ORDER APPROVING EXPEDITED TARIFF

Issue Date: December 9, 2015

Effective Date: December 15, 2015

On December 1, 2015, Missouri Gas Energy, an operating unit of Laclede Gas Company (MGE), issued a tariff that will allow it to undertake a new, co-delivered pilot weatherization program in conjunction with Independence Power & Light. Under the program, MGE will work with Independence Power & Light to install, monitor, and evaluate weatherization measures for customers who receive natural gas service from MGE and electric service from Independence Power & Light. MGE's tariff carries a January 1, 2016 effective date, but MGE asks the Commission to expeditiously approve the tariff so that it can take effect on December 15, when Independence Power & Light intends to start its side of the program.

MGE explains that it has discussed the joint program with MGE's Energy Efficiency Collaborative, a group that includes the Commission's Staff, the Office of the Public Counsel, the Department of Economic Development – Division of Energy, and other stakeholders. The collaborative has endorsed the joint program and will continue to provide oversight as the joint program is implemented.

The Commission directed its Staff to file a response to MGE's tariff and its request for expedited approval by December 8, and allowed other interested stakeholders until that date

to file a response if they wished to do so. Staff filed its recommendation on December 7, advising the Commission to approve the tariff on an expedited basis. No stakeholder opposed the expedited approval of the tariff.

The Commission finds that the submitted tariff should be approved expeditiously so that MGE can begin offering the joint program at the same time as Independence Power & Light.
