Service Commencement Date

The first date on which the Company notifies the Customer that the requested service or facility is available for use, unless extended by the Customer's refusal to accept service which does not conform to standards set forth in the Service Order or this tariff, in which case the Service Commencement Date is the date of the Customer's acceptance. 5. SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.1 General

The various types of Carrier service offerings are described below. Carrier services are billed at predetermined monthly rates. Recurring charges are billed in advance of the month in which service is performed. In addition, the optional features and any extraordinary installation costs other than recurring and non-recurring charges may apply as described herein. Customers requesting these services may subscribe to services on a month-to-month basis, or for term discount plans of 1 to 5 years. Customers subscribing to a term discount plan may receive a discount on charges for these arrangements. Agreements for services in excess of 5 years will be negotiated on an ICB. All arrangements will be filed with the Missouri Public Service Commission prior to service.

5.2 Service Configurations

There are two types of service configurations over which Carrier's services are provided: point-to-point service and multipoint service.

a) Point-To-Point Service

Point-To-Point Service connects two Customer-designated premises, either on a directly connected basis, or through a hub where multiplexing functions are performed.

b) Multipoint Service

Multipoint Services connect three or more Customer designated premises through a Carrier hub. There is no limitation on the number of locations connected via multipoint service. However, when more than three points are provided in tandem, the quality of service may be degraded. Multipoint service may be provided where technically possible. If Carrier determines that the requested characteristics for a multipoint service are not compatible, the Customer will be advised and given the opportunity to change the order within 60 days.

The following service descriptions and technical specifications will apply to Carrier's services. When references to Bellcore Technical Publications on file with the Missouri Public Service Commission are made for performance criteria, the criteria will be considered objectives for Carrier's performance. In no case should the reference to these Bellcore standards be construed as creating any warranties on the part of Carrier. Technical publications are available for review by the Customer upon request.

a) Voice Grade Service (DS-0)

A Voice Grade Facility is a channel which provides voice frequency transmission capability in the normal frequency range of 300 to 3000 HZ and may be terminated as analog two-wire or four-wire, or where facilities permit, as a four-wire in a digital format when used in conjunction with another Voice Grade Facility termination at the other end. Voice Grade Facilities are provided between Customer designated locations or between a Customer designated location and a Carrier's hub.

Transmission specifications are defined in Bellcore Technical Reference TR-TSY-000335, issue 2 and PUB 41004, Table 4, and those publications referenced therein for Voice Grade frequency (300-3000hertz Voice Grade Transmission).

As Carrier does not provide the electronics, Carrier cannot test and monitor the facilities. When available, pricing will be on a per strand per mile basis.

When provided, the type of facility and the route of the facility will be determined by Carrier. Carrier makes no guarantee or warranty of the suitability of Dark Fiber for purposes intended by the Customer.

5. SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS (Cont'd)5.3 Service Descriptions and Technical Specifications (Cont'd)h) Dim Fiber Services

Dim Fiber is a service that permits the Customer to utilize a portion of Carrier's bandwidth in increments that are traditionally non-standard telephony bandwidths, such as 4 Nbps, 10 Mbps, 16 Mbps, or 100 Mbps. Dim Fiber service is offered only where facilities permit, and may be offered with custom multiplexing equipment or utilizing Customer provided equipment. Dim Fiber will be priced based on the capacity and the multiplexing services required. As Carrier may not provide the electronics, Carrier may not test and monitor the facilities.

When provided, the type of facility and the route of the facility will be determined by Carrier. When the Customer provides the electronics, Carrier makes no guarantee or warranty of the suitability of Dim Fiber for purposes intended by the Customer.

i) Multiplexing Services

Multiplexing is provided in the following configurations:

M13 Multiplexing (ICB)

An arrangement that converts a 44.736 Mbps channel into 28 DS-1 channels using digital time division multiplexing.

DS-1 to DS-0 Multiplexing

An arrangement that converts a 1.544 Mbps channel into 24 channels for use with Voice Grade Facilities or DDS.

j) Private Local SONET Ring (PLSR)

Private Local SONET Ring (PLSR) service is a local channelized service providing an optical fiber based self-healing digital channel for two-way transmission. The architecture of PLSR is designed to increase the reliability and availability for customer's private line and access services. The initial offering of PLSR will provide dedicated private SONET Ring networking between various customer sites and Company nodes. A dedicated fiber ring architecture is the preferred transport medium consisting of optical/electrical elements (OC-n fiber muxes) dedicated to the Company end-user customer.

