CLASSIFICATION OF SERVICE
BILLING OF LICENSE, OCCUPATION, FRANCHISE,
OR OTHER SIMILAR CHARGES OR TAXES FEB - 1 1984

There shall be added to the Customer's bill, as a separate item, an amount equal to the proportionate part of any license, occupation, franchise, or other similar fee or tax now or hereafter imposed upon the Company by local taxing authorities, whether imposed by ordinance, franchise or otherwise, and which fee or tax is based upon a percentage of the gross receipts, net receipts, or revenues from sales of water or services rendered by the Company to the Customer.

Where more than one such charge or tax is imposed by a taxing authority, the total of such charges or taxes applicable to a Customer may be billed to the Customer as a single amount.

Charges or taxes herein referred to shall in all instances be billed to Customers on the basis of Company rates effective at the time of billing, and on the basis of the tax rate effective at the time billing is made.

Meter Rates

A meter will be installed on a fire hydrant or on a service connection to provide water for construction purposes.

The cost of installing and removing the temporary service connection and meter setting, or the connection made to the fire hydrant, shall be paid for by the Customer.

The Company may require an application to be signed and a meter deposit made, and the account handled in the same manner as any other metered account.

**CLASSIFICATION OF SERVICE
RETURNED DEPOSIT ITEM CHARGE**

Provided a Customer's check or Electronic Fund Transfer ("EFT") is properly processed by the Company, if a check or EFT that has been received as payment for service is returned by the bank unpaid, a Returned Deposit Item charge will be assessed to cover the cost of processing this transaction. Refer to Sheet No. 1B for fee. +
+

The Returned Deposit Item charge for the dishonored check or EFT may be reflected, at the Company's option, when the Company returns the dishonored check or EFT or may be charged on the Customer's next billing.

The Company may serve a Customer on a cash-only basis if more than one check or Returned Deposit Item of the Customer is returned NSF or any other valid return reason in a 12-month period. "Cash" shall be deemed to mean U.S. currency, money order, or certified check. *

RULES, REGULATIONS AND CONDITIONS OF SERVICE

FEB 11 1984

MISSOURI

Public Service Commission

1. RULES AND REGULATIONS GOVERN RENDERING OF SERVICE

(A) The Rules and Regulations in their entirety as herein set forth, or as they may hereafter be altered or amended in a regular and legal manner, shall govern the rendering of water service, including the extensions of water mains and the making of connections thereto, and every Customer, upon the signing of an application for water service, or upon the taking of water service, shall be bound thereby.

(B) Except for fire and special temporary services, all service will be rendered on a metered basis.

2. DEFINITIONS APPLICABLE TO THE FOLLOWING SECTIONS

(A) A "Customer" is any person, firm, corporation or municipality supplied with water service by Missouri-American Water Company, St. Joseph District, pursuant to these Rules and Regulations.

* (B) The "Company" is Missouri-American Water Company, St. Joseph District, acting through its Officers, Manager or other duly authorized employees or agents.

(C) A service pipe as referred to in these Rules and Regulations consists of the following, viz:

I. The corporation cock, tail piece and lead connection; or the corporation cock and flange connection; or the tapping valve.

II. The curb cock and curb box, or coppersetter when installed in a meter box.

III. The pipe between the Water Company main and the premises supplied.

(D) A premises as contemplated in these Rules is:

I. A building owned or leased by one party and occupied as one business or residence, or;

II. A combination of buildings owned or leased by one party in one common enclosure occupied by one family or business.

Missouri Public Service Commission name of officer title address

Missouri-American Water Company
Name of Issuing Corporation

For

City of St. Joseph, MO and Vicinity
Community, Town or City**Rule, Regulations & Conditions of Service****6. Private Fire Protection Service**

- A. Application for private fire protection service will be considered by the Company subject to the availability of water mains of sufficient size, and the furnishing of fire protection service shall be on the basis of pressure and volumes as may exist in the locality, which pressures and volumes are not guaranteed by the Company. The private fire protection service is not designed to extinguish a fire, but rather to suppress or retard its growth to protect persons and property.
- B. When fire flows are necessary (whether for a single premises or on a Master Water Service Line which is metered at its connection to the Company's main), the meter(s) must be capable of measuring a full range of flows required by the customer (both domestic and fire flows). The Customer with approval from the Company may choose the preferred method of:

A combination service line with a meter designed for both domestic flows and fire flows, typically referred to as a "fire flow" meter, or an approved meter by the Company. For residential single or two family premises combination services only, this meter may not be a "fire flow" meter designed and warranted for use on residential fire suppression systems. That portion of the dual purpose service line from the Company main to the property line shall be the property of the Company in consideration of its perpetual maintenance and upkeep excluding St. Louis County Operations.

Based on Customer's needs and premises requirements, the Customer with approval from the Company may also choose between:

- 1) a split service line configuration which uses a detector check meter(s) on the fire line and a meter suitable for the reasonably anticipated domestic usage requirements on the line not used for fire protection, or
- 2) a dedicated fire service line with detector check meter, which is separate from the domestic water service line.

If a Customer chooses a combination service configuration for a one or two family residential premises that is sized to meet fire flows, this service line will be considered an oversized Domestic Service Line and must conform to the rules for service connections as set forth in Rule 11. An "Application for Special Connection" must be completed and approved in writing by the Company, as well as by the applicable Fire Protection Authority.

A Customer who receives both domestic water and fire protection services through a combination or split service line acknowledges that discontinuance of service for any reason will result in the discontinuance of fire protection service.

- C. If unauthorized usage is made of the fire protection facilities, or unusual circumstances develop, the Company reserves the right, at any time, to install a meter or flow-detection device. In such circumstances the Company will provide the meter, but the cost of meter installation including necessary plumbing, fittings, vaults or meter settings necessary for the installation shall be paid by the Customer.

6. Private Fire Protection

A. Application for private fire protection service will be considered by the Company subject to the availability of water mains of sufficient size, and the furnishing of fire protection service shall be on the basis of pressure and volumes as may exist in the locality, which pressures and volumes are not guaranteed by the Company.

B. When fire flows are necessary (whether for a single premises or on a Master Water Service Line which is metered at its connection to the Company's main), the meter(s) must be capable of measuring a full range of flows required by the customer (both domestic and fire flows). The Customer with approval from the Company may choose the preferred method of:

A combination service line with a meter designed for both domestic flows and fire flows, typically referred to as a "fire flow" meter, or an approved meter by the Company. That portion of the dual purpose service line from the Company main to the property line shall be the property of the Company in consideration of its perpetual maintenance and upkeep excluding St. Louis County Operations.

Based on Customers needs and premise requirements, The Customer with approval from the Company may also choose between:

- 1) a split service line configuration which uses a detector check meter(s) on the fire line and a meter suitable for the reasonably anticipated domestic usage requirements on the line not used for fire protection, or
- 2) a dedicated fire service line with detector check meter, which is separate from the domestic water service line.

C. If unauthorized usage is made of the fire protection facilities, or unusual circumstances develop, the Company reserves the right, at any time, to install a meter or flow-detection device. In such circumstances the Company will provide the meter, but the cost of meter installation including necessary plumbing, fittings, vaults or meter settings necessary for the installation shall be paid by the customer.

D. All new Private Fire Service Line Connections shall include installations of a valve, as approved by the Company, of the same size as the service connection at the junction of the water main, along with an approved backflow prevention assembly with detection meter. The Company or Company's representative will make the service tap to its main at the cost and expense of the Customer. The backflow assembly must be installed on the customer premises in an in-ground vault, above ground, or inside a building. The installation and operation of the backflow assembly must conform to the requirements of the Company and the Department of Natural Resources and shall remain the sole responsibility of the Customer for periodic inspections, testing and maintenance by the Customer. Should a Customer fail to have the backflow assembly inspected, tested or maintained, the Company will refuse to continue service to the premise until such time as the Customer complies with the Rules.

E. No Private Fire Service Line Connections shall be used for domestic, commercial or industrial use unless such connection is authorized by the Company in writing.

F. All new sprinkler pipes and other private fire connection pipes shall be so placed as to be readily inspected. If the pipes are concealed on existing services or not readily identifiable, or if any authorized connections for other uses are in existence, meters shall be installed on each service at the expense of the Customer.

6. APPLICATION FOR PRIVATE FIRE SERVICE - Continued

MISSOURI
Public Service Commission

(C) The Company will make the connection to its mains at the cost and expense of the Customer, but the street service connection from the main to the property line shall be furnished and installed by and at the cost and expense of the Customer.

(D) The entire private fire service system on the Customer's premises shall be installed by and at the expense of the Customer, and shall be subject to the inspection, test and approval of the Company before the service is made effective, and at such times thereafter as may be deemed necessary by the Company.

