AT&T COMMUNICATIONS OF THE SOUTHWEST, INC.  
WIDE AREA TELECOMMUNICATIONS SERVICE TARIFF

1st Revised Preface Sheet  
Replacing Original Preface Sheet

WIDE AREA TELECOMMUNICATIONS SERVICE

The resolution of certain matters has resulted in a one-time savings to  
AT&T which AT&T will flow through to its customers in the following manner:

RECEIVED

SEP 23 1992

1. Temporary Credit

MO. PUBLIC SERVICE COMMISSION

- A. A temporary credit of 11.0% will apply to the current prices of existing WATS/800 type services each month for a six-month period beginning with the first billing period on which the temporary credit appears. The credit will apply to the bottom line amount of AT&T intrastate usage billing from April 1, 1992 through September 30, 1992 for all customers except those listed below:

Exceptions:

Customers billed by Contel Telephone Company will receive an 11.0% credit applied to the bottom line amount of AT&T Intrastate calls from June 16, 1992 through January 16, 1993.

Customers billed by United Telephone Company will receive an 11.0% credit applied to the bottom line amount of AT&T Intrastate calls from October 1, 1992 through March 31, 1993. (CT)

Customers billed by Peace Valley, Miller Telephone Company, Granby Telephone and Craw-Kan Telephone will receive an 11.0% credit applied to the bottom line amount of AT&T Intrastate calls from April 1, 1992 through July 31, 1992.

1.2 GENERAL REGULATIONS

**DEC 27 1991**

1.2.1 Definitions

**UTILITY DIVISION  
P. S. C. MO.**

COMPANY:

AT&T Communications of the Southwest, Inc.

DEMARCATIION POINT:

The electrical terminus of an access line. It provides a physical interface to the access line in terms of design, installation, and testing.

HUNTING ARRANGEMENT:

A grouping of 800 Service (See Note 1) access lines arranged for the completion of a given message or arranged for overflow to or from another access line or group of access lines.

LOCAL ACCESS AND TRANSPORT AREA (LATA):

A geographic area established for the administration of communications services. It encompasses designated exchanges, which are grouped to serve common social, economic and other purposes.

LOCAL EXCHANGE CARRIER:

Refers to those carriers authorized to provide exchange service.

MULTILINE TERMINATING SYSTEM:

Switching equipment (e.g., PBX, Centrex, ACD, tandem switching equipment) and Key telephone-type systems which are capable of terminating more than one serving office line, WATS access line, channel services or communications system.

POINT-OF-PRESENCE:

An office of this Company from which services are furnished.

WATS ACCESS LINE:

A line from the customer's premises to the serving office which is provided by the Local Exchange Carrier for the purpose of completing WATS messages. Each such line will be arranged at the customer's option for either Outward WATS (See Note 2), or 800 Service, but not for both.

Note 1:Marketed by AT&T Communications of the Southwest, Inc. under the name of AT&T 800 Service after January 1, 1984.

Note 2:Marketed by AT&T Communications of the Southwest, Inc,under the name of AT&T Outward WATS after January 1, 1984.

WIDE AREA TELECOMMUNICATIONS SERVICE **Missouri Public Service Commission**

1.2 GENERAL REGULATIONS - (Continued)

REC'D JAN 28 2000

1.2.2 Undertaking of the Company

Transmitting Messages - The Company does not undertake to transmit messages but furnishes the use of its services to its customers for communications.

The design, maintenance and operation of Wide Area Telecommunications Service envisions that communications will originate or terminate at a WATS service point for the purpose of communicating with service points in the State of Missouri.

1.2.3 Availability of Service

Service is furnished subject to the availability of the service components required. The Company will (1) determine which of those components shall be used and (2) make modifications to those components at its option. "Service components" shall include, but not be limited to, the existence of access and/or billing arrangements on an originating and/or terminating basis. In the absence of access arrangements between the Company and the access provider at a particular Station, a Customer may be unable to place calls from or to the affected Station.

(AT)

(AT)

The Company reserves the right to deny service ordering and provisioning in locations where call discernment in the form of either trunk level call identification or station level signalling with a two digit identifier (FLEX ANI) is not available to AT&T.

1.2.4 Liability of the Company

- A. In view of the fact that the customer has exclusive control of his communications over the services furnished him by the Company, and of the other uses for which services may be furnished him by the Company and because of unavailability of errors incident to the service and to the use of such services of the Company, the services furnished by the Company are subject to the terms, conditions and limitations herein specified.

