FEB 27 1996

LOCAL EXCHANGE SERVICE

MISSOURI
Public Service Commission

A. General

- 1. The rates for Local Exchange Service are subject to the conditions as set forth herein and the Rules and Regulations governing provision of such service covered in this Tariff.

B. Conditions

1. Service Upgrades

At locations where facilities permit, two-party and four-party residence and four-party business service is not offered to customers requesting new telephone service or to customers requesting a change in their existing telephone service.

Locations in which facilities permit the exclusive provision of one-party service for all customers within an exchange will be designated as such on the Local Exchange Service Offerings sheets.

Those locations in which facilities permit the exclusive provision of one-party service for all customers within a designated area will be identified as approved by the Missouri Public Service Commission on the Local Exchange Service Offerings sheets for that exchange. Existing two-party and four-party customers will be allowed to continue their service until such time as they are upgraded by the Company. At the time the customer's two-party or four-party service is upgraded to one-party service, the application of normal service charges will not apply.

The two-party or four-party conversion will consist of the following:

- a. The Company will remove the tip party identifier, change the customer to a new cable pair, or if required, change out the ringer and/or instrument. The customer will not be charged for a premise visit or for an instrument modification when required.
- b. As the Company completes upgrading, as shown on approved Local Exchange Service Offerings sheets, only one-party business and one-party residence service will be available. One-party rates will be effective for each customer on the date the customer's service is upgraded to one-party service.

Missouri School Discount Program

- A. A discount from standard monthly rates for local exchange service may be allowed in connection with service furnished through the Missouri School Discount Program, pursuant to the Video Instructional Development and Educational Opportunity Program, as enacted by the Missouri State Legislature.
- B. Upon the customer's request, a discount of twenty percent (20%) from standard monthly access line rates may be allowed to educational institutions within the Company's certified area, as determined in Paragraph 3, following.
- C. An educational institution shall be defined as an accredited public or private school in the state of Missouri. Private schools must be accredited by either the Missouri Chapter of the National Federation of non-Public Schools Accrediting Association, Independent Schools Association of The Central States, North Central Association of Colleges and Schools, and/or the University of Missouri - Columbia. Public schools must be accredited by the Department of Elementary and Secondary Education for the State of Missouri and/or the North Central Association of Colleges and Schools.
- D. The qualifying discount will be permitted only on the local exchange access line. All other features, ancillary services or options, relative to the particular service, shall continue to be billed at the appropriate tariffed rates.
- E. The qualifying discount will be permitted only where the predominant use is providing educational and instructional programs and for the educational institutions' administrative use. The discount is not allowed to residential complexes associated with the institution.
- F. In addition to meeting the qualification specified in Paragraph 3 preceding, an eligible customer must sign an affidavit certifying that the qualification is met. The affidavit will be retained on file with the Company.
- G. The customer should request to receive the discount on all subsequent additions of eligible services which are ordered. There will be no additional affidavits required.
- H. The following local exchange services are eligible for a discount under this program:
- Flat Rate, business one-party service

Discounts for Schools and Libraries Participating in the Federal Universal Service Program

- A. Discounts on the intrastate services offered through this tariff will be available to eligible schools and libraries. A school or library will be eligible to participate in the discount program if it receives funds from the Federal Universal Service Fund.

- B. The level of discount available will mirror the discount percentage level available to the school or library through the Federal Universal Service Fund program. The discount will be applied against the intrastate service rate otherwise applicable under this tariff. The discount only applies to the extent funds are available to the eligible school or library, through the Federal Universal Service Fund.

LIFELINE SERVICE

A. General Regulations

Lifeline Service is a government benefit program established by the Federal Communications Commission (FCC) and Missouri Public Service Commission (Commission) and is available to qualifying low-income subscribers for certain residential telecommunications services. The terms and conditions of Lifeline service, including monthly discount amounts, are set forth in rules established by the FCC and Commission and available at the Company's office.