(E) Service for private fire protection shall be distinct and separate from the regular or general water service. A private fire service connection is furnished for the sole purpose of supplying water for the extinguishment of accidental fires, and the use of water from such a connection for any other purpose is absolutely forbidden without the written approval of the President or a Vice President of the Company.

(F) Where services already installed are used for both general and fire purposes, separate charges will be made for each type of service in accordance with the established schedule of rates, the charge for fire service being based on the size of the connection made to the main, and that for general water service being based on the consumption through and the size of the meter or meters installed.

(G) Private fire protection service may at any time be furnished at the option of the Company through a line guarded by an approved fire line meter or detector device which shall be furnished and installed by the Customer at his cost and expense. The meter shall be set in a brick or concrete vault or chamber, properly drained and protected, located on the Customer's premises at a point as near as possible to the point of entry to the premises, and said vault or chamber shall be subject to the approval of the Company, but constructed and maintained by and at the expense of the Customer. The meter or detector device will be maintained by the Company, but at the expense of the Customer.

6. APPLICATION FOR PRIVATE FIRE SERVICE - Continued

(H) Hydrants and other fixtures connected with a private fire service connection may be sealed by the Company, and such seals shall be broken only in case of fire or as specially permitted by the Company, and the Customer must immediately notify the Company of the breaking of any such seal.

(I) No pipe or fixtures connected with a private fire service connection served by the Company shall be connected with pipes or fixtures supplied with water from any other source.

(J) The Customer shall furnish and accurate sketch or drawing showing the pipes, valves, hydrants, connections and appurtenances on the premises of the Customer and connected with the mains of the Company and also an accurate sketch of any other water pipe system and fixtures that may exist on the premises.

(K) Whenever a fire service system is to be tested under the regulations of the fire insurance underwriters, the Customer shall notify the Company of such proposed test, naming the day and hour when same is to be made, so that, if desired, the Company may have an inspector present during the test.

(L) Any repairs or maintenance performed on the premises of the Customer will be at the Customer's expense, and that performed in the street will also be at the expense of the Customer.

(M) The entire private fire service connection and all parts of it, and any meter or other indicating or controlling device and all parts and appurtenances thereof no matter where located shall be under the sole jurisdiction of the Company.

(N) The Company shall determine the size and location of any connections made to its mains for private fire service.

6. Private Fire Protection Service (Continued)

G. The size of the private fire service connection shall be determined by the Company.

H. Customers desiring private fire service must consult, before installation, with the Company as to the availability of mains and pressure. In the event a private fire service connection is requested at a point not already served by a main of adequate capacity, at the sole discretion of the Company, a main extension will be required as provided in the rule for Extension of Company's Water Mains.

I. Private fire hydrants not installed on public right-of-way or on Company easement and connected to Company mains shall be subject to required contracts as provided in the Company's applicable rate schedule.

J. Any modifications to any existing service lines to retrofit a fire suppression system for either residential or commercial structures shall have written approval of the Company, applicable Fire Protection Authority, and the division of plumbing having jurisdiction of the premises to be served, prior to modification and or installation of said fire suppression system.

K. An applicant for Split, Combination Water Service lines, Special Connection(s) or dedicated fire service lines shall comply with all provisions specified in the Application for Special Connection, which may be modified, altered or changed from time to time by the Company.

L. Service connections for water to be used for the suppression of fire shall be made only upon the terms as provided for in the "Application for Special Connection" for such service, a copy of which is available at the Company's office, and then only after such application has been approved in writing by the Company, as well as by the applicable Fire Protection Authority.

M. A valve controlling the entire supply, as approved by the Company, shall be placed either at the curb or at such other point as may be approved by the Company, and said valve shall be at the expense of the Customer, and any valve pit or vault which may be required will also be furnished by and at the expense of the Customer.

N. Where split services are used for both general and fire purposes, separate charges will be made for each type of service in accordance with the established schedule of rates.

O. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise.

P. The Company shall not in any way or under any circumstance be held liable or responsible for personal injury, death, property damage, or any other claim of loss following or resulting from: the termination or discontinuance of a Customer's service; a deficiency in the pressure, volume or supply of water due to the malfunction or failure of a meter; or a deficiency in the pressure, volume or supply of water while meters or service lines are being repaired or replaced, unless such injury, damage or loss is due to the willful misconduct or gross negligence of the Company.

7. DISCONTINUANCE OF WATER SERVICE

(A) The Customer shall notify the Company at least three (3) days in advance of the day disconnection is desired. The Customer shall remain responsible for all service used and the billings therefore until service is disconnected pursuant to such notice.

(B) The Company may discontinue water service to a customer for one or more of the following reasons:

- I. Nonpayment of an undisputed delinquent charge;
- II. Failure to post a required deposit or guarantee;
- III. Unauthorized interference, diversion or use of the Company service situated or delivered on or about the customer's premises;
- IV. Failure to comply with terms of a settlement agreement;
- V. Refusal after reasonable notice to permit inspection, maintenance, replacement or meter reading of Company equipment. If the Company has a reasonable belief that health or safety is at risk, notice at the time inspection is attempted is reasonable;
- VI. Misrepresentation of identity in obtaining utility service;
- VII. Violation of any other rules of the Company approved by the commission which adversely affect the safety of the customer or other persons or the integrity of the Company's system.

the customer at least ten (10) days prior to the date of the proposed discontinuance. Service of notice by mail is complete upon mailing. As an alternative, the Company may deliver a written notice in hand to the customer at least ninety-six (96) hours prior to discontinuance. A notice of discontinuance of service shall not be issued as to that portion of a bill which is determined to be an amount in dispute pursuant to sections 4 CSR 240-13.045(5) or (6) that is currently the subject of a dispute pending with the utility or complaint before the commission, nor shall such a notice be issued as to any bill or portion of a bill which is the subject of a settlement agreement except after breach of settlement.

(H) On the date specified on the notice of discontinuance or within eleven (11) business days after that, and subject to the requirements of these rules, the Company may discontinue service to a residential customer between the hours of 8:00 a.m. and 4:00 p.m. Service shall not be discontinued on a day when Company personnel are not available to reconnect the customer's service or on a day immediately preceding such a day. After the eleven (11) business day effective period of the notice, all notice procedures required by this rule shall again be followed before the Company will discontinue service. *

(I) The Company shall make reasonable effort to communicate with the customer, at least twenty-four (24) hours prior to any discontinuance, regarding the reason(s) for discontinuance of service, and the resolution. If discontinuance of service would affect an occupant who is not the company's customer, or is not responsible for payment of the bill, then the Company shall make reasonable effort to inform such occupant(s). *

(J) Discontinuance of service will be made during reasonable hours. Company personnel shall identify themselves and announce the intention to disconnect service, or leave a conspicuous notice of the disconnect. *

(K) The provisions of paragraphs (i) and (j) above may be waived if safety of Company personnel while at the premises is a consideration. *

FOR
ST. JOSEPH, MISSOURI AND VICINITY

8. RENEWAL OF WATER SERVICE AFTER DISCONTINUANCE - Continued

(A) When water service to a premises has been terminated for any reason other than temporary vacancy, it will be renewed promptly at that premises when the cause for discontinuance has been eliminated and upon payment of all charges due and payable by the Customer in accordance with the Company's approved schedule of rates and tariffs or payment of a sewer bill and other charges pursuant to a contract between the Company and a sewer corporation, municipality, or sewer district authorized by state statute.

(B) No Customer whose service has been turned off shall turn on same or have same done by anyone other than the Company.

(C) Water will not be turned on to any premises unless there is a responsible person present at such time to see that all water outlets in the premises are closed to prevent damage by escaping water.

9 TURN-ON CHARGE

(A) When it has been necessary to discontinue water service to any premises because of violation of the Rules and Regulations, except for non-payment of a sewer bill pursuant to Rule 7(B) VIII, or on account of non-payment of any bill, a charge of \$15.00 will be made to partly cover the expense of turning on the water, except that the charge for any service turned on at the request of a

11. INSTALLATION OF SERVICE LINES - Continued

- (D) Only persons duly authorized by the Company shall make any connection to or disconnection from a water main or service connections of the Company, or set, change, remove, interfere with or by-pass any water meter of the Company. Penalties provided by law for any such action will be rigidly enforced.
- (E) At the time of application for service, applicant may be required to execute a written application or contract; provided, however, that the Company shall have the right to reject any application that does not meet the requirements of their rules and regulations. In any case where unusual construction or equipment expense is necessary to furnish the service, the Company may require a contract for such reasonable period of time as is specified by the Company at the time of the making of such contract.
- (F) The customer shall, upon request of the Company, present in writing to the Company, a list of the devices which are to be attached to the Company's lines, giving the location of the building, and the Company will then advise the form and the character of the water facilities available.
- (G) No substantial addition to the water using equipment or appliances connected to the water system of the Company shall be made except upon written notice to, and with the written consent of the Company.
- (H) Any complaint against the service or employees of the Company should be made at an office of the Company and preferably in writing.

