of a previously paid fire hydrant charge.

**PAYMENT TERMS** - Bills are net, and are due and payable within ten (10) days after date of bill. In all cases of nonpayment of the public fire hydrant service charge, water service may be discontinued in accordance with the provisions of Rule 2.3.

**ADJUSTMENT** of fire hydrant service charge. The monthly fire hydrant service charge shall be adjusted annually on March 1 of each year, based on December 31 data of the previous year or, at its option, the Company may recompute the monthly service charge at any time to reflect changes in number of customers or fire hydrants in the incorporated city, town, or village that results in a variation of \$0.01 or more in the monthly charge.

RATE F  
PRIVATE FIRE PROTECTION

AVAILABILITY - This rate is available for fire protection on private property.

CONSTRUCTION PROVISION - The expense of installation will be borne by the customer requesting such service.

RATE (1) - Customer with unmetered fire protection will be billed at the following rates based upon the tap size in the Water Company's main (tap size for multiples of smaller taps for one line shall be the equivalent connection had a single tap been used) :

<u>Tap Size</u>	<u>Annual Rate</u>	
2" or less	\$29.21	+
4"	\$116.61	+
6"	\$262.38	+
8"	\$466.50	+
10"	\$728.93	+
12"	\$1,049.77	+

Charges for Private Fire Protection for larger than 12" taps must be individually negotiated with the Water Company.

DETECTOR CHECK METERS - In addition to the tap size charge, fire lines with detector check meters will be billed as follows: (1)

For all water used as registered by the meter the Commodity Charge is the same as the Rate A Commodity Charge shown on Sheet No. RT 1.0.

Minimum Charge - The following charges must be paid on all detector check meters in addition to the Commodity Charge:

<u>Meter Size</u>	<u>Monthly Charge</u>	
5/8"	\$12.26	+
3/4"	\$13.22	+
1"	\$15.14	+

Bill Consolidation Tariff	
<b><u>DESCRIPTION AND TERMS:</u></b>	*
To provide for the consolidation of water usage for billing purposes for customers in the St. Louis District owning and occupying contiguous properties served by multiple meters. Qualifying customers and facilities are those locations where a customer's property or contiguous properties are served by a single distribution main or distribution facility, although service is provided through more than one meter.	*
<b><u>APPLICABILITY:</u></b>	*
This consolidation will be provided to existing customers who apply and whose eligibility under the terms above is confirmed by the Company. Initiation of the bill consolidation for an existing customer will commence at the conclusion of the Company's next general rate case. New customers may apply for such consolidation at the time service is requested. Bill consolidation will be applied for new customers to the first bill issued to the customer following application and the Company's confirmation of eligibility.	*
<b><u>RATE CALCULATION:</u></b>	*
Customers qualifying for bill consolidation will be charged the applicable minimum customer charge associated with each meter serving the subject property or contiguous properties. Consumption rates for under Rate J will be applied to the total aggregated usage of all meters at the property or contiguous properties to arrive at the total bill for service. Thus, the customer's bill calculation will be governed by the rules for the Rate J tariff until such time the customer is no longer eligible under the Bill Consolidation Tariff.	*

**Item #1 - Aggregate Annual Increase**

**Brunswick District**

The aggregate annual increase over current revenues which the tariffs propose is \$34,088  
which is an overall increase to the customer of 25.25% on a Pro Forma Basis.

**Jefferson City District**

The aggregate annual increase over current revenues which the tariffs propose is \$1,034,450  
which is an overall increase to the customer of 25.26% on a Pro Forma Basis.

**Joplin District**

The aggregate annual increase over current revenues which the tariffs propose is \$1,938,973  
which is an overall increase to the customer of 25.25% on a Pro Forma Basis.

**Mexico District**

The aggregate annual increase over current revenues which the tariffs propose is \$632,356  
which is an overall increase to the customer of 25.25% on a Pro Forma Basis.

**Parkville District**

The aggregate annual increase over current revenues which the tariffs propose is \$830,565  
which is an overall increase to the customer of 25.25% on a Pro Forma Basis.

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase 14 to 32 cents per day**

**(St. Louis County, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested an across the board rate increase that averages 24.85% across all the company's operating districts. The percentage increase in each district varies, based primarily on the infrastructure investments that the company has made in each community. The company cited ongoing infrastructure investments and increased operating costs as main reasons for the request.

If approved, the average residential customer's bill increase would range from \$4.11 to \$9.69 per month, or \$0.14 to \$0.32 per day. Typical water bills would range from \$20.40 to \$48.08 per month, varying by community. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

While each operating district's rate history is different, most Missouri American Water customers have not received an increase in base water rates since 2001.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

# News Release

Page 2

Any change in water rates will become effective only after a thorough analysis and review by the PSC; a process that will take approximately one year and includes opportunities for formal public and customer input.

