SHEET No.

UNION ELECTRIC COMPANY **GAS SERVICE**

Applying to

MISSOURI SERVICE AREA

WEATHER NORMALIZATION ADJUSTMENT RIDER (WNAR)

The WNA Factor will be calculated for each billing month as follows:

WNA_i =
$$\sum_{j=1}^{21} \left((NDD_{ij} - ADD_{ij}) * \beta \right) * C_{ij}$$

Where:

 $WNA_i =$ Weather Normalization Adjustment

the applicable billing month

billing cycle =

applicable coefficient of 0.10918 as established in Case No. GR-2021-0241.

the total number of customer charges charged in billing cycle j and billing month i.

 $NDD_{ii} =$ the total normal heating degree days for the days in the applicable billing month and billing cycle. The normal degree days are calculated as the weighted average of 87.0% of heating degree days observed at the Columbia, MO Airport weather station and 13.0% of the heating degree days observed at the Cape Girardeau, MO Airport weather station.

 $ADD_{ij} =$ the total actual heating degree days for the days in the applicable billing month and billing cycle. A weighted average will be calculated based on 87.0% of heating degree days observed at the Columbia, MO Airport weather station and 13.0% of the heating degree days observed at the Cape Girardeau, MO Airport weather station.

Monthly WNA_i = WNA_i * Weighted Volumetric Rate ("WVR")

Where:

CANCELLED - Missouri Public Service Commission - 09/01/2025 - GR-2024-0369 - JG-2026-0009

WVR = the Residential Distribution Delivery Rate of \$0.3536 per Ccf as established in Case No. GR-2021-0241.

There shall be a limit of \$0.05 per Ccf on upward adjustments for the WA, and no limit on downward adjustments. Any WA adjustment amounts in excess of \$0.05 per Ccf will be deferred for recovery from customers in the next WA adjustment.

Each month, monthly interest at the Company's monthly short-term borrowing rate shall be applied to the Company's average beginning and ending monthly WNA balances. Corresponding interest income and expense amounts shall be recorded on a net cumulative basis for the WNA deferral period.

Applying to

MISSOURI SERVICE AREA

PURCHASED GAS ADJUSTMENT TRANSITION MECHANISM

* The Company shall have a state-wide single Purchased Gas Adjustment (PGA) rate for all districts, beginning November 1, 2007. A PGA Transition Mechanism is being applied to balance historical price differentials in gas commodity costs between the systems in order to transition into a single PGA. The PGA Transition Mechanism is applied to bills for sales customers served by Panhandle Eastern Pipeline (PEPL), Texas Eastern Transmission Corporation (TETCO), and Natural Gas Pipeline of America (NGPL) pipelines as a charge or credit. PEPL customers will each receive a \$0.50 per month credit on their bill. TETCO customers will each pay a \$2.55 per month charge on their bill. NGPL customers will each pay a \$0.00 per month charge on their bill. The PGA Transition Mechanism will continue until the Company receives approval by the Commission to change or terminate the PGA Transition Mechanism.

The PGA Transition Mechanism will be effective on and after November 1, 2007 in conjunction with the single PGA.

* Indicates Addition.

A. Application for Service

MISSOURI

customer requesting gas service Public Service Company ission authorized service area will provide Company with appropriate information regarding the quantity and characteristics of the anticipated gas consumption and location of the premises to be served. Appropriate personal customer identification may be required at the request of the Company. When interruptible or transportation service is requested, a written agreement between customer and Company shall specify the gas service to be provided, the rate schedule applicable for such service and the minimum term during which service will be supplied by Company and consumed and paid for by customer. All gas service will be supplied subject to the provisions of the Company's tariffs applicable to the service requested and these Rules Regulations, provided customer agrees to the use of the service supplied by Company for the minimum term specified in the tariff applicable to customer's gas service. Customers desiring gas service for periods less than the term specified in the applicable tariff may contract for such service under Company's applicable rate provided customer pays to Company in advance, the total cost of new or existing facilities, the total estimated cost of installation, connection, disconnection and removal of all facilities necessary for such service, less the estimated salvage value of any recoverable facilities.

The Company shall not be required to commence supplying service to a customer, or if commenced the Company may terminate such service, if at the time of application such customer or any member of his household (who have both received benefit from the previous service) is indebted to the Company for the same class of service previously supplied at such premises or any other premises until payment of, or satisfactory payment arrangements for, such indebtedness shall have been made.

B. Form of Service Provided

Company will normally supply only one class of service to an individual premise under a single customer applicated. for service. Where more than one class of service is required by customer or the Company's tariffs, each class of service shall be metered and billed separately.

