RE: Notice of New Rate Increases for PremierSERVSM Frame Relay

Dear Valued Customer:

Thank you for using AT&T Long Distance ("AT&T") for your data communications needs. We value your business and want to be sure you are kept aware of changes being made that may affect your service.

Effective March 22, 2013, AT&T will increase interstate rates for PremierSERV Frame Relay ports (all speeds 56 Kbps to 40 Mbps). AT&T will also increase intrastate rates for PremierSERV Frame Relay ports (all speeds 56 Kbps to 40 Mbps), with that increase to be effective March 22, 2013, or such later date as required by the applicable regulatory authority.

The new rates will reflect increases up to 20.59% and will be applicable to Out-of-Term and any permitted new 1-Year Term Plan Agreements executed on or after March 22, 2013. The rate increases will not apply to services already under a Term Plan Agreement executed before March 22, 2013, during the effective term of the Term Plan Agreement.

Your business is important to us. Please contact your AT&T Account Manager or other member of your Sales Team if you would like to discuss these pricing changes, or learn about other service options that might be suitable for your data communications needs. Thank you for choosing AT&T.

Sincerely,

Bob Schaefer
Product Manager - AT&T Frame Relay/ATM services

Please do not send inquiries or payments to the return address on this notice. If you have comments or questions, please contact AT&T Customer Service at the toll-free number on your bill.