Private Local SONET Ring (PLSR) high-bandwidth services provide customers with the high-quality point-to-point circuits and real-time restoration necessitated by mission-critical applications.

The Company's initial PLSR offering consists of the following restorable service types:

- OC-3
- OC-12
- OC-48

k) Private Local SONET Ring (PLSR) Concatenated (c)

Private Local SONET Ring (PLSR) Concatenated (c) service allocates unchannelized service, providing an optical fiber based self-healing digital two-way transmission. Concatenation is a method of delivering very large amounts of bandwidth by bonding multiple sub rate channels within a SONET payload.

Unlike channelized PLSR services which provides "network handoffs" to demarcations, such as DS1 and DS3 terminations, concatenated PLSR services provides the total ordered bandwidth within the same channel delivered. OC-3(c) service delivers approximately 155.52Mbps, OC-12(c) delivers approximately 622.08Mbps and OC-48(c) is approximately 2.488Mbps via an optical delivery.

The Company's PLSR(c) offering consists of the following restorable service types:

- OC-3(c)
- OC-12(c)
- OC-48(c)

Note:

- Minimum network SONET availability to provide OC-3(c) must be OC-12
- Minimum network SONET availability to provide OC-12(c) must be OC-48
- Minimum network SONET availability to provide OC-48(c) must be OC-192

I) Inter City Private Line Service

Inter-City Private Line Service provides large capacity point-to-point private data facilities to those subscribers whose businesses require the exchange of high volumes of data. This dedicated service is designed to deliver DS-1, DS-3, OC-3, and OC-12 services between two customer designated demarcation points utilizing TelCove's Dense Wavelength Division Multiplexing (DWDM) backbone transport network.

1. DS-1 and DS-3 Service

DS-1 and DS-3 Service are high capacity point-to-point private line services designed for the simultaneous full-duplex transmission of digital signals at a nominal speed of 1.5644 and 44.736 Mbps respectively.

2. OC-3 Service

OC-3 Service is a high capacity point-to-point private line service designed for the simultaneous full-duplex transmission of digital signals based on the Synchronous Optical Network (SONET) standard at a nominal speed of 155 Mbps.

3. OC-12 Service

OC-12 Service is a high capacity point-to-point private line service designed for the simultaneous full-duplex transmission of digital signals based on the Synchronous Optical Network (SONET) standard at a nominal speed of 622 Mbps.

4. Rates and Charges

Monthly recurring charges are mileage based and include local access charges from TelCove's point of presence to the subscriber's demarcation point.

5. Installation Interval

The installation interval for Inter-City Private Line Service will be determined on an individual case basis (ICB). There will be no installation charge for any facility with a term equal to or greater than three years.

m) Ethernet Service*

Ethernet service will offer Ethernet connectivity with bandwidth options of 10/20/30/40/50/100/200/300/400/500/600/1000 Mbps using a core Ethernet switch in each market to provide point-point, point-multipoint and any to any customer configurations.

A. Premises Access Connection

The Premises Access Connection provides the customer premises an Ethernet transport connection to the network using SONET muxing equipment. This access will be provided with bandwidth options of 10, 20, 30, 40, 50, 100, 200, 300, 400, 500, 600 and 1000 Mbps.

B. Ethernet Port Speed

The Ethernet Port Speed defines the physical connection at the customer's router/premises equipment and at the company switch at 10/100/1000 Mbps options. The Ethernet Port Speed element is not included when the customer application is simple point-to-point design that does not utilize the company switch.

C. VLAN (Virtual Local Area Network)

The VLAN element, implemented within the Ethernet switch, is defined either on the basis of port address or MAC (Media Access Control) address. The VLAN provides a means by which LAN users on different physical LAN segments appear to be on the same physical segment of an enterprise-level logical LAN.