In addition, the terms and conditions of Lifeline service are available on the Company's website as follows:

<http://sgo.cravenproductions.com/services/phone/lifeline/>.

Disabled Service

Disabled Service is a government benefit program established by the Missouri Public Service Commission (Commission) as part of the Missouri Universal Service Fund (MoUSF). It is a residential retail service that offers a qualifying disabled customer reduced charges for certain telecommunications services. The terms and conditions of disabled service, including monthly discount amounts, are set forth in rules established by the Commission and available at the Company's office.

In addition, the terms and conditions of Disabled Service are available on the Company's website as follows:

<http://sgo.cravenproductions.com/services/phone/lifeline/>.

GENERAL EXCHANGE TARIFF**THREE-DIGIT DIALING SERVICE (811)**

1. Three-Digit Dialing Service (811)

1.1 General Regulations

- A. The 811 Service is a locally assigned three digit abbreviated dialing code provided to a state One Call System (“SOCS”) for use in providing advance notice of excavation activities to underground facility operators by way of voice grade facilities. Federal Communications Commission (“FCC”) Docket 92-105 mandates that incumbent local exchange carriers in each local calling area make the 811 abbreviated dialing code available to a SOCS as a tarified, local calling area based service (the “811 Service”).
- B. The 811 Service allows a Company subscriber to access a SOCS call center by dialing only the 811 abbreviated dialing code. Subject to other terms and conditions of this tariff, Company subscribers shall be able to make, and the SOCS shall be able to receive, calls using the 811 Service as part of their local exchange service.
- C. All 811 Service calls shall be local in nature and shall not result in any expanded area calling, intraLATA toll or interLATA long distance or pay-per-call charges to Company subscribers.
- D. The 811 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. The 811 Service is otherwise available wherever local service is available.
- E. 811 Service is available from the Company within the Company’s service area only. To provide access to 811 to end users in another company’s service area or to a Competitive Local Exchange Carrier (“CLEC”) end user within the local calling area, the SOCS must make appropriate arrangements with the other company or CLEC serving that territory. The SOCS should work separately with competing local providers to ascertain that its end user customers will be able to reach one-call services provided by dialing 811.

Issued: May 16, 2007

Effective: June 15, 2007

W. Jay Mitchell
Ozark Telephone Company
P.O. Box 547
Seneca, MO 64865

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)

1.2 Obligations of the SOCS

- A. The SOCS may, but is not required to, submit a written application for 811 service to the Company which will include:
- (1) The local, foreign exchange or toll free telephone number into which the Company is to translate the dialed 811 abbreviated code.
 - (2) For network sizing and protection, an estimate of annual call volumes, the expected busy hour and holding time for each call to the 811 Service.
 - (3) Complete contact information.
- B. If requested by the Company, the 811 provider shall assist the Company in responding to complaints made to the Company concerning 811 Service.
- C. Local Calling for Company Subscribers
- (1) The SOCS, in cooperation with the Company, will assure that all 811 Service calls are local and do not generate Extended Area Service ("EAS"), Metropolitan Calling Area ("MCA") service, intraLATA toll, interLATA long distance or pay-per-call charges for Company subscribers.
 - (2) The SOCS must supply the Company with a toll free number. The Company will translate the 811 digits into the telephone number provided by SOCS.
 - (3) The SOCS is responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performances are used in connection with the 811 Service, and from all holders of copyrights, trademarks and patents used in connection with the said service.

