TARIFF FORMAT

REC'D JUL 02 2001

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the M.P.S.C. For example, 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the M.P.S.C. follows in its tariff approval process, the most current page number on file with the M.P.S.C. is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.1.

In addition, Company uses industry standard pricing factors such as distance, time-of-day, volume commitments, basic services, term commitments, promotional pricing and credits, and/or combinations of any of these to offer customer-specific call plans. Your credit will be awarded after your recommended end user has been a customer for three consecutive months and has incurred no late fees or other delinquency charges. Additionally, no more than one credit per billing cycle will be provided.

Additional credits earned will be staggered over subsequent billing cycles so that no more than one credit is provided during any two consecutive billing cycles. Two of the three customers complete three months of uninterrupted service by October 1st with no late payment or other delinquency charges and one drops WCSS service after three months but has incurred a late payment fee for the second billing cycle.