WIDE AREA TELECOMMUNICATIONS SERVICE

**DEC 27 1991**

1.2 GENERAL REGULATIONS - (Continued)

**UTILITY DIVISION  
P. S. C. MO.**

1.2.5 Limitation of Service

WATS does not include person-to-person, collect, conference or other messages requiring operator handling, except that an operator will reach the called telephone number where service components are not available for customer dial completion.

WATS service contemplates the provision of satisfactory transmission only between the access line and the calling or called service point.

1.2.6 Use of Service for Unlawful Purposes

The service is furnished subject to the condition that it will not be used for an unlawful purpose.

1.2.7 Suspension and Termination of Service for Cause

- A. Upon nonpayment of any sum due the Company, or upon a violation of any of the conditions governing the furnishing of service, the Company or its authorized agent may, by notice in writing to the customer, without incurring any liability, forthwith discontinue the furnishing of said service. This written notice shall be sent or delivered to the customer five (5) days prior to the date of the proposed discontinuance. If in the judgment of the Company, unusual risk of financial loss exists, service may be discontinued after 48 hours written notice has been furnished to the customer.
- B. 800 Service is furnished upon the condition that the customer obtain adequate service to permit the use of this service without injurious effects upon it or any other service rendered by the Company. The Company may terminate or refuse to furnish 800 Service to any customer without incurring any liability if the use of the service would interfere with or impair WATS or any other service rendered by the Company, provided that in the case of a termination of service, at least five days have elapsed following written notification to the subscriber by mail or in person of the Company's intention to terminate the service for such cause.
- C. The WATS Access Line may not be suspended at the customer's request.

1.2.8 Use of the Service by the Customer

- A. The service is provided for use by the customer and may be used by others when so authorized by the customer, providing that all such usage shall be subject to the provisions of this Tariff.

1.2.8 Use of the Service by the Customer - (Continued)

**UTILITY DIVISION  
P.S.C. NO.**

B. The service is furnished subject to the condition that there will be no abuse or fraudulent use of the service. Abuse or fraudulent use of service includes, but is not limited to:

1. The placing or acceptance of a WATS message in response to any uncompleted message telecommunications message which was made in order to transmit or receive intelligence without the payment of the applicable message toll charge.
2. The obtaining, or attempting to obtain, or assisting another to obtain or to attempt to obtain Wide Area Telecommunications Service by rearranging, tampering or making connection with any services of the Company or by any trick, scheme, false representation or false credit device, or by or through any other fraudulent means or device whatsoever with intent to avoid the payment, in whole or in part, of the regular charge for such service.
3. The use of the service of the Company for a message or messages, anonymous or otherwise, if in a manner reasonably expected to frighten, abuse, torment or harass another.
4. The use of profane or obscene language.
5. The use of the service in such a manner as to interfere unreasonably with the use of service by one or more other customers.

1.2.9 Advance Payments

Applicants for service who do not have an account with the Company or its authorized agent or whose financial responsibility is not a matter of general knowledge may be required to make an advance payment at the time of application and at least one month's estimated charges for the service desired.

The amount of the advance payment is credited to the customer's account as applying to any indebtedness under the contract.

Original Sheet 7

**RECEIVED**

WIDE AREA TELECOMMUNICATIONS SERVICE

1.2 GENERAL REGULATIONS - (Continued)

**DEC 27 1991**

1.2.10 Payment of Charges

**UTILITY DIVISION**

- A. The customer is responsible for payment of all charges for service furnished. Charges are based on Tariff rates and regulations in effect at the time the service is furnished. Usage charges are billed at the end of the billing cycle. All other recurring charges are billed monthly in advance. All charges are due when the bill is rendered.

1.2.11 Deposits

The Company or its agent may require an applicant or a present customer to post a deposit not to exceed the estimated amount of the total charges for service and facilities for an average period of two months, such deposit to be held by the Company or its agent as guarantee of payment.

An applicant for service, or a present customer, may satisfy a deposit requirement by providing a Contract of Guaranty in an amount not less than the requested deposit from a present customer acceptable to the Company or its agent. The guaranty contract shall be on a form provided by the Company or its agent which shall include the Company's and/or its agent's right to transfer charges to the limit of the guaranty, from a defaulted bill of the customer, from whom a deposit or a Contract of Guaranty was required, to the guarantor's account or accounts and the further right to suspend the guarantor's service.

