GENERAL EXCHANGE SERVICE TARIFFS

APPLICATION AND EXPLANATION OF SYMBOLS

RECEIVED
JUL 14 1955
MISSOURI
Public Service Comm.

A. APPLICATION

These Tariffs apply to the General Telephone Exchange Services of the Grand River Mutual Telephone Corporation, hereinafter referred to as the Telephone Company, in all Exchanges of the Telephone Company. In the event of any conflict between any rate, rule or regulation contained in these General Exchange Service Tariffs and any rate, rule or regulation contained in the Local Exchange Service Tariffs, the rate, rule or regulation contained in the Local Exchange Service Tariff shall apply.

FILED
AUG 15 1955

The provision of services and facilities, as provided herein, is subject to the General Rules and Regulations of the Telephone Company, which General Rules and Regulations as they now exist or as they may be revised, added to or supplemented by superseding issues are hereby made a part of these General Exchange Service Tariffs.

PUBLIC SERVICE COMMISSION

These Tariffs cancel and supersede all other Tariffs of the Telephone Company issued and effective prior to the effective date of these Tariffs.

B. EXPLANATION OF SYMBOLS

- (C) Signifies a changed regulation.
- (D) Signifies a discontinued rate, treatment or regulation.
- (I) Signifies an increased rate or new treatment resulting in increased rate.
- (N) Signifies a new rate, treatment or regulation.
- (R) Signifies a reduced rate or new treatment resulting in reduced rate.
- (T) Signifies a change in text but no change in rate, treatment, or regulation.

SERVICE CONNECTION CHARGES

- 1.0 The term "Service Connection Charges" is used to define refundable charges made for the establishment of a phone service or subsequent additions, moves, or changes to that service.
- 1.1 Service Connection Charges are in addition to any other scheduled rates and charges normally applying under the tariffs. They apply in addition to and not in lieu of Mileage Charges, Installation Charges, or Construction Charges made because of unusual costs in establishing service.
- 1.2 Service Connection Charges are payable at the time application is made for the particular service or facility, and prior to the establishment of service, or upon presentation of a bill. Service may be established in advance of payment in the case of Service Connection Charges for additions to the service of existing subscribers or for Departments, Administrations, and Agencies of the Federal, State, County, Township, or Municipal Governments.

SERVICE CONNECTION CHARGES

DEC - 1 1986

MISSOURI

Public Service Commission

2.0 SERVICE CONNECTION CHARGES:

These charges cover any work done at the request of the subscriber for single or individual line business or residence service.

2.1 SERVICE ORDERING CHARGE

covers all work associated with creation and processing of a service order, including initial interview with subscriber, work done as to application card and other permanent records, typing service orders, distribution of service order copies and completion of all other records originating from service orders.

2.2 CENTRAL OFFICE ACCESS CHARGE

covers all work (i.e. central office wiring, programming, or outside wiring) involving the access line extending from the Company's Central Office to the subscriber's premises. One charge will apply for each access line. This charge does not anticipate "construction" which is covered in other parts of these tariffs.

PAYPHONE SERVICE

JAN 15 1997

A. GENERAL REGULATIONS

MISSOURI
Public Service Commission

1. Payphone Service includes lines to which coin, coinless, card reader or a combination of coin/card reader telephones may be attached.
2. Payphone Service is a two-way or optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. In the case of one-way service, intercept treatment will be provided.
4. A maximum of one customer-provided instrument implemented pay telephone may be connected to any one Instrument or CO implemented coin line.
5. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
6. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
7. A Network Interface Device will be installed at a location mutually agreed upon by the Payphone Service Provider and the Company. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
8. One directory will be distributed without charge for each payphone business exchange line.
9. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

PAYPHONE SERVICE (Continued)

MISSOURI +
Public Service Commission

A. GENERAL REGULATIONS (Continued)

- 10. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
- 11. The Company shall not be liable for shortages of coins, collected and deposited at the subscriber's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Missouri Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule of regulations shall prevail.
- 12. Off-Premise Extensions to a payphone service provider on non-contiguous property are not permitted. Extensions on the same continuous property are permitted.
- 13. Local messages from Payphones are charged at no higher than twenty-five (25) cents for each call.
- 14. The Multi-line Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone Instrument and CO Implemented coin lines.

B. RESPONSIBILITY OF THE CUSTOMER

- 1. The Customer for the purposes of this tariff is defined as the Payphone Service Provider.
- 2. The customer shall be responsible for the installation, operation and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible to comply with the requirements set forth in the American With Disabilities Act of 1990.

