6. Optional Services and Features

APR 3 1997

6.1 CLASS Service

MISSOURI
Public Service Commission

A. General

Class Custom Calling Service consists of one or more of the following optional features which provide end-user services that allow the customer more control over incoming and outgoing call based on Signaling System 7 (SS7) hardware and software. Class custom calling is available only with one party business and residence service in central offices which, at the Company's option, are appropriately equipped, subject to restrictions imposed by regulatory bodies.

B. Descriptions of CLASS Features

1. Automatic Call Back (ACB) - Allows customer to automatically redial the last number called from their line for up to 30 minutes. This applies whether the call was answered, unanswered or encountered a busy condition. If the called number is busy, the customer does not hear the normal busy tone, but is notified and instructed by an announcement after which automatic processing of the call continues until the number is idle. When both lines are idle, the calling party hears a special ring. When the caller picks up the set, the called party's line rings. Touch tone service activation code *66, deactivation code *86. Rotary service activation code 1166, deactivation code 1186. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.
2. Automatic Recall (AR) - Enables a customer to have a call placed automatically to the calling party of the last incoming call whether the call was answered or unanswered if the called line is available. AR allows the customer to hear the directory number of the last incoming call prior to deciding whether or not to recall that number. Touch tone service activation code *69, deactivation code *89. Rotary service activation code 1169, deactivation code 1189. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.

6.1 CLASS Service (Cont'd)

MISSOURI
Public Service Commission

B. Descriptions of CLASS Features (Cont'd)

3. Customer-Originated Trace (COT) - Allows the customer to originate a trace on the last incoming call by dialing an activation code. The call is traced automatically, and the identity of the originating directory number and the time the call was made is forwarded to a predetermined location. Information recorded will be released by the Company only to an authorized representative of a law enforcement agency and, in no event, other than as provided by applicable state and federal law. If the customer makes or receives another call or if the call waiting feature is activated prior to activating the trace, COT will not record the correct number. Touch tone service activation code *57. Rotary service activation code 1157. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.
4. Customer Originated Trace Usage Sensitive (COTU) - Allows customer to be billed for Customer Originated Trace on a usage sensitive basis, where facilities permit.
5. Calling Number Delivery (CND) - Allows customer to receive the calling number on incoming calls. The number is delivered to the called party's CPE in the interval between the first and second ring. Calling numbers will not be displayed if the call originates from an area that does not have the appropriate network signaling connections. This may exclude calls made from most cellular phones, calls made through some interexchange carriers, and calls originated from other local exchange carriers. CND for calls originated from a PBX will display the main PBX number only. If the caller's number is a multi-party line, or is blocked, the number will not be displayed.

Telephone numbers transmitted via CND may not be sold or given to another party without the caller's consent. Calling number information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. CND customers failing to comply with any of these conditions will have their service terminated.

6. Optional Services and Features (Cont'd)

6.1 CLASS Service (Cont'd)

B. Descriptions of CLASS Features (Cont'd)

5. Calling Number Delivery (CND) (Cont'd)

CND will be provided in connection with single residence and business lines where Telephone Company facilities permit.

6. Calling Number Delivery Blocking (CNDB)

Calling Number Delivery Blocking allows the customer to prevent the delivery of their directory number on a per call basis or per line basis whether or not Calling Number Delivery is subscribed to or available. Per call blocking is provided to all customers without charge and is activated by dialing an activation code (*67 from a touch tone line or 1167 from a rotary line) immediately prior to placing a call. Activation is initiated for one call only.

Per line blocking will automatically block delivery of the calling party's number on all calls. Per line blocking is available upon request, at no charge, to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters, law enforcement agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line Blocking. The calling number will not be transmitted from a line equipped with this feature.

CNDB is not provided on calls initiated from Payphone Service.

7. Calling Name Delivery (CNAM) - Allows customer to receive the calling name on incoming calls. The name is delivered to the called party's CPE in the interval between the first and second ring. Calling names will not be displayed if the call originates from an area that does not have the appropriate network signaling connections. This may exclude calls made from most cellular phones,

7. Calling Name Delivery (CNAM) (Cont'd)

calls made through some interexchange carriers, and calls originated from other local exchange carriers. If the caller is calling from a multi-party line, or is blocked, the name will not be displayed.

CNAM will be provided in connection with single residence and business lines where Telephone Company facilities permit.