11. INSTALLATION OF SERVICE LINES - Continued

(D) All service pipes shall be laid at all points at least four and one-half feet below the surface of the ground and shall be placed on firm and continuous earth so as to give unyielding and permanent support. They shall not be laid in sewer ditches, nor in driveways, nor pass through premises other than that to be supplied, and shall be installed in a trench at least twenty-four inches in a horizontal direction, in undisturbed earth, from any other trench wherein are laid gas pipe, sewer pipe, or other facilities, public or private.

(E) The Customer shall install a stop and waste cock of a type approved by the Company on the service pipe immediately inside the foundation wall of the building supplied, and so located as to be easily accessible to the occupants and to provide proper drainage for all of the pipes in the building, as well as for the meter installed in the building.

(F) The Customer shall, at his own cost and expense, make all changes in the service pipe required or rendered necessary on account of changes in the street grades, relocation of mains, or other causes.

(G) No fixture shall be attached to, or any branch made in, the service pipe between the street main and the meter.

(H) Each new premises, or existing premises to be altered, shall be supplied through an independent service pipe and all double houses, apartment buildings which do not qualify as a single premises as defined under Rule 2D, and similar structures shall have a separate service connection for each tenant unless specifically approved or ordered by the Company, in which event the owner is to be solely responsible for all water used on and in said buildings or premises.

(I) Any repairs or maintenance necessary on the service pipe or on any pipe or fixture in or upon the Customer's premises shall be performed by the Customer at his expense and risk.

<u>RULES, REGULATIONS AND CONDITIONS OF SERVICE</u>	
<p>11. INSTALLATION OF SERVICE LINES - Continued</p> <p>(I) The Company shall not be obliged to install a service connection until the Customer's water service meets existing plumbing codes and Company specifications. <i>For purpose of this tariff a "SERVICE CONNECTION" is defined as the service pipe from the main to a curb stop or service box at the property line, owned and maintained by the Company, used to conduct water from the main to and including a metering installation near the Customer's property line. A "CUSTOMER'S WATER SERVICE" is defined as a pipe with appurtenances from the Service Connection to the Customer's premises.</i></p> <p>(J) The Company will locate the point to which service connection will be made and will furnish and run the service pipe to the Customer's property line. Company will own, maintain, and replace, when necessary, all service connections.</p> <p>(K) The actual ownership of a minority of the service connections is indeterminate in several areas served by the Company. It is therefore the intent of these rules and regulations that the Company shall assume the responsibility and expense for maintenance of all service connections to the Customer's property line or the meter installation, if such installation is located outside the customer's property, or inside the customer's property and within five (5) feet of the property line. When, in the opinion of the Company, a service connection is in need of replacement, the Company shall make the replacement at its own expense. The Company will hold title to all service connections installed by the Company.</p> <p>(L) The Customer's water service from the box to the Customer's building shall be installed by and at the expense of the Customer. A Customer's water service shall not be used to supply more than a single premise without the consent of the Company.</p>	<p>*</p>

(J) Service pipes must be kept and maintained in good condition and free from all leaks, and for failure so to do the water supply may be discontinued.

(K) The Company shall in no event be liable for any damage done or inconvenience caused by reason of any break, leak or defect in, or by water escaping from service pipes, or from fixtures on the premises of the owner or Customer.

(L) The curb box or meter box shall be set on a level with the grade of the surrounding terrain on which the installation is made and shall be kept accessible at all times.

(M) No plumber shall part with the possession of a key for turning on or off the water, except to an employee of the Company.

(N) After testing any work, the plumber shall turn off the water from such premises, except where the work is a simple extension of an additional fixture on a service then in use. Where water is turned off previous to making alterations or repairs, plumbers shall not leave water turned on when work is completed.

II. Interest at the rate of six percent per annum compounded annually shall be payable on all deposits. Interest shall be paid upon the return of the deposit. Interest shall not accrue on any cash deposit after the date the Company has made a reasonable effort to return such deposit to the Customer.

III. Upon termination of service, the deposit, with accrued interest, shall be credited to the final bill and the balance, if any, shall be returned promptly to the Customer.

IV. The credit of a Customer shall be established and the deposit and accrued interest shall be refunded promptly by the Company upon satisfactory payment by the Customer of all proper charges for water service for a period not to exceed twelve successive months. For purposes of this rule, payment is satisfactory if made prior to the date upon which the bill becomes delinquent. The Company may withhold refund of the deposit funds pending the resolution of a matter in dispute involving discontinuance for nonpayment or unauthorized interference by the customer.

V. If a Customer is unable to pay a security deposit in one payment, the Company will allow the Customer to make payments over a period of at least two months.

(D) In lieu of a cash security deposit required by these rules, Company may accept the written guarantee of a responsible party who is an existing Company Customer as surety for a customer service account subject to the following terms and conditions:

RULES, REGULATIONS AND CONDITIONS OF SERVICE

FEB 7 1984

12. SECURITY DEPOSITS - Continued

MISSOURI
Public Service Commission

I. It shall be in writing and shall state the terms of the guarantee and the maximum amount guaranteed. The Company shall not hold the guarantor liable for sums in excess of the maximum amount of the required cash deposit unless the guarantor consents thereto in a separate written instrument.

II. Credit shall be established for the Customer and the guarantor shall be released upon satisfactory payment by the Customer of all proper charges for water service for a period of twelve successive months. For purposes of this rule, payment is satisfactory if, as to undisputed bills, it is made prior to the date upon which the bill becomes delinquent. Payment of a disputed bill shall be satisfactory if made within ten days of resolution or withdrawal of the dispute. The Company may withhold the release of the guarantor pending the resolution of a matter in dispute involving discontinuance for nonpayment or unauthorized interference by the Customer.

13. CUSTOMERS REQUIRING UNINTERRUPTED SUPPLY

(A) The Company will endeavor to give reasonable service, but does not guarantee a sufficient or uniform pressure, or an uninterrupted supply of water, and Customers are cautioned to provide sufficient storage of water where an absolutely uninterrupted supply must be assured, such as for steam boilers, hot water heating systems, gas engines, etc.

(B) Fixtures or devices taking a supply of water directly from the service pipes, depending upon the hydraulic pressure of the pipe system of the Company for supplying same under working pressure, will do so at the risk of the parties making such attachments, as the Company will not be responsible for any accidents or damages to which such fixtures or devices are subject.

RULES, REGULATIONS AND CONDITIONS OF SERVICE

FEB - 1 1984

14. INTERCEPTING TANK REQUIRED FOR LARGE CUSTOMERS

(A) Service pipes shall not be connected to the suction side of pumps, and the supply for uses of a character requiring a large quantity of water within a short period will not be permitted without the express approval of the Company in writing, except through intercepting or intermediate storage tanks.

(B) The inlet connection for tanks shall discharge at a point no less than 6-inches above the overflow, and shall be approved by the Company.

15. CHECK VALVES, FLUSH VALVES AND VACUUM BREAKERS

(A) Customers having boilers or hot water heating systems connected with mains of the Water Company must have a check valve in the supply pipe to the boilers and hot water heating systems, together with a relief valve at some point between the check valve and the heating system. All Customers are hereby cautioned against danger of collapse of boilers, since it is sometimes necessary to shut off the supply of water without notice, and for this reason, a vacuum valve should be installed in the steam line to prevent collapse in case the water supply is interrupted. The Company, however, will not be responsible for accidents or damages resulting from the imperfect action or failure of said valves.

(B) Flush valve or direct flushing closets should not be installed in premises where the service pipe supplying such premises is connected to a main 2-inches or less in diameter. All flush valves shall be equipped with approved type vacuum breakers.

16. PLUMBING WORK MUST BE INSPECTED BY COMPANY

All plumbing work done in connection with pipe and fixtures connected with the Company's mains shall be submitted for the inspection of the Company before such underground work is covered up. Whenever the Company determines that a job of plumbing is obviously defective, although not in direct violation of these Rules and Regulations, the Company may insist upon its being corrected before the water will be turned on.

17. CROSS-CONNECTIONS AND INTERCONNECTIONS

MISSOURI
Public Service Commission

(A) No interconnections, as defined below, nor any physical connections between the public water supply and any commercial water supply or any other pipe system or equipment which in any manner receives all or any part of its supply of water directly or indirectly from wells, streams, or any source other than that of the water system of the Company, will be permitted regardless of whether or not such cross-connections and interconnections are controlled by automatic devices, such as check-valves, or by hand operated mechanisms such as gate valves or stop cocks; and no physical connection shall be made or established except between public water supplies which are adequately treated and are under adequate laboratory control.