Issued: May 16, 2007

Effective: June 15, 2007

Ozark Telephone Company
P.O. Box 547
Seneca, MO 64865

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)
 - 1.3 Obligations of the Company
 - A. The Company shall provision the 811 Service in accordance with FCC directives and the terms of this tariff.
 - B. When an 811 Service call is placed by the calling party via interconnection with an interexchange carrier, the Company cannot guarantee the completion of said 811 Service call, the quality of the call or any features that may otherwise be provided with 811 Service.
 - C. The Company does not undertake to answer and forward 811 Service calls but furnishes the use of its facilities to enable SOCS to respond to such calls at SOCS established call centers.
 - D. The rates charged for 811 Service do not contemplate the inspection or constant monitoring of facilities to discover errors, defects, and malfunctions in service, nor does the Company undertake such responsibility. The SOCS is responsible for making such operational tests as, in the judgment of the SOCS, are required to determine whether the Company's facilities are functioning properly for its use. The SOCS is responsible for promptly notifying the Company in the event the Company's facilities are not functioning properly.
 - 1.4 Liability
 - A. The Company's entire liability to any person for interruption or failure of the 811 Service shall be limited to the terms set forth in this section and other sections of this Tariff.
 - B. The liability of the Company for losses or damages of any kind arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, or failure or defects in any facility furnished by the Company occurring in the course of furnishing 811 Service, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the SOCS for the 811 Service and local exchange service for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs.
 - C. The Company is not liable for any losses or damages caused by the negligence of the SOCS.

Issued: May 16, 2007

Effective: June 15, 2007

W. Jay Mitchell
Ozark Telephone Company
P.O. Box 547
Seneca, MO 64865

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)
 - 1.4 Liability (cont'd)
 - D. The Company shall not be liable to the SOCS for any damages the SOCS may incur that result from any changes, modifications or rulings made by the FCC.
 - E. The Company will make every effort to route 811 calls to the SOCS call center, however, the Company will not be held responsible for routing mistakes or errors.
 - F. The 811 Service is provided solely for the benefit of the SOCS. The provision of the 811 Service by the Company shall not be interpreted, constructed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity.

F. Customer-Provided Equipment and Inside Wire

MISSOURI
Public Service Commission

1. General

- a. Customer-provided equipment and/or inside wire may be connected at the customer's premises to facilities of the Company for use with exchange access service in compliance with FCC regulations.
- b. Customers may connect equipment, systems and/or inside wire registered or grandfathered by the FCC directly to the Company network.
- c. The Rules and Regulations contained in this Tariff apply when the customer elects to provide his own equipment and/or inside wire. In any instance where the Tariff of the Company conflicts with an effective order of the FCC, the FCC order will have precedence.
- d. Responsibility of the Customer (New Installations)
 - 1) A customer desiring to connect customer-provided equipment to the exchange and message toll network must make application to the Company. Such application may be made orally and followed by written application prior to the desired in-service date and shall include the following:
 - a) The type and manufacture of each item of the grandfathered equipment or the registration number and ringer equivalence of the registered equipment.
 - b) The number of main terminals to be connected.
 - 2) Upon notification from the Company that the customer-provided equipment or inside wire is causing or is likely to cause harm, the customer shall make such change as is necessary to remove such harm. Failure to make such change will result in disconnection of service until such change is completed to the satisfaction of the Company.

- 3) The customer may be required, as a condition of service, to pay in full all sums due the Company including, but not limited to, service charges, termination charges, minimum charges, and reimbursement for loss or damage to Company facilities as may apply.
- 4) A customer must subscribe to, and be capable of providing operation for, sufficient quantities of main terminals to provide adequate access to his customer-provided equipment and/or inside wire in accordance with accepted communications industry standards.
- 5) The customer must provide all of the terminal equipment and/or inside wire on the customer's side of the point of demarcation between Company owned equipment and customer-owned equipment.
- 6) Use of Company facilities or service in connection with any device for recorded public announcements is subject to the following conditions:
 - a) For purposes of identification, customers to telephone service who transmit recorded public announcements over facilities provided by the Company must include in the recorded message the name of the organization or individual responsible for the service and the address at which the service is provided.
 - b) Customers transmitting factual public announcements such as time, stock market quotations, airline schedules and similar information are excluded from the preceding condition.