8. Calling Name Delivery Blocking (CNAB) - Allows the customer to prevent the delivery of their name on a per call basis or per line basis whether or not Calling Name Delivery is subscribed to or available. Per call blocking is provided to all customers without charge and is activated by dialing an activation code (*67 from a touch tone line or 1167 from a rotary line) immediately prior to placing a call. Activation is initiated for one call only.

Per line blocking will automatically block delivery of the calling party's name on all calls. Per line blocking is available upon request, at no charge, to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters, law enforcement agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line Blocking. The calling name will not be transmitted from a line equipped with this feature.

CNAB is not provided on calls initiated from Payphone Service.

9. Calling Party Identity (CPI) - Allows a customer to combine Calling Name Delivery and Calling Number Delivery together at a cost savings over subscribing to the individual features. The combined features work the same as if subscribed to separately. See individual descriptions for specifics.
10. Anonymous Call Rejection (ACR) - Allows customer to reject calls for which call name/number has been intentionally blocked. Rejected calls are sent to a recording. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections. This feature is available only where switching equipment is compatible.

OPTIONAL SERVICES AND FEATURES

6. Optional Services and Features (Cont'd)

6.1 CLASS Service (Cont'd)

B. Descriptions of CLASS Features (Cont'd)

11. Selective Call Forwarding (SCF) – Allows customer to have certain terminating calls forwarded to a designated remote directory number. This activity occurs when a call is received from a directory number which has been indicated on a list of up to 32 numbers. Terminating calls which are from telephone numbers that are not on the list are given the standard terminating treatment. To access menu via touch tone service dial *63; rotary service dial 1163. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.
12. Selective Call Rejections (SCR) – Allows customer to define a list of up to 32 calling directory numbers to be screened. Any calling numbers on this list are routed to announcements and rejected. All other calls are treated normally. To access menu via touch tone service dial *60; rotary service dial 1160. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.
13. Call Waiting Caller ID – Provides the customer with the “Calling Party Identity” of a caller attempting to reach the customer while the customer is on another call. This service requires the customer to also have Call Waiting and Calling Party Identity to operate.
14. Selective Call Acceptance (SCA) – Allows customers to define a list of up to 32 directory numbers from which calls will be accepted. Any calling numbers that are not on that list are routed to a recording and rejected. To access menu via Touch Tone dial *64; rotary service dial 1164. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.
15. Distinctive Ringing Call Waiting (DR/CW) – Allows customer to define a list of up to 32 calling directory numbers that will be signaled by a distinctive ring or call waiting tone (short-long-short). Any calling numbers not on that list will be signaled by the normal ring. To access menu via Touch tone dial *61, rotary code 1161. This feature is only compatible with calls originating in and terminating to a network equipped with the appropriate signaling connections.

6.3 Basic Custom Calling Service (Cont'd)

MISSOURI
Public Service Commission

B. Descriptions of Basic Features (Cont'd)

2. Call Waiting (CWT) - Alerts a subscriber who is on an established call that a third party is trying to call. The called party may either ignore the waiting call or answer the call by a) terminating the existing call or by going on hook, waiting for a ring and answering the call; or b) putting the established call on hold and subsequently alternating between the two parties.
3. Cancel Call Waiting (CCW) - Allows customer to prevent call waiting tones from being applied to the line on a per call basis. Incoming calls to the busy line will receive a busy tone. Activation code touch-tone 70#, rotary dial 70 then wait 4 seconds. After dialing the activation code and hearing special dial tone proceed with normal dialing. CCW will be deactivated when the call is terminated.
4. Three-Way Calling (3WC) - Allows the customer to form a three-way conference with two other parties. The feature is activated by flashing the hookswitch during the normal connection, receiving special dial tone, and dialing the third party. After connection is established with the third party a hookswitch flash connects all three parties together. The originating customer must remain on the line to keep the conference established.
5. Speed Calling 8 Numbers (SSC) - Allows customer to place calls to frequently called local or long distance numbers by dialing one digit code (2-9) followed by a # for touch tone customers. Rotary customers dial code (2-9) and wait 4 seconds.
6. Speed Calling 30 Numbers (LSC) - Allows customer to place calls to frequently called local or long distance numbers by dialing two digit code (20-49) followed by # for touch tone customers. Rotary customers dial code (20-49) and wait 4 seconds. The combination of SSC and LSC is not available.