The fact that a deposit has been made, or a guaranty provided, shall in no way relieve the customer from complying with the Company's and/or its agent's regulations as to the prompt payment of bills, nor constitute a waiver or modification of the regular practices of the Company or its agent providing for the temporary suspension of service or the termination of the service contract for non-payment of bills.

The amount of the deposit may be refunded at any time at the option of the Company or it will be refunded at the termination of the service either by the customer or the Company, less such sums as may be due the Company for service rendered. Simple interest at the rate of nine per-cent per annum will be paid on deposits held thirty days or more. Payment of the interest to the customer shall be annually if requested by the customer, or at the time the deposit is returned or credited to the customer's account.

1.2.13 Maintenance and Repairs

The Company undertakes to maintain and repair the services which it furnishes to customers. The customer shall be responsible for damages to services of the Company caused by the negligence or willful act of the customer. The customer may not rearrange, disconnect, remove or attempt to repair or permit others to rearrange, disconnect, remove or attempt to repair any equipment installed by the Company except upon the written consent of the Company.

1.2.14 Special Taxes, Fees and Charges

Any assessments, franchise fees, privilege, license, occupation, excise, or other similar taxes or fees, whether in a lump sum or at a flat rate, or based on receipts, or based on poles, wire or other utility property units, imposed upon the company by any governmental authority shall be added pro rata, in so far as practical, to the rates and charges stated in the Company's standard schedules, in amounts which in the aggregate for the Company's customers of any political entity shall be equal to the amount of any such tax upon the Company. The Company shall, so long as any such tax or fee is in effect, add to the bills of the customers in such political entity pro rata on the basis of the revenue derived by the Company from each such customer, an amount sufficient to recover any such tax or fee.

1.2.15 Allowance for Interruptions

- A. Message Telecommunications Service furnished at the customer's request when his Wide Area Telecommunications Service is interrupted is charged for at the Message Telecommunications rates contained in the Message Telecommunications Service Tariff.

1.2.16 Promotional Programs

The Company may, upon Commission approval, offer specific rate incentives during specified promotional periods. The Company will notify the Missouri Public Service Commission by letter prior to the commencement of a promotional program. This letter will specify the terms of the promotion, the specific service offered, and the location and dates of the promotional period.

WIDE AREA TELECOMMUNICATIONS SERVICE

1.3 CONNECTIONS

1.3.1 General

When customer premises equipment is connected to WATS, it must comply with the FCC's Registration Program. If Grandfathered customer premises equipment, test equipment or communications systems are connected, the Minimum Protection Criteria specified in the tariff must be met.

WATS is not represented as adapted for connection to other services or communications systems. It is designed, operated and maintained to provide satisfactory transmission only between a calling and a called service point(s) equipped with suitable customer premises equipment.

The Company is responsible for the quality of transmission for WATS from demarcation point to demarcation point.

1.3.2 Responsibilities of the Customer

When customer premises equipment or a communications system is connected to WATS, the customer assumes responsibility for the connection as follows:

- A. Interference and Hazard - The operating characteristics of customer premises equipment or communications systems connected to WATS must not interfere with, or impair, any of the services offered by this Company. In addition, they must not endanger the safety of Company employees or the public, damage or interfere with the proper functioning of Company equipment, or otherwise injure the public in its use of WATS.

The Company will take immediate action to protect its services or interests if this regulation is violated.

1.3.2 Responsibilities of the Customer - (Continued)

**UTILITY DIVISION  
P. S. C. MO.**

- B. Changes to WATS - The Company is not obligated to alter or modify WATS because of additions or changes to customer premises equipment or a communications system provided by the customer or others.
- C. Testing and Maintenance - If a trouble report occurs on an assembly, the customers must determine whether the fault is in (1) the connected premises equipment or communications system, or (2) WATS, the Company will test and maintain only the services it provides. The testing of WATS will usually be made from a point-of-presence.
- D. Information a Customer must Provide

Prior to reconnecting grandfathered equipment to WATS, the customer must provide the following information about the equipment to the Company:

1. Manufacturers name, model number and type
2. Ringer equivalent number and type (if known)
3. Type of standard jack (if required)
4. Service to which equipment is being connected

1.3.2 Responsibilities of the Customer - (Continued)

D. Information a Customer must Provide - (Continued)

5. Notarized affidavit for premises wiring
6. Description of interface
7. Line or pin assignment for a multiline jack

The customer must also notify the Company when the grandfather equipment is permanently disconnected.