Extension of Distribution Mains IV.

MISSOURI Public Service Commission

Subject to Rule and Regulation III. F hereof, gas service will be supplied to customers within Company's authorized service area, by extension, modification or enlargement of the Company's gas distribution system in accordance with the following provisions:

* A. Length of Extension

The length of the extension will be the distance along the installation route specified by Company. Such distance shall be measured from the nearest existing main having sufficient capacity to serve the customer to the point necessary to accommodate the connection to the service pipe to customer's premises. Within residential subdivisions and commercial or industrial tracts, the extension shall also include the additional length of the main to the property boundary between the customer being served and the next immediately adjacent premises. Company shall have the right to defer deployment of its construction resources for the installation of extensions in residential subdivisions and commercial or industrial tracts until the length of the extension is at least 500 feet or stretches to the end of the street or plat being developed.

Cost of Extension

The total installed cost of line extensions, modifications and enlargements of the Company's distribution system will include the cost of all labor and materials, permits, cleared right-of-way and all other incidental costs, including indirect costs. The indirect costs will include, where applicable, the cost of engineering, supervision, inspection, insurance, payments for injury and damage awards, taxes, AFUDC (Allowance For Funds Used During Construction), legal and administrative and general expenses associated with the extension of the Company's distribution system. Charges to customers for extension costs will include additions for indirect costs based upon the indirect costs experienced by the Company, as a percentage of direct costs, during the preceding calendar year. The Company's main and service extension allowances and charges are based on normal, pre-development and unobstructed conditions. Cost estimates relative to guaranteed revenue or customer contributions are based on the conditions prevailing at the time the estimate is made and stated anticipated subsurface conditions (rock and underground conflicts). Additional costs due to changes in surface conditions or unanticipated subsurface conditions will be charged to the customer. A copy of the Company's estimated extension charges, including such indirect costs, shall be furnished to the customer upon request prior to construction.

MISSOURI SERVICE AREA

JAN 0 9 1998

Extension of Distribution Mains (Cont'd.) Public Sawice Commission IV.

Extensions Not Exceeding 100 Feet Per Customer

Company will provide an extension of its distribution mains of up to 100 feet per individual and up to 100 feet per residential subdivision or commercial-industrial tract customer, without requirement of a customer contribution or guarantee, subject to the provisions of this paragraph. In determining the actual main extension footage per customer, the extension length specified in paragraph A. of this Section IV. shall be divided by the number of residential and/or commercial-industrial tract customers which, in the Company's sole judgment, will be connected and utilizing gas as their main source of space and/or process heating within one year after completion of the main extension. All other customers, not meeting the above requirements, shall be provided gas service in accordance with the provisions of paragraphs D.-G. of this Section IV.

Extensions Exceeding 100 Feet Per Customer

Company will provide an extension of its distribution mains in excess of 100 feet per customer to individual customers and for each gas connection within residential subdivisions and commercial or industrial tracts as follows:

Residential subdivisions - Customer/developer will pay to Company a non-refundable contribution for all main extension footage requested in excess of 100 feet times the number of customers, as referenced in paragraph C. above, to which gas will be connected. The non-refundable contribution will be required from customer/developer prior to the commencement of construction by Company and will be determined in accordance with the following expression:

(Total Main Extension Cost)

(Total Main Ft.) - (No. of Customers X 100 Ft.) Total Main Footage

All other extensions - For all extensions other than to residential subdivisions, Company's main extension allowance will be equal to the total net revenue anticipated to be realized from customer and commodity charges (excluding PGA and billing tax revenues) by Company, for additional gas service provided from the main extension, during the first three years following the commencement of such service. Where the anticipated three year net revenue to be received is less than the estimated main extension cost, customer/developer or other responsible party will be required to enter importanguagantee agreement with Company, prior to the commencement of construction by Company. Said guarantee will be applicable to the total cost of the extension requested in order to insure that the Company's extension is based upon sound tegmomic principles.

UNION ELECTRIC COMPANY GAS SERVICE

Applying to _

MISSOURI SERVICE AREA

V. Installation of Service Pipe

DEC 2

A. Specifications

MISSOURI Public Service Commission

Company will specify the connection point to its distribution main, the route of the service pipe and the point of delivery for the requested service, and will furnish, install and maintain such facilities. Where in Company's judgment an existing service pipe meets the requirements for the service being requested, Company will use the existing service.

