The charge for this portion of the Clearline 45 Service is for transportation of traffic between the Carrier's POPs. Charges are based on airline mileage as calculated using the formula presented Section 4.3, Mileage Between Rate Centers.

Each Clearline 45 Service circuit connected between two subscriber's interface points will be construed as an individual circuit for rate compilation purposes.

The charge for a Clearline 45 Service circuit is calculated by adding the fixed charge plus the charge per mile times the total number of V&H miles.

.2 DS-3 Access Charge

Access facilities from the subscriber's premise to the Carrier's POP are required at both ends of the Clearline 45 Service.

Access can either be leased by local exchange company (LEC) DS-3 access lines or by other access arrangements. If Sprint obtains the DS-3 access lines for the subscriber from the LEC, the subscriber's monthly recurring charge (MRC) for the access portion of the service will be the LEC's charge for providing the access lines. The Special Access Surcharge is applied in accordance with the LEC's Intrastate Access Tariffs. Carrier will cease billing the Special Access Surcharge upon receipt of the Exemption Certificate.

Central Office connection charges will apply in all cases where Sprint connects to any local access facilities to provide Clearline 45 Service.
