A. Multi-Element Service Charge Plan

The Multi-Element Service Charge Plan covers any work done at the request of the subscriber.

MISSOURI
Public Service Commission

1. Elements Covered.

This work is broken down into elements as follows:

(a) Service Ordering Charge.

Covers all work associated with creation of a Service Order, including initial interview with subscriber, work done as to application card and other permanent records, typing Service Order, distribution of Service Order copies and completion of records originating from Service Order. Also includes plant assignment work.

(b) Line Connection Charge.

Covers all work involving the telephone line extending from the central office to the demarcation point at the subscriber's premises, subscriber's number CAMA identification, jumper from equipment to line, drop wiring, etc. This would apply to new installations.

(c) Demarcation Point.

The point of connection, provided and maintained by the telephone company, at which the station wiring becomes dedicated to an individual customer's use. For an individual customer dwelling this point of connection will generally be the modular jack incorporated into the customer side of the Network Interface Device (NID). The drop wire and the network protector will continue to be provided by, and remain the property of, the telephone company. The demarcation point is usually the point at which the telephone company wiring connects with the customer's wiring.

LOCAL EXCHANGE SERVICE

Lifeline Service

A. General Regulations

1. Lifeline service is available to qualifying low-income subscribers for single-party residence service.
2. The monthly discount will be the maximum amount allowed by the Missouri Public Service Commission and the Federal Communications Commission; however, this discount will not exceed the sum of the federal subscriber line charge and the recurring charges for voice telephony service. The monthly discount will be the same for Lifeline customers solely subscribing to voice telephony service and for Lifeline customers subscribing to a bundle of services.
3. Lifeline will not be furnished on a Foreign Exchange service.
4. Lifeline service shall not be disconnected for non-payment of toll charges.
5. Toll blocking provides a means of restricting access to the Long Distance Message Telecommunications Network. Toll blocking for the purposes of lifeline service will restrict 1+, 0+ and 0- (operator handled) calls.
 - a. If the customer chooses "toll blocking" the company will not charge a service deposit.
 - b. Toll blocking is offered to Lifeline subscribers at no charge.

LOCAL EXCHANGE SERVICE

Lifeline Service (Cont'd)

B. Eligibility Requirements

1. An applicant must meet all of the criteria established by the Federal Communications Commission (FCC) and the Missouri Public Service Commission (MoPSC) in order to qualify for Lifeline Service or Low-Income Assistance. (T)
| (T)
(D)
2. The customer must sign, under penalty of perjury a document certifying:
 - 1) He/she qualifies as a Lifeline customer under criteria established by the FCC and the MoPSC; (T)
and (D)
 - 2) That he/she will notify the company if he/she no longer qualifies for Lifeline service. (T)
3. The premises at which the residence service is requested must be the applicant's principal place of residence.
4. There is only one telephone line serving the residence premises. The residence premises household (dwelling unit) shall consist of that portion of an individual house or building or one flat or apartment occupied by a single family or individuals functioning as one domestic establishment.
5. Qualified individuals will receive discounted services under either the Missouri low-income assistance or the disabled assistance program, not both. (N)

C. Missouri Universal Service Fund Disabled Assistance

1. General – A disabled customer, or a dependent of a disabled customer, is a customer who requests or receives local telecommunications service as defined in this tariff, and meets the eligibility requirements under the rules established by the Missouri Public Service Commission. (M)
2. Support Amount – Customers eligible under the established criteria can receive a discount equal to the amount approved by the Missouri Public Service Commission from their bill for local telecommunications service. (M)

RECEIVED

LOCAL EXCHANGE SERVICE TARIFFS

NOV 19 1997

Toll Access Restriction

A. Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network. Three options are available to the customer:

1. Restriction of 1+ calls only.
2. Restriction of 1+ calls and 0+ and 0- (operator handled) calls, except 8XX IN-WATS.
3. Restriction of 1+, 0+, 0- and 8XX IN-WATS where facilities allow.

B. Restriction of 0+ and 0- operator handled calls prevents the customer from dialing a long distance telephone number or telephone operator for any purpose including for emergency or telephone assistance purposes. The Company shall not be liable to the customer or any third party for any and all claims, losses or damages caused by the restriction to any toll service.

C. Customers must apply in writing for the establishment of Toll Access Restriction.

D. The appropriate non-recurring charges will apply to establish service.

E. Rates

The rate for this service will be charged on a monthly basis.

Toll Access Restriction (any option)

“Missouri Universal Service Fund”

1. Company will place on each retail end-user customer's bill, a surcharge equal to the Missouri Universal Service Fund percentage assessment ordered by the commission.
2. The surcharge will appear as a separate line item detailed as “Missouri Universal Service Fund.”
3. The surcharge percentage will be applied to the total of each customer's charges for intrastate regulated telecommunications services that meet the definition of net jurisdictional revenues at 4 CSR 240-31.010(12).

PAYPHONE SERVICE

RECEIVED

4. Payphone Service

JAN 15 1997

A. General Regulations

1. Payphone Service includes lines to which coin, coinless, or combination of coin/card reader telephones may be attached.
2. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. In the case of one-way service, intercept treatment will be provided.
4. A maximum of one customer-provided instrument may be connected to any one Instrument or CO implemented coin line.
5. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
6. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
7. A Network Interface Device will be installed at a location mutually agreed upon by the Payphone Service Provider and the Company. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
8. One directory will be distributed to the Payphone Service Provider without charge for each payphone business exchange line.
9. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

4. Payphone Service (Cont'd)

A. General Regulations (Cont'd)

MO. PUBLIC SERVICE COMM

10. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
11. The Company shall not be liable for shortages of coins collected and deposited at the subscriber's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Missouri Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule or regulations shall prevail.
12. Off-Premise Extensions are not permitted.
13. For Future Use +
14. The Multiline Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone Instrument and CO Implemented coin lines.

