Green Button Alliance Michael L. Rush, PE MoPSC Staff Rebuttal Testimony ER-2018-0145 and ER-2018-0146 July 27, 2018

Date Testimony Prepared:

MISSOURI PUBLIC SERVICE COMMISSION

COMMISSION STAFF DIVISION

ENGINEERING ANALYSIS DEPARTMENT

FILED October 22, 2018 Data Center Missouri Public Service Commission

REBUTTAL TESTIMONY

OF

MICHAEL L. RUSH, PE

Staff Exhibit No. 215 Date 9-25-18 Reporter TTT File No. ER-2018-0145 +0144

KANSAS CITY POWER & LIGHT COMPANY CASE NO. ER-2018-0145

AND

KCP&L GREATER MISSOURI OPERATIONS COMPANY CASE NO. ER-2018-0146

Jefferson City, Missouri July 2018

1	REBUTTAL TESTIMONY					
2	OF					
3	MICHAEL L. RUSH, PE					
4 5	KANSAS CITY POWER & LIGHT COMPANY CASE NO. ER-2018-0145					
6	AND					
7 8	KCP&L GREATER MISSOURI OPERATIONS COMPANY CASE NO. ER-2018-0146					
9	Q. Please state your name, title, and business address.					
10	A. Michael L Rush, PE, Critical Infrastructure Security Engineer, Engineering					
11	Analysis Department, Commission Staff Division, Missouri Public Service Commission,					
12	200 Madison Street, Jefferson City MO, 65102.					
13	Q. What are your qualifications and experience?					
14	A. I have been a practicing professional engineer since 1995 and have been in my					
15	present position since November 2016. I am responsible for interfacing with Missouri					
16	utilities on physical and cyber security issues. I am also the critical infrastructure intelligence					
17	analyst at the Missouri Information Analysis Center ("MIAC") as well as a lead responder for					
18	the energy sector emergency response function at the Missouri State Emergency Management					
19	Agency ("SEMA"). I previously held a PSC staff position in the Procurement Analysis Unit.					
20	Other experience includes employment as an Engineering Research Scientist at Lincoln					
21	University of Missouri, a civilian instructor at the Army Corps of Engineers' Prime Power					
22	School, a Researcher at the Arizona State University Center for Cognitive Ubiquitous					
23	Computing ("CUbiC"), and a Sr. Project Engineer at the General Motors Corporation.					
24	Q. What is the purpose of your testimony?					

Page 1

Rebuttal Testimony of Michael L. Rush, PE

,

1	A.	To address issues related to the direct testimony of Geoff Marke of the Office
2	of the Public	Counsel concerning the function of the Green Button Alliance, the current state
3	of the Green	1 Button Alliance, the advantages to the customer of adhering to industry
4	standards, and	the efforts necessary to utilize the advantages of the Green Button Alliance.
5	GREEN BU	TTON ALLIANCE AND THE ADVANTAGES OF CONFORMANCE
6	Q.	Briefly explain the Green Button Alliance.
7	А.	The Green Button Alliance ("Alliance") is an industry-led effort to develop
8	and promote	standards so that a customer, or Energy Consumer, has easy access to energy
9	usage data in	both a customer and computer friendly manner. The Alliance itself is not a
10	platform for c	ata sharing but an organization that promotes the use of standards for sharing of
11	energy data.	The initial effort was supported by the US Department of Energy ("DOE"), the
12	National Insti	tute of Standards and Technology ("NIST"), and the North American Energy
13	Standards Boa	rd ("NAESB") in addition to other industry and governmental organizations.
14	Q.	Would joining the Alliance be beneficial to a customer of an energy provider?
15	А.	The concept behind the Alliance would be useful for an Energy Consumer who
16	wants to have	more control over how much, when, and what kind of energy they consume.
17	Q.	How does the Alliance assist an Energy Consumer in gaining more control
18	over their ener	gy usage?
19	А.	The Alliance promotes the adoption of an industry data exchange standard
20	("Data Standa	d") which includes a data format and a standardized interface for the exchange
21	process. Think	c of the Data Standard as defining what is exchanged and how it is exchanged.
22	The Data Star	ndard was developed in cooperation with NAESB, an industry forum that

