MO. PUBLIC SERVICE COMM

- f. The Company is not liable for any defacement of, or damage to, the premises of a subscriber resulting from the furnishing of services or the attachment of instruments, apparatus, and associated wiring furnished by the Company on such subscriber's premises or by the installation or removal thereof, when such defacement or damage is not the result of the Company's negligence. No agents or employees of other participating carriers shall be deemed to be agents or employees of the Company without written authorization.

The subscriber shall secure all licenses, permits, rights-of-way, and other arrangements necessary for such interconnection.

The subscriber shall ensure that the equipment and/or system is properly interfaced with the Company's facilities or services, that the signals emitted into the Company's network are of the proper mode, bandwidth, power, and signal level for the intended use of the subscriber and in compliance with the criteria set forth in this tariff, and that the signals do not damage equipment, injure personnel, or degrade service to End Users. If the Federal Communications Commission or some other appropriate certifying body certifies terminal equipment as being technically acceptable for direct electrical connection with interstate and/or intrastate communications service, the Company will permit such equipment to be connected with its channels without the use of protective interface devices.

5. USE OF SERVICE

MO. PUBLIC SERVICE COMM

- a. Services provided under this tariff may be used only by the subscriber in furnishing authorized communications services offered to End Users. Service furnished by the Company may be used for one or more of the following:
- i. for the transmission of communications by the subscriber.
 - ii. for the transmission of communications to or from an End User, as defined herein.
 - iii. for the transmission of communications to or from an End User of another common carrier, in which the common carrier has subscribed to the Company's communications services.
- b. Service furnished by the Company may be arranged for use of End Users. Payment for the Company's service in such instances is the ultimate responsibility of the End User, depending on the billing method requested. Payment arrangements are mutually agreed upon by the Company and the End User prior to the completion of a telephone call. Calls are initially routed to a Company operator or equipment which identifies the Company. The End User then selects a billing method in accordance with his or her preference. Either a "live" Company operator obtains the appropriate billing information or the End User enters the billing information directly. The call will then be completed.
- c. Service furnished by the Company shall not be used for any unlawful purpose.

6. PAYMENT ARRANGEMENTS

- a. The End User is responsible for payment of all charges for services furnished by the Company except for Bulk Transmission services as described in Section D of this tariff.

5. RATE MILEAGE DETERMINATION

MO. PUBLIC SERVICE COMM

For the purpose of determining airline mileage, vertical and horizontal grid-lines have been established across the United States and Canada. The spacing between adjacent vertical grid-lines and between horizontal grid-lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each local exchange company primary serving office or serving office from its latitude and longitude location by use of appropriate map-projection equations. A pair of V&H coordinates locates a primary serving office or serving office for determining airline mileage, at a particular intersection of an established vertical grid-line with an established horizontal grid-line. The distance between any two primary serving offices or serving offices is the airline mileage computed as explained below.

To determine the rate distance between any two primary serving offices or serving offices proceed as follows:

- a. Obtain the "V" and "H" coordinates for each local exchange company primary serving office or serving office.
- b. Obtain the differences between the "V" coordinates of the two primary serving offices or serving offices. Obtain the difference between the "H" coordinates.

NOTE: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

5. RATE MILEAGE DETERMINATION (Continued)

MO. PUBLIC SERVICE COMM

- c. Square each difference obtained in 2., preceding.
- d. Add the squares of the "V" difference and the "H" difference obtained in 3. above.
- e. Divide the sum of the squares obtained in 4. above by 10.
- f. Obtain the square root of the result obtained in 5. above. This is the interexchange rate distance in miles. (Fractional miles are rounded to the next higher mile).

Example:

The rate mileage distance between Independence, Missouri and St. Louis, Missouri.

Formula:
$$\sqrt{\frac{(7020-6807)^2 + (4175-3482)^2}{10}}$$

Distance = 230 miles.