B. Responsibility of the Customer

1. The Customer for the purposes of this tariff is defined as the Payphone Service Provider.
2. The customer shall be responsible for the installation, operation and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible to comply with the requirements set forth in the American With Disabilities Act of 1990.

The customer-provided instrument must be registered in compliance with Part 68 of the FCC's Registration Program. In addition, the customer must comply with the Missouri Public Service Commission's Rules and Regulations regarding the use of customer-provided pay telephones.

Public Service Commission

3. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
4. The customer shall be responsible for obtaining a Certificate of Service Authority (CSA) to provide Payphone Service and for providing proof of said authority prior to installation of service.
5. Customers who elect not to subscribe to Selective Class of Call Screening will be fully responsible for all calls billed to customer's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release customer from paying any such charges. Customer will hold the Telephone Company harmless from and against any liability or loss resulting from all calls billed to customer's exchange access line.
6. Any federal, state, or local taxes on the Customer Owned Pay Telephone or calls made from that phone are the responsibility of the customer.
7. The customer shall not program or cause to be programmed any such telephone used in connection with this service to limit the duration of a local message.

C. Violation of Regulations

1. Upon notification from the Company that the customer-provided equipment or inside wire is causing or is likely to cause harm, the customer shall make such change as is necessary to remove such harm. Failure to make such change will result in the disconnection of service until such change is completed to the satisfaction of the Company.

MISSOURI
Public Service Commission

D. Instrument Implemented Payphone Service

Instrument Implemented Payphone Service is offered for use with a customer provided pay telephone. All attachments of a customer provided instrument to the network must be made pursuant to the rules and regulations set forth in this Tariff and as required by State and Federal commissions.

E. Central Office (CO) Implemented Coin Line

1. Central Office Implemented Coin Line provides coin signaling. It is a line side connection from the local exchange switch to the point of demarcation at the customer premise.
2. Features are additives to the operation of a flat rate access line that provide for CO Implemented coin line service. The Company offers those features that are provided by the functionality of the Company's switches. These include coin supervision, coin control (collect and return of coins, if applicable), and answer supervision. CO implemented coin line features that are implemented by the functionality of an operator service provider, such as coin rating, coin refund, repair referral, and operator call screening, are the responsibility of the Payphone service provider (Customer).
3. CO Implemented Coin Line features, including coin line signaling, coin collect and return (where applicable) and answer supervision, are provided by the Telephone Company per the technology available from the Company's facilities. It shall be the responsibility of the CO Implemented Coin Line payphone owner to assure technical and operational compatibility with the coin line features offered by the Telephone Company.

PAYPHONE SERVICE

4. Payphone Service (Cont'd)

JAN 15 1997

F. Features and Functions

**MISSOURI
Public Service Commission**

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Coin Line.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect coin(s) from or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

OPTIONAL SERVICES AND FEATURES5. Optional Services and Features

RECEIVED

A. Digital Channel Service (DCS)

SEP 15 1999

1. General

MO. PUBLIC SERVICE COMMISSION

- a. Digital Channel Service (DCS) is an optional packaged service arrangement that is used in conjunction with a customer's business trunks. It packages these trunks with a T-1 transmission facility.
- b. DCS facilities provide an intraexchange connection between a customer's premises and the local serving central office. DCS is based on DS1/DS0 technology, also known as T1 service. This service arrangement uses the DS1/DS0 architecture to provide a 1.544 Mbps connection. The customer is then provided the capability to transmit voice and/or data over channels of that digital facility. Each DS1 facility provides up to 24 DSO channels.

2. DCS Packaging

- a. DCS service arrangement connects a Telephone Company central office switch to Customer Premises Equipment (CPE). Depending on the application, that CPE might be a PBX, a router, a multiplexer, etc. Each DCS provides up to 24 channels.
- b. Digital Channel Service packages the following components:

Digital Facility – includes the DS1 facility.

Exchange Services (per channel) – defines how each channel is to be used.

3. Technical Specifications

- a. Transmission Specifications – this facility is based on a 1.544 Mbps DS1 carrier (T1 facility).
- b. Customer Premise Equipment and Facilities – compatible customer premise equipment is required for DCS. The company shall not be responsible if changes in any of the equipment, operations, or procedures of the Telephone Company used in the provisioning of DCS render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

5. Optional Services and Features (Continued)

RECEIVED

A. Digital Channel Service (DCS) (Continued)

SEP 15 1999

4. Regulations and Conditions

MO. PUBLIC SERVICE COMMISSION

- a. Unless specifically exempted, DCS shall be subject to all general regulations applicable to the provision of service by the Company as stated in this tariff.
- b. DCS is furnished subject to central office switching capacity, capability, as well as the availability and suitability of outside plant facilities.
- c. Payment for service:
 1. The minimum charge period for services provided under this tariff is one year.
 2. Suspension of service is not allowed during the minimum charge period. Disconnecting prior to the completion of the minimum period will result in the balance of the amount due for the period being payable at the time of disconnection.
- d. At the Company's discretion and subject to the Commission rules and regulations, nonrecurring charges may be reduced or waived during promotional campaigns (minimum service periods will apply). All promotions will be subject to prior notification and approval by the Missouri PSC.
- e. Directory Listings – One directory listing is provided without charge for each channel activated. Additional listings may be provided as specified elsewhere in this tariff.
- f. Customer Premises Equipment
 1. This tariff does not include terminal equipment on the customer's premises.
 2. The customer is responsible for providing the power required for any customer premises equipment connected to DCS.
- g. End User Common Line (EUCL) Charges – DCS is subject to Federal Communications Commission (FCC) End User Common Line (EUCL) charges under the rates and application rules specified by the FCC.

