TARIFF FORMAT SHEET

Service Commission

- A. Page Numbering - Page numbers appear in the upper-right corner of the sheet. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added, the page appears as a decimal. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Sheet 14 cancels the third revised Sheet 14. Because of deferrals, notice periods, etc., the most current page number on file with the Commission is not always the Tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

4.1.1 Basic Local Service

Basic Local Service is a service that is available for access by subscribers on a full time basis. Basic Local Service provides Customer with a single, voice-grade communications channel and access to unlimited local calls, "911" and/or "E 911" calls, if available in the Customer's area, and toll free (e.g. "800" or "888") calls.

Basic Local Service does not include any long distance service or other toll services. The following types of calls and services will be blocked by the Company through the ILEC's switch: interLATA, intraLATA, interstate, and international (e.g. "1+" or "0+"); collect calls; operator-assisted calls; third number billed calls; or any service that may be billed to Customer's telephone number (e.g. "900" and "976" calls).

4.1.2 Service Area

Where facilities are available, the Company's service area incorporates the geographic regions and exchanges currently served by incumbent local exchange carriers, including Southwestern Bell Telephone Company.

4.1.3 Local Calling Area

Local calling areas will be identical to the local calling areas of the incumbent local exchange carriers from which the Company purchases services, as those local calling areas are defined in the tariffs of the incumbent local exchange carrier that have been filed with the Commission.

4.1.4.A Call Forwarding

Allows calls to automatically ring to another phone number selected or determined by the Customer.

4.1.4.B Call Waiting

Allows Customer to be notified of an incoming call while having a conversation with another party.

4.1.4.C Call Return

The subscriber may return the last call to the Customer's telephone number by dialing a one or two-digit code.

4.1.4.D Non-Published Number

Allows the Customer to keep its name, street address, and telephone number from being listed in the telephone directory published by the dominant exchange service provider in the Customer's exchange area.

4.1.4.E Caller ID

This feature enables the customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a customer's line, the CPN of incoming calls is displayed on the called CPE during the first long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, only to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to the Company: a) private, nonprofit, tax exempt, domestic violence intervention agencies and b) federal, state, and local law enforcement agencies. The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

A customer may prevent delivery of their calling name and/or number to the called party by dialing an access code immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block delivery of their name and telephone number. The blocking of CPN will not be

provided on calls originating from Customer Owned Pay Telephones. If the Caller ID customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

Any customer subscribing to Caller ID will be responsible for the provision of a display device that will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator-handled calls.

4.1.4.F Three-Way Calling

Allows the Customer to add a third party to a conversation.

4.1.4.G Reserved for Future Use4.1.4.H Call Trace

Allows Customers receiving annoying or anonymous calls to request (i) a telephone number change, which will be provided at no charge by the Company, or (ii) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the customer to dial a code (*57) to automatically request the following information be recorded: the originating telephone number; the date and time of the call; the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will assist the customer (in exchanges where Sprint service is being resold) or activate a Voice Response Script which will assist the Customer in establishing an open file (in exchanges where SWBT service is being resold). Should the Customer decide to prosecute the call originating party, the Customer should contact Company for further instructions. Activation of Call Trace never authorizes Company to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's telephone line or customer may need to contact local law enforcement personnel to provide assistance.

Disconnection or Suspension of Telephone Service

Service Commission

Your telephone service is subject to disconnection or suspension for any of the reasons listed below. If you do not resolve the reason for disconnection or suspension, your service may first be suspended. If service is suspended, your telephone number is reserved for five days, and can be reconnected within that time for a restoration charge of \$25.00 as described in the "Reconnection of Service" section of this Information Bulletin. Additionally, Metro Teleconnect will make reasonable efforts to contact you at least 24 hours in advance prior to disconnecting your telephone service.

3. Failure to substantially comply with terms of a settlement agreement.
4. Refusal after reasonable notice to permit inspection, maintenance, or replacement of telephone utility equipment.
5. Misrepresentation of the identity in obtaining telephone utility service.
6. As approved by federal or state law.

Any person who alleges such an emergency, shall, if requested, provide Company with reasonable evidence of such necessity.

Reconnection of Service

CALL TRACE

Service Commission

Allows Customers receiving annoying or anonymous calls to request (i) a telephone number change, which will be provided at no charge by the Company, or (ii) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the customer to dial a code (*57) to automatically request the following information be recorded: the originating telephone number; the date and time of the call; the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will assist the customer (in exchanges where Sprint service is being resold) or activate a Voice Response Script which will assist the Customer in establishing an open file (in exchanges where SWBT service is being resold). Should the Customer decide to prosecute the call originating party, the Customer should contact Company for further instructions. Activation of Call Trace never authorizes Company to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's telephone line or customer may need to contact local law enforcement personnel to provide assistance.

OPERATOR SERVICES

Metro Teleconnect DOES NOT provide operator services.

TOLL SERVICES ARE BLOCKED

You are ordering Prepaid Service from Metro Teleconnect. Prepaid Service is a prepaid, switched, intrastate, telecommunications service which permits Customers to establish communications between two locations within the State of Missouri that are within the exchanges (the Local Calling Area) in which Metro Teleconnect is authorized to offer and provide service.

Prepaid Service provides you with a single, voice-grade communications channel, including a telephone number and a Directory Listing. Prepaid Service permits you to:

- (i) place calls within the Local Calling Area;
- (ii) access 911 Service if available in your Local Calling Area;
- (iii) place calls to toll-free "800" or "888" telephone numbers.

Prepaid Service does not permit you to originate calls to direct dial (1+) or (0+) toll services; to caller-paid information services (e.g., "900", "976", "711"); or to (0-) access or services. Calls to telephone numbers used for toll services and caller-paid information services will be blocked by the Company.

REFUND OF CONNECTION FEE AND FIRST MONTH'S CHARGES

The Connection Fee and First Month's Prepaid Service Charges you paid at the time you signed-up for service can be refunded to you if you cancel service anytime within 10 business days after signing-up for service.