(B) Definitions.

When used in these Rules and Regulations, the following words and phrases shall have the meaning herein provided:

I. Cross-Connections. A cross-connection is any pipe, valve or other arrangement or device, connecting the pipe lines of the Company or facilities directly or indirectly connected therewith, to and with pipes or fixtures supplied with water from any source other than the lines of the Company directly connected.

II. Interconnection. An interconnection is a plumbing arrangement, other than a cross-connection, by which contamination might be admitted or drawn into the distribution system of the Company, or into lines connected therewith, which are used for the conveyance of potable water.

(C) If a public water supply is used as a secondary supply delivered either to an elevated tank or suction tank supplied with water from a source or system with which physical connections are not permitted by this regulation, such tank or tanks shall be open to atmospheric pressure, and the water from the public water supply system shall be discharged into the tank at an elevation above the overflow level of the tank or tanks, and the tank overflow shall be of adequate size to fix definitely the maximum overflow level.

17. CROSS-CONNECTIONS AND INTERCONNECTIONS – Continued

(D) The making, causing or permitting of the installation or existence of an interconnection or Cross-connection shall constitute a violation of the Rules and Regulation of the Company, and such prohibited connection shall be removed forthwith in a manner acceptable to the Company and to the duly constituted plumbing inspectors and public health officials. Failure to do so within two days from and after date of notification by the Company may result in discontinuance of water service.

(E) Fire Protection Systems

- a. All new fire protection systems, other than residential systems utilizing a combination service line for one and two family premises, connected to the Company's water supply shall be protected from back pressure and back siphonage by one of the following testable devices:
 - Double Check Detector assembly (DCDA).
 - Reduced Pressure Detector Assembly (RPDA).
- b. Fire protection systems that contain antifreeze, fire retardant, or other chemicals must be equipped with an RPDA.
- c. A reduced pressure assembly (RP) may be used to isolate a branch line(s) of the fire service that contains chemicals, at the discretion of the Company. In this case, a DCDA may be installed as the containment assembly.
- d. Existing fire protection systems must be equipped, at a minimum, with a double check valve assembly (DC) unless the system contains chemicals. In this case, the system must be equipped with an RP.
- e. When an existing fire protection system equipped with a DC is extended or renovated, the system's backflow prevention device must be upgraded to a DCDA.

RULES, REGULATIONS AND CONDITIONS OF SERVICE

18. METERS - Continued

(E) When the meter is not installed in a building, placed in a meter box or vault, which box or vault shall be placed just inside the Customer's property line or at such other location as may be selected by the Company.

(F) The Company reserves the right to put seals on any water meter, or on its couplings, in and for any premises, and may shut off the supply if such seals are found broken or removed.

(G) Each new premises, or existing premises to be altered, shall be supplied through an independent meter setting, and only one premises shall be supplied through such meter setting, except that when, due to the arrangement of piping in existing double houses, apartment buildings and similar structures, undue hardship would result from the enforcement of this Rule, such premises may be served through a single meter setting. In such cases, however, the owner of the property shall guarantee the payment of all bills.

(H) When, after the effective date hereof, more than one meter is installed upon a Customer's premises at the request of the Customer or due to conditions existing upon the premises of the Customer, then each meter shall be treated separately as if it belonged to a separate Customer, and the registrations of such meters shall not be combined.

(I) In all other instances where more than one meter is installed upon a Customer's premises, then the registrations of all such meters shall be combined, and the minimum charge shall be the sum of the individual minimum charges for all such meters.

(J) Meters are periodically tested in accordance with the Public Service Commission's regulations. The Company may at any time remove any meter for routine tests, repair or replacement and may, at its option and expense, test any meter when the Company has reason to believe that it is registering inaccurately.

18. METERS - Continued

MISSOURI
Public Service Commission

(K) The Company will make a test of the accuracy of a meter upon request of a Customer, provided such Customer does not make request for tests more frequently than once in twelve months. The Customer will be notified of the time and place of such test so that he may be present to witness same should he so desire. A report giving the results of such tests will be made to the Customer, and a complete record of the same will be kept on file in the office of the Company.

(L) No water-service meter will be allowed in service which has an incorrect gear ratio or dial train or is mechanically defective or shows an error in measurement in excess of 5% when registering water at stream flow equivalent to approximately one-tenth and full normal rating under the average service pressure. When adjustment is necessary, such adjustment will be made as accurately as practical for average rate of flow under actual conditions of installation. Tests for accuracy will be made with a suitable testing device in accordance with the best modern water meter practice and at rates of flow which properly will reflect the accuracy of meters over each meter's range of minimum to maximum flow.

(M) Unless otherwise ordered by the Commission, each service water meter installed will be periodically removed, inspected and tested in accordance with the following schedule, or as more often as the results obtained may warrant, to insure that the meter accuracy is maintained within the limits set out in Rule 18 (L):

- 5/8-inch meters - 10 years, or for each 200,000 c.f. registered
- 3/4-inch meters - 8 years, or for each 300,000 c.f. registered
- 1-inch meters - 6 years, or for each 400,000 c.f. registered
- 1 1/2-inch meters and over - 4 years

FEB - 1 1984

18. METERS - Continued

MISSOURI
Public Service Commission

(N) If on test of any service meter either by the Company or by the Commission, such meter shall be found to have a percentage of error greater than that allowed by the Commission, the following provisions for the adjustment of bills shall be observed:

I. Fast Meters - When a meter is found to have a positive average error - i.e., is fast - beyond the limit prescribed by the Commission and as set forth in Rule 18 (L), in tests made at the request of the Customer, the Company will refund to the Customer an amount equal to the excess charged for the water incorrectly metered, for a period equal to one-half of the time elapsed since the previous test, but not to exceed six months. No part of the minimum charge will be refunded.

II. Slow Meters - When a meter is found to have a negative average error - i.e., is slow - beyond the limit prescribed by the Commission and as set forth in Rule 18 (L), in tests made at the request of the Customer, the Company may make a charge to the Customer for the water incorrectly metered for a period equal to one-half of the time elapsed since the previous test, but not to exceed six months. If a meter is found not to register for any period, the Company will estimate the charge for the water used by averaging the amounts registered over similar periods, preceding or subsequent thereto, or over corresponding periods in previous years.

(O) In the event of a meter failing to register properly or when removed for testing or repairs, water bills will be rendered on an estimated bases as set out in Rule 18 (N) II.

(P) When any meter has once been placed, any change in location directed by the Customer will be done by the Company, but at the expense of the Customer.

19. TERMS AND CONDITIONS OF BILLING AND PAYMENT - Continued Public Service Commission

(I) The Company will not be bound by bills rendered under mistake of fact as to the quantity of service rendered.

(J) The use of water by the same Customer in different premises or localities will not be combined, and each installation shall stand by itself.

(K) If for any reason service is discontinued before the expiration of one (1) month from commencement of service, a bill for at least the minimum charge for one (1) month will be rendered.

(L) Water bills are rendered for the entire premises and will not be subdivided.

(M) The charges for water to all premises will continue to accrue unless the service is discontinued at the curb by an authorized agent of the Company.

(N) The Company may render a bill based on estimated usage pursuant to a billing procedure approved by the Public Service Commission if:

I. Extreme weather conditions, emergencies, labor agreements, or work stoppages prevent actual meter readings.

II. The Company is unable to obtain access to the Customer's premises for the purposes of reading the meter, or in situations where the Customer makes reading the meter unnecessarily difficult.

(O) If the Company is unable to obtain an actual meter reading, it shall undertake reasonable alternatives to obtain a customer reading of the meter, such as mailing or leaving postpaid, pre-addressed postcards upon which the Customer may note the reading.

RULES, REGULATIONS AND CONDITIONS OF SERVICE

19. Terms and conditions of billing and payment – Continued

(O) Estimated Bills

- I. Where a meter fails to register, or if the Company is unable to obtain a meter reading, the Customer's bill for water usage shall be estimated by using the Customer's usage during the same period in the most recent year for which actual meter readings are available. In the event the Customer was not provided water service the previous year, then the Customer's bill for water usage shall be estimated based upon the average usage of similar Customers. If a Customer has not had water service for three (3) months, the average used for an estimated bill will be based on the number of months the Customer has had water service.