MO. PUBLIC SERVICE COMMISSION

4. Regulations and Conditions (Continued)

- h. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure or malfunctions of DCS or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.
- i. The following services will not be provided within the DCS arrangement:
 - 1. Access lines
 - 2. Feature groups A, B, C, or D
 - 3. Other private line/access services and facilities unless specified herein.
- j. Customers are required to provide muxing/demuxing at the customer premises.

5. Rates and Charges

a. Digital Channel Service

	<u>Service Facility Establishment</u>	<u>Monthly Charge</u>
Digital Access Facility (per DCS facility) (includes 1 st mile of the facility)	\$350.00	\$150.00
Distance Extension Charge (per repeater) (as required, approximately 1 per each mile from the central office)	N/C	\$30.00

b. Channel Charges

For each channel activated, a channel charge will be applied.

	<u>Non-Recurring Charge</u>
Per channel activated	\$12.00
Applicable DID & PBX trunk charges along with Nonrecurring service connection charges found in this tariff also apply.

c. Subsequent Channel Additions and Changes

When channels are ordered or modified after the initial installation of DCS, the nonrecurring Channel Addition and Change charge reflected below is applied in addition to the normal charges reflected in this tariff. Only one Channel Addition and Change charge will apply when multiple channels are added or changed on a DCS facility as part of the same service order.

	Non-Recurring Charge
Channel Additions and Changes (per DCS facility)	\$35.00
Channel Activation (per channel added)	\$12.00

B. Direct Inward Dialing (DID) Service

1. General

- a. Direct Inward Dialing Service to customer premises located switching systems is furnished subject to the availability of telephone numbers.
- b. The service includes the central office switching equipment necessary for direct inward dialing from the exchange and long distance message telecommunications network directly to terminal equipment associated with customer premises located switching systems.
- c. The service must be provided on all lines in a trunk or network access line group arranged for inward service. Routing of calls to selected numbers within the direct inward dialing number group over a separate trunk or network access line group is not contemplated.
- d. Operational characteristics of interface signal between the Company-provided connecting arrangements and the customer-provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service

Custom Local Area Signaling Services (CLASS) are a set of advanced call management features which will only be offered on one-party service and will not be activated on certain FX lines, and Payphone Services. CLASS features may be offered in conjunction with Enhanced Business Service (EBS) and consist of one or more of the following features:

1. Feature Descriptions:

a. Automatic Callback

Automatic callback permits the subscriber to place a call to the telephone number associated with the most recent incoming call whether or not the call was answered or the telephone number is known by the subscriber. If the called line is available, the call is immediately completed. If the called line is not available, a queuing process, which may last up to thirty minutes, takes place. When both lines are available, the calling subscriber is notified via a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed.

b. Automatic Recall

Automatic Recall allows the subscriber to automatically redial the last number dialed from the subscriber's telephone regardless of the completion status of the last number dialed. If the called line is available, the call will be placed immediately. If the redialed line is busy, the network will queue the request for thirty minutes and process the call when both the called and calling party lines are idle. When the call can be completed, a distinctive ring will be provided to the caller's line to alert the subscriber that the requested callback is ready. When the subscriber picks up the telephone, the call is automatically placed.

This feature cannot be activated for calls originating from a line that is forwarded.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

1. Feature Descriptions: (Cont'd)

c. Calling Number Delivery

Calling Number Delivery (also known as "Caller ID") allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number of an incoming call before answering. During the time that the incoming call is placed, the calling number is forwarded from the central office to a compatible customer provided Customer Premises Equipment (CPE) Display Unit associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

The calling number is also not available when incoming calls have been handled by an operator or charged to credit cards. Number delivery for calls originating from a PBX will display the main PBX number only. If the caller's number is not part of the CLASS network, or is blocked, the number will not be displayed.

Subscription to Calling number delivery on EBS access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line basis.

Telephone numbers transmitted via Calling Number Delivery may not be sold or given to another party without the caller's consent. Calling number Delivery information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

1. Feature Descriptions: (Cont'd)

c. Calling Number Delivery (Cont'd)

the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. Calling Number Delivery customers failing to comply with any of these conditions will have their service terminated.

d. Calling Number/Name Delivery Blocking

Calling Number/Name Delivery Blocking allows the subscriber to prevent the delivery of the subscriber's directory number/name on a per call basis (per call block) or per line basis (per line block.).

Per call block will block the delivery of the subscriber's number/name for one call only and may be activated by dialing an activation code (*67 from a Touch-Tone telephone or 1167 from a rotary telephone) immediately prior to placing a call. The activation code will initiate per call block, which is available at no charge.

If the calling party activates blocking, the directory number/name will not be transmitted across the line. Instead, Calling Number/Name Delivery customers will receive an anonymous indicator. This anonymous indicator notifies the Calling Number/Name Delivery customer that the calling party has elected to block the delivery of the telephone number/name.

Per line block will automatically block delivery of the subscriber's telephone number/name on all calls. Line blocking for the delivery of the calling number/name is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

1. Feature Descriptions: (Cont'd)

d. Calling Number/Name Delivery Blocking (Cont'd)

employees/volunteers, where an executive officer of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence enforcement agencies and (b) federal, state and local law enforcement agencies. The calling number/name will not be transmitted from a line equipped with this capability.