"Our rates are based on the actual cost of providing water service," said Greg Weeks, General Manager. "The price our customers pay is driven by the ongoing infrastructure investment that Missouri American Water makes to provide reliable, quality water service." Weeks added that Missouri American Water has also experienced significant increased costs for chemicals, fuel, labor and insurance over the past three years, which it is seeking to recover in its rate filing.

"We continue to deliver an excellent service that our customers depend upon at an exceptional value," continued Weeks. "One gallon of tap water still costs less than one penny." According to Weeks, water service remains a great value when compared to other utility services. With few exceptions, water service remains the lowest utility bill consumers pay each month.

Many communities across the United States are facing the challenges associated with an aging infrastructure. According to United States Environmental Protection Agency, to continue to ensure safe drinking water, the nation's water utilities will need to invest an estimated \$274 billion over the next 20 years. This significant national need reflects the challenges confronting water utilities as they deal with aging infrastructures, some of which were constructed more than a century ago.

**Missouri American Water** is the largest regulated water utility in the state, providing quality water and wastewater services to approximately 1.3 million people in more than 100 communities across the state. The company is dedicated to maintaining and ensuring the reliability of its local water system by making ongoing, prudent, infrastructure investments while balancing periodic cost increases.

Missouri American Water is a wholly-owned subsidiary of American Water, the largest water services provider in North America. Headquartered in Voorhees, NJ, American Water serves 18 million people in 29 states and Canada. More information can be found by visiting [www.amwater.com](http://www.amwater.com).

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.19 per day**

**(Brunswick, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 24.69% rate increase for the Brunswick District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 4000 gallons of water per month) will increase approximately \$5.70 per month, or \$0.19 cents per day. In Brunswick, the typical customer would pay approximately \$28.28 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

Since November 2000, the average residential customer's base water rates have increased by only 2.54% in Brunswick.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

In Brunswick alone, the company will have invested \$714,888 in infrastructure improvements. Each one of these investments will continue to preserve water quality, maintain reliability and continue to meet the needs of Brunswick customers.

# News Release

Page 2

Any change in water rates will become effective only after a thorough analysis and review by the PSC; a process that will take approximately one year and includes opportunities for formal public and customer input.

"Our rates are based on the actual cost of providing water service," said Penny Gladbach, Brunswick Operations Supervisor. "The price our customers pay is driven by the ongoing infrastructure investment that Missouri American Water makes to provide reliable, quality water service." Gladbach added that Missouri American Water has also experienced significant increased costs for chemicals, fuel, labor and insurance over the past three years, which it is seeking to recover in its rate filing.

"We continue to deliver an excellent service that our customers depend upon at an exceptional value," continued Gladbach. "One gallon of tap water still costs less than one penny." According to Gladbach, water service remains a great value when compared to other utility services. With few exceptions, water service remains the lowest utility bill consumers pay each month.

Many communities across the United States are facing the challenges associated with an aging infrastructure. According to United States Environmental Protection Agency, to continue to ensure safe drinking water, the nation's water utilities will need to invest an estimated \$274 billion over the next 20 years. This significant national need reflects the challenges confronting water utilities as they deal with aging infrastructures, some of which were constructed more than a century ago.

**Missouri American Water** is the largest regulated water utility in the state, providing quality water and wastewater services to approximately 1.3 million people in more than 100 communities across the state. The company is dedicated to maintaining and ensuring the reliability of its local water system by making ongoing, prudent, infrastructure investments while balancing periodic cost increases.

Missouri American Water is a wholly-owned subsidiary of American Water, the largest water services provider in North America. Headquartered in Voorhees, NJ, American Water serves 18 million people in 29 states and Canada. More information can be found by visiting [www.amwater.com](http://www.amwater.com).

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.17 per day**

**(Jefferson City, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 25.12% rate increase for the Jefferson City District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 5000 gallons of water per month) will increase approximately \$5.19 per month, or \$0.17 cents per day. In Jefferson City, the typical customer would pay approximately \$25.74 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

Since December 2000, the average residential customer's base water rates have increased by only 3.80% in Jefferson City.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

In Jefferson City alone, the company will have invested \$3,701,354 in infrastructure improvements. Each one of these investments will continue to preserve water quality, maintain reliability and continue to meet the needs of Jefferson City customers.

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.14 per day**

**(Joplin, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 24.48% rate increase for the Joplin District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 5,700 gallons of water per month) will increase approximately \$4.11 per month, or \$0.14 cents per day. In Joplin, the typical customer would pay approximately \$20.40 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

Missouri American Water is also presenting the Public Service Commission with an option for Joplin customers to pay for improvements to the Joplin Water Treatment Plant gradually over time instead of all at once upon completion of the project in December 2008. The company will invest more than \$44 million in constructing these improvements -- the first significant upgrade to the 120-year-old plant since the 1950s.