DATE OF EFFECTIVE: July 1, 2010

ISSUED BY: Frank Kartmann, President
727 Craig Road, St. Louis, MO 63141

RULES, REGULATIONS AND CONDITIONS OF SERVICE

FEB - 1 1984

MISSOURI

Public Service Commission

19. TERMS AND CONDITIONS OF BILLING AND PAYMENT - Continued

(P) In the event the Company is unable to obtain a meter reading which would otherwise be cause for discontinuance of service in accordance with the Rules of the Public Service Commission of Missouri, the Company will offer special appoints to customers for meter reading between 4:30 p.m. and 9:00 p.m. on Monday through Friday and between 8:00 a.m. and 4:00 p.m. on Saturday, both excluding holidays. The charge for such special appointment will be at actual cost, but not exceeding \$55.00.

(Q) For conditions not specifically mentioned in this tariff regarding the Company's billing practices, refer to 4 CSR 240-13 of the Missouri Public Service Commission's rules.

20. EXTENSION OF MAINS

In the matter of extension of facilities, the following rules shall apply:

(A) Free Extensions

I. Public Fire Service

(a) In the event that any municipality ^{of} fire protection district shall order the installation of additional fire hydrants on existing mains having an internal diameter of six inches or larger, the Company will install such hydrants at its own cost and expense.

(b) Where pipe line installations are required to carry out an order of any municipality or fire protection district to install fire hydrants or where existing mains, in the opinion of the Company, are inadequate to provide fire flows to such hydrants, and the municipality or fire protection district

orders the installation of a water main of adequate size to provide such flows to the hydrant or hydrants so ordered, the Company will install such mains and hydrants at its own cost and expense provided that the estimated cost of the extension does not exceed four times the estimated normal annual revenue from bonafide applicants whose service pipes will immediately be connected directly to the extension and from whom the Company has received application for service upon forms provided by the Company for this purpose.

+

(c) The estimate of investment cost shall include all costs associated with the extension, including hydrants, pipe, valves, fittings, and other necessary materials, and all other costs such as labor, permits, the cost of cutting and replacing of pavements, lawns and sidewalks, the relocation, alteration, removal and reconstruction of existing mains, facilities and equipment, if required, the Company's expense (based on job time) for supervision, engineering, insurance, tools and equipment, and accounting and 5% for contingencies.

II. General Water Service

(a) The Company will, upon written request for service by a prospective Customer or a group of prospective Customers located in the same neighborhood, determine the necessary size of main required to give service and make an estimate of the cost of the proposed extension including hydrants, pipe, valves, fittings, and other necessary materials and all other costs such as labor, permits, etc., including the cost of cutting, and replacing of pavements, lawns and sidewalks, the relocation, alteration, removal and reconstruction of existing mains, facilities and equipment, if required, and the Company's

20. EXTENSIONS OF MAINS - Continued

of immediate normal annual revenue from the original prospective Customers, the Applicant or the applicant's authorized agent shall contract for such extension and shall deposit in advance with the Company the estimated cost of the extension less four (4) times the estimated immediate normal annual revenue from the original prospective Customers. During the first ten (10) years after the date of the extension agreement and after the stated number of original prospective customers are taking water service, the Company will, for each additional bonafide new Customer taking service under a regular yearly contract, and directly connected to the extension between its original beginning and original terminus, refund to the original Depositor or Depositors, an amount equal to four (4) times the Company's estimate of immediate normal annual revenue of the new Customer, but in no event shall the aggregate refund made to any Depositor exceed the original deposit of such Depositor.

III. Adjustment of Cost of Extension. Should the actual cost of the extension be less than the estimated cost, the Company will refund the difference as soon as the actual cost has been ascertained. When the actual cost of the extension exceeds the estimated cost, then the Company will bill the Depositor for the difference between the estimated and the actual cost.

(C) Original prospective Customers to be considered above shall be those who sign contracts for at least one year's water service, and guarantee to the Company that they will take water service at their premises within thirty (30) days after the date water is turned into the main. Estimates of annual revenue will be made by the Company, and will be based on the experience of the Company regarding use of water by other customers similarly situated.

RULES, REGULATIONS AND CONDITIONS OF SERVICE

FEB 7 1984

20. EXTENSIONS OF MAINS - Continued

(D) In estimating the cost of an extension, the estimate shall be based on the diameter of the pipe to be used, provided, however, that the estimated cost to the Customer or Customers shall not be based on a pipe diameter in excess of eight inches, unless the water demand estimated for the proposed Customer or Customers requires a larger pipe.

(E) No interest will be paid by the Company on the Applicant's payment or on any unrefunded balances.

(F) At the expiration of said ten-year period, the refund account will be closed, and no further refunds will be made.

(G) Extensions made under this Rule shall be and remain the property of the Company.

(H) The Company reserves the right to further extend its water mains from each water main extension made under this Rule, and the Depositor or the Depositor's agent paying for an extension shall not be entitled to any refund for the attaching of Customers to any further extension or branch mains so installed.

(I) In determining the length of main extensions, or of pipe lines to be installed to serve a subdivision, the main shall be extended to fully cover the frontage of the property, and if the last lot to be served is a corner lot or a lot immediately adjacent to a corner lot, the terminal point of the extension made hereunder shall be located so that the main laid hereunder ties in with the existing main located in the intersecting street; and further provided that, if there is no main located in the intersecting street, the terminal point of the extension made hereunder shall be located at the nearest street line of the intersecting street.

(J) Before water lines will be laid hereunder in any new sub-division, it is understood and agreed that the road surface shall be brought to the established sub-grade; and the developer or builder of such new subdivision shall furnish the Company with a right-of-way agreement suitable in form to the Company, unless the streets of the new subdivision have been dedicated to the public use.

(K) Contract for Service. The Company shall not be required to make extensions or refunds as described in this rule unless those to be served by such extension shall guarantee to the Company that they will take water service at their premises within thirty (30) days after water is turned into the main. The Company may require of the prospective Customer on a proposed extension a satisfactory and reasonable guarantee that he will fulfill all the obligations made by him to the Company.

(L) The Company will, upon written request for service by prospective Customer and the execution by said Customer of a satisfactory agreement, upon forms provided by the Company for this purpose, consider an entire real estate subdivision as a unit, even though developed by segments, for the purpose of refunds to be made by the Company upon compliance with the following conditions:

I. The Customer shall have executed a Water Main Extension and Deposit Agreement for such real estate subdivision development;

II. There shall be attached to the Agreement a drawing of the subdivision which shall indicate the proposed total development of the subdivision.

III. If the Customer desires to have further main extensions into said subdivision by separate segments from time to time, the Customer shall so request in writing and each such extension so requested shall be covered by a separate standard form of Water Main Extension and Deposit Agreement executed by the Customer and the Water Company.

IV. Under such circumstances, for the purpose of making refunds to the Customer under other provisions of the Company's Schedule of Rates, Rules and Regulations, all such Agreements for refund relating to any segment of the subdivision in question shall be considered and treated as one Agreement for the purpose of refund, excepting only that the Company shall not have any refund obligation for Customers added in any particular segment of the subdivision after the ten-year period for that particular segment has expired; the refund obligation for any particular segment to terminate ten years after the main extension covered by such Agreement for any particular segment shall be completed and ready for service; and provided further that the total amount refunded by the Company to the Customer shall not in any event exceed the total amount deposited for the entire subdivision covered by all Agreements relating to said subdivision.

V. All other Rules, Regulations and Conditions of Service applicable to any Customer of the Company shall be in effect with regard to any such main extensions except as specifically supplemented by or modified by this rule.

21. PUBLIC FIRE HYDRANTS

(A) All public fire hydrants shall be furnished, installed and maintained by the Company.

(B) Whenever a change in the location of a fire hydrant is ordered, requested or made necessary due to change in line or grade of any public place, street, avenue, alley, bridge, roadway, curb or walk, or for any other reason, said change will be made by the Company at the expense of the municipality, fire protection district, or other party ordering, requesting, or making necessary such change.

21. PUBLIC FIRE HYDRANTS - Continued

(C) The Company may refuse to accept orders for the installation of new fire hydrants or for the relocation of existing fire hydrants at locations where there is not an existing water main six inches (6") or larger in diameter.

(D) The use of fire hydrants will be restricted to the taking of water for the extinguishing of fires, and water shall not be taken from any fire hydrant for construction purposes, sprinkling streets, flushing sewers or gutters or for any other use, unless specifically permitted by the Company for the particular time and occasion.

(E) During freezing weather, the municipality or fire protection district shall notify the company after it has opened any hydrant.

(F) Inspections and tests of public fire hydrants will be made by the Company at convenient times and reasonable intervals.

(G) No person, except for the legitimate purpose of extinguishing fires or for other purposes herein provided, shall open any fire hydrant without the consent of the Company.