6.3 Basic Custom Calling Service (Cont'd)

MISSOURI
Public Service Commission

B. Descriptions of Basic Features (Cont'd)

7. Automatic Line (AL) - Provides an automatic connection between a calling station that goes off hook and a preassigned directory number.
8. Warm Line (WL) - Provides an automatic connection between a calling station that goes off hook and remains off hook for 30 seconds and a preassigned directory number. This allows the line to be used to make outgoing calls to other number when desired.
9. Stop Hunt (SH) - Gives customer option to cancel trunk hunt on an as needed basis and return busy tone to caller.
10. Single Party Line Revertive Ring (SLR) - Allows customer the option to dial their own telephone number and hang up which will cause all extensions to ring. The intended party can pick up any ringing extension and converse.
11. Teen Service (TEEN) - Allows two directory numbers to be assigned to a single-party line. Each directory number is assigned a unique ringing pattern so that the nature of the call can be determined. Subscribers who also have the Call Waiting feature assigned to their line receive distinctive Call Waiting tones for each directory number. Subscribers who also have Call Forwarding assigned to their line have two options: a) both telephones can be forwarded to the same directory number when Call Forward is activated or, b) only the main or master number can be forwarded when Call Forward is activated.
12. Call Forward Remote Access (CFRA) - Allows customer to activate or deactivate the call forward feature from a remote location by dialing a dedicated base directory number, their own directory number, followed by a Personal Identification Number (PIN), and activation/deactivation codes followed by the forwarded to number if activating. Activation code 72#, deactivation code 73#. This feature requires touch-tone service at the remote station.

6.3 Basic Custom Calling Service (Cont'd)

MISSOURI
Public Service Commission

B. Descriptions of Basic Features (Cont'd)

13. Call Forward Busy (CFB) - Allows customer to program the base phone to be forwarded only when a busy condition is encountered. The forwarded to number can be changed as often as necessary by dialing the access code which will be followed by a confirmation code after which the forward to directory number is entered. If the forward to directory number is a toll call, the base phone will incur toll charge. Activation *90, deactivation code *91. Rotary customer activation code 1190, deactivation code 1191.
14. Call Forward No Answer (CFNA) - Allows customer to program the base phone to be forwarded after a specified number of rings. The forwarded to number can be changed as often as necessary by dialing the access code which will be followed by a confirmation code after which the desired number of rings before forwarding occurs (2-9) is entered and followed by the forward to directory number. If the forward to directory number is a toll call, the base phone will incur toll charge. Activation code *92, Deactivation code *93, Rotary customers activation code 1192, deactivation code 1193.
15. Call Transfer (UTF) - Allows users to transfer a call to another directory number and then drop out of the call, leaving the other two parties connected. A subscriber must have Three Way Calling (3WC) and Call Transfer (UTF) station options to use this feature. This feature is activated by depressing the hookswitch for about one second which places the existing call on hold and returns dial tone to the subscriber. The subscriber then dials the directory number of the person to whom the call is being transferred. When the third party answers, the subscriber can talk privately before connecting the other call if desired. If not, the subscriber can hang up and the calls will be connected. Any chargeable (long distance) calls originated by the subscriber for the transfer will be billed to the subscriber even if the subscriber drops out of the call.

B. Descriptions of Basic Features (Cont'd)

16. Remote Call Forward (RCF) - Allows an assigned telephone number to be forwarded full time to another number. This forwarding is performed in the central office and is constant. Programming for Remote Call Forwarding is performed by the Company at the request of the customer. Calls forwarded to a toll location will be billed to the remote call forwarding customer.
- a. Remote Call Forwarding service is not offered where the terminating station is a coin telephone.
 - b. The Telephone Company will not provide identification of the originating telephone number to the Remote Call Forwarding customer.
 - c. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
 - d. Remote Call Forwarding service is not represented as suitable for satisfactory transmission of data.
 - e. Remote Call Forwarding service is available when used in connection with Local Exchange Service and interstate or intrastate Long Distance Message Telecommunications Service, interstate or intrastate 800 Service.
 - f. Remote Call Forwarding service is provided on the condition that the customer subscribe to sufficient facilities to adequately handle calls to the Remote Call Forwarding number without interfering with or impairing any services offered by the Telephone Company.
 - g. Directory Listings

One listing covering the exchange in which the call forwarding Central Office is located is provided without charge. Additional Directory Listings may be obtained under rates outlined in Section 6.6 of this Tariff.