CUSTOM CALLING SERVICES

JAN 15 1997

CUSTOM CALL SERVICES

MISSOURI
Public Service Commission

A. General

1. Custom Call Services consist of one or more of the following features which provide special kinds of customer controlled or prearranged and fixed communications features on individual access lines. Custom Call Services are available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

- a. These services may be provided only in conjunction with individual line residence and business services and some Multiline services. Party line customers, PBX customers, Payphone Service are excluded from Custom Call Services. (C)

B. Feature Descriptions

1. Automatic Busy Redial - is an arrangement which permits the customer to redial automatically the last number dialed. If the called line is found to be busy, a 30-minute queuing process begins. The customer is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of the called line until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call can now be completed.
2. Automatic Call Return - allows a customer to automatically return the last incoming call whether it is answered or not. Upon activation of the feature, the number of the most recent party who called is dialed automatically. If the called line is found to be busy, a 30-minute queuing process begins. The customer is given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of both parties until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call may now be completed.

B. Feature Descriptions (Cont'd)

- 3. Call Block - allows a customer to block incoming calls from a maximum of 12 telephone numbers. The customer also can block incoming calls placed from the last calling number even if the number is unknown to the customer. Blocked calls are routed to a recorded announcement which specifies that the called party is not accepting calls.
- 4. Call Forwarding - Permits the customer to have all incoming calls to his line automatically transferred to another dialable telephone number, while this service feature is activated. Where a toll message charge is applicable to a call between the customer's telephone and the telephone number to which calls are to be forwarded, such charges will be billed to the Call Forwarding customer. Call Forwarding may be arranged for:
 - a. Fixed operation, which provides for Company establishment or change of the forwarded telephone number destination requested by the customer. In the event of an interruption in "fixed" Call Forwarding service, the Company will reestablish the most current forwarded telephone number destination shown in its records. Feature activation and deactivation is the responsibility of the customer.
 - b. Variable operation, which provides for customer establishment and change of the forwarded telephone number destination. The customer is also responsible for feature activation and deactivation as well as reestablishing the forwarded telephone number destination upon interruption of "variable" Call Forwarding service.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

5. Call Forwarding Busy Line (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Digital Centrex Service line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a normal busy line condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

6. Call Forwarding Busy Line/No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Digital Centrex Service line number or other line number of the customer at another location on a different premise when such incoming calls encounter either a normal busy line condition or a no answer condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

7. Call Forwarding Busy/No Answer (Variable) - This service permits the customer to have incoming calls transferred to another telephone number when his number is busy and/or not answered after a specified number of rings. The customer is responsible for the establishment and change of the forwarded telephone number destination. The customer is also responsible for feature (Busy, No Answer or Busy/No Answer) activation and deactivation as well as reestablishing the forwarded telephone number upon interruption of the Call Forwarding service. Where a toll message charge is applicable to the call to be forwarded, such charges will be billed to the Call Forwarding customer. This service is not available in connection with Call Forwarding service as described in B.2, 3 and 5 or line (rotary) hunting service.
8. Call Forwarding No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Digital Centrex Service line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a no answer condition after a specific number of rings, such number of rings to be specified when this service is ordered.
- a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

B. Feature Descriptions (Cont'd)

9. Call Tracing Service - allows the customer to immediately and automatically trace the last incoming call received from a local service. Upon the customer's request the trace information will be provided to law enforcement agencies by the Company but will not be released directly to the customer. To initiate the call trace, the customer must contact the Company at the number provided in the voice announcement within ten (10) days of the incident. Call Tracing Service performs the function of recording call information, but in no way identifies the person(s) actually placing the call(s). By accepting the Service, the customer agrees that Ozark Telephone Company shall not be liable for damages due to an inability to trace the call(s). Call Tracing Service will be the only nuisance call tracing service available to residential one-party and business one-party customers where this feature is offered.