1.3.3 Responsibilities of the Company

- A. General - In addition to furnishing and maintaining its service components for WATS, the Company will provide technical information pertaining to WATS interface parameters as an aid to the customer in selecting the appropriate interface.
- B. Changes in Minimum Protection Criteria, Operations, or Procedures- The Company is not responsible to any party if a change in its WATS components, Minimum Protection Criteria, operations, or procedures, which are consistent with the Registration Program, (1) affects any facilities, customer premises equipment or communications systems provided by others in any way, or (2) requires their modification in order to be used with WATS. However, if such changes can be reasonably expected to materially affect the operating or transmission characteristics of the WATS or render any customer premises equipment or communications system incompatible with WATS, the Company will make a reasonable effort to notify the customer in writing of the proposed change. A reasonable interval will be allowed before the change is implemented to enable the customer to maintain compatibility of its customer premises equipment or communications system with WATS.

1.3.4 Connection to Service Provided by a Local Exchange Carrier

WATS may be connected to services provided by a Local Exchange Carrier. The connections are subject to the regulations in this tariff and the appropriate tariff(s) of the Local Exchange Carrier.

1.3 CONNECTIONS - (Continued)

**UTILITY DIVISION**  
**P.S.C. NO.**

1.3.5 Connection of a Communications System or WATS Equivalent Service

When a communications system or WATS equivalent service is connected to the Company's WATS, the customer must make all arrangements concerning the connected systems or service with its provider. The connection does not constitute a joint undertaking between this Company and the provider of the system or service. The system or service must be operated, and maintained so it will work satisfactorily with WATS. Connections to WATS will be made in accordance with the following:

A. Answer Supervision

When WATS is connected to a communications system which is also connected to switching or terminal equipment, such equipment shall provide the necessary answer supervision so that chargeable time begins upon delivery of the WATS message to the equipment and ends upon termination of the message by the calling party.

B. Minimum Protection Criteria

The connection at the WATS demarcation point must be made so that it continually complies with the specified Minimum Protection Criteria.

C. Communications System Failures

When a communications system fails and the connection to WATS is not through switching equipment, the communications system must be arranged to promptly return the WATS to an idle (on-hook) state. In addition, the customer must promptly notify the Company when the communications system fails.

D. Use of Satellite Facilities

If a communications system uses satellite facilities (directly or indirectly), and is connected to WATS, there may be two or more satellite links involved in the combined connection. In such cases, the Company will not be responsible for any deterioration in the quality of the through transmission of signals on such a connection. The Company will continue to furnish WATS using the service components that it considers to be appropriate. Credit allowance for impaired transmission resulting from such connection will not be granted.

1.3.6 Minimum Protection Criteria

**UTILITY DIVISION  
P. S. C. MO.**

A. General

Minimum Protection Criteria have been specified so that Company personnel, equipment, and services will be protected from the harmful effects of signal power overload, hazardous voltages and longitudinal acoustic, or inductive connections of customer premises equipment and communications systems to WATS.

B. All Connections

Customer premises equipment and communications systems which are connected to WATS on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. To protect other Company services, it is necessary that the signal which is applied at the demarcation point meets the following limits:

a. Metallic Voltage

(1) 4 kHz to 270 kHz

<u>Center Frequency (f) of 8 kHz Band</u>	<u>Max. Voltage in All 8 kHz Bands</u>	<u>Metallic Terminating Impedance</u>
8 kHz to 12 kHz	- (6.4 / 12.6 log f) dBV*	300 ohms
12 kHz to 90 kHz	(23 - 40 log f) dBV	135 ohms
90 kHz to 266 kHz	- 55 dBV	135 ohms

\*dBV = 20 log<sub>10</sub> voltage in volts

- (2) The root-mean-square (RMS) value of the metallic voltage components in the frequency range of 270 kHz to 6 MHz shall, averaged over 2 microseconds, not exceed -15 dBV. This limitation applies with a metallic termination having an impedance of 135 ohms.

1.3 CONNECTIONS - (Continued)

1.3.6 Minimum Protection Criteria - (Continued)

B. All Connections - (Continued)

1. (Continued)

b. Longitudinal Voltage

(1) 4kHz to 270 kHz

Center Frequency (f) of 8 kHz Band	Max. Voltage in All 8 kHz Bands	Longitudinal Terminating Impedance
8 kHz to 12 kHz	- (18.4 / 20 log f) dBV*	500 ohms
12 kHz to 42 kHz	(3 - 40 log f) dBV	90 ohms
42 kHz to 266 kHz	- 62 dBV	90 ohms

\*dBV = 20 log<sub>10</sub> voltage in volts

(2) The root-mean-square (RMS) value of the longitudinal voltage components in the frequency range of 270 kHz to 6 MHz shall, averaged over 2 microseconds, not exceed -30 dBV. This limitation applies with a longitudinal termination having an impedance of 90 ohms.

