The Telephone Company shall not be required to attach its equipment or lines to wiring not owned and installed by it, nor shall equipment, apparatus, circuits, or devices not furnished by the Telephone Company be attached to or connected with facilities furnished by the Telephone Company, whether physically, by induction or otherwise, unless provided for elsewhere in the tariffs. The terms and conditions specified in such contracts are subject to these General Rules and Regulations, the General Exchange Service Tariffs and the Local Exchange Service Tariffs for the particular exchange from which service is to be furnished. Any change in rates, rules or regulations shall act as a modification of the contract to that extent, without further notice.

- g. The 911 calling party forfeits the privacy afforded by nonpublished and unlisted telephone number service to the extent that the telephone number, address and name associated with the originating station location may be furnished to a PSAP. Information will be provided only for the purpose of responding to emergency calls. Information may only be retrieved by the PSAP on a call-by-call basis and may only be used for the purpose of responding to 911 emergency calls.

D. RATE REGULATIONS AND CHARGES

The following services are available for the provision of D911 and E911 Service:

1. Interoffice Trunk-

The interoffice trunk rate covers the cost of the dedicated facility between central offices. Recurring rates are those identified in the PSC MO. No. 1 Private Line Tariff. Services in this tariff define the types of access service available for 911 access. The type of facility available is limited to the offerings in the Private Line Tariff. The Interoffice trunking charges apply to each trunk ordered. A minimum of two trunks is required on each interoffice route. A mileage rate and trunk termination rate apply.

2. ANI (Automated Number Identification)-

ANI provides for the telephone number of the calling party to be forwarded to the PSAP. ANI is a nonchargeable element. ANI does not guarantee the capability of forwarding the number of an off premise station location or for stations behind business systems which will possess the identity of the main billing number.

3. PSAP Data Base Update Service-

The Company will provide the Database Provider with an initial list, as well as periodic updates, of customer names, telephone numbers, and billing addresses. These updates will be taken directly from Telephone Company billing and cable records, which do not always include service addresses. Procedures will be mutually agreed upon by the Customer and the Company.