The blocking of the directory number/name will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services.

e. Customer Originating Trace

Customer Originating Trace enables the customer to initiate an automatic trace of the incoming call received, regardless of the time lapse since that call, providing there have been no intervening outgoing calls. To initiate the trace, the customer must dial an activation code, then dial a "1". Upon activation by the customer, the network automatically sends a message to the Telephone Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local telephone company business office for further action. The customer is not provided the traced number.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature (described in other sections of this tariff) is activated prior to activating the trace, the Customer Originated Trace feature will not record the correct number.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

1. Feature Descriptions: (Cont'd)

e. Customer Originated Trace (Cont'd)

Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A separate charge applied to each successful activation of this feature.

f. Distinctive Ringing

Distinctive Ringing provides a distinctive ringing pattern to the subscribing customer for specific telephone numbers. The customer creates a screening list of telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

If the called customer subscribes to Call Waiting (described in other sections of this tariff) and the call arrives while the line is busy, the Call Waiting tone has the same distinctive patterns. For calls from a dial tone line with multi-line hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

g. Selective Call Acceptance

Selective call acceptance provides the customer the ability to select (a maximum of 12) customer telephone numbers from which calls are to be received. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the CLASS Network. When a call is placed to the customer's number from a number on the screening list, the call is completed. When a call is placed to the customer's number that is not on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

1. Feature Descriptions: (Cont'd)

g. Selective Call Acceptance (Cont'd)

For calls from a line within multi-line hunting, the call is completed only when the main telephone number has been entered in the screening list.

h. Selective Call Forwarding

Selective Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of numbers is created by the customer and placed in the network memory via an interactive dialing sequence. This list can only be created from CLASS serving area telephone numbers. Only calls from those telephone numbers on the screening list may be forwarded to the designated telephone number.

For calls from a line within multi-line hunting the call is selectively forwarded only when the main telephone has been entered in the screening list.

i. Selective Call Rejection

Selective Call Rejection provides the customer the ability to prevent incoming calls from certain telephone numbers. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the CLASS network. When a call is placed to the customer's number from a number on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

For calls from a line within multi-line hunting the call is blocked only when the main telephone number has been entered in the screening list.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

2. General Regulations:

- a. CLASS features can be provided on a stand alone basis or may be enhanced by use with Custom Calling service features as described in other sections of this tariff.
- b. CLASS features are provided from specially equipped Telephone Company Central Offices and enable customers to access various features by dialing a specific code on either a rotary-dial or Touch-Tone calling basis.
- c. The customer of record will be responsible for all rates and charges associated with the CLASS features as described in Rates and Charges. The customer of record will be charged for all features activated on his/her service and charged the applicable monthly subscription rate for each line on which a CLASS feature is provided.
- d. CLASS features are available to customers who have rotary or Touch-Tone service for calls within the CLASS Calling Service area. Customers with rotary service can access CLASS features by dialing "11" instead of "*".
- e. A CLASS customer may employ available CLASS features only under the following conditions:
 - When both the CLASS customer and the other party involved in the call are served from the same central office, even if the other party does not subscribe to a CLASS feature.
 - When both the CLASS customer and the other party involved in the call are served from different central offices which are linked by facilities that can handle the delivery of the calling number, even if the other party does not subscribe to CLASS.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

2. General Regulations (Cont'd)

f. Customer Originated Trace will be billed the activation charge shown in the Rates and Charges section only when the attempt to trace and record the calling telephone number is successful. The results of a successful trace will only be provided to legal authorities with proper authorization. The Telephone Company will not be liable for damages if, for any reason, an attempt is not successful.

g. The liability of the Telephone Company is as specified in the General Rules and Regulations section of this tariff. In addition to the provisions of the General Exchange Tariff, the calling party of customer releases and holds the Company harmless from any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a calling number delivery of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.

h. CLASS features will only be offered with one-party service, compatible PBX equipment and EBS. CLASS features cannot be activated for certain FX lines, and Payphone Services.

Calling Number Delivery is the only feature currently available on PBX equipment.

Selective Call Acceptance, Selective Call Forwarding, Selective Call Rejection and Distinctive Ringing are not available on EBS lines.

i. CLASS features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer CLASS only where technologically feasible.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

3. Nonchargeable CLASS Features:

- a. Calling Number Delivery Blocking - Per Call: temporarily allows the subscriber, when placing outgoing calls, to label his or her telephone number as private, thus restricting its availability to the called party. This feature is accessed by dialing (*67), or 1167 for rotary phones, before dialing the phone number of the called party.
- b. Called Number Delivery Blocking - Per Line: allows the subscriber, when placing outgoing calls, to permanently label his or her telephone number as private, thus restricting its availability to the called party. This service is available only to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters, law enforcement agencies and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line Blocking.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

C. CLASS Service (Cont'd)

4. Rates and Charges

The following CLASS features are available at the following monthly rates:

	<u>Rate</u>	
a. Automatic Callback	\$ 2.50 per month	
b. Automatic Recall	\$ 2.50 per month	
c. Calling Number Delivery	N/C	(R)
d. Customer Originating Trace Per Activation	\$ 5.00 per activation	
e. Distinctive Ringing	\$ 2.50 per month	
f. Selective Call Acceptance	\$ 2.50 per month	
g. Selective Call Forwarding	\$ 2.50 per month	
h. Selective Call Rejection	\$ 2.50 per month	

In addition to the charges above, a Service Order Charge as outlined above in this section of the tariff will apply to the establishment of class services. A non-recurring charge of \$5.00, will apply to the activation or rearrangement of one or more features.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services

1. General

Enhanced Business Services (EBS) is a service offering enhanced features on Business One Party Touch Tone Local Exchange Service. The service is limited to customers with a minimum of two access lines.