2. To prevent the interruption or disconnection of a WATS message, it is necessary that the signal applied at the demarcation point be limited. Specifically, the signal at the demarcation point shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the demarcation point in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

**UTILITY DIVISION  
P. S. C. MO'**

C. For Direct Electrical Connections

In addition to the regulations in B., preceding, customer premises equipment and communications systems which are connected to WATS on a direct electrical basis must comply with the following:

1. To prevent excessive noise and crosstalk, it is necessary that the power of the signal presented at the point-of-presence not exceed 12dB below one milliwatt when measured over any three second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the premises equipment or communications system to the demarcation point will be specified for each customer location. In no case shall the power exceed one milliwatt.

D. Acoustic or Inductive Connections

In addition to the regulations in B., preceding, customer premises equipment and communications systems which are connected to WATS on an acoustic or inductive basis must comply with the following:

1. To prevent excessive noise and crosstalk, it is necessary that the power of the signal which is applied by the equipment to the demarcation point located on the customer's premises be limited so that the signal power does not exceed 9dB below one milliwatt when averaged over any three second interval. However, to permit each customer, independent of distance from the point-of-presence, to supply signal power which at the point-of-presence approximates 12dB below one milliwatt when averaged over any three second interval, the Company, at the customer's request, will specify, for each customer location, the signal power at the demarcation point, which shall in no case exceed one milliwatt.

1.3.7 Recording of Two-Way Telephone Conversations

**UTILITY DIVISION**  
**P. & C. NO.**

The FCC has adopted regulations which apply to the recording of two-way telephone conversations on WATS. These services are not represented as adapted to the recording of such conversations. However, customer-provided voice recording equipment may be connected to WATS. Its connection is subject to the Registration Program and to the following:

A. Direct Electrical Connection

(Filed in compliance with an Order adopted May 20, 1948, of the FCC, in Docket No. 6787.) Customer-provided voice recording equipment may be used to record two-way telephone conversations if a distinctive recorder tone is repeated at intervals of approximately fifteen seconds. This distinctive recorder tone is required when recording equipment is in use and is electrically connected with services of the Company. The distinctive recorder tone can be provided as part of: (1) the recording equipment, (2) the customer-provided registration or grandfathered protective circuitry, or (3) a grandfathered connecting arrangement.

The customer-provided voice recording equipment must be arranged so that it can be connected or disconnected (or switched on or off) at the will of the customer.

B. Recording Requirements - If a distinctive recorder tone is not used, one of the following conditions must apply:

1. All parties to the telephone conversation must give their prior consent to the recording of the conversation, and the prior consent must be obtained in writing or be part of, and obtained at the start of, the recording, or
2. All parties to the telephone conversation must be verbally notified at the beginning of the conversation and the notification must be recorded as part of the call, by the recording party.

C. Exceptions to the Requirement for the Recorder Tone

**UTILITY DIVISION**

The distinctive recorder tone is not required:

**P. S. C. MO.**

1. When used by an FCC licensed broadcast station customer for the recording of two-way telephone conversations solely for broadcast over the air. (Filed in compliance with an Order of the FCC adopted December 13, 1972.)
2. When used by the United States Secret Service of the Department of Treasury for recording two-way telephone conversations which concern the safety and security of the person of the President of the United States, members of his immediate family, or the White House and its grounds. (Filed in compliance with an Order of the FCC adopted January 22, 1975.)
3. When used by a broadcast network or by a cooperative programming effort, composed exclusively of FCC broadcast licensees, to record two-way telephone conversations solely for broadcast over the air by a licensed broadcast station. (Filed in compliance with an Order of the FCC adopted December 18, 1975.)
4. When used for recording at United States Department of Defense Command Centers of emergency communications transmitted over the Department of Defense's private line system when connected to WATS. (Filed in compliance with an Order of the FCC adopted May 19, 1976.)
5. When used by the United States Nuclear Regulatory Commission of the Department of Energy with respect to the telephone systems located at its Operations Center for the recording of two-way telephone conversations. (Filed in compliance with an Order of the FCC adopted January 29, 1981.)