22. INTERRUPTIONS IN WATER SUPPLY

(A) The Company may at any time shut off the water in the mains in case of accident, or for the purpose of making connections, alterations, repairs, changes, or for other reasons, and may restrict the use of water to reserve a sufficient supply in its reservoirs for public fire service or other emergencies whenever the public welfare may require it.

(B) The temporary shutting off of water from any premises for any cause, whether non-payment of bills, leaking pipes, fixtures, etc., shall not entitle the Customer to a deduction in the amount of his water charges during the time of such temporary shut off, unless the temporary discontinuance of service is caused by the malfunction or break-down of the Company's facilities, and

exceeds forty-eight (48) hours in duration. The shutting off of water temporarily shall not cancel a contract for water service except at the option of the Company or upon notice from the Customer.

23. LIABILITY OF COMPANY

(A) The Company shall not in any way or under any circumstances be held liable or responsible to any person or persons for any loss or damage from any excess or deficiency in the pressure, volume, or supply of water due to any cause whatsoever. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in the service, but it cannot and does not guarantee that such will not occur.

(B) The Company shall not be responsible for accidents or damages to boilers, hot water tanks, etc., resulting from the discontinuance of service, nor by reason of the breaking of any main, water pipe, fixture or appliance whether owned by the Company or Customer, and no person shall be entitled to damages for any interruption of service. The Company will exercise every care in this matter, and in the event of the necessity of turning off water, every reasonable effort will be made to notify the Customers.

(C) The Company will make every effort to maintain a pressure on the distribution system that is required for reasonable service, but it does not guarantee to furnish at all times any given quantity for fire uses or for general purposes.

(D) The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise. The Company agrees to furnish such supply of water as shall then be available and no other or greater, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

in compliance with the Plumbing Code of the City of St. Joseph, Missouri, and shall be subject to inspection and approval by the City Plumbing Inspector. Public Service Commission

(G) All plumbing work performed outside the city limits of St. Joseph shall be done in compliance with the published Rules of the Missouri-American Water Company, St. Joseph District, and in compliance with the plumbing code or requirements of the locality in which the work is to be performed.

(H) All plumbers are required to give the Company one day's advance notice for making taps in the Company's mains. At the time of notice, the plumber shall complete "Tap Application" forms, giving complete information of such nature as required. The plumber shall obtain an excavation permit from the City of St. Joseph, or a county permit, where required, or a state permit, where required, and shall make an excavation directly over the Company's main sufficiently large to permit operation of the tapping equipment without encountering undue hazards created by confined space or improperly excavated openings. Any plumber failing to comply with this regulation shall be required to excavate the opening as directed by the Company through its duly authorized agent before such tap will be made.

(I) No plumber or his agent shall leave water turned on to any property by means of inserting a meter jumper or other device. Such devices may be used by the plumber for test purposes only, and on completion of such test, the plumber shall remove such meter jumper or other device, leaving the water turned off at the curb stop or meter box to premises to be supplied by the service installation. Water service shall not be established to any premises until proper application has been made by the Customer at the office of the Company.

(J) No plumber shall allow his name to be used by any person, directly or indirectly, either to obtain a permit or permits, or to do any work under his Bond, in connection with facilities of the Company.

RULES, REGULATIONS AND CONDITIONS OF SERVICE

25. RULES AND REGULATIONS APPLICABLE TO PLUMBERS - Continued

(K) Any failure to comply with these Rules and Regulations, or any Ordinance of the City of St. Joseph, or any ordinance in effect in areas outside the city limits of St. Joseph, pertaining to plumbing work, may cause the Bond of the plumber to be forfeited, revoked, or suspended at the discretion of the Manager of the Company.

+ 26. EXTENSION OF MAIN INCOME TAX LIABILITY

For the purposes of these rules, regulations and conditions of water service, including, but not withstanding, any rule or regulation relating to extension of mains, and to give effect to the Tax Reform Act of 1986, as may be supplemented or amended, and any applicable state income tax, any customer, developer or other party requesting the extension of mains for water service is required and shall have the option of selecting one of the following provisions in connection with the other terms and conditions heretofore applicable to the extension of mains requiring an advance for construction:

(a) NO REFUND OPTION. Any customer, developer or other party requesting a main extension requiring an advance for construction may pay only the amount normally required to reflect construction costs, excluding any amount for income tax liability, provided such party waives the right to any and all refunds normally available under the main extension rule or regulation; OR

(b) REFUND OPTION. Any customer, developer or other party requesting a main extension requiring an advance for construction may deposit an advance in an amount that, after subtracting therefrom the associated income tax liability, is not less than the amount required for the construction cost of the requested main extension under the main extension rule or regulation. Any party electing this refund option shall receive refunds under the main extension rule or regulation, including an additional amount representing the associated taxes at the time of such refunds.

25. RULES AND REGULATIONS APPLICABLE TO PLUMBERS - Continued

(K) Any failure to comply with these Rules and Regulations, or any Ordinance of the City of St. Joseph, or any ordinance in effect in areas outside the city limits of St. Joseph, pertaining to plumbing work, may cause the Bond of the plumber to be forfeited, revoked, or suspended at the discretion of the Manager of the Company.

26. EXTENSION OF MAINS INCOME TAX LIABILITY

To enable Company to pay state and federal income taxes which result from the treatment of an advance for construction as gross income, the amount of such advance, as initially estimated and as finally actually determined under the Rule herein regarding extension of mains, shall be doubled. In lieu of up to fifty percent of a doubled advance, a letter of credit in a corresponding amount and from a financial institution with a state or federal charter in good standing shall be accepted by Company. Such letter of credit shall be accepted for the sole purpose of establishing a source from which Company may, for a period not to exceed six months from the end of the tax year in which a doubled advance is treated as gross income, draw funds to pay state and federal income taxes which result from such treatment. All amounts paid in excess of fifty percent of a doubled advance shall be retained, in an interest bearing account approved by the Commission, for the purpose of paying state and federal income taxes which result from treating such advance as gross income. If none, or only a portion, of the escrow funds are necessary to pay state and federal income taxes which result from the treatment of advances for construction as gross income, the excess funds plus interest accrued on the total escrow funds less proper expenses necessary to administrate the escrow account (not to exceed .7 of 1 percent of the total escrow funds) shall be refunded to the person or entity who advanced the funds. Such interest and excess funds shall be refunded within six months of the end of the tax year in which the doubled advance in question is treated as gross income. At no time shall the administrative costs exceed the interest earned on the escrow amounts.

Refunds on a doubled advance for construction shall be calculated by doubling the amount which would otherwise be due under the Rule herein regarding extension of mains. In no event shall Company be obligated to refund an amount greater than the amount of a doubled advance, plus interest earned on the escrow account less the expense necessary to administrate the escrow fund.

If advances for construction, either through administrative or legislative action or a final judicial decision, are determined not to be gross income, Company shall cease, as of the effective date of such action or decision, to collect doubled advances and shall thenceforth calculate advances for construction solely on the basis of the Rule herein regarding extension of mains.

APPLICATION FOR SPECIAL CONNECTION

FEB - 1 1984

This Application made in triplicate this _____ day of _____, 19____, by _____ (Applicant) Missouri Public Service Commission

(a corporation of the State of _____), hereinafter called the "Applicant," to Missouri-American Water Company, St. Joseph District (a corporation of the State of Missouri), doing business in the City of St. Joseph, Missouri, and vicinity, hereinafter called the "Water Company."

The Applicant, upon the terms and conditions hereinafter set forth, hereby applies to the Water Company for a _____ inch service pipe connected to the street main of the Water Company on _____ Street between _____ Street and _____ Street in the _____ of _____ for the purpose of attaching to said service pipe the following fixtures and openings:

all of which fixtures and openings to be located within or upon the premises of the Applicant abutting the street on which the said main of the Water Company is located.

In consideration for which the Applicant agrees to be bound by all the terms and conditions of this application, and to pay the Water Company for service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this application may be accepted by the Water Company are as follows:

First: That the Water Company, by its representatives, shall have the right to enter the premises of the Applicant at any reasonable time

for the purpose of making such inspections as it may deem necessary, and it shall have the right to attach any testing device or use any means which it may elect to ascertain the condition of the pipe and appurtenances and the uses made of same. **Public Service Commission**

Second: That the service connection from the street main to the property line shall be installed and maintained by and at the expense of the Applicant.

Third: That a detector device may be required on said service at such location as may be determined by the Water Company. Such detector device shall be installed and maintained by and at the expense of the Applicant; all other pipe fixtures and appurtenances shall be constructed and maintained in good condition by and at the expense of the Applicant.

Fourth: That the vault and vault cover to house the detector device and related valves, fittings, etc., if required, shall be constructed and maintained by and at the expense of the Applicant. The vault construction shall be subject to Water Company approval.

