- A. Page Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. From time to time new pages may be added to the tariff. When a new page is added between existing pages a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Sheet 14 cancels the third revised Sheet 14. Because of deferrals, notice periods, etc., the most current page number on file with the Commission is not always the Tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

The Deposit, to be held by Zone as a guarantee or security for the payment of charges incurred, may be drawn upon by Zone for any and all past due amounts, and may be increased at any time upon Zone's request and in its sole discretion. Zone's obligation to provide Services is contingent upon an initial and continuing credit approval by Zone. Additional Deposit amounts may be required after Services commence pending continuing review of issues which include but are not limited to Customer's monthly revenue, payment history, financial condition and as security against disputed amounts.