B. Customer Payment

The specified service facilities will be installed by Company following the payment by customer of the service pipe charges indicated on Sheet No. 19, Miscellaneous Charges.

C. Customer Owned Service Pipe

When Company becomes aware of the need to do so, Company will repair or replace as necessary customer owned service pipe installed by customers prior to April 1, 1977 in former Missouri Utilities Company's Central and Mid-Mo Districts and prior to December 1, 1979 in former Missouri Utilities Company's Southeast and Ozark Districts, but will assume ownership responsibility for such service facilities until their replacement by Company, which will be done based upon Company's sole judgement and discretion.

Company Liability

CANCELLED

FEB 1 8 1998

Company will not be liable for and customer will indemnify and save Company harmless from all claims for trespass, injury to persons, or damage to lawn, trees, shrubs, buildings, or other property that may be caused by the installation or replacement of service pipe and other Public Service Commission pecessary facilities to serve customer unless the injury to of the Company or its employees.

or misuse by customer or by any member of customer's family, or by an officer, agent, or employee of customer, then the costs of the necessary repairs or replacements shall be paid by customer.

Meter Testing

Company's meters shall be tested for accuracy in accordance with the method for sample testing of in-service gas meters authorized by the Commission in Case No. GO-98-25 in which the Commission granted the company a variance from the requirements of 4 CSR 240-10.030(19) related to the removal, testing and inspection of gas meters. If a customer requests a meter test within 12 months of any previous testing of such meter, the indicated charge on Sheet No. 19 will be assessed for meters found to have an average meter error of 2 percent or less.

Billing Adjustments G.

- Residential For all residential billing errors, the Company will determine from all related and available information the probable period during which the error condition existed and shall make billing adjustments for the estimated period involved as follows:
 - a. In the event of an overcharge, an adjustment shall be made for the entire period that the overcharge can be shown to have existed not to exceed sixty (60) consecutive monthly billing periods calculated from the date of discovery, inquiry or actual notification of the Company whichever comes first;
 - *b. In the event of an undercharge, an adjustment shall be made for the entire period that the undercharge can be shown to have existed not to exceed twelve (12) monthly billing periods calculated from the date of discovery inquiry or actual notification of the Company, whichever was first and the Company will offer a repayment period of double the period covered by the adjusted bill though the customer may elect a shorter repayment period;
 - c. Where, upon test, an error in measurement is found to be within the limits prescribed by Commission rules, no billing adjustment will be made;
 - d. When evidence of tampering or obstruction is found, or there are misrepresentations of the use of service by the customer, the Company will calculate the billing adjustment period in accordance with the

UNION ELECTRIC COMPANY **GAS SERVICE**

Applying to

MISSOURI SERVICE AREA

VIII. Billing Practices

*A. Monthly Billing Periods

Company will render bills over twelve (12) monthly billing periods in a year, with each bill based upon the service used between regularly scheduled meter readings. While Company's work schedules provide for the orderly reading of all meters over intervals of approximately 30 days, holidays, weekends, inclement weather and other operating constraints may cause the billing interval to vary during various portions of the year. Likewise, a customer excercising Section VIII.I. Preferred Delinquent Date Selection may result in either a longer or shorter period between meter readings for the first bill after the election. (This section reflects a variance from Rules 4 CSR 240-13.015(1)(C) and 4 CSR 240-13.020(6) granted by Commission in Case GE-2019-0386.)

B. Inaccessible Meters

Where a meter is inaccessible to the meter reader during scheduled working hours on repeated occasions, such that a customer must arrange for meter reading by appointment to avoid discontinuance of service, the customer may at his own expense have Company relocate the meter to an accessible location, if feasible.

C. Estimated Bills for Full Billing Periods

Monthly bills may be rendered to the Company's natural gas customers based upon estimated gas usage (which may include the use of readings furnished by the customer), where conditions reasonably beyond the control of the Company prevented it from obtaining actual meter readings. These conditions include extreme weather, operating and other emergencies, labor agreements, work stoppages, and the Company's inability to gain access to the meter. The Company will provide a copy of customer's estimate, upon request. All estimates are subject to the provisions of Section VII.G. Billing Adjustments, of theses Rules and Regulations, and will be determined as follows:

a. Single-Month Estimated Bills

A single billing month's estimated natural gas usage will be determined on the basis of the customer's prior month's usage, adjusted by a factor reflecting the difference in weather between the prior and current monthly billing periods.

