3.7 Custom Business Services (continued)

3.7.12 SBC Long Distance Virtual Private Network (VPN)¹ (continued)

C

(D) Features (continue)

.2 Public Dialing Plan

Public Dialing Plan allows the VPN user to dial a 1+10-digit number from a VPN switched station using the North American Dialing Plan and have that call rated as a VPN call. This functionality is specifically designed for Switched Access lines presubscribed to the Company for the provision of outbound long distance Service. The VPN user may complete three different call types using the Public Dialing Plan: (1) switched to dedicated (VPN On-Net), (2) switched to switched (Virtual On-Net), and (3) switched to switched (VPN Off-Net). This feature requires that the VPN Customer's Switched Access lines be presubscribed to the Company for the provision of interstate Service.

.3 Forced On-Net

Forced On-Net enables a VPN user to dial another station within the same VPN service using the North American Dialing Plan and have the call routed as if the user had dialed the private number.

¹ This Service is no longer available for new Customer term plan agreements effective July 15, 2006. Existing Customers may add, move, remove or change lines and/or locations for the duration of their current term plan agreement. This Service is no longer available to existing Customers upon expiration of the Customer's term plan.

.4 Network Overflow

Network Overflow provides the ability for VPN On-Net calls to be routed over an alternate route should the primary route (or subsequent alternate routes) be busy. For example, if a VPN On-Net call cannot be completed due to a busy condition, the call can be routed over another dedicated switch/trunk group or over public network facilities. Network Overflow can only be applied to VPN Dedicated Access lines.

.5 Call Screen Routing

Call Screen Routing provides the capability to screen or route calls based on a number of parameters, such as the ANI from a switched line. VPN Customers may choose to block calls to a particular geographical area, or route calls depending on time of day, day of week, or day of year. Customers may subscribe to CSR features without subscribing to VPN Authorization Codes.

¹ This Service is no longer available for new Customer term plan agreements effective July 15, 2006. .6 VPN Authorization Code

Customers must subscribe to CSR in order to obtain VPN Authorization Codes. The VPN Authorization Code is used to override CSR restrictions imposed on the VPN Service. When a call screen restriction is reached, the VPN user(s) will be informed by an announcement that they do not have the proper authority to place the call. To override the restriction and enable the call to proceed, user(s) are required to enter a VPN Authorization Code with the appropriate Authorization Level. The VPN Authorization Code may be from one (1) to twenty-three (23) digits in length.

¹ This Service is no longer available for new Customer term plan agreements effective July 15, 2006. .7 Re-Origination

Re-Origination allows VPN members to make multiple calls during a single remote access session. That is, rather than redialing the remote access toll-free number for each successive call, the VPN member may simply press the pound (#) key on the telephone keypad on completion of a call and dial the next number the member wishes to call. The VPN member may make up to four (4) re-originated calls. A separate call detail record will be created for each individual call.

.8 Account Codes

Account Codes are optionally available with VPN Service.

(E) Commence of Service

Once Service is implemented and tested, billing for the Service will begin upon receipt of Customer's acceptance of the Service. This applies to both the initial VPN Service(s) and additional VPN Service(s).

(F) Billing

Customers subscribing to VPN will be direct-billed by the Company. The VPN Service is identified with the Corporate BAN of a Billing Hierarchy, and as such, there can only be one VPN per Billing Hierarchy and vice versa. The Corporate BAN is always an invoice point, but VPN Customers may request multiple invoice points throughout the Billing Hierarchy, such that different corporate organizations, divisions, groups, etc. are billed individually for the VPN charges that they incur.
