**SURREBUTTAL TESTIMONY**

**OF**

**J. RICHMOND BURDGE**

**UNITED ELECTRIC d/b/a AMEREN MISSOURI**

**CASE NO. EA-2016-0208**

**I. INTRODUCTION**

**Q. Please state your name and business address.**

A. My name is J. Richmond Burdge and my business address is P.O. Box 2230, Jefferson City, Missouri 65102.

**Q. By whom are you employed and in what capacity?**

A. I am employed by the Missouri Office of the Public Counsel ("OPC") as a Research Analyst.

**Q. On whose behalf are you testifying?**

A. I am testifying on behalf of the OPC.

**Q. Are you the same J. Richmond Burdge who provided rebuttal testimony in this case?**

A. Yes, I am.

**Q. What is the purpose of this testimony?**

A. The purpose of this testimony is to respond to the rebuttal testimony provided by Claire M. Eubanks on behalf of Missouri Public Service Commission Staff ("Staff") in this case. Specifically, I address her application of the "*Tartan* Criteria."

**Q. What is OPC's position?**

A. The solar project Ameren Missouri has proposed does not meet several of the so-called "*Tartan* Criteria" for judging the appropriateness of utility projects.

1 II. THE “TARTAN CRITERIA”

2 Q. What are the *Tartan* Criteria and what purpose do they serve?

3 A. The *Tartan* Criteria were first described in the Commission’s Report and Order (pp. 10-  
4 26) in case GA-94-127, *In the Matter of the Application of Tartan Energy Company, LLC*,  
5 *d/b/a Southern Missouri Gas Company*.

6 The five *Tartan* Criteria are as follows:

- 7 1. Need for Service;  
8 2. Applicant’s Qualifications;  
9 3. Applicant’s Financial Ability;  
10 4. Economic Feasibility of Proposal; and  
11 5. Promotion of the Public Interest.

12 It is my understanding that the Commission applies the *Tartan* Criteria in order to assist in  
13 determining whether a company’s request for a certificate of convenience and necessity  
14 (“CCN”) is “necessary or convenient for the public service.”

15 Q. Why did Ms. Eubanks discuss these criteria in her testimony?

16 A. She proposed that the Commission’s Report and Order in KCP&L Greater Missouri  
17 Operations Company’s (“GMO’s”) Greenwood solar facility case (EA-2015-0256) could  
18 “provide...guidance” to the Commission in deciding whether Ameren Missouri’s  
19 proposed solar facility is “necessary or convenient for the public service”.<sup>1</sup>

20

---

<sup>1</sup> EA-2016-0208, Rebuttal Testimony of Claire M. Eubanks, p. 2.

1 Q. Did Staff perform any analysis to demonstrate that the project proposed in the  
2 current case meets the *Tartan* Criteria?

3 A. No. Staff did not quantify any considerations of economic feasibility concerning this  
4 project and did not quantify any benefit to ratepayers that would result from its approval.<sup>2</sup>  
5 To make its case that the Company's application meets certain *Tartan* Criteria, Staff relies  
6 on the parallel case of GMO's Greenwood solar facility without examining Ameren  
7 Missouri's proposed facility adequately.

8 Q. Are there problems with allowing EA-2015-0256 to provide guidance in the present  
9 case?

10 A. Yes. It is my understanding that the Commission's Report and Order in EA-2015-0256 is  
11 currently under appeal. In this instance, the Commission's Staff has forgone the duty of  
12 analyzing the proposal at hand to present an informed analysis. Instead, Staff relies on the  
13 Commission's decision in the Greenwood case despite the imperfect parallel between the  
14 two cases as well as the uncertain position of that particular case.

15  
16 III. APPLYING THE *TARTAN* CRITERIA

17 Q. The *Tartan* Criteria refer to a "service" provided by the utility.<sup>3</sup> What service would  
18 Ameren Missouri be providing to its customers with this proposal?

19 A. As described in my rebuttal testimony, Ameren Missouri has ample generating capacity  
20 for the next several years so the proposal cannot be said to be necessary for generating

<sup>2</sup> EA-2016-0208, Responses to DR 0042 Opitz, DR 0044 Opitz.

<sup>3</sup> GA-94-127, *In the Matter of the Application of Tartan Energy Company, LLC, d/b/a Southern Missouri Gas Company*, Report and Order, p. 10.

1 capacity. Ameren Missouri is also compliant with its requirements for Solar Renewable  
2 Energy Credits ("S-RECs") so the proposal does not provide the "service" of helping to

3 meet that need. There is no evidence showing a need for the proposed "service" in order to  
4 provide safe and adequate electric service. In fact, due to the complete lack of details  
5 concerning location and construction, it is reasonable to conclude that there is not even a  
6 "proposal" for the Commission to consider.

7 **Q. Applying the *Tartan* Criteria as closely as possible given these ambiguities, according**  
8 **to the first of the five criteria, is the service provided by the proposed solar facility**  
9 **needed?**

10 A. No. As I have demonstrated in my rebuttal testimony and mentioned above, Ameren  
11 Missouri does not need additional facilities to serve its customers at the current time.  
12 Furthermore, this project is not necessary for Renewable Energy Standard ("RES")  
13 compliance.

14 **Q. Is Ameren Missouri qualified to provide the service?**

15 A. Yes, Ameren Missouri's current operation of its O'Fallon Solar plant demonstrates the  
16 company can operate solar facilities.

17 **Q. Does Ameren Missouri have the financial ability to build the proposed solar facility?**

18 A. OPC does not dispute that Ameren Missouri currently collects more than \$3.2 billion from  
19 ratepayers and other sources annually.<sup>4</sup> If this project is permitted, the company will  
20 include a related \$10 million in rate base, causing a concomitant rise in customer rates. In  
21 that sense, Ameren Missouri has the financial ability to complete the project. Judging by

<sup>4</sup> ER-2016-0179, Direct Testimony of William R. Davis, Schedule WRD-3.

1 its own quarterly earnings reports, which included a positive assessment from the  
2 president and chief executive officer and an upward adjustment of 2016 share price  
3 guidance, Ameren Missouri's financial health is quite robust and very capable of  
4 supporting the construction of a potential project of this size.<sup>5</sup>

5 **Q. Is the proposed facility economically feasible?**

6 A. No. There is no evidence to demonstrate the project is economically feasible. This  
7 proposal will increase rates for a potential project that customers do not need. To consider  
8 a project "economically feasible" because it will result in a relatively minor rate increase  
9 within the context of overall rate increases is not appropriate. Such a standard disregards  
10 potential impacts on low-income ratepayers, many of whom already require help from  
11 low-income assistance programs to pay their bills or arrearages. Rather, to show economic  
12 feasibility, a party should demonstrate that the benefits to customers outweigh the costs to  
13 customers. The Commission should evaluate "economic feasibility" from the ratepayer's  
14 perspective when evaluating this project.

15 **Q. Does Ameren Missouri's proposed solar facility promote the public interest?**

16 A. No. As I have described above and in my rebuttal testimony, this project would burden  
17 Ameren Missouri's ratepayers with the cost of a project which they do not need and  
18 provides them no known benefits. For these reasons, it would not promote the public  
19 interest, and should be rejected by the Commission.

20 **Q. Does this conclude your testimony?**

21 A. Yes, it does.