6.4 Call Manager Features

A. General

Call Manager features are based on records stored in a database and controlled by the subscriber. These features allow subscribers to manage outgoing 0+ and 1+ calls using a variety of methods that incorporate the use of a Personal Identification Number (PIN).

B. Description of Features

1. Personal Identification Number (PIN)

- a. PIN's are four digit codes that can be changed by a subscriber by dialing an access code. All customers who subscribe to Call Manager Features are initially assigned a PIN of 0000, which they can change using their telephone keypad and can be changed at anytime. Many of the Call Management features require the use of a PIN which is entered by the subscriber at the appropriate time in the call sequence using the touch-tone pad. All new subscriber PINs will be set to 0000 until changed by the subscriber.
- b. To change the PIN, the subscriber dials a number of the form:
*97 AAAA NNNN where *97 is the code to specify a PIN change. AAAA is the subscriber's old (current) PIN, and NNNN is the new PIN.

In order to change the PIN, the subscriber must dial the same digits twice within 30 seconds. If the second call is not the same as the first call, or if the current PIN (AAAA) is not correct, the subscriber will receive a failure indication, and the operation will be terminated.

2. Super Speed Calling

- a. Four digit Super Speed Calling allows names to be dialed from the keypad instead of a number on a speed call list.

Allows the subscriber to store a four digit speed dialing list in a database that they have access to change, add, or delete numbers from. The subscriber accesses the list by dialing: #NNNN. The subscriber can associate the letters on the keypad with frequently called numbers. For example, the subscriber can dial #JOHN and the database will translate the number dialed into the seven or ten digit number stored in the database and automatically dial the number.

6.4 Call Manager Features (Cont'd)

MISSOURI
Public Service Commission

B. Description of Features (Cont'd)

2. Super Speed Calling (Cont'd)

b. Programming Super Speed Numbers

Numbers are added to the subscribers list by placing two programming calls within 30 seconds. The first programming call has the format:
*95 AAAA NNNN. *95 indicates the Super Speed programming feature. AAAA is the Subscribers PIN, and NNNN is the four digit code to be programmed. Within 30 seconds the second programming call must be made in the following format: *96 XXXXXXXXXXXX. *96 indicates the second Speed programming call, and the XXXXXXXXXXXX is the number to be entered into the database and to be dialed anytime the subscriber dials the previously specified four digit code. The number to be called must contain from seven to fourteen digits

c. Removing Super Speed Numbers

Numbers are removed from the subscribers list by placing two programming calls within 30 seconds. The first programming calls has the format:
*95 AAAA NNNN. *95 indicates the Super Speed programming feature. AAAA is the Subscribers PIN, and NNNN is the four digit code to be deleted. Within 30 seconds the second programming call must be made in the following format: *96 0. This removes the four digit code as well as the number associated with that code from the subscribers speed call list.

d. Removing a Super Speed Call List

A Super Speed Call list can be deleted in its entirety by placing two programming calls within 30 seconds. The first programming call has the format: *95 AAAA 0000. *95 indicates the Super Speed programming feature. AAAA is the Subscribers PIN, and 0000 indicates that the list is to be deleted. Within 30 seconds the second programming call must be made in the following format: *96 1. This will remove the subscriber's entire speed call list.

6. Optional Services and Features (Cont'd)

6.4 Call Manager Features (Cont'd)

B. Description of Features (Cont'd)

3. 900 Call Restriction

900 Call Restriction allows subscribers to setup a group 900 NXX codes or all 900 NXX codes to block or allow. This allows subscriber control over access to 900 phone numbers. Control can be implemented in the following ways:

- a. Disallow access to all 900 NXX's.*
- b. Disallow access to all 900 numbers except for a specifically allowed list of NXX's.
- c. Allow access to all 900 NXX's.
- d. Allow access to all 900 numbers except for a specifically disallowed list of NXX's.

If a subscriber dials a 900 number that is not allowed, the subscriber is notified by a recording that the number is unavailable.

(1) Setting the Restriction

To set the restrictions, the subscriber dials a number of the form:
*94 AAAA NXX C where *94 is the code to access the feature, AAAA is the subscriber's four digit PIN, NXX is the affected NXX, and C is a function code.