REC'D JAN 23 2001

b. Non-Gas Heating Accounts

CANCELLED

The account is estimated based on the usage, whether actual or estimated, in the corresponding month of last year if that billing was for the current customer and the JAN 1 4 2002

account was billed. Otherwise prior month's usage, whether actual or estimated, is used. When prior usage is for less than 30 days, 30 day equivalent usage is calculated. If the prior month or corresponding month of last year was an actual Company or customer reading, and the previous month was an estimate the first reading. is averaged.

D. Estimated Initial and Final Bills

The Company will normally be granted access to customer's premises for purposes of obtaining initial and final meter readings and the associated connection and disconnection of gas service. However, where such access cannot be obtained, or other conditions beyond the control of Company prevent obtaining an actual meter reading, estimated initial and final bills may be rendered by Company. When obtained, meter readings will be adjusted to customer's service responsibility However, customer will be responsible for all gas utilized until access is provided to Company for obtaining actual meter readings and the disconnection of gas service. No final bill will be rendered where the amount of the bill for gas usage is less than \$1.00, except for those accounts where a customer deposit is being refunded to customer.

*E. Budget Billing Plan

Customers who are billed under the Residential Service Classification or General Service Classification and, at the Company's option, certain eleemosynary customers may elect to be billed and pay for all service under Company's Budget Billing Plan provided customer shall have satisfied Company's credit requirements. The provisions of the Budget Billing Plan are as follows:

Billing Practices (Cont'd.) VIII.

- Upon enrollment in the Budget Billing Plan by customer, the average monthly bill amount will initially be equal to one-twelfth of the estimated annual cost of service to the customer.
- Company will re-evaluate the estimated annual cost of service to an actual use basis at least once every twelve months. Customer will elect the annually recurring re-evaluation month to be either a) any month earlier than the twelfth month following enrollment, or b) the twelfth billing period following enrollment.
- 3. Customer will elect for any under or collection balance that has accumulated through the annually recurring re-evaluation month to be either a) rolled over and spread equally across all monthly bills in the next Budget Billing Plan year, or b) fully included on the re-evaluation month's bill.
- Customer elections made under 2. or 3. above may not be changed within twelve months. that were enrolled in the Budget Billing Plan prior to March 18, 2012 will continue under option (b) for 2. and 3. but may make an election of option (a)at any time.
- Company will adjust the average monthly billing during the fourth and eighth months preceding the annually recurring re-evaluation month under this Plan, if the recalculated Budget Billing Plan amount indicates an increase of \$3.00 or more. Company will not adjust the average billing in two consecutive months.

Preferred Delinguent Date Selection

Customers receiving service under the Residential Service Rate or the General Service Rate may select the date their bill will become delinquent provided their service is equipped with an advanced meter reading device. If the customer's preferred date is not available, they will be given the option of selecting a different delinquent date or retaining their existing delinquent date.

Customer's selected delinquent date will become effective no later than the second bill issued after customer's selection and cannot be implemented for bills already issued.

The first bill issued following implementation of a delinquent date selected by customer may result in a bill period that is either longer or shorter than normal and may also be prorated.

Customer may not make a delinquent date selection more frequently than once every 12 months except by Company approval.

(This section reflects a variance from Rules 4 CSR 240-13.015(1)(C) and 4 CSR 240-13.020(6) granted by Commission in Case GE-2019-0386.)

*c. The customer has failed to pay an undisputed bill on or before the delinquency date for five billing periods out of twelve consecutive billing periods; provided, however, that deposit requirements during the months of November, December, and January for reasons other than unauthorized use or diversion of service, may, if the customer is unable to pay the entire deposit, be paid by installments over a six month period, unless the Company can show a likelihood that the customer does not intend to pay for continued service. The Company shall not assess new deposits nor bill previously assessed deposits to customers who enter into and make timely payments in accordance with the Missouri Public Service Commission's "Cold Weather" rule.

B. Non-residential Customers

Company may at any time, as a condition to furnishing or continuing service, require any customer or applicant for non-residential service to make a cash deposit or, at Company's option, furnish a personal guarantee of a responsible party with established credit satisfactory to Company.

*C. General Provisions

1. Deposit limits - A deposit for initial service will not exceed the charges applicable to usage during one-sixth (1/6) of the estimated annual bill for monthly billed customers for utility charges at the requested service location, and when a deposit is required as a condition for continued service, the deposit will not exceed two times the highest bill for utility charges actually incurred or estimated to be incurred by that residential or non-residential customer during the preceding twelve months at the service location. All deposit levels referred to herein will be established based upon usage levels and associated billings applicable to periods representative of actual meter readings and undisputed billing amounts.