Fifth: That the service control valve shall be under the control of the Water Company, except during times of fire, when it shall be under the control of the Chief of the Fire Department of said _____ and the Applicant agrees to obtain approval of said Chief of this application.

Sixth: That all fixtures and openings (other than control valves) shall be kept closed and sealed, and not open or used except during times of fire. Upon extinguishment of each fire, the Applicant shall immediately notify the Water Company, so that said fixtures and openings can again be closed and sealed.

Seventh: That the extent of the rights of the Applicant under this application is to receive, but only at times of fire on said premises, such supply of water as shall then be available and no other or greater. That the Applicant agrees the Water Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and that it shall be free and exempt from

Eighth: That this application does not contemplate uses of fixtures other than herein stated. If a supply of water for use other than extinguishment of fire is desired by the Applicant, then same shall be taken only through a service pipe separately connected with the street main of the Water Company and not connected directly or indirectly with the service pipe contemplated by this application.

Ninth: That the Applicant shall furnish, attach and make a part hereof, an accurate sketch showing the pipes, valves, hydrants, tank, openings, and appurtenances contemplated in this application. Such sketch must also show any other water supply system and pipe lines and appurtenances which may exist on the premises.

Tenth: That the rights and obligations of the Applicant hereunder shall be further subject at all times to the rates, rules and regulations of the Water Company that now exist or which may hereafter be adopted.

Eleventh: That the Applicant agrees to obtain in advance the approval of the Water Company for any change, alteration, addition or deduction contemplated in the fixtures, openings and uses herein specified.

Twelfth: That upon acceptance by the Water Company and the completion of the service connection herein contemplated, this application shall be in force as a contract and shall continue as such until cancelled by written notice fifteen days in advance given by the Applicant to the Water Company.

Thirteenth: That the Water Company has the right to disconnect or disconnect said service pipe and terminate this application, upon written

ECONOMIC DEVELOPMENT RIDER	
PURPOSE: The purpose of this Economic Development Rider is to encourage industrial and commercial development in the State of Missouri.	
<u>GENERAL PROVISIONS</u>	*
Nothing in this tariff shall be construed to preclude the Commission from exercising any authority it holds under the laws and regulations of the State of Missouri.	* *
<u>AVAILABILITY & APPLICABILITY</u>	*
Water service under this Rider is only available in conjunction with local, regional, and state governmental economic development activities where incentives have been offered and accepted by a customer who is requesting service, in conjunction with the location of new or expanding facilities, in the Company's service territory.	
Water service under this Rider is only available to industrial and commercial customers whose facilities are not involved in activities consisting of selling or providing goods and services directly to the general public, except for situations where such activities occur in adjacent facilities that are separately metered and billed at the applicable tariff rate or where such activities constitute a de minimus level of the customer's revenue from the service location.	* * * * *
This Rider will only be available if adequate capacity is available to meet the customer's anticipated additional load throughout the year.	* *
Water service under this Rider is not available in conjunction with service provided pursuant to any other special contract agreements.	
This Rider is applicable to new industrial or commercial customers moving to the Company's service territory from outside the state of Missouri or relocating or expanding from unsuitable facilities within Missouri, or the additional separately-metered facilities of an existing industrial or commercial customer, that meet the following criteria:	* * * *

Purpose

The purpose of this Economic Development Rider is to encourage industrial and commercial development in Missouri.

MO. PUBLIC SERVICE COMM.

Availability

Water service under this rider is only available in conjunction with local, regional, and state governmental economic development activities where incentives have been offered and accepted by a customer who is requesting service, in conjunction with the location of new or expanding facilities, in the Company's service areas.

Water service under this rider is only available to customers otherwise qualified for service under the following Company's Service Classifications:

- Industrial
- Commercial

Water service under this rider is not available in conjunction with service provided pursuant to any other special contract agreements.

Applicability

This Rider is applicable to a new customer, or the additional separately-metered facilities of an existing customer, who will be served under one or more of the above service classifications and who meet the following criteria:

- 1) The annual load factor of the new customer or additional facilities is reasonably projected to equal or exceed fifty-five percent (55%) during the entire term of application of this rider. The projected annual customer load factor shall be determined using the following relationship: Projected Annual Water Consumption, Expressed as MGD

Divided by Maximum Summer Monthly Billing Demand, Expressed as MGD

- 2) The average annual billing demand of the new customer or additional facilities is projected to be at least 0.5% of the total district consumption during each contract year under this rider.
- 3) The customer' new or additional facilities must create new permanent jobs within the facilities qualifying for this rider. The number of jobs created must be 0.1% of the total population of the district service area. Any location providing at least 50 jobs qualifies under this paragraph.

Requests for service under this rider must be submitted prior to the customer having committed to moving into or expanding within the Company's service territory and shall be accompanied by sufficiently detailed information to enable the Company to determine whether the new customer or additional facilities meet the above criteria.

Service under this rider shall be evidence by a contract between the customer and the Company in the general form as that contained in the following sheets, which shall be filed within ten days of execution with the Commission for information purposes.

Customer must notify Company in writing of the date at which customer would like the provisions of this rider to commence. Such commencement date must be within twelve (12) months of the execution of the contract.

This rider shall only be available in districts in which adequate capacity is available to meet the additional load throughout the year.

INCENTIVE PROVISIONS:

Amount of Discount:

Subject to the provisions below, the discount during the first contract year shall be 30 percent; during the second contract year, 25 percent; during the third contract year, 20 percent; during the fourth contract year, 15 percent; and during the fifth contract year, 10 percent. After the end of the fifth contract year, no other discount pursuant to this Rider shall be applied to the customer's bill and the applicability of this Rider and its associated contract to the particular facilities shall cease.

Calculation:

At the conclusion of the first contract year (i.e., 12 full monthly billing periods after the effective date of the contract), the Company shall review customers annual load factor and calculate an average monthly billing demand. If the customer has demonstrated at least a 55 percent annual load factor and at least an annual consumption level of 0.5% of total consumption for the district, then a bill credit shall be issued to apply the 30 percent discount for the first contract year, as set out below.

GENERAL INCENTIVE PROVISIONS

Amount of Discount

Subject to the provisions below, the discount during the first contract year shall be 30 percent; during the second contract year, 25 percent; during the third contract year, 20 percent; during the fourth contract year, 15 percent; and during the fifth contract year, 10 percent. After the end of the fifth contract year, no other discount pursuant to this Rider shall be applied to the customer's bill and the applicability of this Rider and its associated contract to the particular facilities shall cease.

Calculation

At the conclusion of the first contract year (i.e., 12 full monthly billing periods after the effective date of the contract), the Company shall review the customer's annual load factor and calculate an average monthly billing demand. If the customer has demonstrated at least a 55 percent annual load factor and at least an annual consumption level of 0.5% of total consumption for the district, then a bill credit shall be issued to apply the 30 percent discount for the first contract year, as set out below.

The same review shall be made at the end of each succeeding year during the five-year period and the applicable discount amount applied as a credit for that year if the criteria were met. If the customer fails to meet the criteria for a particular year, the customer will not receive the applicable discount for that year, but the contract shall remain in effect and the customer shall remain eligible for the discounts that would be applicable during the remainder of the five-year period. If the customer fails to meet the criteria in both the first and the second year, or in any two successive years during the five-year period, service to the customer under this Rider shall terminate and the contract for service under the Rider shall be void.

Calculation cont'd:

The same review shall be made at the end of each succeeding year during the five year period and the applicable discount amount applied as a credit for that year if the criteria were met.

If the customer fails to meet the criteria for a particular year, the applicable discount for that one year shall be forfeited by the customer but the contract shall remain in effect and the customer shall remain eligible for the discounts which would be applicable during the remainder of the five year period.

If customer fails to meet the criteria in both the first and the second year, or in any two successive years during the five year period, service to the customer under this Rider shall terminate and the contract for service under the Rider shall be void.

Application of the discount:

Since the discount is to be calculated at the end of the year after determination that all criteria have been met, the customer will have been billed for the otherwise applicable rate schedule and been charged for the appropriate taxes (e.g., sales and other gross receipts or franchise taxes). To afford the customer the full benefit of the discount (e.g., 30 percent for the first year) to the amount the customer paid for water service pursuant to the otherwise applicable rate schedule for the previous twelve billing periods, not including taxes. The discount will be given to the customer by that amount being applied as a credit on the next bill, prior to the calculation of taxes. No discount will be applied to items on the bill which are otherwise required to be charged to a customer by statute or rule of the Commission. e.g., the Missouri Primacy Fee.