PAYPHONE SERVICE (Continued)

JAN 15 1997

B. RESPONSIBILITY OF THE CUSTOMER (Continued)

3. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
4. The customer shall be responsible for obtaining a Certificate of Service Authority (CSA) to provide Payphone Service and for providing proof of said authority prior to installation of service.
5. Each customer must provide instructions, attached or in close proximity to the set, for use including specific instructions for the above requirements; refunds and complaints; one-way calling if so equipped; long distance access; and must prominently display notice in close proximity to the set that the Instrument Implemented phone is not a Company Telephone. Said instruments shall also show the telephone set's working number and include a local or toll free number to allow the public to directly contact the private payphone owner.
6. Customers who elect not to subscribe to Selective Class of Call Screening will be fully responsible for all calls billed to customer's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release customer from paying any such charges. Customer will hold the Telephone Company harmless from and against any liability or loss resulting from all calls billed to customer's exchange access line.
7. Any federal, state, or local taxes on the Customer Owned Pay Telephone or calls made from that phone are the responsibility of the customer.
8. The customer shall not program or cause to be programmed any such telephone used in connection with this service to limit the duration of a local message.

PAYPHONE SERVICE (Continued)

MISSOURI
Public Service Commission

C. VIOLATION OF REGULATIONS

1. Where any customer-owned pay telephone is in violation of this Tariff, the Company will notify the customer in writing of the violation.
2. The customer shall discontinue use of the customer-owned pay telephone or correct the violation and notify the Company in writing within five (5) days after receipt of such notice that the violation has been corrected.
3. Failure of the customer to discontinue such use or to correct the violation will result in the suspension of the customer service until such time as the customer complies with the provisions of this Tariff.

D. INSTRUMENT IMPLEMENTED PAYPHONE SERVICE

Instrument Implemented Payphone Service is offered for use with a customer provided pay telephone. All attachments of a customer provided instrument to the network must be made pursuant to the rules and regulations set forth in this Tariff and as required by State and Federal commission.

E. CENTRAL OFFICE (CO) IMPLEMENTED COIN LINE

1. Central Office Implemented Coin Line provides coin signaling. It is a line side connection from the local exchanges switch to the point of demarcation at the customer premise.
2. Features are additives to the operation of a flat rate access line that provide for CO Implemented coin line service. The Company offers those features that are provided by the functionality of the Company's switches. These include coin supervision, coin control (collect and return of coins, if applicable), and answer supervision. CO is implemented coin line features that are implemented by the functionality of an operation service provider, such as coin rating, coin refund, repair referral, and operation call screening, are the responsibility of the Payphone service provider (Customer).

PAYPHONE SERVICE (Continued)

JAN 15 1997

E. CENTRAL OFFICE (CO) IMPLEMENTED COIN LINE (Continued)

3. CO Implemented Coin Line features, including coin line signaling, coin collection and return (where applicable) and answer supervision, are provided by the Telephone Company per the technology available from the Company's facilities. It shall be the responsibility of the CO Implemented Coin Line payphone owner to assure technical and operational compatibility with the coin line features offered by the Telephone Company.

F. FEATURES AND FUNCTIONS

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Coin Line.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

GENERAL EXCHANGE SERVICE TARIFFS **Missouri Public Service Commission**

Liability

REC'D DEC 02 1999 (N)

- (A) The Telephone Company will make reasonable efforts to cure any material failure to provide service caused solely by year 2000 defects in Telephone Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-Telephone Company processes, equipment and systems, the Telephone Company is not responsible for failures caused by circumstances beyond its control including, but not limited to, failures caused by: (1) the Customer; (2) other telecommunications providers as defined by Missouri statute; or (3) customer premises equipment. In addition, the Telephone Company does not ensure compatibility between Telephone Company and non-Telephone Company services used by the customer.

M. PRIVATE LINES (LOCAL)

MISSOURI

Public Service Commission

1. The Telephone Company will furnish and maintain Private Lines, where facilities are available and within the Exchange Area, for telephone communication between stations not connected to the exchange switchboard.

2. If any of the circuit required to furnish the service is outside the Base Rate Area, such circuit is furnished in accordance with the regulations contained under "Construction Charges" in the General Rules and Regulations.

3. The following rates apply Monthly Rates*

a. For the initial one-half mile of circuit or fraction thereof, circuit measurement \$ 3.00

b. For each additional one-fourth mile of circuit or fraction thereof, circuit measurement \$.70

Per Jerry Holman of the Company, this applies to very rarely therefore, no annual mileage calculation 5/94

Section Number II

GENERAL EXCHANGE SERVICE TARIFFS

MISCELLANEOUS SERVICES AND FACILITIES (Continued)

N. OFF-PREMISE EXTENSION (OPX) SERVICE

1. Off-premise extension circuits are provided to allow the customer the option of extending his telephone service to a second location within the wire center using the company's cable or fiber distribution facilities. Off-premise extension circuits are furnished subject to the availability of circuits and provided when no unusual expense is involved. Distances for determination of rates shall be based on airline miles between the normal location and the location of the off-premise extension. Off-premise extension service is not available in exchanges served by fiber. (N)