2. Conditions

a. Enhanced Business Service is offered as follows:

EBS is offered to customers with 2 - 75 lines.

b. Customer premise equipment must be compatible with the services and equipment provided by the Company.

c. The minimum charge for Enhanced Business Services shall be one month.

d. Touch tone service is necessary in order to have the Enhanced Business Services features. Touch tone service is provided at the rates specified elsewhere in this tariff.

e. Any combination of Enhanced Business Services features listed in paragraph C may be added to access lines with an EBS group with the following exceptions:

1) Call Waiting and Busy Call Forward are mutually exclusive. Both services cannot be available on the same line.

2) Enhanced Business Service features can only be added in accordance with the availability identified for each feature.

3) Abbreviated Dialing Features have the following limitations:

f. Long Speed Calling and Short Speed Calling are mutually exclusive for a given EBS line. Only one of the two services can be subscribed to.

* Indicates new rate or text

+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services (Cont'd)

2. Conditions (Cont'd)

- g. Long Speed Calling and Group Speed Calling or Convenience Calling are mutually exclusive for a given EBS line. Only one of these services can be subscribed to. However, Group Speed Calling or Convenience Calling and Short Speed Calling can be subscribed to simultaneously.

3. Description of Service Features

a. Basic Features

- 1) Direct Inward Dialing - Calls to individual EBS lines may be dialed directly to the line from an outside line.
- 2) Direct Outward Dialing -
 - a) Less than seven lines - Calls to outside lines may be dialed using the standard calling sequence.
 - b) Seven or more lines - Calls to outside lines may be dialed by dialing nine and the standard calling sequence.
- 3) Station to Station Dialing - This Feature allows an EBS subscriber to complete a call to other lines within the same EBS group by dialing the last one to four digits of the line number. The EBS customer selects the number of digits to be dialed.

b. Add-on Features

- 1) Busy Transfer - Allows calls routed to a busy station to be rerouted automatically to another station within the group.
- 2) Call Forwarding - When activated, all incoming calls to the line are forwarded to another preselected line.

* Indicates new rate or text

+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services (Cont'd)

3. Description of Service Features (Cont'd)

b. Add-on Features (Cont'd)

- 3) Call Hold - This feature allows an EBS subscriber to place an established call on hold freeing the subscriber's line to originate another call, use call pickup, retrieve a waiting call, or return to a previously held call.
- 4) Call Pickup - Allows the EBS subscriber to answer any ringing phone within the group by dialing a code.
- 5) Call Transfer - Allows a subscriber to transfer a call to another line either within or outside the EBS customer group.
- 6) Call Waiting - Alerts a subscriber who is using his EBS line that another call is waiting. Audible ringback is returned to the calling party instead of a busy tone. This feature also allows the subscriber to dial a code before placing a call to cancel Call Waiting for the duration of that call. Once the call has been terminated the Call Waiting feature is automatically reactivated.
- 7) Directory Number Hunt - Permits incoming calls to be switched to an idle line based upon a predesignated hunting sequence.
- 8) Distinctive Ringing - Provides the subscriber with different ringing patterns for calls originating inside or outside the EBS customer group. In addition, a different signal is provided on Call Waiting, if the customer subscribes, for calls originating inside or outside the EBS customer group.
- 9) Don't Answer Transfer - Automatically transfers terminating calls encountering no answer to a predesignated line within the group if the call is not answered within a preselected number (two to ten) of ring cycles.
- 10) Intercom - Allows the subscriber to dial other lines in the EBS group by dialing the pound sign (#) and a single digit.

* Indicates new rate or text

+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services (Cont'd)

3. Description of Service Features (Cont'd)

b. Add-on Features (Cont'd)

11. Restricted Station Options - Allows the EBS subscriber to predesignate limitations on incoming and outgoing calls to/from an EBS line. Incoming calls may be restricted to calls from the EBS group. Each EBS line may have two different levels of outgoing restrictions. Outgoing restrictions might include EBS group only, local calling only, intraLATA calling only, or interLATA calling only, for example. Limitations may apply and specific restrictions desired must be discussed with the Telephone Company. Each requested restriction is counted as a separate basic feature.
12. Three Way Conference Calling - This feature allows an EBS subscriber to form a three-way conference call with two other parties, located either within or outside the EBS group.

c. Abbreviated Dialing Features

1. Convenience Dialing - This feature allows an EBS-I group to use a Convenience Dialing List which associates each of 30 frequently called numbers (up to 15 digits each) with a two-digit code. These numbers can be dialed by dialing an asterisk (*) and the two-digit code.
2. Group Speed Calling - This feature allows the EBS-II customer to assign the access lines in his total group to up to 20 speed calling groups. Each user within a group can then use the Group Speed Calling List for that group which associates each of 30 frequently called numbers (up to 15 digits each) with a two-digit code. The frequently called numbers can be dialed by dialing an asterisk (*) and the two-digit code.
3. Short Speed Calling - This feature allows an individual line of an EBS customer to establish a speed calling list of eight frequently used numbers (up to 15 digits each) with a single digit index code. The subscriber can then dial these frequently called numbers by dialing an access code (usually *74) and the index code.