C = 2 to block the specified NXX or
C = 8 to allow the specified NXX

(2) Erase list of NXX codes.

If a subscriber wishes to erase their list of NXX codes and block all 900 calls they should dial *94 AAAA 000 2. If a subscriber wishes to erase their list of NXX code and allow all 900 calls they should dial *94 AAAA 000 8. AAAA represents the subscribers four digit PIN.

*900 Blocking to all 900 NXX's is available to all subscribers free of charge if requested.

MO. PUBLIC SERVICE COMM

4. Bulk Toll Blocking

Bulk Toll Blocking allows the subscriber to activate and deactivate toll restriction by dialing a special code, which includes their PIN to enable or disable 1+, 0+, and 0- calling.

a. Setting the Toll Restrictions

To set or alter the restrictions, the subscriber dials a number of the form:
*94 AAAA 000 C. *94 is the code to access the restriction programming feature. AAAA is the subscriber's PIN, 000 is fill and C is the function code.

C=3 to disable toll calling
C=7 to enable toll calling

5. Per Call Toll Blocking

Per Call Toll Blocking provides the capability to block all 1+, 0+ and 0- calls unless the subscriber's PIN is entered when making the call.

To use Per Call Toll blocking the subscriber dials: #AAAA where AAAA is the subscriber's PIN. If the correct PIN is dialed, a second dial tone is returned and the subscriber will then dial the toll call normally. If the subscriber dials an incorrect PIN, a failure indication is returned.

6. Least Cost Routing

Least Cost Routing allows subscribers to request a different carrier for four time periods for week-days and one carrier for Saturday and one carrier for Sunday to obtain the lowest cost for inter-LATA toll services. It allows subscriber to control their interlata carrier selection based on the time of day. Each customer who subscribes to this service will have a Least Cost Routing Table which determines the carrier to be used for each of four daily time periods, as well as an entry for Saturday and an entry for Sunday. Management of the Least Cost Routing Table will be done by the Telephone Company.* Subscribers to the Least Cost Routing feature automatically have access to 900 Blocking and Bulk One Plus Blocking.

* Customer activity charges apply.

B. Description of Features (Cont'd)

4. Bulk One Plus Blocking

Bulk One Plus Blocking allows the subscriber to activate and deactivate toll restriction by dialing a special code, which includes their PIN to enable or disable one plus calling.

a. Setting the One Plus Restrictions

To set or alter the restrictions, the subscriber dials a number of the form:
*94 AAAA 000 C. *94 is the code to access the restriction programming feature. AAAA is the subscriber's PIN, 000 is fill and C is the function code.

C=3 to disable one plus calling
C=7 to enable one plus calling

5. Per Call One Plus Blocking

Per Call One Plus Blocking provides the capability to block all 1+ calls unless the subscriber's PIN is entered when making the call.

To use Per Call One Plus blocking the subscriber dials: #AAAA where AAAA is the subscriber's PIN. If the correct PIN is dialed, a second dial tone is returned and the subscriber will then dial the one plus call normally. If the subscriber dials an incorrect PIN, a failure indication is returned.

MISSOURI
Public Service Commission

A. Published Listings

A primary listing, which may include the names, address and telephone number of the individuals, organization, firm or corporation subscribing to Local Exchange Service will be furnished at no charge.

1. Listings will be limited to such information as is necessary for proper identification.
2. The length of a listing may be limited by the use of abbreviations where the clarity of the listing and the identification of the customer will not be impaired.
3. The Company may refuse to insert any listing which in its judgment does not facilitate the use of the directory.
4. Only one number will be listed in the telephone company directory at no charge for each Multi-Line Hunt group. Unless otherwise directed by the customer and agreed to by the company, the pilot number in the hunt group will be the number listed.

B. Non-Published Listings

Non-Published service is the omission of a customer's listing from both the telephone directory and directory assistance records. Non-published listings are available upon request and subject to the applicable rate in 6.6 F following.

C. Non-List Listings

Non-list service is the omission of a customer's listing from the telephone directory. The customer's listing may be obtained from the directory assistance operator. Non-list service is subject to the applicable rate in 6.6 F following.

