TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the third revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their Tariff approval process, the most current sheet number on file with the Commission is not always the Tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

- D. Check Sheets - When a Tariff filing is made with the Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the sheets contained in the Tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

2.7 RESPONSIBILITY OF CARRIER

2.7.1 Calculation of Credit Allowance

- A. No credit shall be allowed for an interruption of less than two hours.
- B. Customer shall be credited for an interruption of two hours or more for as long as the interruption continues.

2.7 RESPONSIBILITY OF CARRIER (continued)

2.7.3 Disconnection of Service by Carrier (continued)

- E. In the event of fraudulent use of Carrier's network, Carrier will discontinue service and/or seek legal recourse to recover all costs involved in enforcement of this provision.

2.7.4 Fractional Charges

Charges for a fractional part of a month are calculated by counting the number of days remaining in the billing period after service is furnished. Divide that number of days by 30 days (billing period). The result is then multiplied by the applicable monthly service charge to arrive at the appropriate fractional monthly service charge.

2.8 RESTORATION OF SERVICE

The use and restoration of service in emergencies shall be in accordance with the priority system specified in Part 64, Subpart D of the Rules and Regulations of the Federal Communications Commission.

2.9 TAXES

Customer will be billed and is responsible for payment of applicable local, state, and federal taxes assessed in conjunction with service used.

2.10 TIMING OF CALLS

2.10.1 When Billing Charges Begin and Terminate for Phone Calls

Customer's long distance usage charge is based on the actual usage of Carrier's network. Usage begins when the called party picks up the receiver (i.e., when two-way communication, often referred to as "conversation time," is possible). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. A call is terminated when the calling or called party hangs up.

2.10.2 Billing Increments

Unless otherwise specified in this Tariff, the minimum call duration for billing purposes is six seconds for a connected call. Calls beyond six seconds are billed in six second increments. Billing will be rounded to the nearest penny for each call.
