TARIFF FORMAT SHEET

- A. Page Numbering - Page numbers appear in the upper-right corner of the sheet. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added, the page appears as a decimal. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Sheet 14 cancels the third revised Sheet 14. Because of deferrals, notice periods, etc., the most current page number on file with the Commission is not always the Tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

- 2.8 Disputed Charges

- 2.8.1 A customer shall advise Company if any part of a charge is in dispute by written notice, in person or by telephone call directed to Company during regular business hours. A dispute must be registered with Company prior to the delinquent date of a charge to avoid discontinuance of service. When a customer advises Company that all or part of a charge is in dispute, Company shall record the date, time and place the inquiry is made, investigate the matter promptly and thoroughly and attempt to resolve the dispute in a manner satisfactory to both parties.

- 2.8.4 Failure of the customer to pay to the Company the amount not in dispute within four (4) working days from the date the dispute is registered or by the delinquent date of the disputed bill whichever is later, shall constitute a waiver of the customer's right to continuance of service and the Company may then proceed to discontinue service as provided in this tariff.
- 2.8.5 If the dispute is ultimately resolved in favor of the customer in whole or in part, the Company must promptly repay any excess moneys paid by the customer. SEP 25 2000

4.1 Description of Service**MISSOURI**
Public Service Commission

The Company's Local Exchange Service enables Customer to:

- Place or receive calls to any calling Station in the local calling area, as defined herein;
- Access basic 911 Emergency Service if available in Customer's area;
- Where available, place or receive calls to toll free 8XX telephone numbers.

The Company's service can not be used to originate calls to other telephone companies' caller-paid information services (e.g., 900, 976).

4.1.1 Basic Local Service

Basic Local Service is a service which is available for access by subscribers on a full time basis. Basic Local Service provides Customer with a single, voice-grade communications channel and access to unlimited local calls, "911" and/or "E 911" calls, if available in the Customer's area, and toll free (e.g. "800" or "888") calls.

Basic Local Service does not include any long distance service or other toll services. The following types of calls and services will be blocked by the Company through the ILEC's switch: interLATA, intraLATA, interstate, and international (e.g. "1+" or "0+"); collect calls; operator-assisted calls; third number billed calls; or any service that may be billed to Customer's telephone number (e.g. "900" and "976" calls).

4.1.2 Service Area

Where facilities are available, the Company's service area incorporates the geographic regions and exchanges currently served Southwestern Bell Telephone Company.

4.1.3 Local Calling Area

Local calling areas will be identical to the local calling areas of the incumbent local exchange carriers from which the Company purchases services, as those local calls areas are defined in the tariffs of the incumbent local exchange carrier that have been filed with the Commission.

4.1.4 Optional FeaturesMISSOURI
Public Service Commission4.1.4.A Call Waiting

Allows Customer to be notified of an incoming call while having a conversation with another party.

4.1.4.B Call Forwarding

Allows calls to automatically ring to another phone number selected or determined by the Customer.

4.1.4.C. Three-Way Calling

Allows the Customer to add a third party to a conversation.

4.1.4.D Caller ID Name and Number

This feature enables the customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a customer's line, the CPN of incoming calls is displayed on the called CPE during the first long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, only to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to the Company: a) private, nonprofit, tax exempt, domestic violence intervention agencies and b) federal, state, and local law enforcement agencies. The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

A customer may prevent delivery of their calling name and/or number to the called party by dialing an access code immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

4.1.4.E Caller ID (Cont'd)

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator handled calls.

4.1.4.F Call Trace

Allows Customers receiving annoying or anonymous calls to request (i) a telephone number change, which will be provided at no charge by the Company, or (ii) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the customer to dial a code (*57) to automatically request the following information be recorded: the originating telephone number; the date and time of the call; the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will activate a Voice Response Script which will assist the Customer in establishing an open file (in exchanges where SWBT service is being resold). Should the Customer decide to prosecute the call originating party, the Customer should contact Company to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's telephone line or customer may need to contact local law enforcement personnel to provide assistance.

4.1.4.G Call Return

Enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call. (N)

4.1.4.F Unlisted Number

A non-published listing is not listed in either the alphabetical section of the Company's directory or directory assistance records and will not be furnished upon request of the calling party. However, when a call is placed from a telephone number associated with a non-published listing, the number and/or name may be disclosed if the called party has the necessary equipment for receiving and/or disclosing incoming telephone numbers and/or names. TELECOMMUNICATIONS SERVICES

SEP 25 2000

CALL TRACE**MISSOURI
Public Service Commission**

Allows Customers receiving annoying or anonymous calls to request (i) a telephone number change, which will be provided at no charge by the Company, or (ii) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the customer to dial a code (*57) to automatically request the following information be recorded: the originating telephone number; the date and time of the call; the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will activate a Voice Response Script which will assist the Customer in establishing an open file (in exchanges where SWBT service is being resold). Should the Customer decide to prosecute the call originating party, the Customer should contact Company for further instructions. Activation of Call Trace never authorizes Company to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's telephone line or customer may need to contact local law enforcement personnel to provide assistance.