Effective: ~~July 1, 1997~~
JUL 1 1997

OPTIONAL SERVICES AND FEATURES

6. Optional Services and Features(Cont')

6.12 Service Bundle Discounts

A. Service Bundle Discounts are provided to subscribers when they subscribe to a unique bundle of services contained in this tariff. The subscriber must subscribe to all services contained in the bundle in order to receive any of the discount credits listed below. The bundles combine Local Exchange Service (as defined elsewhere in this tariff) with popular CLASS Service features (section 6.1 of this tariff) and Basic Custom Calling Service features (section 6.3 of this tariff) at a discounted rate. Service Bundle Discounts will be provided to Residential and Business customers as set forth below. The tariffed rate is a credit, which will reduce the full tariff rate for each service item and result in a reduced dollar amount on the subscriber's monthly bill.

B. Residential Bundle

1. The Residential Bundle consists of: Local Exchange Service (one access line), Calling Party Identity, Call Waiting Caller ID, Call Waiting, Three-Way Calling and Call Forward No Answer.
2. The service discount credits are as follows:

<u>Service</u>	<u>Monthly Credit*</u>	<u>Tariff Reference</u>
Local Exchange Service (residence)	\$0.00	4.7A
Calling Party Identity	\$2.00	6.1C9
Call Waiting Caller ID	\$0.75	6.1C13
Call Waiting	\$0.25	6.3C2
Three-Way Calling	\$0.25	6.3C4
Call Forward No Answer	<u>\$0.25</u>	6.3C14
Total Monthly Credit	\$3.50

OPTIONAL SERVICES AND FEATURES

KLD Unlimited Call Plan Bundle – Terms & Conditions

The Residential Select Bundle KLD Unlimited Long Distance Call Plan requires the purchase of a Kingdom Select Residential Bundle and the provisioning of Kingdom Long Distance Service to one residential phone line with direct dialing. It is intended for personal, residential voice calls within the continental United States of America a/k/a the “lower 48 states”. It cannot be used for toll access to the Internet, party or chat lines, adult entertainment lines, voicemail/information service access or for business purposes such as telemarketing, call centers, auto-dialing, commercial or broadcast facsimile, conference lines, directory and operator assistance, multi-party conference calls, or other non-single path person-to-person conversation or voice messages.

Additionally, usage not consistent with typical domestic residential voice usage occurs when monthly minutes of use total more than 115% of the national average minutes of use for United States residential telephone service. Service inconsistent with residential voice calling or that violates any of the guidelines for this plan may be suspended, restricted or canceled. Violation of the plan may result in conversion to the Kingdom Basic long distance plan. Plan participation is at the discretion of the Cooperative. Rates are subject to change.

SPECIAL CONSTRUCTION

RECEIVED

7. Special Construction

APR 3 1997

7.1 Excess Construction Charge

MISSOURI
Public Service Commission

1. Where no facilities are in place, the Company will build one-third of a mile of circuits to any rural customer for business or residence use without excess construction charges.
2. For all distance over one-third mile an excess construction charge based on the time and materials used for construction will be charged.
3. The first 1000 feet of circuit on private property for local exchange service will be provided by the Company. Any distance beyond the first 1000 feet will be charged to the customer at time (loaded labor rate) and materials used for construction. An advance payment of the reasonable cost of construction will be required. The customer shall furnish suitable right-of-way to the Company.
4. For mobile homes, trailers, construction sheds, and other nonpermanent buildings, the customer may be required to pay in advance one year's rental in addition to any excess construction charge. This credit may not be used to reduce the monthly bill for toll or taxes, and no portion will be refunded to the customer if service is discontinued before credit is entirely used.
5. Ownership of all facilities constructed under this section up to the demarcation point will remain with the telephone company.

7.2 Special Construction

When a special type of construction is desired by a customer, as when underground service connections are desired in places where aerial drop wires are regularly used to reach customer's premises, an additional charge is made. This charge is equal to the difference between the estimated cost of the special type of construction and the average cost of standard construction.

Title to all facilities constructed and paid for wholly or in part by the subscriber is vested in the Company.

7.3 Temporary Service:

Where plant construction is required to provide exchange, extension line, etc., service, temporary in character, the Company may require the applicant to pay charges based upon the costs involved or to contract for service beyond the initial period or both.