* Indicates new rate or text

+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services (Cont'd)

3. Description of Service Features (Cont'd)

c. Abbreviated Dialing Features (Cont'd)

4. Long Speed Calling - This feature allows any individual line of an EBS customer to establish a speed calling list of thirty frequently used numbers (up to 15 digits each) with a two digit index code. The subscriber can then dial these frequently called numbers by dialing an access code (usually *74) and the index code.
5. See paragraph B(5)c above for restrictions related to Abbreviated Dialing Features.

4. Rates

- a. In addition to the EBS line rates as specified in this section, rates for Business One-Party Touch Tone Local Exchange Service apply in accordance with the following table:

Equivalent Business Lines	<u>Number of EBS Stations</u>	
	From	To
2	2	6
3	7	12
4	13	19
5	20	27
6	28	36
7	37	46
8	47	60
9	61	75

The business touch tone rate is applied to the Equivalent Business Lines and EBS rate is applied to each EBS station.

- b. Installation and move and change charges are applicable as set forth in this tariff.

* Indicates new rate or text

+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

D. Enhanced Business Services (Cont'd)

4. Rates (Cont'd)

c. All rates listed below are per individual EBS station.

	<u>EBS Station Monthly Rate</u>
1) Basic features and all customer programmable features as listed in paragraph C above.	\$2.00
2) For systems with more than 75 EBS stations the rates will be developed individually.	
3) Features other than those listed in paragraph c above will be offered with a one time programming charge.	

* Indicates new rate or text
+ Indicates change

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

E Custom Calling Service

1. Conditions

Custom Calling Services are available only to those customers who are served from a Central Office equipped to provide such services.

When a service is programmed for both Conference Calling and Call Waiting, only one of the two may be activated at any one time.

These services will not be provided for public pay stations.

The grade of transmission on three way calling and call forwarding may vary depending on the distance and routing necessary to complete the call. End to end transmission is not guaranteed.

2. Application of Customer Activity Charges

Customer Activity Charges as outlined in Section 5 of this tariff will apply to the establishment of Custom Calling service features.

3. Feature Descriptions

a. Call Forwarding - Permits the customer to have all incoming calls automatically transfer to another dialable telephone number, while this service is activated. Where a toll message charge is applicable to a call between the customer's telephone and the telephone number to which calls are being forwarded, such charges will be billed to the Call Forwarding Customer. Some restrictions may apply to forwarding incoming toll calls to a number in another wire center. There are two methods of providing Call Forwarding:

- 1) Fixed operation, which provides for Company establishment or change of the forwarded telephone number destination requested by the customer. In the event of an interruption in "fixed" Call Forwarding Service, the company will re-establish the most current forwarded telephone number destination shown in its records. Feature activation and deactivation is the responsibility of the customer.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

E. Custom Calling Service (Cont'd)

3. Feature Descriptions (Cont'd)

a. Call Forwarding (Cont'd)

- 2) A variable operation, which provides for customer establishment and change of the forwarded number destination. The customer is also responsible for feature activation and deactivation as well as re-establishing the forwarded telephone number destination upon interruption of "variable" Call Forwarding Service.

- b. Call Forward Busy Don't Answer (CFBD) - Allows the customer to activate two types of call forwarding: Call Forward Busy (CFB) and Call Forward Don't Answer (CFD).

CFB allows the customer to forward calls only after a busy condition is encountered. CFD allows the customer to forward calls after a specified number of rings has occurred.

Both options are variable operations as discussed above in section 6.3(C)(1)(a). CFD will not forward to a busy number unless the station has Line Hunting, CFB or Busy Transfer.

- c. Call Waiting - Provides for signaling a customer, who is talking on the line, that another call has been placed to the customer's line. The customer may, by switch hook operation, hold the first call, answer the second, return to the first, or converse alternately with both.
- d. Cancel Call Waiting - By dialing/keying a code, a subscriber will be able to cancel call waiting during the duration of the next out-going call only.
- e. 8-Number Speed Calling - Permits local and long distance calls to eight different numbers to be placed by dialing an abbreviated code.
- f. 30-Number Speed Calling - Permits local and long distance calls to thirty different numbers to be placed by dialing an abbreviated code

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

E. Custom Calling Service (Cont'd)

3. Feature Descriptions (Cont'd)

- g. Teenline - Allows a customer to have two directory numbers on the same single-party line so that a subscriber can receive calls dialed to separate numbers without installing a second line. The subscriber is issued a primary directory number (PDN) and a secondary directory number (SDN). Calls placed to the PDN are identified by normal ringing, while calls to the SDN are identified by distinctive ringing. Although calls can terminate to either the PDN or to the SDN, they can originate only from the PDN. All billing is applied to the PDN.

Call Forwarding (CFW) can be applied to a Teen Service line in two ways: calls to both the PDN and the SDN can be forwarded, or call forwarding can be restricted to the PDN. If call forwarding is restricted to the PDN, calls to the SDN still ring at the subscriber's premises. A PDN cannot be forwarded to the SDN.