2. If a customer requests an OPX line at the same premise and: (a) the line goes back to the pedestal, and (b) a cable pair from an additional premise cable to a separate location is used, then the following OPX charges apply.

a. Mileage Charges*. Customers will be billed at \$0.70/per ¼ mile of cable if cable is installed by and belongs to the Company.

i. Mileage is calculated by measuring the distance between the stations that are ringing the same number or the distance from pedestal to second location, whichever is applicable.

ii. If a customer pays for the materials and labor to have cable buried between two buildings on the same premise, OPX mileage is not charged. This is a customer owned OPX, and the maintenance of same is the customer's responsibility.

b. Additional Local Service Charges and Simultaneous Ring Charges. If a customer requests an OPX line and a second cable pair or fiber is needed, then the customer will be billed for an additional local service line at the rates described elsewhere in this tariff. Simultaneous Ring Service may also be required at each additional location.

* Rates shown on this tariff sheet are for informational purposes only and are not subject to the jurisdiction of the Missouri Public Service Commission.

Service Restrictions

NOV 19 1997

(N)

A. Toll Access Restriction

MO. PUBLIC SERVICE COMM

1. Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network. Three options are available to the customer:
 - a. Restriction of 1+ calls only.
 - b. Restriction of 1+ calls and 0+ and 0- (operator handled) calls, except 8XX IN-WATS.
 - c. Restriction of 1+, 0+, 0- and 8XX IN-WATS where facilities allow.
2. Restriction of 0+ and 0- operator handled calls prevents the customer from dialing a long distance telephone number or telephone operator for any purpose including for emergency or telephone assistance purposes. The Company shall not be liable to the customer or any third party for any and all claims, losses or damages caused by the restriction to any toll service.
3. Customers must apply in writing for the establishment of Toll Access Restriction.
4. The appropriate non-recurring charges will apply to establish service.
5. Rates

The rate for this service will be charged on a monthly basis.

PRIVATE LINE CONCURRENCE

Private Line Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Private Line Service as set forth in Mark Twain Rural Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for private line service of Mark Twain Rural Telephone Company. Rates for these services are set out in the following pages of this concurrence. (T)

Private Line Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, in whole or in part, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers. OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI)

1. General

- a. Integrated Services Digital Network (ISDN) – Primary Rate Interface (PRI) is a central office based service arrangement that is an alternative for individual access services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800/888 Services, Wide Area Telecommunications Services, and local business trunks.
- b. ISDN-PRI is provisioned on a 1.544 megabit per second (Mbps) facility and uses the ISDN architecture of 23 “B” channels and one “D” channel to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport. In addition, ISDN-PRI may be provided with fewer “B” channels on an individual case basis (ICB) depending on the special circumstances of the customer.
- c. ISDN-PRI provides the capability to transport customer information in the form of circuit-switched voice or data up to 64 Kbps over any “B” channel.
- d. ISDN-PRI and other local services are offered on an end user basis only. Use of such services for transmitting interexchange traffic that does not either originate and terminate at the customer premises is prohibited.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI)
(Continued)

2. Regulations

- a. ISDN-PRI service is only available from serving central offices equipped with the necessary facilities to provide ISDN-PRI service. Feature availability and service capabilities are dependent on the facilities and the digital technology providing the service.
- b. Customer Provided Equipment (CPE) must be NI-2 compliant (meet the National Standard for PRI). Any CPE that requires custom switch features not supported in the NI-2 specification may be supported as an exception.
- c. This Tariff provides for PRI switching capabilities only and additional services must be subscribed to under separate sections of this Tariff. Each ISDN-PRI facility is provided with one telephone number.
- d. This tariff does not provide for the transmission of packet data on the "B" or "D" channels, but this service can be provided on an individual case basis.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

3. ISDN-PRI Features

The following B-channel features are offered to the customer, at no additional charge.

- a. Call-by-Call Service Selection provides an option to the dedicated channel configuration by allowing channels to be configured to access multiple services on a per call basis. With this feature, separate facilities are not required for individual services, such as DID, DOD, WATS, 800/888 services, and local switched access lines.
- b. Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.
- c. Fractional DS1 ISDN-Originating allows the customer to set up N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.
- d. Fractional DS1 ISDN-Terminating allows the customer to receive N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)
 - I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)
 4. ISDN-PRI Rate Structure
 - a. ISDN-PRI Access
 1. Non-recurring charges for the initial database configuration work and installation of the ISDN-PRI Interface at the Customer Premises apply per each 1.544-Mbps facility provisioned.
 - b. Channel Activations
 1. Channel Activations will be provided at no charge during initial installment of ISDN-PRI access.
 - c. Channel Usage
 1. Voice/Data channel usage rates will apply on a per channel basis.
 - d. Subsequent Activity
 1. Non-recurring charges for database configuration work will apply for all subsequent activity related to changes in channel configuration or ISDN-PRI attributes. The database charges are applied per PRI.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features (Cont'd)

I. Integrated Services Digital Network – Primary Rate Interface (ISDN-PRI) (Cont'd)

5. ISDN-PRI Rates and Charges

	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
a. Channel Activation and Usage, per		
B Channel	\$ 24.50	(l)
D Channel	\$ 29.50	(l)

b. Example 1. Standard ISDN-PRI service

23 B Channels x \$24.50 = \$563.50	(l)
1 D Channel x \$29.50 = <u>\$29.50</u>	(l)
\$593/month	(l)

Example 2. Elementary School ICB ISDN-PRI service.