Revenue Determination:

The pre-tax revenues under this rider, shall be determined by reducing otherwise applicable charges, associated with the rate schedules. The discount, where applicable, will be determined based on service rendered to customer during the Company's designated and applicable billing periods of each contract year and shall be as follows:

	<u>Discount</u>
First Contract Year	30%
Second Contract year	25%
Third Contract Year	20%
Fourth Contract Year	15%
Fifth Contract Year	10%

CANCELLED

OCT 03 2003

Form of Contract

MO. PUBLIC SERVICE COMM.

This Agreement is entered into as of this _____ day of _____, _____, by and between Missouri-American Water Company and _____ (Customer).

WITNESSETH:

Whereas, Company has on file with the Public Service Commission of the State of Missouri (Commission) a tariff providing for an Economic Development Rider (Rider), and;

Whereas, Customer is a new customer, or has acquired additional separately metered facilities within the Company's service territory, and;

Whereas, Customer has furnished sufficient information to the Company to demonstrate that its new facilities or additional separately metered facilities (Facilities) satisfied the Availability and Applicability provisions of the Rider, and;

Whereas, Customer wishes to take water service from the Company, and the Company agrees to furnish water service to the Customer under this Rider and pursuant to all other applicable tariffs of the Company;

Now, therefore, the Company and Customer agree as follows:

1. Service to the Customer's Facilities shall be pursuant to the Rider, all other applicable tariffs, and the Company's General Rules and Regulations Applying to Water Service, as may be in effect from time to time and approved by the Commission.
2. Customer acknowledges that this Agreement is not assignable voluntarily by Customer, but shall nevertheless inure to the benefit of and be binding upon the Customer's successors by operation of law, so long as the successor continues to meet the criteria of the Rider.
3. Customer will furnish additional information, as requested by the Company, to assure the continued eligibility for service under the Rider.

ECONOMIC DEVELOPMENT RIDER (continued)	
<u>ALTERNATIVE INCENTIVE PROVISIONS</u>	
In the event the General Incentive Provisions are not sufficient and a qualifying customer can demonstrate a viable competitive alternative in another geographical area, which is critical to the customer's decision to locate new or expanding facilities in the Company's service territory, and the qualifying customer can demonstrate that net benefits will accrue to the State of Missouri by locating or expanding its facilities in the Company's service territory, the Company and the customer may enter into a Special Service Contract that will provide for a competitive rate in lieu of the rate discounts provided for in the General Incentive Provisions.	*
A competitive rate provided for in a Special Service Contract entered into under these Alternative Incentive Provisions: (1) shall not exceed the Maximum Rate set forth below; (2) shall not be less than the Minimum Rate set forth below; and (3) shall be subject to an Escalation Clause as set forth below (so long as the contract rate does not exceed the Maximum Rate).	*
<u>Maximum Rate:</u> The Maximum Rate for water usage shall be the charges specified in the Company's Rate Schedule that would otherwise apply to the qualifying customer absent this Rider.	*
<u>Minimum Rate:</u> The Minimum Rate for water usage shall be sufficient to recover: (1) the Variable Production Cost of Water; and (2) a reasonable contribution towards all other costs associated with the provision of service for the life of the contract. For the purposes of these provisions, the Variable Production Cost of Water shall be the variable costs the Company incurs to produce additional treated water, including, but not limited to, expenses for electric power, chemicals, purchased water and waste disposal. (Regardless of the rate paid by the customer pursuant to this Rider, the customer shall also be responsible for: (1) the monthly customer charge applicable to the class of customer being served; (2) the public fire protection service charge applicable to the class of customer being served, if any; (3) all applicable taxes, if any; and (4) any other appropriate fees or charges lawfully charged to the customer.)	*

- 4. Customer acknowledges that all information provided to the Company for the purpose of determining whether the Customer is eligible for service under the Rider shall be retained by the Company, and shall be subject to inspection and disclosure under Chapters 386 and 393, RSMO 1986, as amended from time to time. Should the customer designate any of such information proprietary or confidential, Company shall notify customer of any request for inspection or disclosure, and shall use good faith efforts to secure an agreement or Commission order protecting the proprietary or confidential nature of such information.
- 5. This Agreement shall be governed in all respects by the laws of the State of Missouri (regardless of conflict of law provisions), and by the orders, rules and regulations of the Commission as they may exist from time to time. Nothing contained herein shall be construed as divesting, or attempting to divest, the Commission of any right jurisdiction, power or authority vested in it by law.

In witness whereof, the parties have signed this Agreement as of the date first above written.

(continued)

Escalation Clause: The rate set forth in the Special Service Contract shall be subject to an Escalation Clause, during the original and any renewal terms of the Special Service Contract, based upon changes in published price indices and/or changes in the Company's cost of service.

Continued Eligibility for Contract Rate

At the conclusion of each contract year (a period encompassing twelve full monthly billing periods after the customer begins taking service under the contract), the Company shall calculate the customer's annual load factor and average monthly billing demand to determine whether the customer has demonstrated at least a 55 percent annual load factor and at least an annual consumption level of 0.5% of total consumption for the district. If the customer fails to meet these criteria in both the first and the second year, or in any two successive years during the term of the contract, the rate provided for in the Special Service Contract shall no longer be available to the customer and the applicability of this Rider to the customer shall be considered a nullity. During the period in which an eligible customer performs initial construction on production/commercial facilities in order to begin operations, the Continued Eligibility provisions as hereinabove stated shall not apply until such time as a customer actually begins production/operation in the new facility. The customer is required to inform the Company as to the date when actual production/operation in the new facility begins.

Contract Provisions

Review of the Contract Rate: If the Special Service Contract is for a period of ten or more years, the contract shall contain a provision acknowledging that: (1) the Commission's Staff and the Office of the Public Counsel have the right to request a Commission review of the continued appropriateness of the alternative rate set forth in the contract after the initial five years of the contract, with the purpose of such a review being to determine whether the alternative rate continues to be in the best interest of all customers in the Company's service territory; (2) the Commission, acting on its own volition, may also open an inquiry in this regard; (3) if, upon such review(s), the Commission finds that the contract, as implemented, no longer serves the public

interest, it may allow the Company to continue providing service under the contract after adjusting rate conditions to restore the interests of the Company's other customers in the service territory, or it may direct the Company to terminate the contract; and (4) the results of any review(s) conducted under these provisions shall be implemented in a general rate proceeding.

Capital Investment Considerations: If the Company will incur additional capital costs to initiate service to a qualifying customer under these Alternative Incentive Provisions, the Special Service Contract shall include provisions whereby such costs will be recouped over the life of the contract through a capital improvement charge that will be in addition to the alternative rate set forth in the contract. In recognition of the possibility that the customer may not remain a customer of the Company for the full term of the contract, the contract shall also contain provisions whereby the customer will pay the Company the balance of any remaining capital costs that would have otherwise been collected under the capital improvement charge, if the customer ceases to take service from the Company prior to the end of the contract.

In recognition of the possibility that the Company may incur additional capital costs in the future to continue to serve a qualifying customer under these Alternative Incentive Provisions, the Special Service Contract shall include, or be amended to include, provisions whereby such costs will be recouped over the remaining life of the contract through the addition of a capital improvement charge that will be in addition to the alternative rate set forth in the contract. In recognition of the possibility that the customer may not remain a customer of the Company for the full term of the contract, the contract shall also contain provisions whereby the customer will pay the Company the balance of any remaining capital costs that would have otherwise been collected under the capital improvement charge, if the customer ceases to take service from the Company prior to the end of the contract.

As an alternative to the above-referenced capital improvement charges, the customer may elect to reimburse the Company for the amount of any additional capital costs incurred by the Company to initiate or continue service to the customer through the payment of a contribution-in-aid-of-construction equal to the additional capital costs.	* * * *
<u>Contract Approval</u>	*
Before a Special Service Contract, or subsequent amendments thereto, entered into under these Alternative Incentive Provisions can go into effect, the contract must be filed with and approved by the Public Service Commission. The filing of a Special Service Contract, or subsequent amendments thereto, with the Commission will include the following information.	* * * *
1) A complete copy of the contract along with all attachments and related agreements.	*
2) Customer Needs: A narrative description of the reasons why the General Incentive Provisions of this Rider are not sufficient for the Special Service Contract Customer. This description shall include the competitive alternatives available to the customer. In addition, this description shall include the consequences if the Special Service Contract is not approved. All information that the Company relies upon in support of the contract, including an affidavit from the customer attesting that the General Incentive Provisions are not sufficient, shall be included. All significant assumptions that affect this description, and the source/basis of those assumptions, shall be identified.	* * * * * * *
3) Customer Alternatives: An estimate of the cost to the Special Service Contract Customer for each competitive alternative available to the customer. This estimate shall be for the time frame of the Special Service Contract, or by each year for multi-year contracts.
