3.1.3. Volume Discounts

A. Determination of Discounts. The Company offers volume discounts on its 48 state contiguous United States (domestic) interstate and intrastate services. At the end of a billing cycle the amount of the discount is determined by summing the dollar volume of the customer's MTS, Calling Card, Debit Card, and 800 Service domestic calls. This total is then used to determine the percentage of this discount. The percentage is multiplied by the sum of the domestic dollar volume to determine the amount of the discount. A credit for the discount will be applied to the customer's total bill.

B. Usage exempt from discounts. The following types of calls are not subject to high volume discounts and are not considered in calculating a customer's volume when determining the magnitude of the customer's high volume discount:

1. Calls placed to international locations