12 B Channels x \$24.50 = \$294.00	(l)
1 D Channel x \$29.50 = <u>\$29.50</u>	(l)
\$323.50/month	(l)

c. ISDN-PRI also requires one T-1 line and any applicable port charges at the rates and terms described in the National Exchange Carrier Association (NECA) interstate tariff in which the Company concurs.

d. Installation and configuration change charges are applicable as described elsewhere in this tariff and/or the NECA tariff. Current installation and configuration change charges include 10 hours at the current labor rate, 2 trip charges at the current trip charge rate, and 1 service order fee at the current service order rate.

e. Caller ID Number is a feature described elsewhere in this tariff, and an additional Caller ID charge will apply per each trunk.

SS. TOLL CREDIT CARDS

MISSOURI
Public Service Commission

1. At this time, toll credit cards are made available to their customers by many telephone companies. Coordination and standardization are the function of the Bell System. Credit cards issued through this joint effort are recognized by most telephone companies in the United States.
2. Through the use of a credit card, the customer can make toll calls at exchanges of these cooperating companies and have the charges billed to his telephone at the exchange of which he is a customer.
3. Toll credit cards are issued by this company without charge for use as in paragraph SS 2.
4. When requested by a credit card holder, additional cards will be issued having non-existent telephone numbers assigned for billing purposes.

**GENERAL EXCHANGE SERVICES
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE**

JUN 30 1997

A. GENERAL

MO. PUBLIC SERVICE COMMISSION

1. Custom Calling Services and Custom Local Area Signaling Services (CLASS) are optional service arrangements that allow the customer more control over incoming and outgoing calls.
2. Custom Calling Services will be offered to customers in exchange areas of the Company where these services are technically feasible.
3. Custom Local Area Signaling Services (CLASS) are a specialized group of services that allow customers control over incoming and outgoing calls through the use of the Signaling System 7 (SS7) Network and data base entries. Services are offered where technically feasible and may be available on both intraexchange and interexchange basis.
4. Custom Calling Services and Custom Local Area Signaling Services (CLASS) may be divided into two distinct groups of services; those that apply some type treatment or service to calling which may originate from a customers line or those that apply some treatment or service to calls which are terminating to the customers line.
5. CLASS features will only operate as described in these tariffs, on calls originating or terminating within offices appropriately equipped with SS7 Network capabilities, and are dependent on the connection of other Local Exchange Carriers and Interexchange Carriers to an SS7 Network, where technically feasible.
6. The liability of the Telephone Company is as specified in the General Regulations of this Tariff. In addition to the provisions of this Tariff, a calling party customer of the Company releases and holds the company harmless from any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission of a calling number of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
7. Per Line Blocking for the delivery of the calling number is available upon request, at no charge, only to the following entities for lines over which the official business of the agency is conducted, where an executive officer of the agency registers a need for blocking and provides the required certification to the Telephone Company:
 - a. Private, nonprofit, tax exempt, domestic violence intervention agencies.
 - b. Federal, state, and local law enforcement agencies.

GENERAL EXCHANGE SERVICES
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE
JUN 30 1997

C. DESCRIPTION OF SERVICES

(N)
MO. PUBLIC SERVICE COMM

1. Abbreviated Dialing (Speed Calling): Allows a customer to call any one of a group of frequently called numbers simply by dialing a one or two digit code. Two different configurations are available; short lists (8 numbers) and long lists (30 numbers).
2. Anonymous Call Rejection (CLASS): Allows customers with or without Calling Number Delivery and/or Calling Name Delivery to reject calls for which the caller has intentionally blocked calling name/number display information.

If the display information is not available due to network restrictions or any other reason, the receiving customer CPE (if equipped) is presented with a message to indicate the unavailability of the call information.

Rejected calls are sent to a company supplied announcement that informs the calling party why the call is being rejected. Anonymous Call Rejection can be overridden by an operator in case of an emergency.

3. Automatic Call Back (CLASS): A feature when activated by the customer will attempt to redial the last number called from their station regardless of whether the original call was answered, unanswered or busy. The calling and called lines will be monitored by the system and attempt to connect the call for up to 30 minutes. Activation can be canceled at any time.
4. Automatic Line: This feature provides an automatic connection between a calling station that goes off-hook and a preassigned directory number. The originating station is denied the ability to call any directory number other than the preassigned number.

CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE**

JUN 3 0 1997

C. DESCRIPTION OF SERVICES: (Continued)

(N)

MO. PUBLIC SERVICE COMM

- 5. Automatic Recall (CLASS): This feature allows subscribers to have a call returned to the calling party of the last incoming call. This applies whether the incoming call was answered or unanswered. When activated, the customer is allowed to hear the directory number of the last incoming call prior to deciding whether or not to recall that number.

Calls cannot be returned to a number which was delivered with a "private" delivery status, and only one successful call to a number using the Automatic Recall feature will be allowed.

- 6. Call Forward Busy/No Answer: These features provides forwarding capability to incoming calls that encounter a busy or no-answer state. The forward-to directory number is programmed by the customer as well as the number of rings before transfer.
- 7. Call Forward-Fixed: Allows a customer to have all incoming calls to a location automatically forwarded to a predetermined telephone number. This programming is performed by company personnel.
- 8. Call Forward-Remote Access: This feature allows a customer to activate or deactivate the Call Forward option on their telephone from a local or toll remote location by dialing a dedicated directory number, their own seven digit directory number, followed by a Personal Identification Number (PIN) and the activation/deactivation codes.
- 9. Call Forward: This feature directs calls from a local telephone number to another location, with the forwarding station receiving billing for any calls that are forwarded to a toll location. The location to which calls are to be forwarded must be entered by the customer each time this service is activated.

C. DESCRIPTION OF SERVICES: (Continued)

(N)

MO. PUBLIC SERVICE COMM

- 10. Call Transfer: Allows users to transfer a call to another directory number and then drop out of the call, leaving the users connected. Customers must have Three-Way Calling and User Transfer Station Options to use this feature.
- 11. Call Waiting: This feature informs a customer who is on an established call that a third party is trying to call. An incoming call which arrives at a busy line receives audible ringing instead of a busy tone. The called party is alerted by a tone that is only available to the called party.
- 12. Call Waiting-Cancel: This feature allows a customer to prevent, on a per call basis, an incoming call from Call Waiting on their line. Incoming calls to the station receive a busy signal. This feature ensures that Call Waiting indication tones do not interrupt important calls or disrupts data transmissions.
- 13. Calling Name Delivery (CLASS): Calling Name Delivery displays the name associated with an incoming directory number. The name as well as the date and time of the incoming call are displayed after the first ringing cycle.

(N)

C. DESCRIPTION OF SERVICES: (Continued)

MO. PUBLIC SERVICE COMM

- 14. Calling Name Delivery Blocking (CLASS): This feature allows calling customers to keep their name from appearing on a called party's display unit and can be blocked on a per-call basis.
- 15. Calling Number Delivery (CLASS): This feature allows customers to receive the calling number or incoming calls. The number is delivered to the called party's CPE in the interval between the first and second ring and remains for duration of the call.
- 16. Calling Number Delivery Blocking (CLASS): This feature allows the calling party to suppress their directory number so that the called party with Calling Number Delivery does not receive the information. The called party receives a "private" message instead of the calling party's directory number. The customer can set the privacy indicator on a per-call basis.
- 17. Customer-Originated Trace (CLASS): This feature allows customers to initiate a trace on the last incoming call by dialing an activation code. The call is traced automatically, and a printout of the originating directory number and the time the call was made is forwarded to a company location. The results of a successful trace will only be provided to legal authorities with written authorization from the customer. A charge applies when a successful trace is delivered to proper legal authorities.
- 18. Distinctive Ringing/Call Waiting (CLASS): This is an incoming call management feature that allows customers to define a list of calling directory numbers that provide the customer with a distinctive ringing pattern or a distinctive Call Waiting tone. Terminating calls which are not on the list will have standard ringing or tones.
- 19. Malicious Call Hold: This feature enables the called party to hold the connection on any call and can be used to augment the capability provided by the Calling Line Identification feature.
- 20. Restrict Outgoing: This feature allows for the screening of outgoing calls and can allow or deny calls as requested by the customer based on company developed screening tables.

CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE

JUN 3 0 1997

C. DESCRIPTION OF SERVICES: (Continued)

MO. PUBLIC SERVICE COMM

- 21. Selective Call Acceptance (CLASS): Allows customers to define a list of calling directory numbers that will be accepted. Any number not on the list is routed to announcements and rejected. The calling party not on the acceptance list receives an announcement stating that the call is not presently being accepted by the called party.
- 22. Selective Call Forwarding (CLASS): Allows customers to have certain incoming calls forwarded to a designated remote directory number. Calls not on the SCF screen lists are terminated in the standard manner. The number of calls included on a SCF screening list will be limited based on system parameters.
- 23. Selective Call Rejection (CLASS): Allows customers to define a list of calling directory numbers that are routed to recorded announcements and rejected. All other calls are treated normally. Lists will be limited based on system parameters.
- 24. Teen Service: This feature allows two telephone numbers to be assigned to a single-party line. Each telephone number is assigned a unique ringing pattern so the called party can determine the nature of the call. Only one call may be active on the line at a given time.
- 25. Teen Service with Voice Mail: Teen Service enables two telephone numbers-the primary directory number (PDN) and the secondary directory number (SDN) to be assigned to a single l line. Teen Service with Voice Mail forwards the SDN to Voice Mail to allow the SDN to have separate announcements and messages.

