TARIFF FORMATA. Sheet Numbering

Numbers appear in the upper-right hand of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, the first sheet added between sheets 24 and 25 would be 24.1.

B. Sheet Revision Numbers

Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the fourth revised sheet 24 cancels the third revised sheet. Consult the check sheet for the sheet currently in effect.

C. Check Sheets

When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariffs with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). The tariff user should refer to the latest check sheet to find out if a particular page is the most current page on file with the Commission.