10. Call Waiting - Provides for signaling a customer, who is talking on his line, that another call has been placed to his line. He may, by switchhook operation, hold the first call, answer the second, return to the first or converse alternately with both.

11. Calling Number Identification (ID) - Calling Number ID is an arrangement which permits a customer with local exchange service, other than foreign central office service, to be immediately apprised of the calling telephone number of a call placed to the customer.

At the time the incoming call is placed, the calling telephone number is forwarded from the terminating central office to compatible customer provided display equipment associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

For calls originating from a line with a multiline hunt group, ordinarily the main telephone number is delivered. If the calling telephone number is not available for forwarding to the called party, the customer's display device will give an anonymous indication. The calling telephone number is unavailable from calls made through some large PABX systems, from most cellular radio calls, and currently from interexchange carrier calls. Nor is the calling telephone number made available when incoming calls have been handled by an operator or charged to credit cards.

Customers subscribing to Calling Number ID will be responsible for the provision of compatible display equipment. The Company assumes no liability for any incompatibility of the customer provided display equipment.

Caller ID information may not be sold or given to another party without the caller's consent. Caller ID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. This applies if the number delivery services subscriber has an existing relationship with the customer. Caller ID customers failing to comply with any of these conditions will have their service terminated.

Public Service Commission

12. Cancel Calling Number Delivery (Per Call) - Allows customers, in areas where Calling Number Identification is available, to inhibit the delivery of their telephone number to an identification device, by activating blocking immediately prior to a call.
13. Cancel Calling Number Delivery (Per Line) - Allows a single-line customer to make all calls with the delivery of his/her calling number identification (CNI) marked as "private" to the people he/she is calling. If the preassigned access code for Cancel Calling Number Delivery (Per Call) is dialed on the line, the calling number will be delivered on the next call placed.

This service is available only to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line blocking.

14. Last Number/Save Number Redial - Permits the customer to dial a code which activates the switch to automatically place a call to the last called number stored. Each time a customer dials, the most recent number is stored. Save Number Redial allows the customer to store the called number by dialing a code at any point during a call, or upon encountering a busy or no answer condition when placing a call. The customer may place and receive any number of calls in the normal manner after a number is stored. A customer wishing to reinitiate a call to the party whose number was stored dials a code and the call is placed automatically.

16. Selective Ring - Allows distinctive ringing to be applied to an individual line, where each of two numbers, a main number and a Selective Ring number, will have a uniquely distinctive ring for customer identification. Because two telephone numbers are associated with one telephone line, only one conversation can be conducted at a time.

Regulations for directory listings set forth elsewhere in this Tariff will apply for the main number. The customer is entitled to one free listing in the alphabetical section of the telephone directory for the Selective Ring number, regardless of the class of service.

17. Special Call Acceptance - allows a customer to select (maximum of 12) customer telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller the customer is not accepting calls. Calls from numbers outside the specified exchanges will ring normally.
18. Special Call Forwarding - is an arrangement which permits a customer to prespecify telephone numbers (maximum of 8) from which incoming calls are to be forwarded. During the period that Special Call Forwarding is activated, only calls from the prespecified numbers will be forwarded.
19. Special Call Waiting - allows a customer to choose up to 12 numbers which can activate Call Waiting. Incoming calls placed from numbers not selected by the customer receive busy signals when the customer's line is busy. Customer may not subscribe to Call Waiting and Special Call Waiting on the same line.

B. Feature Descriptions (Cont'd)

- 20. Speed Calling - Permits local and long distance calls to be placed by dialing an abbreviated code. This arrangement is available in an eight-number capacity and a thirty-number capacity.
- 21. Three-Way Calling - Permits a customer to add a third party to an existing conversation, whether the original call was incoming or outgoing.
- 22. VIP Alert - allows a customer to program up to twelve (12) telephone numbers of selected callers enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone. If a customer also subscribes to Call Waiting, calls from the selected numbers will be distinguished by a special Call Waiting tone.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.