GENERAL EXCHANGE SERVICE TARIFFS
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE

C. DESCRIPTION OF SERVICES: (Continued)

26. Single Number Service: This feature allows customers to have a single telephone number that will help them to be reached wherever they are. Customers may configure and manage incoming calls using up to nine different telephone numbers to “find” the customer by ringing at the same time or in any order the customer chooses.
- a. Long distance charges will apply to non-local calls and will be billed by the customer’s presubscribed long distance carrier.
 - b. Customers may activate a notification to the caller (such as “Attempting to locate [name here]. Please stay on the line.”
 - c. Customers may activate an optional notification when answering (such as “I have a call for [name here]. If that person is available, please press ‘1’. Otherwise, please hang up.”
 - d. Customers may customize a schedule of the numbers to be called by day and time.

Single Number Service is available only to customers in the following exchanges: Princeton, Mercer, Lucerne, Powersville, Newtown, Spickard, Brimson, and Jamesport. In addition to the monthly rate for service, a one-time charge of \$15.00 to program the service for a customer and a \$4.00 service order fee apply.

27. Simultaneous Ring Service: This service allows a user to define a group of up to five numbers to ring at the same time. The first alerted number to answer the call is connected to the calling party, and all other alerted numbers are released.
- At least one of the simultaneous ring numbers must be a line served by the Company’s switch. All calls to secondary locations are subject to the services and rates that apply.
- Long distance charges will apply to all non-local calls and will be billed by the customer’s presubscribed long distance carrier.
- In addition to the monthly rate for service, a \$4.00 service order fee will apply.
- If Simultaneous Ring Service is used to OPX two locations, then each secondary location requires an additional local access line provided and charged pursuant to the rates, terms and conditions described elsewhere in this tariff.

(N)

**GENERAL EXCHANGE SERVICE
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE**

C. DESCRIPTION OF SERVICE: (Cont'd)

26. Three-Way Calling: This feature allows a customer to form a three-way conference with two other parties. The customer that initiated the conference controls the conference and must remain on the line for the duration of the call.
27. Touch Tone Service: The provision of DTMF signaling through tone pads on the communication instruments.
28. Warm Line: This is an Automatic Line feature which gives the subscriber 20 seconds after going off-hook to dial a number before it automatically dials a pre-designated number. (T)

D. CONDITIONS

1. Custom Calling and CLASS will be provided in connection with individual line residence and business service. Services may not be compatible with key or PABX system lines or trunks.
2. CLASS Service cannot be provisioned on an originating basis with Company Provided Public Telephone Service, COCOT Service, Toll Terminals, and some PABX Trunks.
3. A Non-Recurring Service Ordering Charge, found in other parts of this tariff, will apply for the implementation of Custom Calling or CLASS services if installed at any time other than the initial installation of a customers access line service with the company, or the installation of additional access line service.

DIGITAL CENTREX SERVICE

SEP 10 1998

(N)

A. GENERAL

MO. PUBLIC SERVICE COMM

1. Digital Centrex Service (CENTREX) is an integrated business network system made up of feature enhanced digital switching software and hardware located in the Telephone Company offices and customer provided equipment located at the customer premises.
2. CENTREX service will be provided to business customers with a minimum of two access lines and may be provided jointly at business and residence locations.
3. CENTREX service will only be available in those exchange areas where Company provided facilities and equipment exist.
4. A standard feature of CENTREX service, Virtual Facilities Group Control, which limits the number of trunks/lines available for outgoing and incoming calling will be provided to determine the number of End User Common Line charges for CENTREX lines as set forth in the NECA Tariff FCC No. 5 and for any other charges assessed on a per line or trunk basis.
5. The minimum lines to be assessed in the Virtual Facilities Control Group will be two (2) per customer group.
6. CENTREX customers will be provided with one directory listing in the alpha section, and one listing in the classified section at no charge. All other additional listings will be at the rates established in other sections of these tariffs.
7. CENTREX lines may be terminated at locations not considered the customers primary business location at the rates established in the RATE section of this tariff following, providing all locations are served by the same Company central office.
8. CENTREX service or lines of a customer which terminate interexchange, where possible, will be provided by agreement on an Individual Case Bases or according to tariffs in effect for the provision of interexchange private line services.
9. CENTREX service is a service provided to individual business and residence customers of the Company and is not for resale or shared use.