If approved, this Joplin Plant Improvement Charge would increase the average customer's bill by quarterly increments that average \$4.80 per month (for customers using 5,700 gallons of water per month). These increases would begin in January, 2008. This "pay-as-you go" strategy would result in a savings of \$1.7 million dollars to the Joplin ratepayers.

Since November 2000, the average residential customer's base water rates have **decreased** by 3.05% in Joplin. Joplin customers have not had a rate increase in ten years.

# News Release

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.20 per day**

**(Mexico, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 24.77% rate increase for the Mexico District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 4,600 gallons of water per month) will increase approximately \$6.04 per month, or \$0.20 cents per day. In Mexico, the typical customer would pay approximately \$29.96 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

Since November 2000, the average residential customer's base water rates have increased by only 1.83% in Mexico.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

In Mexico alone, the company will have invested \$3,832,497 in infrastructure improvements. Each one of these investments will continue to preserve water quality, maintain reliability and continue to meet the needs of Mexico customers.

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.32 per day**

**(Parkville, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 24.98% rate increase for the Parkville District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 8,800 gallons of water per month) will increase approximately \$9.69 per month, or \$0.32 cents per day. In Parkville, the typical customer would pay approximately \$48.08 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

The 101 customers served by Missouri American Water's sewer system would pay an additional \$10.33 per month.

Since November 2000, the average residential customer's base water rates have increased by only 2.09% in Parkville.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

### **ONGOING INVESTMENTS, INCREASED COSTS DRIVE RATE FILING WITH MISSOURI PUBLIC SERVICE COMMISSION**

**If approved, the average customer bill to increase \$0.16 per day**

**(Warrensburg, MO- December 15, 2006)** – Missouri American Water today filed a rate request with the Missouri Public Service Commission (PSC) that would change rates for water service in all of the company's operating districts. In its filing, the water company requested a 24.54% rate increase for the Warrensburg District, citing ongoing infrastructure investments and increased operating costs as main reasons for the request. If approved, the average customer's bill (for 5,300 gallons of water per month) will increase approximately \$4.69 per month, or \$0.16 cents per day. In Warrensburg, the typical customer would pay approximately \$23.26 per month for water. Customers will still be receiving a gallon of water delivered to their homes for less than a penny per gallon.

Since November 2000, the average residential customer's base water rates have increased by only 1.10% in Warrensburg.

The company will have invested almost \$200 million in water system improvements throughout the state from November 2003 to April 2007. Replacing and installing new water lines, meters and hydrants and making improvements at water treatment, pumping and storage facilities enhances customer service in local communities.

In Warrensburg alone, the company will have invested \$4,762,609 in infrastructure improvements. Each one of these investments will continue to preserve water quality, maintain reliability and continue to meet the needs of Warrensburg customers.

# News Release

Page 2

Any change in water rates will become effective only after a thorough analysis and review by the PSC; a process that will take approximately one year and includes opportunities for formal public and customer input.

"Our rates are based on the actual cost of providing water service," said Michael Wood, Warrensburg Operations Superintendent. "The price our customers pay is driven by the ongoing infrastructure investment that Missouri American Water makes to provide reliable, quality water service." Wood added that Missouri American Water has also experienced significant increased costs for chemicals, fuel, labor and insurance over the past three years, which it is seeking to recover in its rate filing.

"We continue to deliver an excellent service that our customers depend upon at an exceptional value," continued Wood. "One gallon of tap water still costs less than one penny." According to Wood, water service remains a great value when compared to other utility services. With few exceptions, water service remains the lowest utility bill consumers pay each month.

Many communities across the United States are facing the challenges associated with an aging infrastructure. According to United States Environmental Protection Agency, to continue to ensure safe drinking water, the nation's water utilities will need to invest an estimated \$274 billion over the next 20 years. This significant national need reflects the challenges confronting water utilities as they deal with aging infrastructures, some of which were constructed more than a century ago.

**Missouri American Water** is the largest regulated water utility in the state, providing quality water and wastewater services to approximately 1.3 million people in more than 100 communities across the state. The company is dedicated to maintaining and ensuring the reliability of its local water system by making ongoing, prudent, infrastructure investments while balancing periodic cost increases.

Missouri American Water is a wholly-owned subsidiary of American Water, the largest water services provider in North America. Headquartered in Voorhees, NJ, American Water serves 18 million people in 29 states and Canada. More information can be found by visiting [www.amwater.com](http://www.amwater.com).

**Item #7 - Summary of Reasons for the Proposed Changes**

The proposed changes represent a general rate increase request. The need for an increase in rates is primarily caused by the Company's increasing capital and operating expenditures. The rate request is based upon the Company's need to continue to invest in capital improvements and to recover higher operating costs at its existing water facilities. The capital investments are part of an ongoing program to replace aging infrastructure and to relocate or replace underground water mains related to highway or other road improvements. The higher operating costs are associated with maintaining existing water facilities. These capital and operating increases are necessary in order to maintain system reliability, to keep the water system current with environmental and safety standards, and to continue to meet the needs of customers.