- h. Automatic Line (AL) - Provides an automatic connection between a calling station that goes off hook and a preassigned directory number.
- i. Warm Line (WL) - Provides an automatic connection between a calling station that goes off hook and remains off hook for 30 seconds and a preassigned directory number. This allows the line to be used to make outgoing calls to another number when desired.
- j. Call Transfer (UTF) - Allows users to transfer a call to another directory number and then drop out of the call, leaving the other two parties connected. A subscriber must have Three Way Calling and Call Transfer station options to use this feature. This feature is activated by depressing the hookswitch for about one second which places the existing call on hold and returns dial tone to the subscriber. The subscriber then dials the directory number of the person to whom the call is being transferred. When the third party answers, the subscriber can talk privately before connecting the other call if desired. If not, the subscriber can hang up and the calls will be connected. Any chargeable (long distance) call originated by the subscriber for the transfer will be billed to the subscriber even if the subscriber drops out of the call.
- k. Call Forwarding Remote Access - Allows the customer to activate or deactivate the call forward feature from a remote location by dialing a dedicated base directory number, their own directory number, followed by a Personal Identification Number (PIN), and activation/deactivation codes followed by the forwarded to number if activating. Activation code 72#, deactivation code 73#. This feature requires touch-tone service at the remote station.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

E. Custom Calling Service (Cont'd)

4. Rates

The following rates apply in addition to other rates and charges applicable to the associated individual local exchange service lines.

a. Features Rates

1)	Call Forwarding	\$2.00
2)	Call Waiting	\$2.00
3)	Cancel Call Waiting	\$1.00
4)	Three-way Calling	\$2.00
5)	Teen Line	\$2.00
6)	Call Forward Busy Don't Answer (CFBD)	\$1.50
7)	Call Forward Busy (CFB)	\$1.00
8)	Call Forward Don't Answer (CFD)	\$1.00

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

E. Custom Calling Service (Cont'd)

4. Rates (Cont'd)

a. Features Rates (Cont'd)

9)	Speed Calling (8 Number Capacity)	\$1.00
10)	Speed Calling (30 Number Capacity)	\$2.00
11)	Automatic Line	\$1.00
12)	Warm Line	\$1.00
13)	Call Transfer	\$1.00
14)	Call Forwarding Remote Access	\$1.00

In addition to the charges above, a Service Ordering Charge as outlined above in this section of the tariff will apply to the establishment of class services. A non-recurring charge of \$5.00, will apply to the activation or rearrangement of one or more features.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

F. Trap and Trace

1. Description

Traps provide the capability of capturing and recording the telephone number of the calling party for each local telephone call to the customer's telephone number. The calling party's number is captured by telephone company switching equipment and is transmitted to a local law enforcement agency. Traps will not be installed unless requested by a law enforcement agency of the local, state, or federal government. Results of the nuisance trap will only be disclosed to appropriate law enforcement agencies in accordance with applicable law.

Unusual expenses such as overtime or prolonged work incurred in gathering data for nuisance trapping will be charged to the particular customer at the company's current loaded labor rate. This charge will not apply to requests initiated by enforcement agencies for their own purposes, however, it will apply to individual requests initiated through law enforcement agencies.

2. Customer Activity Charges

A Service Ordering Charge as outlined above in this tariff will apply for establishing this service. A non-recurring charge of \$5.00, will apply to the activation or rearrangement of one or more features.

3. Availability

Nuisance Traps will be available only where technically feasible and where appropriate arrangements have been made with a law enforcement agency.

4. Rates

	<u>Monthly</u>
Nuisance call trapping	\$5.00

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

G. Remote Call Forwarding

1. General

Remote Call Forwarding (RCF) service is a service whereby a call placed from the originator to a customer's Remote Call Forwarding telephone number is automatically forwarded by Telephone Company digital central office equipment to another telephone number designated by the customer. This number does not have to be in the exchange where RCF is ordered.

2. Regulations

- a. Remote Call Forwarding service is offered subject to availability of suitable facilities and provided no unusual expense is involved.
- b. Remote Call Forwarding service is not offered where the terminating station is a coin telephone.
- c. The Telephone Company will not provide identification of the originating telephone number to the Remote Call Forwarding customer.
- d. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
- e. Remote Call Forwarding service is not represented as suitable for satisfactory transmission of data.
- f. Remote Call Forwarding service is available when used in connection with Local Exchange Service and interstate or intrastate Long Distance Message Telecommunications Service, interstate or intrastate 800 Service.
- g. Remote Call Forwarding service is provided on the condition that the customer subscribe to sufficient facilities to adequately handle calls to the Remote Call Forwarding number without interfering with or impairing any services offered by the Telephone Company.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

G. Remote Call Forwarding (Cont'd)

2. Regulations (Cont'd)

h. Directory Listings

One listing covering the exchange in which the call forwarding Central Office is located is provided without charge.

- i. A Service Ordering Charge as established above in this tariff are applicable to the establishment of Remote Call Forwarding. A non-recurring charge of \$5.00, will apply to the activation or rearrangement of one or more features.

3. Rates and Charges

- a. The following charges are for the Remote Call Forwarding service only and are in addition to applicable charges for service and equipment with which it is used.

	<u>Monthly Rate</u>
Remote Call Forwarding, per access path	\$5.00

b. Usage Charges

Usage charges applicable to remotely forwarded calls for that portion of the call from the call forwarding location to the answering location shall be charged in addition to the monthly rate specified above. The Remote Call Forwarding customer is responsible for any applicable customer-dialed station-to-station charges or interstate and intrastate charges specified in the Long Distance Message Telecommunications Service or 800 Service Tariffs. The aforementioned charges apply to all calls answered at the call forwarding location, including person-to-person and collect calls, if accepted.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

H. Service Packages

1. Package I – This package consists of Call Waiting, Call Forwarding, Three-way Calling, and Calling Number Delivery (T)
(D)
(D)
2. Package II – This package consists of Call Waiting, Call Forwarding, Three-way Calling, Calling Number Delivery, Automatic Call Back, Automatic Recall and Speed Calling (8 number capacity). (T)
3. Package Rates: (T)

Package I	\$ 3.50 per month	(R)
Package II	\$ 7.50 per month	(D)
		(T)(R)

In addition to the charges above, a Service Order Charge as outlined above in this section of the tariff will apply to the establishment of class services. A non-recurring charge of \$5.00, will apply to the activation or rearrangement of any of these packages.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI)