D. Acoustic or Inductive Connection

Customer-provided voice recording equipment may not be connected to WATS for the recording of two-way telephone conversations by means of an acoustic or inductive connection, unless its use qualifies under the regulations, "Exceptions to the Requirement for the Recorder Tone."

1.3.9 Standard Jacks - Registration Program

UTILITY DIVISION  
P. S. C. MO.

Standard jacks are provided by the Company to connect Registered Equipment to those services that are subject to the Registration Program. The use of jacks is covered in Part 68 of the FCC's Rules and Regulations. Specific jacks are described in the document on file with the FCC entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configuration Described in Subpart F of Part 68 of the FCC's Rules and Regulations."

These jacks are used to terminate services provided by the Company. Other services or facilities provided by the Company or by others may also be terminated in any spare capacity of the jacks remaining after installation without additional charge for the use of such capacity.

The rates and charges for standard jacks and their typical uses are set forth following. The rates and charges applicable at any given time within the allowable minimum/maximum range will be specified in a supplemental rate schedule filed with and approved by the Missouri Public Service Commission. Any change to a rate or charge within the allowable range shall not be construed as an application to increase or decrease rates.

1.4.4 Line Usage - 800 Service or Outward WATS

**UTILITY DIVISION  
P. S. C. MO.**

Rates for 800 Service in paragraph 1.4.4, A., following will apply to interLATA 800 Service actual usage or the percentage interLATA usage in accordance with the method reflected in the applicable local exchange carrier approved tariff. Rates for intraLATA 800 Service usage will be at the appropriate rates as found in the Tariffs of the local exchange carrier.

Rates for Outward WATS Service in paragraph 1.4.4, B., following will apply to interLATA only usage by rate period. Rates for intraLATA usage will be at the appropriate rates as found in the Tariffs of the local exchange carrier.

A. 800 Service

1. Monthly Usage Rate Table	<u>Day</u>	<u>Evening</u>	<u>Night/ Weekend</u>
First 11 hours, each hour	*	*	*
Next 11 hours, each hour	*	*	*
Next 18 hours, each hour	*	*	*
Over 40 hours, each hour	*	*	*

B. Outward WATS

1. Monthly Usage Rate Table	<u>Day</u>	<u>Evening</u>	<u>Night/ Weekend</u>
First 10 hours, each hour	*	*	*
Next 10 hours, each hour	*	*	*
Next 17 hours, each hour	*	*	*
Over 37 hours, each hour	*	*	*

C. The rates and charges applicable at any given time will be specified in a supplemental rate schedule filed with and approved by the Missouri Public Service Commission.

**DEC 27 1991**

1.4.5 Method of Determining Monthly Charges

The WATS usage charge is determined using steps A. through E. following:

**UTILITY DIVISION  
P. S. C. MO.**

- A. Determine the total number of completed messages for each rate period for each service arrangement.
- B. For 800 Service, apply the Minimum Average Time Requirement of thirty seconds by dividing the number of completed messages for each rate period by 120. (1 message = 30 seconds). For Outward WATS, apply the Minimum Average Time Requirement of one minute by dividing the number of completed messages for each rate period by 60. (1 message = 1 minute)
- C. Determine the total actual hours used for each rate period for each service arrangement.
- D. Determine the total chargeable hours for each rate period for each service arrangement. This is the greater of B. or C., above, rounded to the nearest tenth (one decimal place.)
- E. Determine the total usage charge for all rate periods in each service arrangement by applying the rates shown in the rate table in Section 4.4 for Outward WATS or 800 Service.

**DEC 27 1991**

1.4 RATES - (Continued)

1.4.6 Timing of Calls

**UTILITY DIVISION**

**P.S.C. MO.**

- A. Chargeable time begins when connection is established between service point associated with the WATS access line and the calling or called service point and ends when the calling service point "hangs up," thereby releasing the network connection. If the called service point "hangs up" but the calling service point does not, chargeable time ends when the network connection is released by automatic timing equipment in the telephone network.
- B. When a connection is established in one rate period and ends in another, the rate for each rate period applies to the portion of the connection occurring within that rate period.
- C. The rate charged is determined by the day and time (standard or daylight savings) at the WATS access line location.
- D. When 800 Service is directly connected (i.e., not connected through a Multiline Terminating System) at a customer's premises to a communications system, chargeable time begins when the 800 Service message terminates in or passes through the first multiline terminating system or terminal equipment on that communications system. It is the customer's responsibility to furnish appropriate answer supervision to the point of connection with the 800 Service so that chargeable time may begin.