**This service is subject to the availability of necessary facilities.*

5. SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS (Cont'd)5.3 Service Descriptions and Technical Specifications (Cont'd)n) Customer Provided Equipment [T]

Customer provided terminating equipment such as CSUs, multiplexers, and other terminating equipment may, at the Customer's request, be provided by the Customer, at the Customer's expense. Carrier makes no guarantees or warranties as to the performance of Customer provided equipment.

5.4 Rate Categories

There are six rate categories that may apply to Carrier's Services.

a) Channel Terminations

The Channel Termination Rate Category provides for the communications path between a Customer designated premises, and another Customer designated premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the Carrier's service is to be connected, and the type of signaling capability (if any). One channel Termination charge applies per Customer designated premises at which the service is terminated.

b) Channel Mileage

The Channel Mileage Rate Category provides for the transmission facilities between two or more Customer designated premises. The Channel Mileage Rate Category is not applied to services that are less than one V&H computed mile (as described in F4 of this tariff), unless specified. Channel Mileage Rates are comprised of a Fixed Mileage Rate, applied to the first mile, and a Per Mile Rate Element, applied for each mile.

5. SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS (Cont'd)5.4 Rate Categories (Cont'd)c) Optional Features and Functions

The Optional Features and Functions Rate Category provides for optional services which may be added to a Carrier's service to improve its quality or characteristics to meet specific communications requirements. These services are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be derived using various combinations of equipment.

d) Extraordinary Charges

From time to time, customers may request special services not addressed specifically by rate elements in this tariff, or services to locations that may cause Carrier to incur extraordinary expenses not contemplated in the provision of standard service offerings. These costs include, but are not limited to:

- Additional construction costs
- Building space rental or rights-of-way costs
- Additional equipment
- Special facilities routing

In these cases, the Customer will be billed additional charges computed on an ICB. Special services not addressed in this tariff shall be approved by the Missouri Public Service Commission prior to the provision of such service.

5. SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS (Cont'd)5.6 Regulations and Computations of Mileage

- a) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- b) All times refer to local time.
- c) All inter-city services are rated according to the mileage between the Carrier's Point of Presence in each city.
- d) Airline mileage, used in connection with determining rates for intercity portions of services and facilities, is obtained by using the "V" and "H" coordinates assigned to each point as set forth in (e) below. This procedure is referenced in the AT&T Tariff FCC No. 10. To determine the airlines distance between any two locations, proceed as follows:
 - (i) Utilize the "V" and "H" coordinates for each Customer designated location.
 - (ii) Obtain the difference between the "V" coordinates of each of the locations. Obtain the difference between the "H" coordinates.
 - (iii) Square each difference obtained in step (ii) above.
 - (iv) Add the square of the "V" difference and the "H" difference obtained in step (iii) above.
 - (v) Divide the sum of the square by 10. Round to the next higher whole number if any fraction is obtained.

5.7 Contract Rates - Special Pricing Arrangements-ICB

- a) In lieu of the rates otherwise set forth in this tariff, rates and charges, including minimum usage, installation, special construction and recurring charges for Carrier's services may be established at negotiated rates on an ICB, taking into account the nature of the facilities and services, the costs of construction and operation, the volume of traffic, the length of service commitment by the Customer, and use of facilities by other customers. Such arrangements shall be considered Special Pricing Arrangements, the terms of which will be set forth in individual Customer contracts. However, unless otherwise specified, the terms, conditions, obligation and regulation set forth in this tariff shall be incorporated into, and become a part of, said contract, and shall be binding on Carrier and Customer. Specialized rates or charges will be made available to similarly situated customers on a non-discriminatory basis. All special Pricing Arrangements, including ICB, shall be filed with the Missouri Public Service Commission.
- b) In addition to any rate or charge established by the Carrier, the Customer will also be responsible for any recurring or non-recurring charges imposed by local exchange telephone companies incurred by or on behalf of the Customer in establishing and maintaining service. Such charges may be billed by the Carrier or directly by the local exchange company, at the Carrier's option.

5.8 Back Billing

Carrier shall be entitled to revise bills previously rendered to adjust for previously rendered unbilled service, or adjust upward a bill previously rendered, assuming that the customer was aware of the unbilled services during the period the services were unbilled, for a period of six years after the service was rendered.