1. General

- a. Integrated Services Digital Network (ISDN) – Primary Rate Interface (PRI) is a central office based service arrangement that is an alternative for individual access services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800/888 Services, Wide Area Telecommunications Services, and local business trunks.
- b. ISDN-PRI is provisioned on a 1.544 megabit per second (Mbps) facility and uses the ISDN architecture of 23 "B" channels and one "D" channel to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.
- c. ISDN-PRI provides the capability to transport customer information in the form of circuit-switched voice or data up to 64 Kbps over any "B" channel.
- d. ISDN-PRI and other local services are offered on an end user basis only. Use of such services for transmitting interexchange traffic that does not either originate and terminate at the customer premises is prohibited.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI)
(Continued)

2. Regulations

- a. ISDN-PRI service is only available from serving central offices equipped with the necessary facilities to provide ISDN-PRI service. Feature availability and service capabilities are dependent on the facilities and the digital technology providing the service.
- b. Customer Provided Equipment (CPE) must be NI-2 compliant (meet the National Standard for PRI). Any CPE that requires custom switch features not supported in the NI-2 specification may be supported as an exception.
- c. This Tariff provides for PRI switching capabilities only and additional services must be subscribed to under separate sections of this Tariff. Each ISDN-PRI facility is provided with one telephone number. Additional numbers may be purchased at the rates specified elsewhere in this tariff.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

2. Regulations (Continued)

- d. This tariff does not provide for the transmission of packet data on the "B" or "D" channels, but can be provided on an individual case basis.
- e. Termination Liability Terms and Conditions. Customers must subscribe to this service for 1, 3, or 5 year(s). Should a customer chose to discontinue service prior to expiration of the term to which the customer has subscribed, a discontinuance charge will apply. The discontinuance charge will be equal to 100% of the total monthly rates for the applicable contract term, less any amounts previously paid by the customer.
- f. During the initial term commitment, the customer may add PRI services at the same monthly rate specified in the customer's original contract.
- g. The PRI Subsequent Activity Charge (SAC) is applicable for any changes to customer configurations after the initial installation. The SAC is applicable per occurrence and not based on the number of facilities or channels.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

3. ISDN-PRI Features

The following B-channel features are offered to the customer, at no additional charge.

- a. Caller ID Number is a standard feature.
- b. Call-by-Call Service Selection provides an option to the dedicated channel configuration by allowing channels to be configured to access multiple services on a per call basis. With this feature, separate facilities are not required for individual services, such as DID, DOD, WATS, 800/888 services, and local switched access lines.
- c. Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.
- d. Fractional DS1 ISDN-Originating allows the customer to set up N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.
- e. Fractional DS1 ISDN-Terminating allows the customer to receive N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

4. ISDN-PRI Rate Structure

a. ISDN-PRI Access

1. Non-recurring charges for the initial database configuration work and installation of the ISDN-PRI Interface at the Customer Premises applies per each 1.544-Mbps facility provisioned.

b. Channel Activations

1. Channel Activations will be provided at no charge during initial installment of ISDN-PRI access.

c. Channel Usage

1. Voice/Data channel usage rates will apply on a per channel basis.

d. Subsequent Activity

1. Non-recurring charges for database configuration work will apply for all subsequent activity related to changes in channel configuration or ISDN-PRI attributes. The database charges are applied per PRI.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

5. ISDN-PRI Rates and Charges		Monthly Rate	Nonrecurring Charge
a.	ISDN-PRI Access ¹		
	12-Month Contract	\$400.00	\$500.00
	36-Month Contract	\$360.00	\$500.00
	60-Month Contract	\$320.00	\$500.00
b.	Channel Activation and Usage, per channel	\$ 15.00	
c.	Subsequent Activity Charge (SAC), per occurrence	N/A	\$200.00

¹Customer only will be offered a term commitment plan of 12, 36 or 60 months.

PRIVATE LINE TARIFF CONCURRENCE

Private Line Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Private Line Service as set forth in Mark Twain Rural Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for private line service of Mark Twain Rural Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort and after provisions have been made for the Company's telephone exchange services, will provide, upon reasonable notice, services of the type offered in Mark Twain Rural Telephone Company's Private Line Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Mark Twain Rural Telephone Company's Private Line Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

Private Line Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, in whole or in part, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

ACCESS SERVICES TARIFF CONCURRENCE

Access Services

Access services are those services which are described in the Access Services Tariff of Mark Twain Rural Telephone Company. These services are offered (T)
 by the Company to intrastate interexchange customers (ICs) in accordance with the rules and regulations specified in the Access Services Tariff of Mark Twain Rural Telephone Company and approved by the Missouri Public Service Commission, and in any amendments thereto and authorized by the Missouri Public Service Commission or applicable law. The Company does not concur (T)
 in the rates for access services of Mark Twain Rural Telephone Company. (T)
 Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort and after provisions have been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Mark Twain Rural Telephone Company's Access Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Mark Twain Rural Telephone Company's Access Services Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company. (T)
 (T)

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

DIGITAL LINK SERVICES CONCURRENCE

Digital Link Services Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Digital Link Service as set forth in Mark Twain Rural Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for Digital Link Service of Mark Twain Rural Telephone Company. Rates for these services are set out in the following pages of this concurrence. (T)

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions have been made for the Company's telephone exchange services, will provide, upon reasonable notice, services of the type offered in Mark Twain Rural Telephone Company's Digital Link Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrent in Mark Twain Rural Telephone Company's Digital Link Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company. (D)
(T)
(T)
(T)

Cancellation of Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.