SERVICE RESTRICTIONS

APR 3 1997

MISSOURI
Public Service Commission

8. Service Restrictions

8.1 900 Service Access Restrictions

A. General

1. 900 Service Access Restriction is a central office service furnished to customers, upon request, which allows for access restrictions to be placed on the customer's local exchange telephone service line so that calls to telephone numbers preceded by the 900 NPA will not be completed. When a 900 NPA telephone number is dialed, the call will be diverted to a Company-provided intercept announcement.
2. This restriction service enables the customer to prohibit the dialing of calls to 1+900-XXX-XXXX. Calls which are placed using any alternative dialing pattern cannot be restricted.

B. Rate Applications

1. Customer Activity Charges as outlined in Section 5 will be applied to customers for establishing this service at any time after 60 days after installation.
2. No monthly rate will apply for this service.

8.2 976 Service Access Restriction

A. General

1. 976 Service Access Restriction is a central office service furnished to customers, upon request, which allows for access restrictions to be placed on the customer's local exchange telephone service line so that calls to telephone numbers preceded by the 976 NXX will not be completed. When a 976 NXX telephone number is dialed, the call will be diverted to a Company-provided intercept announcement.

1. Customer Activity Charges as outlined in Section 5 will be applied for establishing this service.
2. The rate for this service will be charged on a monthly basis:

700 Service Access Restriction

\$2.00

8.4 Toll Access Restriction

- A. Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network. Four options are available to the customer:

1. Restriction of 1+ calls and Billed Number Screening
2. Restriction of 1+ calls and 0+ and 0- (operator handled) calls and Billed Number Screening
3. Restriction of 0+ and 0- (operator handled) calls and Billed Number Screening
4. Billed Number Screening only

- B. Restriction of 0+ and 0- operator handled calls prevents the customer from dialing a telephone operator for any purpose including for emergency or telephone assistance purposes. The Company shall not be liable to the customer or any third party for any and all claims, losses or damages caused by the restriction to any toll service.

- C. Billed Number Screening allows the customer to identify to the Telephone Company that they will not accept any Third-Number Billed and/or Collect calls for billing to their telephone number. The Company places information regarding this screening restriction into a data base that is normally accessed prior to such calls being completed that will refuse to validate the completion of such a call to the indicated number. Billed Number Screening can be ordered to screen third-number billed call, collect calls, or both.

- D. Customer Activity Charges as outlined in Section 5 will apply to the establishment of this service.

E. Rates

The rate for this service will be charged on a monthly basis.

INTRAEXCHANGE PRIVATE LINE SERVICES

APR 3 1997

10. Intraexchange Private Line Services

10.1 General Description

MISSOURI
Public Service Commission

Intraexchange Private Line Services involve the provision of dedicated non-switched facilities of various types between two separate customer locations within the same exchange. The facilities are offered for the use of the customer to provide a communication path or paths between the two locations. Provision of the service is based on the availability of facilities between the two requested locations.

Facilities of the types described in the Company's Private Line Tariff Concurrence and the Digital Link Tariff Concurrence will be made available on an intraexchange basis based on the terms and conditions outlined in those tariff concurrences.

10.2 Rate Structure

- A. Interoffice rate elements are applicable to all serving wire centers.
- B. Application of the rate elements in the Tariff Concurrences referenced above will be as follows for intraexchange private line and digital link services:
 - 1. The Local Channel or Local Distribution Channel rates will apply once at each end of the circuit at the customer premises.
 - 2. Channel Terminal charges apply at each termination of an interoffice channel.
 - 3. The intraLATA interoffice channel rate will be applied if the circuit is routed through the Primary Serving Office and a Serving Office or between two Serving Offices.
 - 4. All rates for conditioning and optional features will apply as outlined in the private line or digital link tariff.
 - 5. Service Charge or Service Activity Charge rates contained within the private line or digital link tariffs will apply.

ACCESS TARIFF CONCURRENCE

12. Access Tariff Concurrence

A. Held For Future Use

(D)

(D)

B. Access Services

Access services are those services which are described in the Access Services Tariff of Oregon Farmers Mutual Telephone Company. These services are offered by the Company to intrastate interexchange customers (ICs) in accordance with the rules and regulations specified in the Access Services Tariff of Oregon Farmers Mutual Telephone Company and approved by the Missouri Public Service Commission, and in any amendments thereto and authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for access service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

C. Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort and after provisions have been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Access Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Access Services Tariff shall not be construed to deemed a representation that all services and service components described therein are available from the Company.

D. Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.
