2.8 Responsibility of Carrier

MISSOURI
Public Service Commission

2.8.2 Cancellation Credit

Where Carrier cancels a service or the provision of equipment and the final service period is less than the monthly billing period, a credit will be issued for any amounts billed in advance, prorated at 1/30th of the monthly recurring charge for each day the service was rendered or the equipment was provided. This credit will be issued to the customer or applied against the balance remaining on the customer's account.

2.8.3 Fractional Charges

Charges for a fractional part of a month are calculated by counting the number of days of the month remaining in the billing period before service was discontinued. That number is divided by thirty and the resultant fraction is multiplied by the monthly charge to arrive at the fractional monthly charge.

2.8.4 Customer Complaint Procedure

Carrier will resolve any disputes brought to its attention as promptly and effectively as possible. Customer Service Representatives can be reached via the following 800 telephone number: 1-800-569-0080.

Any unresolved disputes may be directed to the attention of the Missouri Public Service Commission.

In the event of a dispute concerning an invoice, the customer must pay the amount of the undisputed portion of the bill in accordance with timely payment requirements and notify the Company of the disputed portion.

2.9.1 General Provisions

MISSOURI
Public Service Commission

- A. Carrier furnishes its operator assistance services to Pay Telephone Service and Hospitality Service customers. Rates and charges are set forth in the applicable rate schedules set forth in this tariff.
- B. Operator assistance services are provided primarily to subscribers that serve transient End User markets. Terminal equipment accessing Carrier's services will route operator assisted calls over designated carrier facilities to regional digital call processing switches served by the underlying carrier's operator centers.
- C. Calls requiring operator intervention such as Collect, Third Party Billed, Person-to-Person and certain Calling/Credit Card calls will be routed to an operator position by the processor. Carrier operators and automated interfaces will answer each call by identifying the services as that of the Company's.
- D. The operator will collect billing information and perform validation and call acceptance functions. If the call is authorized, the operator will release the call for completion and call timing will then be performed in the processing switch. Automated interface Calling Card and Credit Card calls are validated through an automated interface and if authorized will be completed without operator intervention.
- E. Switch processors forward call message detail via magnetic tape for computer processing and application of tariffed rates. After rating has been performed billing tapes are created and forwarded to local exchange carriers and commercial credit card companies. These companies acknowledge receipt and, after processing, confirm revenues due and payable to Carrier. All calls will be billed to the end user within sixty (60) days of the date of said call.

SECTION 3 - DESCRIPTION OF SERVICE

MISSOURI
Public Service Commission

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when the calling station "hangs up." If the called station "hangs up" but the calling station does not, chargeable time ends when the connection is released by automatic timing equipment within the telecommunications network.

3.2 Start of Billing

For billing purposes, the start of service is the first day on which service is available for use by the customer. The end of service date is the last day, or any portion thereof, on which service was provided by the Company.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs. The customer is responsible for taking all necessary legal steps for interconnecting his customer-provided terminal equipment or communications systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment will be furnished and maintained at the expense of the providing customer, except as otherwise agreed in advance and in writing. The customer is responsible for all costs at their premises, including personnel, wiring, electrical power, and the like incurred in the use of Carrier's service. When such terminal equipment is used, the equipment shall comply with the generally accepted minimum protective criteria standards of the telecommunications industry.

3.5 Calculation of Distance

Usage charges for all intrastate calls are based on flat rates and are not mileage sensitive.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

$$\text{Formula:} \quad \frac{\sqrt{(V1 - V2)^2 + (H1 - H2)^2}}{10}$$

3.6 Minimum Call Completion Rate

The customer can expect a call completion rate of not less than 97% (number of calls completed/number of calls attempted) during peak use periods for Feature Group D (1+) services.
