If it is deemed necessary by the Company to safeguard its interests, applicants for service or present customers may be required to make a deposit of an amount not to exceed the sum of two (2) months' monthly recurring charges for services subscribed to plus two (2) months' estimated long distance charges. If the customer's service is terminated for any reason the deposit will be applied to reduce the amount of any unpaid charges for exchange or long distance service.

The interest rate on a deposit held thirty (30) days or more shall be established on October 1 of each year for the period of October 1 that year to September 30 of the following year. The interest rate shall equal the prime rate as published in the Wall Street Journal for the last business day of September plus one percent (1%). 3. Calling Number Delivery

Calling Number Delivery (also known as "Caller ID") allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number of an incoming call before answering. During the time that the incoming call is placed, the calling number is forwarded from the central office to a compatible customer provided Customer Premises Equipment (CPE) Display Unit associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

The calling number is also not available when incoming calls have been handled by an operator or charged to credit cards. Number delivery for calls originating from a PBX will display the main PBX number only. If the caller's number is not part of the CLASS network, is a multi-party line, or is blocked, the number will not be displayed.

Subscription to Calling number delivery on EBS access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line basis.

Telephone numbers transmitted via Calling Number Delivery may not be sold or given to another party without the caller's consent. Calling number Delivery information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to

5. 8-Number Speed Calling - Permits local and long distance calls to eight different numbers to be placed by dialing an abbreviated code.
6. 30-Number Speed Calling - Permits local and long distance calls to thirty different numbers to be placed by dialing an abbreviated code.
7. Teenline - Allows a customer to have two directory numbers on the same single-party line so that a subscriber can receive calls dialed to separate numbers without installing a second line. The subscriber is issued a primary directory number (PDN) and a secondary directory number (SDN). Calls placed to the PDN are identified by normal ringing, while calls to the SDN are identified by distinctive ringing. Although calls can terminate to either the PDN or to the SDN, they can originate only from the PDN. All billing is applied to the PDN.

Call Forwarding (CFW) can be applied to a Teen Service line in two ways: calls to both the PDN and the SDN can be forwarded, or call forwarding can be restricted to the PDN. If call forwarding is restricted to the PDN, calls to the SDN still ring at the subscriber's premises. A PDN cannot be forwarded to the SDN.

8. Call Waiting I.D. - Allows the subscriber to identify who is calling while on the telephone. A tone notification lets the subscriber know a call is waiting and the name and number of the caller waiting, subject to technical limitations, will appear on the Caller ID display. A phone that has Caller ID capability is necessary. (N)