**GENERAL EXCHANGE SERVICE TARIFFS
DIGITAL CENTREX SERVICE**

CENTREX SERVICE (Continued)

B. CONDITIONS

1. The minimum charge for CENTREX SERVICE is one month.
2. Customer premises equipment will be provided by the customer and must be compatible with the services and equipment provided by the Company.
3. All applicable features as described in following parts of this tariff are available to each CENTREX line of each customer group.
4. Intraexchange and interexchange calling services available to other classes of service within the exchange of the CENTREX customer such as: Extended Area Service, access to 911, access to operator, and Direct Distance Dialing, are available to CENTREX lines unless denied or restricted by the customer.
5. If CENTREX lines or services are ordered in conjunction with PABX or Key System Trunks the appropriate rates for PABX or Key System Trunks as found in other parts of these tariffs will apply as well as the rates for CENTREX lines.
6. All applicable Rules, Regulations, Rates and Charges found in other parts of the Tariffs of the Company are applicable to CENTREX Service.
7. Touch tone line charges as described in other parts of the Company's tariff are required on each CENTREX access line to which a 2500 and/or analog type communications device is attached.
8. CENTREX service is not available in exchanges served by fiber. (N)

C. DESCRIPTION OF FEATURES AND SERVICES

1. Standard Features
 - a. Automatic Identification of Outward Dialing (AIOD): Records each outgoing, billable call against the CENTREX line originating the call.
 - b. Automatic Line: This feature provides an automatic connection between a calling station that goes off-hook and a preassigned directory number.
 - c. Call Forward: This feature allows a customer to have incoming calls to a station location automatically forwarded to a predetermined telephone number under any of the following three circumstances:
 1. All Calls: Allows all incoming calls to be automatically forwarded to another preselected line.
 2. Busy: This is a station option that automatically transfers incoming calls directed to a busy subscriber to an alternate subscriber within the same customer group.

C. DESCRIPTION OF FEATURES AND SERVICES (Continued)

MO. PUBLIC SERVICE COMM

1. Standard Features (Continued)

c. Call Forward (Continued)

3. No Answer: This feature is a station option that allows a terminating call to an idle subscriber to be transferred automatically to another line within the group after a predetermined number of ringing cycles.

4. Remote Access: This feature allows the activation/deactivation of call forward all calls from a location other than the subscribers base telephone.

d. Call Hold: Allows a subscriber to place a call on hold for any length of time, providing neither party goes on hook.

e. Call Park: This feature allows a subscriber to park a call against their directory number so that the call may be retrieved from any other location within the customer group, and allows the subscriber who parked the call to continue to originate and terminate other calls.

f. Call Pick-up: Allows subscribers to answer incoming calls to another station by dialing a feature activation code.

g. Call Pick-up Groups: Allows the formation of specific call pick-up groups within customer groups.

h. Call Transfer: This feature allows users to transfer a call to another directory number then drop out of the call, leaving the users connected.

i. Call Waiting/Cancel Call Waiting: This feature provides an audible call waiting tone when an incoming call arrives at a busy station. Cancel Call Waiting allows the customer with the Call Waiting feature to have the call waiting tone discontinued on preselected calls by activation of a designated code.

j. Class of Service Restrictions: This feature allows a customer the capability to control calls which may originate or terminate to any line within the customer group and may include any of the following options:

- 1. Deny Originating
- 2. Deny Terminating
- 3. Local Only
- 4. Unrestricted Service

k. Consultation Hold: This feature permits a subscriber, while on an active call, to retrieve a waiting call or to perform a Three-way conference/Call transfer by activation of a hook switch flash. The original call is in a temporary hold state.

l. Direct Inward Dialing: Permits calls from the exchange network to be terminated to a subscribers station directly within a customer group without attendant intervention.

m. Direct Out Dialing: Permits a subscriber to access the exchange network and to have the subscribers directory number identified as the originating party by the Telephone Company recording equipment.