Rebuttal Testimony of Michael L. Rush, PE

1	promotes the development and implementation of all manner of industry standards.			
2	The exchange process is to be used by both the energy provider ("Data Custodian") that			
3	collects usage data on an Energy Consumer as well as any authorized third party company			
4	("Third Party") that requires the data to provide a product or service to the Energy Consumer.			
5	The data format is to be used by all parties as a common form of data exchange.			
6	The Alliance also certifies compliance to the standard. Currently the Alliance can			
7	certify that data downloaded from the Data Custodian by the Energy Consumer conforms to			
8	the standard data format. The ability to certify the data exchange process between the			
9	Data Custodian and an authorized Third Party is currently under active development but is not			
10	yet available.			
11	Q. What else does the Data Standard do for the Energy Consumer?			
12	A. Widespread adoption of the Data Standard will help speed up development of			
13	new energy products and services available to the Energy Consumer by creating an			
14	environment where data interoperability is the norm and proprietary data exchange formats			
15	are limited.			
16	Q. How does the Energy Consumers' data get from the Data Custodian to the			
17	Third Party?			
18	A. The process by which the Third Party acquires the data can be either through			
19	the Energy Consumer or directly from the Data Custodian. An Energy Consumer could			
20	download the data in the standard format from the Data Custodian through the Energy			
21	Consumers account interface and send the data electronically to the Third Party.			
22	Alternatively, the Third Party could access the Energy Consumers' data directly from the			
23	Data Custodian with the express permission of the Energy Consumer.			

.

Rebuttal Testimony of Michael L. Rush, PE

.

1	Q. Why would a Third Party need to access the Energy Consumers' data directly				
2	from the Data Custodian?				
3	A. If the Third Party were providing a product or service that automatically				
4	altered the Energy Consumers' consumption on a near real time basis, direct access would be				
5	required. As an example, a product or service that limited the operation of certain devices at				
6	times of high energy cost, increased the use of those same devices during periods of low				
7	energy cost, or limited energy consumption during times when a capacity charge might be				
8	levied, that product or service would require the use of near real time data.				
9	Q. Would allowing a Third Party to access Energy Consumer data directly from				
10	the Data Custodian create a data security issue?				
11	A. This is a real concern that needs to be balanced with any advantage that the				
12	Energy Consumer may gain from the ability to better control the amount and cost of their				
13	energy needs.				
14	Q. Who certifies that the Data Custodian is providing the data in a manner that				
15	conforms to the Data Standard?				
16	A. The Alliance has processes in place to determine if data downloaded from a				
17	Data Custodian conforms to the standard data format. The Alliance is also working on a				
18	process to certify that Data Custodians who are providing data directly to Third Parties are				
19	providing the data in a manner that conforms to the Data Standard.				
20	Q. Who certifies the Third Party applications to ensure that any product or service				
21	does not present an unacceptable level of risk to the Energy Consumer or Data Custodian?				
22	A. The Alliance does not currently certify Third Party applications but is starting				
23	the development of a process for this type of certification.				

Rebuttal Testimony of Michael L. Rush, PE

1 2 Q. Would you recommend utilizing the Green Button Alliance services?

2 Any development or update to a customer information system should, at a Α. minimum, provide the ability for an Energy Consumer to download data in the industry 3 standard format for use by any Third Party with which the Energy Consumer wants to 4 5 interact. As for Third Party direct access to data held by a Data Custodian, that is a more complex question involving industry certification processes that are not yet fully developed 6 7 and questions of data security that have not yet been addressed. However, once the 8 certification and data security issues have been addressed, Third Party access to Energy 9 Consumer data should be implemented.

10

Does this conclude your rebuttal testimony?

11

A. Yes.

Q.

BEFORE THE PUBLIC SERVICE COMMISSION

OF THE STATE OF MISSOURI

In the Matter of Kansas City Power & Light Company's Request for Authority to Implement a General Rate Increase for)	Case No. ER-2018-0145
Electric Service)	and
In the Matter of KCP&L Greater Missouri Operations Company's Request for Authority to Implement a General Rate Increase for Electric Service)))	Case No. ER-2018-0146

AFFIDAVIT OF MICHAEL L. RUSH, PE

STATE OF MISSOURI)	
)	SS.
COUNTY OF COLE)	

COMES NOW MICHAEL L. RUSH, PE and on his oath declares that he is of sound mind and lawful age; that he contributed to the foregoing Rebuttal Testimony and that the same is true and correct according to his best knowledge and belief.

Further the Affiant sayeth not.

MICHAEL L. RUSH, PE

JURAT

Subscribed and sworn before me, a duly constituted and authorized Notary Public, in and for the County of Cole, State of Missouri, at my office in Jefferson City, on this $27\frac{4}{2}$ day of July 2018.