C. DESCRIPTION OF FEATURES AND SERVICES (Continued)

1. Standard Features (Continued)

- n. Directory Number Hunt: This feature allows incoming calls directed to a particular directory number to "hunt" to another customer selected number in a sequence when the called number is busy.
- o. Distinctive Ringing: Allows the customer to have different distinctive ringing patterns for calls which originate within the customer group, or from the exchange network.
- p. Distinctive Call Waiting Tone: This feature is a call management feature which allows the subscribers to define a list of calling directory numbers that have a special incoming Call-Waiting tone when they arrive at a busy station location.
- q. Intercom Groups: This option allows a customer to call other lines within a customer group by using an abbreviated dialing pattern rather than the seven digit directory number.
- r. Manual Line: This feature provides an automatic connection between a calling station that goes off-hook and a predetermined number designated by the customer.
- s. Speed Calling: Allows users to place calls to frequently dialed numbers by using an abbreviated code rather than dialing the complete number. Abbreviated dialing lists may be assigned as follows:
 - 1. Group Speed Call: The Group Lists consist of a maximum of 30 stored numbers which may be assigned for use by several members within a customer location.
 - 2. Individual Short List: A short list consists of a maximum of eight numbers assigned and programmed by an individual for their personal use.
 - 3. Individual Long List: A long list consists of a maximum of thirty stored numbers assigned, programmed and used by an individual for their personal use, and cannot be shared by a group.
- t. Station to Station Calling: This feature permits stations within a customer group to complete calls to other members within the customers group by dialing less than the seven digit directory number assigned to a station.
- u. Three-way Conference with Transfer: This feature allows a subscriber on an established call, either within the system, or outside the system, to transfer the call to another party or to form a three-way conference.
- v. Virtual Facilities Group Control: This feature allows a customer to ~~input the number~~ of simultaneous incoming or outgoing trunks, therefore, establishing non-physical trunk groups for the customers control and network management.

GENERAL EXCHANGE SERVICE TARIFFS
FOREIGN EXCHANGE SERVICE

A. General

MISSOURI

1. Foreign exchange service is exchange service furnished to a customer from a central office of an exchange other than the one that normally serves the area in which the customer is located. (N)
2. For the purpose of this tariff, the term, "Foreign Exchange", shall mean the exchange from which the foreign exchange service dial tone is furnished. The term, "Normal Exchange", shall mean the exchange normally serving the area in which the customer's premise is located.
3. Foreign exchange service does not come within the Telephone Company's general undertaking, nor does the Telephone Company obligate itself to furnish such service generally; but will do so where facilities of such a character are available as will permit satisfactory telephone transmission, and where the service is warranted by the circumstances involved.
4. Foreign exchange service will be furnished to exchanges within the same LATA as the normal exchange. (N)
5. Foreign exchange service may be provided only in connection with private branch exchange trunk lines, and individual line business or residence service. The service will be furnished only at one location or premises for each channel or circuit. (C) (M)
6. Where the normal exchange is operated by this Telephone Company, foreign exchange service is furnished only on the condition that the applicant is a customer to individual line business or residence service, or private branch exchange service, in the normal exchange, and at the same location where such service is proposed to be installed. Under this condition, when a foreign exchange service customer discontinues normal exchange service customer discontinues normal (N)

exchange service, the normal exchange shall immediately notify such foreign exchange customer and foreign exchange business office, that the foreign exchange service will be discontinued ten (10) days thereafter.

- 7. Where the foreign exchange is operated by another telephone company, foreign exchange service will be provided only when satisfactory arrangements can be negotiated with such company to furnish a portion of the necessary facilities.
- 8. Foreign exchange service will be furnished at the rates outlined hereafter, provided the necessary facilities and equipment are available. Where the facilities and/or equipment are not available, and extraordinary facility costs, equipment costs, special operating expenses, and/or other special considerations are incurred in making such service available, the customer may be required to pay an additional charge to cover all or a portion of such unusual expenses, or be required to contract for service beyond the initial period, or both.
- 9. No off premise extensions will be furnished in connection with foreign exchange service.
- 10. The use of the service is limited to the customer and his employees for business purposes, and in the case of residence service, to the members of his immediate household. Foreign exchange service calls will be further limited to calls within the local calling area (including any EAS locations) of the foreign exchange. If any customer to this service is found to be transferring or transmitting messages for parties other than authorized above, in the normal exchange area, and/or making toll calls through the foreign exchange, such customer and foreign exchange business office shall be notified that the practice must be discontinued or the foreign exchange service will be terminated ten (10) days after the date of such notice.

B. Rates

- 1. Rates for foreign exchange service will include rates for local service at the foreign exchange and rates for private line service from the foreign exchange to the customer location in the normal exchange. (N)
- 2. The charge for local service at the foreign exchange is the established monthly service rate, and non-recurring service connection charge of the foreign exchange for the grade of service (individual line business or residence, or PBX and PABX trunks) with which the foreign exchange service is to be associated. (T)
(D)
- 3. The charges for private line service from the foreign exchange to the customer location in the normal exchange will be as follows: (N)
 - a. For private line facilities provided by this Telephone Company, the rates outlined in this Telephone Company's concurrence in the Oregon Farmers Mutual Telephone Company private line tariff will apply.
 - b. Where all or a portion of the private line facilities are furnished by another telephone company, charges for those facilities shall apply as specified in the regulations of such participating company. (N)
- 5. Where the normal and foreign exchanges have contiguous Exchange Area Boundaries, a foreign exchange service facility arrangement may be provided by a routing method other than using standard interexchange channel facilities. In all such special routing cases, however, the rates specified above will apply as if the standard interexchange channel facilities were used. (N)
